LAPORAN DEWAN KOMISARIS

BOARD OF COMMISSIONERS REPORT

Rudy Hamdani

Presiden Komisaris (Independen)

President Commissioner (Independent)

Assalamu'alaikum Warahmatullahi Wabarakatuh

PEMEGANG SAHAM DAN PEMANGKU KEPENTINGAN YANG KAMI HORMATI, Dear Shareholders and Stakeholders,

Pertama-tama, perkenankanlah saya atas nama Dewan Komisaris memanjatkan puji dan syukur kehadiran Allah Subhanahu wa Ta'ala, yang telah melimpahkan rahmat dan karunia-Nya, sehingga Bank Aladin Syariah dapat melalui tahun 2022 dengan capaian kinerja yang cukup baik. Hal tersebut seiring dengan peran Dewan Komisaris dalam melakukan pengawasan dan pemberian nasihat kepada Direksi, yang senantiasa dilaksanakan dengan itikad baik, bertanggung jawab, dan penuh kehati-hatian, demi kepentingan Bank, sebagaimana arahan Pemegang Saham.

Selanjutnya, izinkan saya mewakili Dewan Komisaris, menyampaikan laporan pengawasan di sepanjang 2022, sebagai bentuk pertanggungjawaban kami kepada para Pemegang Saham dan seluruh Pemangku Kepentingan lainnya. Secara umum, laporan Dewan Komisaris ini diantaranya mencakup penilaian kami atas kinerja Direksi mengenai pengelolaan Bank di tahun 2022, pandangan kami atas prospek usaha Bank yang disusun oleh Direksi, dan tanggapan kami atas penerapan prinsip-prinsip *Good Corporate Governance* (GCG) di lingkup Bank Aladin Syariah.

PANDANGAN ATAS PERKEMBANGAN BANK DALAM INDUSTRI PERBANKAN SYARIAH DI TAHUN 2022

Tahun 2022, merupakan periode yang cukup menantang, di tengah isu resesi yang ditandai dengan lonjakan inflasi di berbagai ekonomi besar dunia yang salah satu pemicunya adalah ketegangan geopolitik akibat konflik Rusia dan Ukraina. Dewan Komisaris menyadari bahwa kondisi tersebut secara tidak langsung akan berdampak terhadap kinerja Bank Aladin Syariah. Di satu sisi, untuk mengendalikan laju inflasi di Amerika Serikat (AS), The Fed sudah melakukan tujuh kali kenaikan suku bunga, sampai dengan bulan Desember 2022, total kenaikan tercatat mencapai 425 *basis poin* (year-to-date/ytd). Sementara, Lembaga Dana Moneter Internasional (*International Monetary Fund/IMF*) dalam laporan *World Economic Outlook* yang dirilis pada Januari 2023, memprediksi pertumbuhan ekonomi global di tahun 2022, berada pada kisaran 3,4% atau turun signifikan dari pertumbuhan ekonomi global tahun 2021 yang tercatat sebesar 6,0%. Hal ini seiring dengan belum meredanya konflik antara Rusia dan Ukraina.

Perkembangan situasi ekonomi global berdampak pada kebijakan yang diambil oleh regulator di dalam negeri. Untuk mempertahankan nilai tukar rupiah dan stabilitas ekonomi di Indonesia, Bank Indonesia (BI) menaikkan suku bunga acuan *BI 7-Day Reverse Repo* seiring dengan dinaikkannya *Fed rate*. Sementara itu, di tengah prospek ekonomi global yang kurang

First of all, allow me on behalf of Board of Commissioners to offer praise and gratitude to the presence of Allah Subhanahu wa Ta'ala, who has bestowed His grace and gifts, so that Bank Aladin Syariah can go through 2022 with fairly good performance achievements. This is in line with the role of Board of Commissioners in supervising and providing advice to Board of Directors, which is always carried out in good faith, responsibly and prudently, for the benefit of Bank, as directed by the Shareholders.

Furthermore, allow me to represent Board of Commissioners, submit a monitoring report throughout 2022, as a form of our responsibility to Shareholders and all other Stakeholders. In general, Board of Commissioners' report includes our assessment of Board of Directors' performance regarding the management of Bank in 2022, our views on Bank's business prospects as prepared by Board of Directors, and our response to the implementation of the principles of *Good Corporate Governance* (GCG) within Bank Aladin Syariah.

VIEWS ON BANK DEVELOPMENT IN THE SHARIA BANKING INDUSTRY IN 2022

2022 was a quite challenging period, in the midst of the issue of recession marked by a surge in inflation in various major world economies, one of the triggers of which is geopolitical tensions due to the conflict between Russia and Ukraine. Board of Commissioners realizes that these conditions indirectly affected the performance of Bank Aladin Syariah. On the one hand, to control the inflation rate in the United States (US), the Fed has raised interest rates seven times, as of December 2022, the total increase was recorded at 425 basis points (year-to-date/ytd). Meanwhile, the International Monetary Fund (IMF) in the World Economic Outlook report released in January 2023, predicts global economic growth in 2022 will be in the range of 3.4% or a significant decrease from the recorded global economic growth in 2021 by 6.0%. This is in line with the unsubsidized conflict between Russia and Ukraine.

Developments in the global economic situation have had an impact on the policies taken by domestic regulators. To maintain the rupiah exchange rate and economic stability in Indonesia, Bank Indonesia (BI) raised the BI 7-Day Reverse Repo reference rate in line with the increase in the Fed rate. Meanwhile, amidst the unfavorable global economic prospects in 2022, the Indonesian economy will

baik di tahun 2022, perekonomian Indonesia masih meneruskan pemulihan di berbagai sektor, termasuk sektor perbankan. Berdasarkan data yang dirilis Badan Pusat Statistik (BPS), ekonomi Indonesia tumbuh menguat sebesar 5,31% (*year-on-year/yoy*) di tahun 2022, lebih tinggi dibanding capaian tahun 2021 yang mengalami pertumbuhan sebesar 3,69% (*yoy*). Perekonomian Indonesia tahun 2022 yang dihitung berdasarkan Produk Domestik Bruto (PDB) atas dasar harga berlaku mencapai Rp19.588,4 triliun dan PDB per kapita mencapai Rp71,0 juta atau USD4.783,9.

Seiring dengan pertumbuhan ekonomi nasional, kinerja industri perbankan selama 2022 terjaga baik dan tumbuh positif serta mampu menahan tekanan perekonomian global. Berdasarkan data OJK pada November 2022, tercatat kredit perbankan tumbuh 11,16% (*yoy*) sedangkan penghimpunan Dana Pihak Ketiga (DPK) tumbuh sebesar 8,78% (*yoy*). Tingkat pertumbuhan kredit dan DPK tersebut telah mencatatkan tingkat pertumbuhan yang melebihi *level* pra-pandemi COVID-19 dengan indikator risiko perbankan yang terjaga. Tren yang sama terlihat pada sektor perbankan Syariah di mana pertumbuhan penyaluran pembiayaan mencapai 19,00% (*yoy*). Per Juli 2022, dana pihak ketiga yang dihimpun naik 12,12% dengan tingkat CAR dan NPF net terjaga di level 23,25% dan 1,07%.

Perkembangan ekonomi nasional dan global, perubahan kebijakan oleh regulator, serta semakin tingginya persaingan di industri perbankan merupakan faktor eksternal penting dalam penyusunan Rencana Bisnis Bank (RBB), yang juga dengan mempertimbangkan peluang dan tantangan atas adaptasi masyarakat ke teknologi dan *digital*, serta perkembangan literasi keuangan di Indonesia.

Di tahun 2022, Bank Aladin Syariah memasuki tahapan pertumbuhan yang dimulai dengan diluncurkannya aplikasi digital Bank di awal tahun. Melalui aplikasi tersebut, Bank telah berhasil mengakuisisi lebih dari satu juta Nasabah sampai dengan akhir tahun 2022. Selain itu, Bank juga meluncurkan produk baru seperti tabungan transaksional "Ala Dompot", tabungan rencana "Ala Impian", serta fitur-fitur baru seperti *bill payment*, Ala Berbagi, dan tarik setor tunai melalui gerai Alfamart. Dari sisi pembiayaan, Bank memulai penyaluran dana melalui produk *invoice financing*, pembiayaan modal kerja dan pembiayaan ritel konsumtif. Guna mendukung pengembangan bisnis Bank, Bank juga memperluas kolaborasi dengan mitra-mitra strategis.

Berdasarkan perkembangan tersebut, Dewan Komisaris melihat bahwa kebijakan strategis Bank di tahun 2022 dengan memperkuat fokus sebagai entitas *digital banking* pada segmen ritel sudah sangat tepat, Dewan Komisaris juga mengapresiasi langkah Bank dalam upaya menjangkau masyarakat *unbanked* dan *underbanked* di Indonesia dengan pendekatan sederhana yang akrab dengan keseharian nasabah.

continue to recover in various sectors, including Banking sector. Based on data released by the Central Statistics Agency (BPS), Indonesia's economy grew stronger by 5.31% (*year-on-year/yoy*) in 2022, higher than the achievements in 2021 which experienced growth of 3.69% (*yoy*). WBS memungkinkan mekanisme pelaporan yang menjamin kerahasiaan pelapor. Penerapan WBS bertujuan untuk mendeteksi dini dan mencegah terhadap terjadinya penyimpangan ataupun pelanggaran dalam setiap aspek kegiatan bisnis Bank. Dalam pandangan Dewan Komisaris, WBS dapat menciptakan iklim kerja yang terbuka, tulus, jujur dan bertanggung jawab di lingkungan Bank. Dewan Komisaris memandang bahwa Bank Aladin Syariah senantiasa mendorong partisipasi aktif seluruh Insan Bank untuk melaporkan setiap pelanggaran atau indikasi *fraud* di lingkungan Bank Aladin Syariah. Dengan demikian, tujuan WBS untuk mewujudkan lingkungan kerja yang bersih dan berintegritas menjadi lebih efektif dan independen.

Peran Dewan Komisaris dalam pengelolaan WBS Bank Aladin Syariah antara lain untuk melakukan pengawasan guna memastikan terselenggaranya WBS dengan dibantu oleh Komite Audit. Dewan Komisaris bersama dengan Komite Audit dan unit-unit lainnya senantiasa melakukan evaluasi dan melakukan tindak lanjut atas laporan yang diterima.

Berdasarkan laporan yang diterima Dewan Komisaris, di sepanjang tahun 2022, tidak terdapat karyawan atau Manajemen Bank yang dilaporkan melalui *Whistleblowing System*. Dewan Komisaris berpendapat bahwa penerapan WBS di lingkup Bank Aladin Syariah telah berjalan dengan baik. Dewan Komisaris memberikan arahan kepada Direksi agar sosialisasi penerapan WBS terus menerus dilakukan secara berkesinambungan untuk meningkatkan pemahaman dan kepedulian segenap Insan Bank dalam melaporkan tindak pelanggaran, sehingga dapat mewujudkan lingkungan kerja yang bersih dan berintegritas.

CAPAIAN KINERJA DEWAN KOMISARIS DALAM FUNGSI PENGAWASAN PADA PENERAPAN GCG DI LINGKUP BANK

Bank Indonesia (BI), Otoritas Jasa Keuangan (OJK), Bursa Efek Indonesia (BEI), dan regulator yang berkepentingan pada bidang perbankan, pasar modal serta perkembangan dunia usaha Indonesia, telah berkomitmen untuk mendorong penerapan prinsip dan praktik GCG sebagai sebuah nilai yang wajib diemban oleh setiap entitas usaha yang berusaha di Indonesia. Bank Aladin Syariah menyambut dengan baik hal tersebut, terutama karena penerapan GCG melalui 5 (lima) prinsip dasar, yaitu transparansi,

VIEWS AND ROLE OF BOARD OF COMMISSIONERS ON THE IMPLEMENTATION OF WBS AND THE ROLE OF BOARD OF COMMISSIONERS IN THE WBS

The existence of *Whistleblowing System* (WBS) is part of Bank Aladin Syariah's commitment to make GCG principles the foundation of every aspect of Bank's daily operations and business. Board of Commissioners views that Bank Aladin Syariah always encourages the active participation of all Bank personnel to report any violations or indications of fraud within Bank Aladin Syariah. Thus, the WBS goal is to create a work environment that is clean and with integrity to be more effective and independent.

Board of Commissioners believes that the implementation of the WBS within Bank Aladin Syariah has been going well. Board of Commissioners provides direction to Board of Directors so that socialization of WBS implementation is carried out continuously to increase the understanding and concern of all Bank personnel in reporting violations, so as to create a work environment that is clean and with integrity.

PERFORMANCE ACHIEVEMENTS OF BOARD OF COMMISSIONERS IN THE SUPERVISORY FUNCTION OF GCG IMPLEMENTATION WITHIN BANK

Bank Indonesia (BI), the Financial Services Authority (OJK), the Indonesia Stock Exchange (IDX), and regulators with an interest in banking, capital markets and the development of the Indonesian business world, have committed to encourage the application of GCG principles and practices as a mandatory value. carried out by every business entity doing business in Indonesia. Bank Aladin Syariah welcomes this, especially because the implementation of GCG through 5 (five) basic principles, namely transparency,

akuntabilitas, responsibilitas, independensi, dan kewajaran, terbukti memberikan hasil positif bagi keberlanjutan dunia usaha dan iklim investasi.

Sebagai organ yang bertugas melakukan pengawasan terhadap pelaksanaan penerapan GCG oleh Direksi, Dewan Komisaris memandang implementasi GCG di lingkup Bank terus mengalami peningkatan dari waktu ke waktu. Hal ini juga seiring dengan transformasi bisnis yang dilakukan Bank di tahun 2022. Pengembangan perangkat kebijakan yang terus diperbaharui, hingga evaluasi dan pemantauan GCG, menjadi cerminan komitmen Direksi untuk dapat menerapkan prinsip dan praktik GCG di seluruh elemen operasi dan bisnis Bank.

Salah satu aspek penting dalam keberhasilan penerapan prinsip GCG adalah sinergi dan kolaborasi yang baik antara organ pendukung Dewan Komisaris dan organ pendukung Direksi. Melalui keberadaan organ-organ pendukung tersebut, setiap aspek dalam penerapan prinsip GCG dapat terlaksana dan terpantau, baik itu kepatuhan, manajemen risiko, audit, hingga perkembangan SDM dan Teknologi Informasi sebagai salah satu fondasi mewujudkan akuntabilitas Bank.

Selain itu, Dewan Komisaris berpendapat bahwa penerapan GCG di lingkup Bank telah berjalan dengan baik. Untuk melakukan evaluasi atas efektivitas penerapan GCG, Bank Aladin Syariah secara berkala melaksanakan *self assessment* atas praktik GCG, yang mengacu pada Peraturan Bank Indonesia No. 11/33/PBI/2009 tanggal 7 Desember 2009 tentang Pelaksanaan *Good Corporate Governance* bagi Bank Umum Syariah dan Unit Usaha Syariah dan Surat Edaran Otoritas Jasa Keuangan No. 10/ SEOJK.03/2014 tentang Penilaian Tingkat Kesehatan Bank Umum Syariah dan Unit Usaha Syariah. Berdasarkan hasil *self assessment* GCG Bank yang dilaksanakan pada tahun 2022 secara semesteran, *self assessment* implementasi GCG Bank semester I dan semester II di tahun 2021 telah dijalankan secara komprehensif dengan hasil peringkat secara Individual adalah 2 (dua) dengan definisi peringkat yang mencerminkan Manajemen Bank telah melakukan penerapan *Good Corporate Governance* yang secara umum baik. Hal ini tercermin dari penerapan atas prinsip-prinsip *Good Corporate Governance*.

Dewan Komisaris memberikan apresiasi yang tinggi kepada Direksi dan seluruh jajarannya yang telah bekerja secara optimal dalam menerapkan GCG dalam melakukan pengelolaan Bank selama tahun 2022. Dewan Komisaris menilai, perangkat GCG yang dimiliki Bank Aladin Syariah saat ini telah sesuai dengan proses bisnis Bank. Dewan Komisaris juga senantiasa terlibat dalam berbagai implementasi GCG, dengan melakukan pengawasan baik secara langsung maupun melalui pengawasan yang dilakukan oleh organ Komite Dewan Komisaris. Berdasarkan pengawasan yang

accountability, responsibility, independence and fairness, has proven to provide positive results for the sustainability of the business world and investment climate.

As the organ tasked with supervising the implementation of GCG by Board of Directors, Board of Commissioners views that GCG implementation within Bank continues to experience improvement from time to time. This is also in line with Bank's business transformation in 2022. Development of policy tools that are continuously updated, up to GCG evaluation and monitoring, is a reflection of Board of Directors' commitment to be able to implement GCG principles and practices in all elements of Bank's operations and business.

One important aspect in the successful implementation of GCG principles is good synergy and collaboration between the supporting organs of Board of Commissioners and the supporting organs of Board of Directors. Through the existence of these supporting organs, every aspect of the implementation of GCG principles can be implemented and monitored, whether compliance, risk management, audits, to the development of HR and Information Technology as one of the foundations for realizing Bank accountability.

In addition, Board of Commissioners view that the implementation of GCG within the scope of Bank has been going well. To evaluate the effectiveness of GCG implementation, Bank Aladin Syariah regularly conducts self-assessments on GCG practices, which refers to Bank Indonesia Regulation No. 11/33/PBI/2009 dated December 7, 2009 concerning Implementation of Good Corporate Governance for Sharia Commercial Banks and Sharia Business Units and Financial Services Authority Circular Letter No. 10/ SEOJK.03/2014 concerning Assessment of Soundness Level of Sharia Commercial Banks and Sharia Business Units. Based on the results of Bank's GCG self-assessment conducted semiannually in 2022, the self-assessment of Bank's GCG implementation in semester I and semester II in 2021 has been carried out in a comprehensive manner with the results of an Individual rating of 2 (two) with a rating definition that reflects Bank's Management has carried out generally good implementation of Good Corporate Governance. PERKEMBANGAN BANK DALAM INDUSTRI PERBANKAN SYARIAH

Di tahun 2022, perekonomian secara global kembali melanjutkan tren pemulihan pasca pandemi yang telah berlangsung sejak 2020. Namun, di tengah pemulihan yang sedang terjadi, terdapat hambatan berupa meningkatnya tantangan dan tingginya ketidakpastian ekonomi dan geopolitik. Ketidakpastian terjadi akibat perang Rusia-Ukraina yang mendorong peningkatan risiko ekonomi global dan kenaikan harga komoditas serta dampak dari tekanan inflasi global yang tinggi, mendorong berbagai bank sentral untuk menaikkan suku bunga acuannya secara agresif sepanjang tahun 2022.

Kondisi tersebut membuat perekonomian global berpotensi jatuh ke dalam jurang “*stagflasi*”, yaitu kondisi ketika pertumbuhan ekonomi bergerak stagnan bahkan cenderung turun dan diikuti dengan tingkat inflasi yang tinggi. Tekanan inflasi yang tinggi dan kebijakan moneter dengan menaikkan suku bunga acuan yang agresif oleh berbagai bank sentral di dunia berimbas pada perlambatan aktivitas ekonomi global. Perlambatan aktivitas ekonomi global tentunya dapat berdampak pada penurunan pertumbuhan ekonomi global. Data terkini menunjukkan bahwa pada Triwulan III 2022 pertumbuhan ekonomi berbagai negara di dunia telah mengalami perlambatan, khususnya di negara-negara maju seperti Tiongkok dan Amerika Serikat.

Sementara itu, perekonomian Indonesia terus melanjutkan tren pemulihan pada tahun 2022, bahkan mencatatkan laju pertumbuhan yang impresif. Tingkat pertumbuhan ekonomi nasional pada tahun 2022 mencapai 5,31% yoy, meningkat dari 3,69% pada tahun 2021 dan bahkan lebih tinggi dari pra- pandemi sebesar 5,02% pada tahun 2019.

Pertumbuhan ekonomi Indonesia yang cukup impresif di tahun 2022, didorong oleh peningkatan aktivitas ekonomi masyarakat seiring dengan pelonggaran kebijakan restriksi aktivitas masyarakat. Hal ini menjadi bukti bahwa pengendalian COVID-19 di Indonesia yang berjalan dengan baik. Progress vaksinasi yang terus meningkat menjadi hal yang krusial dalam pengendalian penyebaran COVID-19 di Indonesia.

Selaras dengan tren pemulihan ekonomi yang terjadi, kinerja industri perbankan di Indonesia turut menunjukkan tren yang membaik. Berdasarkan data OJK per September 2022, rasio kecukupan modal (CAR) berada pada level 25,17% naik 0,51% dibandingkan triwulan sebelumnya, namun turun sekitar 0,01% dibandingkan dengan triwulan III-2021. Industri perbankan juga memiliki likuiditas yang memadai di triwulan III-2022, seperti yang ditunjukkan oleh *loan deposit ratio* (LDR) sebesar 82,05% atau meningkat sebesar 2,94% dibandingkan triwulan III-2021 sebelumnya.

DEVELOPMENT OF BANKS IN THE SHARIA BANKING INDUSTRY

In 2022, the global economy resumed the post-pandemic recovery trend that has been going on since 2020. However, in the midst of the ongoing recovery, there are obstacles in the form of increasing challenges and high economic and geopolitical uncertainties. Uncertainty occurred as a result of the Russia-Ukraine war which led to increased global economic risks and rising commodity prices as well as the impact of high global inflationary pressures, prompting various central banks to raise their benchmark interest rates aggressively throughout 2022.

These conditions make the global economy potentially fall into the brink of “*stagflation*”, namely a condition when economic growth tends to stagnate and even tends to fall, followed by high inflation rates. High inflationary pressures and monetary policy by aggressively raising benchmark interest rates by various central banks in the world have resulted in a slowdown in global economic activity. The slowdown in global economic activity can certainly have an impact on global economic growth. The latest data shows that in the third quarter of 2022 the economic growth of various countries in the world has experienced a slowdown, especially in developed countries such as China and the United States.

Meanwhile, the Indonesian economy continued its recovery trend in 2022, even recording an impressive growth rate. The national economic growth rate in 2022 will reach 5.31% yoy, an increase from 3.69% in 2021 and even higher than the pre-pandemic rate of 5.02% in 2019.

Indonesia's economic growth is quite impressive in 2022, driven by an increase in people's economic activities in line with the easing of restrictions on community activities. This is proof that the control of COVID-19 in Indonesia is going well. Vaccination progress which continues to increase is crucial in controlling the spread of COVID-19 in Indonesia.

In line with the ongoing trend of economic recovery, the performance of Banking industry in Indonesia has also shown an improving trend. Based on OJK data as of September 2022, the capital adequacy ratio (CAR) was at the level of 25.17%, up 0.51% compared to the previous quarter, but down by around 0.01% compared to quarter III-2021. Banking industry also has adequate liquidity in quarter III-2022, as shown by the loan deposit ratio (LDR) of 82.05%, an increase of 2.94% compared to the previous quarter III-2021.

Pada September 2022, total aset industri perbankan nasional adalah sebesar Rp10,487 triliun atau meningkat 7,73% YoY. Tren yang sama dapat dilihat pada pinjaman bank umum yang tumbuh 10,98% YoY menjadi Rp6,274 triliun. Hal ini menunjukkan menguatnya permintaan kredit seiring dengan menurunnya kasus COVID-19 di Indonesia. Di tengah meningkatnya risiko eksternal, risiko kredit terkelola dengan baik pada industri perbankan maupun pembiayaan ditopang oleh likuiditas yang solid dan permodalan yang kuat. Kualitas kredit masih terjaga dengan *Non Performing Loan* (NPL) pada September 2022 sebesar 2,78%, membaik dibandingkan September 2021 sebesar 3,22% dan di bawah level maksimum sebesar 5% yang telah ditetapkan oleh regulator.

Selain itu, penghimpunan dana pihak ketiga dan penyaluran kredit masing-masing tumbuh 6,77% dan 11,00% (yoy) pada September 2022. Ketahanan sektor perbankan pun masih terjaga dengan tingkat kecukupan modal sebesar 25,12% di bulan Agustus 2022, dan NPL net di level 0,79%. Tren yang sama terlihat pada sektor perbankan Syariah di mana pertumbuhan penyaluran pembiayaan mencapai 19,00% (yoy). Per Juli 2022, dana pihak ketiga yang dihimpun naik 12,12% dengan tingkat CAR dan NPF *net* terjaga di level 23,25% dan 1,07%.

Sementara itu, Bank Aladin Syariah yang relatif masih berusia muda berhasil mencanangkan diri dan mencuri perhatian dalam industri perbankan syariah nasional sejak bertransformasi menjadi bank digital. Keputusan mengubah diri menjadi bank digital tergolong strategis, mengingat data OJK juga menyebutkan literasi keuangan Indonesia masih rendah, sebanyak 77% penduduk Indonesia masih belum mendapatkan layanan perbankan. Bank senantiasa berkomitmen untuk memberikan solusi kepada nasabah dan masyarakat guna meningkatkan inklusi keuangan di Indonesia melalui penyediaan produk dan fitur dengan mengedepankan prinsip syariah dan tata kelola yang baik, sesuai dengan misi membuka akses layanan perbankan syariah terpercaya untuk seluruh lapisan masyarakat.

Selain itu, layanan perbankan digital juga merupakan jawaban untuk membantu Pemerintah dalam melakukan inklusi keuangan. Karena dengan pemanfaatan digital bank, sebagian lapisan masyarakat yang tadinya tidak bisa mendapatkan layanan keuangan, akan dapat terlayani dengan mudah. Khususnya lapisan masyarakat yang sebelumnya tidak mendapat akses layanan keuangan sama sekali (*unbanked*) ataupun masyarakat yang telah mendapatkan akses layanan keuangan namun masih terbatas (*underbanked*). Kedua segmen ini, yang akan menjadi target fokus Bank Aladin Syariah dalam mengembangkan bisnis yang mengedepankan layanan perbankan digital. Di samping itu, dengan terlayannya masyarakat yang termasuk *unbanked* ataupun *underbanked*, diharapkan kegiatan perekonomian di Indonesia akan semakin lancar, sehingga inklusi keuangan akan semakin cepat terwujud.

In September 2022, the total assets of the national banking industry amounted to IDR10.487 trillion, an increase of 7.73% YoY. The same trend can be seen in commercial bank loans which grew 10.98% YoY to IDR6.274 trillion. This shows the strengthening of demand for credit in line with the decline in cases of COVID-19 in Indonesia. In the midst of increasing external risk, credit risk was well managed in Banking and financing industries, supported by solid liquidity and strong capital. Credit quality is still maintained with Non-Performing Loans (NPL) in September 2022 of 2.78%, an improvement compared to September 2021 of 3.22% and below the maximum level of 5% set by the regulator.

In addition, the collection of third-party funds and lending grew by 6.77% and 11.00% (yoy) respectively in September 2022. The resilience of Banking sector was also maintained with a capital adequacy level of 25.12% in August 2022, and net NPL at the level of 0.79%. The same trend can be seen in the Sharia banking sector where growth in financing distribution reached 19.00% (yoy). As of July 2022, third party funds collected rose 12.12% with CAR and net NPF levels maintained at 23.25% and 1.07%.

Meanwhile, Bank Aladin Syariah, as a new bank, has succeeded in establishing itself and gaining attention in the national Sharia banking industry since transforming into a digital bank. The decision to turn themselves into a digital bank is quite strategic, considering that OJK data also states that Indonesia's financial literacy is still low, as much as 77% of Indonesia's population still do not get banking services. Bank is always committed to providing solutions to customers and the public in order to increase financial inclusion in Indonesia by providing products and features that promote sharia principles and good governance, in line with its mission of opening access to trusted sharia banking services for all levels of society.

In addition, digital banking services are also the answer to assist the Government in carrying out financial inclusion. Because with the use of digital banks, some layers of society who previously could not get financial services will be able to be served easily. Particularly the strata of society that previously had no access to financial services at all (*unbanked*) or those who had access to financial services but were still limited (*underbanked*). These two segments became the focus target of Bank Aladin Syariah in developing a business that prioritizes digital banking services. In addition, by serving people who are classified as *unbanked* or *underbanked*, it is hoped that economic activities in Indonesia will run more smoothly, so that financial inclusion will be realized more quickly.

Rencana Bisnis Bank juga mempertimbangkan peluang dan tantangan yang hadir dari adaptasi masyarakat ke teknologi dan digital, serta perkembangan literasi keuangan di Indonesia. Di tahun 2022, Bank memasuki tahapan pertumbuhan yang dimulai dengan diluncurkannya aplikasi Bank di awal tahun. KENDALA, TANTANGAN, DAN SOLUSINYA

Tantangan terbesar bagi Bank khususnya dan perbankan nasional pada umumnya muncul dari faktor eksternal, khususnya perekonomian global yang berimbas pada kondisi perekonomian nasional. Tahun 2022 perekonomian Indonesia melanjutkan tren pemulihan ekonomi pasca pandemi. Berbagai kebijakan pemerintah di bidang kesehatan, kebijakan ekonomi dan kebijakan moneter mendorong pemulihan ekonomi yang lebih cepat. Sebagian besar sektor ekonomi secara bertahap telah pulih, termasuk perbankan. Pulihnya aktivitas perekonomian masyarakat mendorong pertumbuhan kredit nasional yang jauh lebih baik dibanding periode sebelumnya. Kondisi tersebut berdampak positif bagi kinerja bank, dimana pada tahun 2022 Bank Aladin Syariah mampu membukukan kinerja yang sangat baik dengan pertumbuhan bisnis yang secara umum melampaui target yang ditetapkan.

Tingkat persaingan di industri digital cukup tinggi karena semakin banyak bank berinvestasi pada pengembangan teknologi digital. Pesatnya perkembangan teknologi memang telah mengubah perilaku dan pola transaksi nasabah menjadi serbadigital. Geliat transformasi digital salah satunya dipicu oleh pandemi *Coronavirus Disease 2019 (COVID-19)* yang melanda Tanah Air pada awal 2020 lalu. Ketika pembatasan sosial berskala besar dilakukan, seluruh kegiatan perbankan nasabah dipaksa beralih ke *digital channel* atau kanal digital. Kebiasaan ini pun terus berlanjut, bahkan makin menguat. Alhasil, nasabah makin memiliki preferensi untuk tidak datang langsung ke kantor cabang perbankan. Hal ini menyebabkan bergesernya fokus bank mengikuti kebiasaan baru nasabah. *Timing go-to-market* dan eksekusi merupakan kunci sukses utama dalam meraih pangsa pasar

Maraknya perusahaan rintisan dan *Fintech* yang model bisnisnya menyerupai bank menambah sengit iklim persaingan. Di mana setiap tahunnya ada saja lembaga pembiayaan baru yang bermunculan guna membantu memenuhi kebutuhan dana bagi masyarakat. Sederhananya, *fintech* adalah sebuah layanan yang bergerak di bidang jasa keuangan berbasis teknologi.

Sementara itu, bank menghadapi tantangan dalam sisi pengembangan produk, dimana pangsa pasar bank yang kebanyakan segmen *underbanked* dan *unbanked* yang wawasan penggunaan gawai masih minim sehingga bank harus berusaha menghasilkan fitur yang sederhana namun tetap dengan fungsi yang maksimal. Bank juga harus tetap menghasilkan fitur yang mendukung nasabah ritel, termasuk pengembangan produk pembiayaan yang lebih beragam baik untuk para nasabah.

2. *Total Rewards Project*: Continuing the *Total Rewards Project* in 2021 which produces a level and grading system, then in 2022 is the time of execution with grade mapping and current employee levels with new grades and levels.

OBSTACLES, CHALLENGES, AND SOLUTIONS

The biggest challenge for banks in particular and national banking in general arises from external factors, especially the global economy which has an impact on national economic conditions. In 2022 the Indonesian economy will continue the trend of post-pandemic economic recovery. Various government policies in the health sector, economic policies and monetary policies encouraged a faster economic recovery. Most sectors of the economy have gradually recovered, including Banking sector. The recovery in people's economic activity encouraged national credit growth which was far better than the previous period. These conditions had a positive impact on bank performance, where in 2022 Bank Aladin Syariah was able to record very good performance with business growth that generally exceeded the targets set.

The level of competition in the digital industry is quite high because more and more banks are investing in the development of digital technology. The rapid development of technology has indeed changed the behavior and patterns of customer transactions to become completely digital. One of the dynamics of digital transformation was triggered by the *Coronavirus Disease 2019 (COVID-19)* pandemic that hit the country in early 2020. When large-scale social restrictions are implemented, all customer banking activities are forced to switch to digital channels or digital channels. This habit continues, even getting stronger. As a result, customers increasingly have a preference not to come directly to banking branch offices. This causes a shift in Bank's focus to follow new customer habits. *Go-to-market timing* and execution are the main keys to success in gaining market share.

The rise of startup companies and *Fintech* which has business model resembles the bank has added to the fierce competition. Which every year there are new financial institutions that have sprung up to help meeting the funding needs of the community. Simply put, *fintech* is a service engaged in technology-based financial services.

Meanwhile, banks are facing challenges in terms of product development. The market share of bank is mostly the underbanked and unbanked segments where insight into the use of devices is still minimal, so bank must try to produce simple features but still with maximum functionality. Banks must also continue to produce features that support retail customers, including developing more diverse financing products for customers.

Direksi meyakini, seluruh strategi dan inovasi yang terus dilakukan dapat menjawab tantangan dan mewujudkan visi Bank “Menjadi Bank Syariah Digital Terdepan”, dengan menerapkan solusi yang tepat. Di mana sebagai Bank Digital Syariah pertama di Indonesia, Bank Aladin Syariah senantiasa berusaha untuk menyediakan produk-produk perbankan dengan fitur syariah yang sesuai dengan kebutuhan nasabah atau masyarakat. Di samping itu, selain memperkuat kerja sama dengan Alfamart yang memiliki lebih dari 17.000 gerai di seluruh Indonesia, Bank juga telah menjalin kemitraan strategis dengan Evermos, Persib, dan Persis Solo, untuk mendorong akuisisi nasabah. Kebijakan-kebijakan tersebut, menjadi salah satu langkah strategis Bank yang dapat menjawab tantangan di tahun 2022.

PROSPEK USAHA TAHUN 2023

Bank Aladin Syariah melihat peluang *trend* pemulihan ekonomi global yang terjadi di tahun 2022 masih dapat berlanjut di tahun 2023 walaupun terdapat potensi perlambatan. IMF memperkirakan pertumbuhan ekonomi dunia tetap positif dan berada pada kisaran 2,7% di tahun 2023. Kondisi pertumbuhan ekonomi yang positif tersebut terutama digerakkan oleh ekonomi negara-negara besar seperti Amerika Serikat (AS), China, Jepang, dan negara-negara Eropa. Kondisi pada negara-negara maju tersebut diperkirakan juga akan berdampak pada negara-negara ASEAN termasuk Indonesia. Hal ini juga ditunjukkan dengan parameter makroekonomi yang positif yaitu tingkat kepercayaan konsumen yang masih berada pada level yang optimis dan konsumsi rumah tangga yang terus meningkat.

Namun begitu, Bank Aladin Syariah juga melihat masih terdapat tantangan dari kondisi makro-ekonomi global atas tingkat suku bunga acuan yang diperkirakan berada pada level yang lebih tinggi dibandingkan tahun 2022, didorong oleh tingkat inflasi yang masih berada di atas target bank sentral, dan adanya ketidakpastian global atas dampak dari konflik Rusia-Ukraina yang belum menemukan titik temu.

Bank Aladin Syariah melihat bahwa perlambatan ekonomi global di tahun 2023 tidak akan berdampak signifikan terhadap perekonomian domestik, mengingat perekonomian Indonesia masih ditopang konsumsi rumah tangga yang didominasi oleh aktivitas UMKM yang merupakan basis utama nasabah Bank. Kebijakan Pemerintah yang tetap proaktif dalam menghadapi dampak pandemi melalui program vaksinasi disertai kebijakan regulator yang akomodatif juga turut mendukung percepatan pemulihan ekonomi. Oleh karena itu, Bank optimis prospek industri perbankan khususnya Bank Aladin Syariah akan membaik dan positif di tahun 2023.

Board of Directors believes that all strategies and innovations that are continuously carried out can answer challenges and realize Bank's vision of “Becoming the Leading Digital Sharia Bank”, by implementing the right solutions. Whereas the first Sharia Digital Bank in Indonesia, Bank Aladin Syariah always strives to provide banking products with sharia features that suit the needs of customers or the public. In addition, apart from strengthening cooperation with Alfamart which has more than 17,000 outlets throughout Indonesia, Bank has also established strategic partnerships with Evermos, Persib and Persis Solo, to encourage customer acquisition. These policies are one of Bank's strategic steps that can respond to challenges in 2022.

BUSINESS OUTLOOK FOR 2023

Bank Aladin Syariah sees an opportunity for the global economic recovery trend that occurred in 2022 to continue in 2023 even though there is a potential for a slowdown. The IMF estimates that world economic growth will remain positive and be in the range of 2.7% in 2023. This positive economic growth condition is mainly driven by the economies of large countries such as the United States (US), China, Japan and European countries. The conditions in developed countries are also expected to have an impact on ASEAN countries, including Indonesia. This is also indicated by positive macroeconomic parameters, namely the level of consumer confidence which is still at an optimistic level and household consumption which continues to increase.

However, Bank Aladin Syariah also sees that there are still challenges from global macro-economic conditions for the benchmark interest rate expected to be at a higher level than in 2022, driven by the inflation rate which is still above the central bank's target, and uncertainty global impact on the impact of the Russia-Ukraine conflict which has not yet found common ground.

Bank Aladin Syariah sees that the global economic slowdown in 2023 will not have a significant impact on the domestic economy, considering that the Indonesian economy is still supported by household consumption which is dominated by MSME activities which are Bank's main customer base. Government policies that remain proactive in dealing with the impact of the pandemic through vaccination programs accompanied by accommodative regulatory policies also contribute to accelerating economic recovery. Therefore, Bank is optimistic that the prospects for Banking industry, especially Bank Aladin Syariah, will improve and be positive in 2023.

Menyikapi hal tersebut, Direksi telah merumuskan langkah strategis untuk tahun 2023, salah satunya antara lain adalah membangun sinergi melalui kemitraan strategis dengan mitra yang memiliki reputasi baik, jaringan luas, serta basis Nasabah yang kuat. Kemudian, menerapkan strategi akuisisi nasabah pendanaan ritel secara organik maupun melalui ekosistem mitra strategis dengan fokus pada produk dana murah (*Current Account Saving Account/CASA*). Bank juga akan membuka hubungan dengan nasabah korporasi sebagai salah satu sumber Dana Pihak Ketiga (DPK) dan sumber akuisisi nasabah. Di tahun 2023, Bank juga berencana untuk meluncurkan produk pembiayaan dengan *pricing* yang tepat dan kompetitif, disamping tetap menjaga kecukupan modal untuk mendukung pertumbuhan Bank dan memenuhi regulasi.

Sementara itu, dalam Rencana Bisnis Bank tahun 2023, Bank Aladin Syariah telah menetapkan berbagai proyeksi kinerja yang cukup realistis dengan tingkat pertumbuhan yang telah disesuaikan dengan tantangan situasi pemulihan ekonomi atas pandemi COVID-19. Di tahun 2023, Bank siap memberikan terobosan-terobosan baru sebagai bank digital yang mengedepankan prinsip Syariah di Indonesia. Bank akan terus melakukan kolaborasi bersama mitra strategis, Bank juga berencana menambah kerja sama dengan mitra strategis baru dan memperdalam kerja sama dengan mitra strategis yang sudah ada.

Tidak hanya itu, Bank Aladin Syariah juga akan meningkatkan kualitas layanan yang memudahkan masyarakat Indonesia dalam melakukan perencanaan keuangan dan bertransaksi sehari-hari seperti pembayaran atau pembelian, juga produk pembiayaan yang lebih beragam baik untuk nasabah ritel maupun korporasi. Dengan meningkatkan konektivitas mitra and perluasan fitur-fitur aplikasinya, termasuk melengkapi jenis produk dan fitur yang ditawarkan melalui aplikasi *mobile banking* Bank terutama untuk nasabah ritel. Bank Aladin Syariah siap menjadi bank yang dekat dengan keseharian masyarakat.

Izinkanlah kami atas nama Dewan Pengawas Syariah (DPS) PT Bank Aladin Syariah Tbk menyampaikan laporan pelaksanaan pengawasan atas pemenuhan prinsip syariah terhadap kegiatan Bank Aladin Syariah selama tahun 2022.

PELAKSANAAN KEGIATAN PENGAWASAN DEWAN PENGAWAS SYARIAH TAHUN 2022

Perbankan syariah Indonesia sampai saat ini masih terus menunjukkan pertumbuhan positif, meskipun masih terdapat beberapa isu strategis serta tantangan yang masih perlu diselesaikan. Era normal baru telah membuat pola kehidupan sosial, masyarakat, dan ekonomi mengalami perubahan. Kepedulian dalam membantu sesama semakin meningkat terutama dalam permasalahan ekonomi. Hal ini menjadi tantangan sekaligus peluang bagi perbankan syariah untuk dapat memberikan pelayanan berbasis digital serta memenuhi kebutuhan sosial masyarakat sehingga dapat berperan dalam membangun perekonomian umat pasca pandemi.

Sesuai tugas dan fungsinya, DPS telah mengawasi kegiatan operasional Bank Aladin Syariah agar tetap sesuai dengan nilai-nilai dan prinsip-prinsip syariah. Dalam pelaksanaan kegiatan pengawasan, DPS melakukannya dengan pengawasan yang ketat. Dalam melaksanakan tugas dan tanggung jawabnya DPS berpedoman pada Anggaran Dasar Perusahaan, Kebijakan GCG, AD/ART DSN-MUI.

Praise and gratitude let us pray to Allah SWT who has given the mercy, guidance and protection to all of us so that Bank Aladin Syariah can go through 2022 well and continue to be a trustworthy sharia bank. Blessings and greetings may be bestowed on His Majesty Rasulullah SAW, along with all his family and relatives.

Please allow us on behalf of the Sharia Supervisory Board (SSB) of PT Bank Aladin Syariah Tbk to submit a report on the implementation of supervision on compliance with sharia principles for the activities of Bank Aladin Syariah during 2022.

IMPLEMENTATION OF SHARIA SUPERVISORY BOARD SUPERVISION ACTIVITIES IN 2022

Until now, Indonesian sharia banking continues to show positive growth, although there are still several strategic issues and challenges that still need to be resolved. The new normal era has changed the pattern of social, community and economic life. Concern in helping others is increasing, especially in economic problems. This is a challenge as well as an opportunity for Islamic banking to be able to provide digital-based services and meet the social needs of the community so that they can play a role in building the people's economy after the pandemic.

In accordance with its duties and functions, SSB has supervised the operational activities of Bank Aladin Syariah so that it remains in accordance with sharia values and principles. In carrying out supervisory activities, SSB does so under strict supervision. In carrying out its duties and responsibilities, SSB is guided by the Company's Articles of Association, GCG Policy, DSN-MUI AD/ART.

DPS melaksanakan tugas dan tanggung jawab DPS tersebut di antaranya dengan menilai dan memastikan pedoman operasional dan produk yang dikeluarkan Bank Aladin Syariah telah memenuhi prinsip syariah, mengawasi agar proses pengembangan produk baru Bank Aladin Syariah sesuai dengan fatwa DSN-MUI, serta melakukan pengkajian berkala atas mekanisme penghimpunan dana, penyaluran dana serta pelayanan jasa Bank, serta memastikan bahwa semua telah sesuai dengan prinsip syariah. Dalam melaksanakan fungsi pengawasan, DPS juga senantiasa mengikuti perkembangan bisnis Bank Aladin Syariah dan memastikan serta mengawasi pemenuhan prinsip-prinsip syariah dalam setiap aktivitas usaha.

Di tahun 2022, aktivitas pengawasan DPS mencakup sebagai berikut:

1. Pengawasan terhadap proses pengembangan produk baru bank.
2. Pengawasan terhadap kegiatan bank.
3. Memberikan pendapat syariah atas kegiatan penghimpunan dana, penyaluran dana, dan pelayanan Jasa.
4. Uji Petik Dewan Pengawas Syariah.

Di samping itu, sebagai wujud dari tanggung jawab dan akuntabilitas akan tugas DPS, DPS memiliki kewajiban untuk menyampaikan Laporan Hasil Pengawasan DPS secara semesteran (2 kali dalam setahun). Laporan disampaikan kepada Otoritas Jasa Keuangan dan juga DSN-MUI paling lambat 2 (dua) bulan setelah periode semester dimaksud berakhir. Seluruh kegiatan pengawasan DPS telah dikoordinasikan dengan Direksi melalui rapat rutin. Hal ini sejalan dengan Peraturan Bank Indonesia No. 11/33/PBI/2009 tanggal 7 Desember 2009 tentang Pelaksanaan *Good Corporate Governance* Bagi Bank Umum Syariah dan Unit Usaha Syariah serta Surat Edaran Bank Indonesia No. 12/13/DPbS tanggal 30 April 2010 perihal Pelaksanaan *Good Corporate Governance* Bagi Bank Umum Syariah dan Unit Usaha Syariah untuk memberikan nasihat dan saran kepada Direksi serta mengawasi kegiatan Bank agar senantiasa sesuai dengan prinsip syariah.

Selain dengan Direksi, permasalahan-permasalahan yang terkait pemenuhan prinsip syariah, khususnya yang bersinggungan dengan fokus Bank Aladin Syariah pada tahun 2022, juga DPS sampaikan kepada Dewan Komisaris untuk kemudian dilakukan pengawasan oleh Dewan Komisaris bersama dengan DPS. DPS juga memberikan rekomendasi kepada manajemen maupun opini-opini syariah kepada unit kerja melalui rapat DPS yang diselenggarakan tiap bulannya.

SSB carries out the duties and responsibilities of the SSB, among others, by assessing and ensuring the operational guidelines and products issued by Bank Aladin Syariah comply with sharia principles, supervising that the new product development process for Bank Aladin Syariah is in accordance with the DSN-MUI fatwa, as well as conducting periodic reviews of the mechanism fund raising, fund disbursement and providing Bank services, as well as ensuring that everything is in accordance with sharia principles. In carrying out the supervisory function, SSB also constantly follows the business developments of Bank Aladin Syariah and ensures and supervises compliance with sharia principles in every business activity.

In 2022, SSB supervisory activities include the following:

1. Supervision of the bank's new product development process.

4. Sample Test of the Sharia Supervisory Board.

In addition, as a form of responsibility and accountability for the duties of the SSB, the SSB has an obligation to submit the SSB Supervision Report semiannually (twice a year). Reports are submitted to the Financial Services Authority and also the DSN-MUI no later than 2 (two) months after the semester period in question ends. All SSB supervisory activities have been coordinated with the Board of Directors through regular meetings. This is in line with Bank Indonesia Regulation No. 11/33/PBI/2009 dated December 7, 2009 concerning Implementation of Good Corporate Governance for Sharia Commercial Banks and Sharia Business Units and Bank Indonesia Circular Letter No. 12/13/DPbS dated April 30, 2010 regarding the Implementation of Good Corporate Governance for Sharia Commercial Banks and Sharia Business Units to provide advice and suggestions to the Board of Directors and oversee Bank activities so that they are always in accordance with sharia principles.

In addition to the Directors, the SSB also conveys issues related to the fulfillment of sharia principles, especially those that intersect with the focus of Bank Aladin Syariah in 2022, to the SSB to the Board of Commissioners for supervision by the Board of Commissioners together with SSB. SSB also provides recommendations to management and sharia opinions to work units through SSB meetings which are held monthly.

Sepanjang tahun 2022, DPS telah mengadakan rapat rutin bulanan yang dihadiri oleh ketua dan anggota DPS. Terhitung rapat DPS dilakukan sebanyak 15 kali. Pada periode tersebut, selain dalam bentuk rapat DPS, DPS juga memberikan opini syariah secara tertulis atas 9 (sembilan) produk Bank baru.

Sementara itu, berdasarkan surat No. S.085.BOD/02.2022 tanggal 25 Februari 2022 Perihal Laporan Hasil Pengawasan DPS menyatakan bahwa pelaksanaan kegiatan penghimpunan dana, penyaluran dana, dan pelayanan jasa Bank secara umum telah sesuai dengan fatwa dan ketentuan syariah yang dikeluarkan oleh DSN-MUI dan opini syariah yang diterbitkan oleh DPS.

Untuk mendukung pelaksanaan tugasnya, DPS dibantu seorang karyawan yang ditunjuk Bank sebagai petugas yang menjalankan fungsi *liaison officer* dan melakukan fungsi kesekretariatan serta pengelolaan arsip/administrasi bagi DPS. Ke depan, DPS berharap manajemen dapat mengoptimalkan *liaison officer* sebagai perpanjangan tangan DPS dalam menjalankan fungsi pengawasan terhadap pemenuhan aspek syariah. Hal ini dalam rangka mendukung optimisme Bank Aladin Syariah dalam mewujudkan misinya dalam memperkuat ekosistem keuangan syariah yang bermanfaat untuk seluruh lapisan masyarakat.

PERUBAHAN SUSUNAN DAN KOMPOSISI DEWAN PENGAWAS SYARIAH

Pada tahun 2022, tidak terdapat perubahan susunan dan komposisi DPS. Maka jumlah anggota DPS Bank tetap berjumlah 2 (dua) orang yang terdiri dari seorang ketua dan seorang anggota. Seluruh anggota DPS Bank Aladin Syariah memiliki integritas, kompetensi dan reputasi keuangan yang memadai, dan telah lulus *fit* dan *proper test* dari regulator.

Throughout 2022, the Sharia Supervisory Board has held regular monthly meetings attended by the chairman and members of the Sharia Supervisory Board. It is estimated that SSB meetings were held 15 times. During this period, apart from taking the form of SSB meetings, SSB also provided written sharia opinions on 9 (nine) new Bank products.

Meanwhile, based on letter No. S.085.BOD/02.2022 dated February 25, 2022 Regarding the Sharia Supervisory Board Report on Results states that the implementation of fundraising activities, fund distribution, and bank services in general is in accordance with sharia fatwas and provisions issued by DSN-MUI and sharia opinions issued published by SSB.

To support the implementation of its duties, SSB are assisted by an employee appointed by the Bank as an officer who performs the function of liaison officer and performs secretarial functions as well as management of records/administration for SSB. Going forward, SSB hopes that management can optimize liaison officers as an extension of SSB in carrying out the supervisory function of fulfilling sharia aspects. This is in order to support the optimism of Bank Aladin Syariah in realizing its mission in strengthening the sharia financial ecosystem that is beneficial for all levels of society.

BRIEF HISTORY OF BANK

SEKILAS TENTANG BANK ALADIN SYARIAH

PT Bank Aladin Syariah Tbk, selanjutnya disebut juga “Bank Aladin Syariah”, didirikan untuk pertama kali dengan nama PT Bank Maybank Nusa International sebagai bank umum konvensional, berdasarkan Akta No. 58 tanggal 16 September 1994 yang merupakan proses *Joint Venture* (perjanjian bisnis) antara dua bank umum, yakni Malayan Banking (Maybank) Berhad dari Malaysia dengan Bank Nusa Nasional dari Indonesia.

Pada tanggal 11 September 2000, PT Maybank Nusa International berganti nama menjadi PT Bank Maybank Indocorp. Hal ini dikarenakan beralihnya kepemilikan saham Bank Nusa Nasional kepada Menteri Keuangan Republik Indonesia qq PT Perusahaan Pengelola Aset (Persero). Kemudian, seiring dengan pergantian bidang usaha dari bank umum konvensional menjadi bank umum syariah berdasarkan Surat Keputusan Gubernur Bank Indonesia No. 12/60/KEP.GBI/DpG/2010 tanggal 23 September 2010, PT Bank Maybank Indocorp berganti nama menjadi PT Bank Maybank Syariah Indonesia (MSI) dengan menawarkan berbagai layanan dan solusi inovatif untuk memenuhi kebutuhan para nasabah.

Di tahun 2011, berdasarkan Akta Notaris Aliya S. TINJAUAN UMUM

GENERAL OVERVIEW

TINJAUAN PEREKONOMIAN

Di tengah upaya pemulihan ekonomi dari dampak pandemi COVID-19, perekonomian global di tahun 2022 diwarnai oleh dampak ketegangan geopolitik yang terutama berasal dari kondisi perang Rusia dan Ukraina. Situasi perang Rusia dan Ukraina membawa dampak negatif pada perekonomian dunia diantaranya menambah gangguan rantai pasok yang berakibat pada kenaikan harga bahan bakar energi dan bahan pokok sehingga mendorong naik inflasi di berbagai negara. Pada Desember 2022, inflasi di Amerika Serikat (AS) mencapai 6,5% (yoy), sementara itu terganggunya pasokan energi dari Rusia ke berbagai negara Uni Eropa telah mendorong inflasi di kawasan tersebut mencapai 10,4% (yoy). Sedangkan di Cina, inflasi terjaga di level 1,8% (yoy) didukung oleh bauran kebijakan fiskal dan moneter yang akomodatif.

Guna mengendalikan laju inflasi, The Fed menerapkan kebijakan moneter ketat dan secara bertahap menaikkan suku bunga acuan dengan total kenaikan sepanjang 2022 sebesar 425bps. Hal ini diikuti oleh kenaikan suku Bunga oleh Bank Sentral di berbagai negara dan berakibat pada menurunnya likuiditas global. Dengan berbagai tekanan yang ada, baik dari terganggunya rantai pasok serta pengetatan likuiditas, ekonomi dunia secara umum mengalami perlambatan di 2022. Pertumbuhan ekonomi dunia tercatat 3,4% (yoy) di tahun 2022, di mana AS tumbuh 2,9% (yoy), Uni Eropa 3,1% dan China 3,2%.

Sementara di dalam negeri, perekonomian Indonesia terus melanjutkan tren pemulihan sejalan dengan meningkatnya aktivitas dan mobilitas masyarakat seiring semakin terkendalinya situasi COVID 19. Memasuki Triwulan IV, Indonesia mulai bersiap bertransisi menuju endemi dan kegiatan masyarakat berangsur kembali normal. Di tengah tren perlambatan ekonomi dunia, ekonomi nasional berhasil tumbuh sebesar 5,3% (yoy) di tahun 2022, lebih tinggi dari pertumbuhan di tahun 2021. Pertumbuhan ini didorong oleh kuatnya permintaan dalam negeri serta naiknya harga komoditas ekspor terutama bahan bakar energi. Ekspor tercatat tumbuh mencapai 14,9% (yoy) di 2022. Baiknya kinerja ekspor mendukung neraca perdagangan yang tercatat surplus di 2022 meskipun dari sisi transaksi modal dan finansial masih mencatat *net* defisit.

Sejalan dengan kebijakan The Fed menaikkan suku bunga acuan, Bank Indonesia (BI) juga telah menaikkan BI 7-Day Reverse Repo Rate sebesar 200bps sepanjang 2022 menjadi 5,5% per Desember 2022. Kebijakan ini sebagai langkah BI dalam rangka menjaga inflasi yang cenderung meningkat serta untuk menjaga kestabilan nilai tukar rupiah. Inflasi Harga Konsumen (IHK) pada akhir 2022 tercatat sebesar 5,51% (yoy) dan nilai tukar rupiah ditutup di level Rp15.567.

ECONOMIC OVERVIEW

In the midst of efforts to recover the economy from the impact of the COVID-19 pandemic, the global economy in 2022 was marked by the impact of geopolitical tensions which mainly stem from the war between Russia and Ukraine. The war situation between Russia and Ukraine had a negative impact on the world economy, including adding to supply chain disruptions which resulted in an increase in the price of fuel energy and basic commodities, which pushed up inflation in various countries. In December 2022, inflation in the United States (US) reached 6.5% (yoy), while the disruption in energy supplies from Russia to various European Union countries has pushed inflation in the region to 10.4% (yoy). Meanwhile in China, inflation was maintained at 1.8% (yoy) supported by an accommodative mix of fiscal and monetary policies.

In order to control the inflation rate, the Fed implemented a tight monetary policy and gradually raised the benchmark interest rate with a total increase throughout 2022 of 425 bps. This was followed by an increase in interest rates by Central Banks in various countries and resulted in a decrease in global liquidity. With various existing pressures, both from supply chain disruptions and tightening liquidity, the world economy in general will experience a slowdown in 2022. World economic growth is recorded at 3.4% (yoy) in 2022, where the US grows 2.9% (yoy) , European Union 3.1% and China 3.2%.

Meanwhile domestically, the Indonesian economy continues its recovery trend in line with increasing activity and people's mobility as the Covid 19 situation is getting under control. Entering Quarter IV, Indonesia prepared for the transition towards endemic and people's activities are gradually returning to normal. Amid the trend of a slowdown in the world economy, the national economy managed to grow by 5.3% (yoy) in 2022, higher than growth in 2021. This growth was driven by strong domestic demand and rising prices for export commodities, especially energy fuels. Exports were recorded to grow by 14.9% (yoy) in 2022. The good performance of exports supported the trade balance which recorded a surplus in 2022 even though from a capital and financial account it still recorded a net deficit.

In line with The Fed's policy of raising the benchmark interest rate, Bank Indonesia (BI) has also raised the BI 7-Day Reverse Repo Rate by 200 bps throughout 2022 to 5.5% as of December 2022. This policy is BI's step in controlling inflation which tends to increase as well as to maintain the stability of the rupiah exchange rate. Consumer Price Inflation (CPI) at the end of 2022 was recorded at 5.51% (yoy) and the rupiah exchange rate closed at Rp15,567.

TINJAUAN SEKTOR PERBANKAN

Seiring dengan pertumbuhan ekonomi nasional, industri Perbankan juga menunjukkan perbaikan kinerja di tahun 2022. Hal ini dapat dilihat dari terus meningkatnya fungsi intermediasi perbankan yang ditandai dengan pertumbuhan penyaluran kredit dan penghimpunan dana pihak ketiga. Pertumbuhan kredit sampai dengan Desember 2022 mencapai 11,35% (yoy), lebih baik dari pencapaian tahun sebelumnya yang sebesar 5,24% (yoy). Penyaluran kredit mencakup seluruh sektor ekonomi dan jenis kredit, didorong oleh sisi permintaan maupun penawaran kredit. Dari sisi permintaan kredit, pertumbuhan didorong oleh kinerja korporasi serta meningkatnya permintaan konsumsi rumah tangga di tengah pemulihan kondisi ekonomi. Sedangkan dari sisi penawaran kredit, penawaran didorong oleh kecukupan likuiditas perbankan yang berasal dari penghimpunan dana pihak ketiga yang tercatat tumbuh 9,01% (yoy).

Selanjutnya, peningkatan fungsi intermediasi perbankan juga didukung oleh relaksasi restrukturisasi kredit oleh Otoritas Jasa Keuangan (OJK) dan pemberian insentif oleh Bank Indonesia diantaranya untuk penyaluran kredit ke UMKM dan sektor-sektor prioritas. Selanjutnya, industri perbankan nasional juga terus menunjukkan ketahanan yang baik di tengah pertumbuhan yang baik di tahun 2022. Menutup tahun, rasio kecukupan modal (*Capital Adequacy Ratio/CAR*) berada di level 25,63%. Sementara itu, rasio kredit bermasalah (*Non Performing Loan/NPL*) terjaga di level 2,44% (bruto) dan 0,71% (neto). Ke depannya, sinergi kebijakan yang baik antara pemangku kebijakan diharapkan dapat terus mendorong perkembangan industri perbankan nasional.

Industri perbankan Syariah pun menunjukkan pertumbuhan yang baik di tahun 2022 di mana pembiayaan tumbuh sebesar 20,1% (yoy). Pertumbuhan ini terlihat pada seluruh jenis pembiayaan, baik pembiayaan modal kerja, investasi dan konsumsi, serta seluruh sektor ekonomi. Hal ini seiring dengan semakin berkembangnya ekonomi Syariah di dalam negeri. Di dalam publikasinya, Bank Indonesia mencatat bahwa pada triwulan III 2022 sektor unggulan ekonomi Syariah tumbuh sebesar 5,5% (yoy) lebih baik dari pertumbuhan triwulan sebelumnya. Di antara sektor yang mendorong pertumbuhan terbesar adalah sektor pertanian dan pariwisata ramah muslim sejalan dengan meningkatnya mobilitas masyarakat di tengah pemulihan situasi pandemi. Sementara itu, pertumbuhan ekonomi Syariah secara keseluruhan diproyeksikan berada di kisaran 4,5-5,3% di tahun 2022. Di tengah naiknya penyaluran pembiayaan ini, ketahanan industri perbankan Syariah terus terjaga di level 2,50% (bruto) dan 0,67% (neto) sampai dengan November 2022 dengan rasio kecukupan modal sebesar 23,65%.

BANKING SECTOR OVERVIEW

Along with the growth of the national economy, Banking industry also showed improved performance in 2022. This can be seen from the continued improvement in Banking intermediation function as marked by the growth in lending and third party fund raising. Credit growth until December 2022 reached 11.35% (yoy), better than the previous year's achievement of 5.24% (yoy). Credit distribution covers all economic sectors and types of credit, driven by both demand and supply sides of credit. On the credit demand side, growth was driven by corporate performance and increased demand for household consumption amidst a recovery in economic conditions. Meanwhile, from the credit supply side, the offer was driven by adequacy of banking liquidity originating from the collection of third party funds which recorded a growth of 9.01% (yoy).

Furthermore, the increase in Banking intermediation function was also supported by the relaxation of credit restructuring by the Financial Services Authority (OJK) and the provision of incentives by Bank Indonesia, including for channeling credit to MSMEs and priority sectors. Furthermore, the national banking industry also continued to show good resilience amidst good growth in 2022. Closing the year, the Capital Adequacy Ratio (CAR) is at the level of 25.63%. Meanwhile, the ratio of non-performing loans (NPL) was maintained at 2.44% (gross) and 0.71% (net). Going forward, good policy synergy between policy makers is expected to continue to encourage the development of the national banking industry.

The Islamic banking industry also showed good growth in 2022 where financing grew by 20.1% (yoy). This growth can be seen in all types of financing, both working capital financing, investment and consumption, as well as all economic sectors. This is in line with the growing development of the Sharia economy in the country. In its publication, Bank Indonesia noted that in the third quarter of 2022 the leading sector of the Islamic economy grew by 5.5% (yoy), better than the growth in the previous quarter. Among the sectors that are driving the greatest growth are the Muslim-friendly agriculture and tourism sectors in line with the increasing mobility of people amidst the recovery from the pandemic situation. Meanwhile, overall Islamic economic growth is projected to be in the range of 4.5-5.3% in 2022. Amid this increase in financing distribution, the resilience of the Islamic banking industry continues to be maintained at the level of 2.50% (gross) and 0.67% (net) until November 2022 with a capital adequacy ratio of 23.65%.

BANK BUSINESS STRATEGY FOR 2022

Even though there was still uncertainty in the national and global economy overshadowed by geopolitical tensions and high inflation, 2022 presented growth opportunities by starting to ease the impact of the COVID-19 pandemic. Increased activity and mobility of the community, especially in the second half of 2022, has stimulated the wheels of the economy and has increased credit growth, including distribution of Sharia financing. Opportunities for growth in 2022 were also supported by the behavior of people who are increasingly accustomed to making transactions through digital channels so that people's economic activities can occur more quickly and from anywhere. This presented a great opportunity for Bank Aladin Syariah in 2022 and Bank continues to work on developing the right policies and strategies to encourage Bank's performance. Of course, in business expansion, Bank continues to prioritize prudence by considering developments in the existing economic situation and conditions.

In order to realize its vision and mission, Bank Aladin Syariah has prepared short, medium and long term plans. After going through business transformation and carrying out organizational development and basic supporting technology infrastructure in the previous year, Bank Aladin Syariah began to enter the stage of business growth in 2022. This year, the focus of Bank was strengthening the capital structure and implementing strategies to achieve growth in the collection and distribution of funds in in order to optimize the intermediation function of Bank. To support the achievement of this growth, Bank continued to make organizational improvements and fulfillment of human capital (HC), and also continuously develops supporting infrastructure for Bank's business activities.

Bank's cash deposit withdrawal feature which is available through Alfamart outlets as one of Bank's strategic

yang tersebar di seluruh Indonesia memberikan akses layanan perbankan yang luas ke berbagai lapisan masyarakat. Hal ini juga menjadi salah satu strategi Bank sebagai Bank digital dengan jaringan yang terbatas untuk tetap dapat memberikan pelayanan yang optimal dan memiliki jangkauan yang luas kepada nasabah terutama di segmen ritel.

Pada tahun 2022, Bank Aladin Syariah juga telah memulai penyaluran pembiayaan Syariah yang diawali dengan pembiayaan *invoice financing* berbasis akad *Qardh* yang menyasar segmen UMKM dan Korporasi. Selanjutnya, untuk segmen yang sama Bank juga meluncurkan produk pembiayaan modal kerja dengan akad *Murabahah*. Sampai dengan akhir tahun 2022, Bank mencatatkan pertumbuhan penyaluran pembiayaan Bank yang pesat mencapai Rp1,38T triliun dengan tingkat pembiayaan bermasalah yang terjaga di tingkat 0,00%. Pertumbuhan pembiayaan yang baik ini didukung oleh besarnya potensi yang datang dari ekosistem mitra Bank.

Kemitraan yang kuat menjadi salah satu kunci pertumbuhan bisnis Bank di tahun 2022. Oleh karena itu, Bank terus memperdalam kerja sama dengan mitra yang ada dan terus menjalin kemitraan baru. Dengan Alfamart yang merupakan mitra strategis Bank, Bank telah memperluas kolaborasi meliputi kerja sama marketing dan branding, akuisisi nasabah, penyaluran pembiayaan ke ekosistem Alfamart, serta penyediaan jaringan pendukung layanan Tarik setor tunai Bank di gerai-gerai Alfamart. Di antaranya, di tahun 2022 Bank Aladin Syariah menjalin kerja sama dengan Evermos yang merupakan *e-commerce reseller* berbasis Syariah. Melalui kerja sama dengan mitra berbasis Syariah, diharapkan Bank Aladin Syariah dapat turut mendukung pertumbuhan ekonomi Syariah di Indonesia. Selanjutnya, di akhir tahun Bank juga memulai kemitraan dengan klub sepak bola Persatuan Sepak Bola Indonesia Bandung (PERSIB) yang dikenal memiliki basis pendukung yang sangat kuat. Selain itu, Bank juga telah menjalin kerja sama dengan beberapa mitra lainnya yang telah dan akan terus menjadi *engine* perkembangan bisnis Bank melalui ekosistem yang dimiliki mitra.

Sementara itu, guna mendukung pertumbuhan bisnis Bank di tahun 2022 serta untuk memenuhi ketentuan yang berlaku, Bank melakukan penguatan permodalan melalui Aksi Korporasi *Rights Issue* dan *Private Placement*. Proses *Rights Issue* Bank memperoleh pernyataan efektif dari Otoritas Jasa Keuangan (OJK) melalui surat Nomor S-74/D.04/2022 tanggal 28 April 2022. Setelah sukses melaksanakan *Rights Issue* Bank di bulan Juni 2022, Bank kembali melakukan Aksi Korporasi yaitu

partners spread throughout Indonesia provides access to a wide range of banking services to various levels of society. This is also one of Bank's strategies as a digital bank with a limited network to continue to be able to provide optimal service and have a broad reach to customers, especially in the retail segment.

In 2022, Bank Aladin Syariah has also started distributing Sharia financing which begins with *Qardh* contract-based invoice financing targeting the MSME and Corporate segments. Furthermore, for the same segment Bank also launched a working capital financing product with a *Murabaha* contract. Financing for the retail segment has also started with the launch of a multipurpose Sharia financing product at the end of 2022. Until the end of 2022, Bank recorded a rapid growth in bank financing distribution reaching Rp. 1.38 trillion with the level of non-performing financing maintained at the level of 0.00%. This good financing growth is supported by the large potential coming from Bank's partner ecosystem.

Strong partnerships are one of the keys to Bank's business growth in 2022. Therefore, Bank continues to deepen cooperation with existing partners and continues to forge new partnerships. With Alfamart which is Bank's strategic partner, Bank has expanded collaboration to include marketing and branding cooperation, customer acquisition, channeling financing to the Alfamart ecosystem, and providing a support network for Bank cash withdrawal services at Alfamart outlets. In addition, in 2022 Bank has also succeeded in establishing various new partnerships. Among them, in 2022 Bank Aladin Syariah cooperates with Evermos, which is a Sharia-based e-commerce reseller. Through cooperation with Sharia-based partners, it is hoped that Bank Aladin Syariah can also support the growth of the Sharia economy in Indonesia. Furthermore, at the end of the year Bank also started a partnership with the Indonesian Football Association football club Bandung (PERSIB) which is known to have a very strong support base. In addition, Bank has also collaborated with several other partners who have been and will continue to be the engine of Bank's business development through partner-owned ecosystems.

Meanwhile, in order to support Bank's business growth in 2022 and to comply with applicable regulations, Bank strengthens capital through Corporate Rights Issue and Private Placement actions. Bank's Rights Issue process obtained an effective statement from the Financial Services Authority (OJK) through letter Number S-74/D.04/2022 dated April 28, 2022. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the accompanying financial statements. The results of our audit procedures, including the procedures performed to address the key audit matter below, provide the basis for our opinion on the accompanying financial statements.

Allowance for impairment losses on murabahah receivables and funds of qardh

Description of the key audit matter:

As described in Note 9 and 10 to the accompanying financial statements, as of December 31, 2022, the balance of allowance for impairment losses on murabahah receivables and funds of qardh were Rp30,282 million and Rp5,066 million. Refer to summary of significant accounting policies for allowance for impairment losses on murabahah receivables and funds of qardh as disclosed in Note 2c and use of significant accounting estimates and judgements in Note 3 to the accompanying financial statements. We focused on this area because the amount of allowance for impairment losses on murabahah receivables and funds of qardh are significant to the accompanying financial statements.

Hal audit utama (lanjutan)

Cadangan kerugian penurunan nilai atas piutang murabahah dan pembiayaan qardh (lanjutan)

Penjelasan atas hal audit utama: (lanjutan)

Penentuan cadangan kerugian penurunan nilai memerlukan pertimbangan dan memiliki ketidakpastian estimasi yang mencakup penentuan model untuk menghitung cadangan kerugian penurunan nilai, identifikasi eksposur kredit yang mengalami penurunan kualitas kredit yang signifikan, dan penentuan asumsi yang digunakan dalam model perhitungan cadangan kerugian penurunan nilai.

Respons audit:

Kami menguji pengendalian utama atas pemberian, serta pencatatan dan pengawasan piutang murabahah dan pinjaman qardh. Kami memperoleh pemahaman dan menilai metodologi pengukuran penurunan nilai, melakukan validasi model pencadangan kerugian penurunan nilai, data masukan, dasar, dan asumsi yang digunakan oleh Bank dalam menghitung cadangan kerugian penurunan nilai. Kami menguji piutang murabahah dan pinjaman qardh untuk mengevaluasi identifikasi eksposur yang mengalami penurunan kualitas kredit yang signifikan atau yang telah mengalami penurunan nilai secara tepat waktu oleh Bank. Kami memeriksa keakurasian perhitungan jumlah cadangan kerugian penurunan nilai dengan melakukan perhitungan ulang atas keseluruhan portofolio. Kami menilai apakah pengungkapan dalam laporan keuangan cukup dan secara memadai mencerminkan eksposur Bank terhadap risiko kredit. Kami melibatkan pakar auditor internal kami untuk membantu kami dalam melakukan prosedur-prosedur di atas ketika keahlian spesifik mereka diperlukan.

Key audit matters (continued)

Allowance for impairment losses on murabahah receivables and funds of qardh (continued)

Description of the key audit matter: (continued)

Determination of allowance for impairment losses requires judgement and is subject to estimation uncertainty which includes determining the model to calculate allowance for impairment losses, identification of credit exposures with significant deterioration in credit quality, and determining assumptions used in the allowance for impairment losses calculation models.

Audit response:

We tested the key controls over the origination, and recording and monitoring of the murabahah receivables and funds of qardh. We obtained understanding and assessed impairment measurement methodologies, performed validation of allowance for impairment losses models, inputs, bases, and assumptions used by the Bank in calculating the allowance for impairment losses. We tested murabahah receivables and funds of qardh to evaluate the timely identification by the Bank of exposures with significant deterioration in credit quality or exposures which have been impaired. We checked the accuracy of the calculation of the allowance for impairment losses amount by recalculating the impairment assessment for the entire portfolio. We assessed whether the financial statement disclosures are adequately and appropriately reflecting the Bank's exposures to credit risk. We involved our auditor's internal experts to assist us in the performance of the above procedures where their specific expertise was required.

Tanggung jawab manajemen dan pihak yang bertanggung jawab atas tata kelola terhadap laporan keuangan

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Dalam penyusunan laporan keuangan, manajemen bertanggung jawab untuk menilai kemampuan Bank dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha, dan menggunakan basis akuntansi kelangsungan usaha, kecuali manajemen memiliki intensi untuk melikuidasi Bank atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Bank.

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor independen yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit yang ditetapkan oleh IAPI akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan tersebut.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting, unless management either intends to liquidate the Bank or to cease its operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Our objectives are to obtain reasonable assurance about whether the financial statements taken as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing established by the IICPA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Tanggung jawab auditor terhadap audit atas laporan keuangan

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya suatu kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian atas pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Bank.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.

Auditor's responsibilities for the audit of the financial statements

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- *Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to such risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or override of internal control.*
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*

- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Bank untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor independen kami ke pengungkapan terkait dalam laporan keuangan atau, jika pengungkapan tersebut tidak memadai, memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor independen kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Bank tidak dapat mempertahankan kelangsungan usaha.
- Mengevaluasi penyajian, struktur, dan isi laporan keuangan secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also: (continued)

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our independent auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusion is based on the audit evidence obtained up to the date of our independent auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Kami menguraikan hal audit utama tersebut dalam laporan auditor independen kami kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal audit utama tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal audit utama tidak seharusnya dikomunikasikan dalam laporan auditor independen kami karena konsekuensi yang merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe such key audit matters in our independent auditor's report unless laws or regulations preclude public disclosure about such key audit matters or when, in extremely rare circumstances, we determine that a key audit matter should not be communicated in our independent auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

v. Employee Benefits (continued)

Sehubungan dengan program imbalan pasti, liabilitas diakui pada laporan posisi keuangan sebesar nilai kini kewajiban imbalan pasti pada akhir periode pelaporan dikurangi nilai wajar aset program. Kewajiban imbalan pasti dihitung setiap tahun oleh aktuaris yang independen dengan menggunakan metode *projected unit credit*. Nilai kini kewajiban imbalan pasti ditentukan dengan mendiskontokan arus kas keluar yang diestimasi dengan menggunakan tingkat bunga Obligasi Pemerintah (dikarenakan saat ini tidak ada pasar aktif untuk obligasi perusahaan yang berkualitas tinggi) yang didenominasikan dalam Rupiah dimana imbalan akan dibayarkan dan memiliki jangka waktu jatuh tempo mendekati jangka waktu kewajiban pensiun.

The liability recognized in the statement of financial position in respect to defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of Government Bonds (considering currently there is no active market for high-quality corporate bonds) that are denominated in Rupiah in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation.

Keuntungan dan kerugian aktuarial yang timbul dari penyesuaian dan perubahan dalam asumsi-asumsi aktuarial langsung diakui seluruhnya melalui penghasilan komprehensif lain pada saat terjadinya.

The liability recognized in the statement of Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

Biaya jasa lalu diakui segera dalam laporan laba rugi.

Past-service costs are recognized immediately in profit or loss.

Keuntungan dan kerugian dari kurtailmen atau penyelesaian program manfaat pasti diakui di laba rugi ketika kurtailmen atau penyelesaian tersebut terjadi.

Gains or losses on the curtailment or settlement of a defined benefit plan are recognized in profit or loss when the curtailment or settlement occurs.

Bank juga memberikan imbalan pasca kerja lainnya, seperti uang penghargaan dan uang pisah. Imbalan berupa uang penghargaan diberikan apabila karyawan bekerja hingga mencapai usia pensiun. Sedangkan imbalan berupa uang pisah, dibayarkan kepada karyawan yang mengundurkan diri secara sukarela, setelah memenuhi minimal masa kerja tertentu. Imbalan ini dihitung dengan menggunakan metodologi yang sama dengan metodologi yang digunakan dalam perhitungan program pensiun imbalan pasti.

The Bank also provides other post-employment benefits, such as service pay and separation pay. The service pay benefit is vested when the employees reach their retirement age. The separation pay benefit is paid to employees in the case of voluntary resignation, subject to a minimum number of years of service. w. Pajak Penghasilan

w. Income Tax

Beban pajak kini ditetapkan berdasarkan taksiran penghasilan kena pajak periode berjalan. Aset dan liabilitas pajak tangguhan diakui atas perbedaan temporer antara aset dan liabilitas untuk tujuan komersial dan untuk tujuan perpajakan setiap tanggal pelaporan. Manfaat pajak pada masa mendatang, seperti nilai terakumulasi atas saldo rugi fiskal yang belum digunakan, jika ada, juga diakui sejauh realisasi atas manfaat pajak tersebut dimungkinkan.

Current tax expense is provided based on the estimated taxable income for the current period. Deferred tax assets and liabilities are recognized for temporary differences between commercial and tax bases of assets and liabilities at each reporting date. Future tax benefit, such as the carry-forward of unused tax losses, if any, is also recognized to the extent that realization of such tax benefit is probable.

Aset dan liabilitas atas pajak tangguhan dan pajak kini dapat saling hapus apabila terdapat hak yang berkekuatan hukum untuk melakukan saling hapus.

Assets and liabilities on deferred tax and current tax can be offset if there is a legal enforceable right to offset.

Aset dan liabilitas pajak tangguhan diukur berdasarkan tarif pajak yang akan berlaku pada tahun saat aset direalisasikan atau liabilitas diselesaikan berdasarkan peraturan perpajakan yang berlaku atau yang telah secara substantif diberlakukan pada tanggal laporan posisi keuangan. Pengaruh pajak terkait dengan penyesuaian untuk dan/atau pembalikan seluruh perbedaan temporer selama tahun berjalan, termasuk pengaruh perubahan tarif pajak, diakui sebagai "Manfaat/(Beban) Pajak Penghasilan" dan termasuk dalam laba atau rugi neto tahun berjalan, kecuali untuk transaksi-transaksi yang sebelumnya telah langsung dibebankan ke penghasilan komprehensif lain dan dilaporkan ke ekuitas.

**3. PERTIMBANGAN, ESTIMASI DAN ASUMSI
AKUNTANSI SIGNIFIKAN**

Penyusunan laporan keuangan sesuai dengan Standar Akuntansi Keuangan di Indonesia mengharuskan manajemen untuk membuat pertimbangan, estimasi, dan asumsi yang mempengaruhi jumlah yang dilaporkan dalam laporan keuangan. Adanya unsur ketidakpastian yang melekat dalam melakukan estimasi dapat menyebabkan jumlah sesungguhnya yang dilaporkan pada periode yang akan datang berbeda dengan jumlah yang diestimasikan.

a. Pertimbangan dalam penerapan kebijakan akuntansi

Usaha yang berkelanjutan

Manajemen Bank telah melakukan penilaian atas kemampuannya untuk melanjutkan kelangsungan usahanya dan berkeyakinan bahwa Bank memiliki sumber daya untuk melanjutkan usahanya pada masa mendatang.

Selain itu, manajemen tidak mengetahui adanya ketidakpastian material yang dapat menimbulkan keraguan yang signifikan terhadap kemampuan Bank untuk melanjutkan kelangsungan usahanya. Oleh karena itu, laporan keuangan telah disusun atas dasar usaha yang berkelanjutan.

**3. SIGNIFICANT ACCOUNTING JUDGMENTS,
ESTIMATES AND ASSUMPTIONS**

The preparation of financial statements in conformity with Indonesian Financial Accounting Standards requires management to make judgments, estimates, and assumptions that affect amounts reported therein. Due to inherent uncertainty in making estimates, actual results reported in future periods may differ from those that have been estimated.

a. Judgment made in applying accounting policies

Going concern

The Bank's management has made an assessment of its ability to continue as a going concern and is satisfied that the Bank has the resources to continue its business in the foreseeable future.

Furthermore, the management is not aware of any material uncertainties that may cast significant doubt on the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

AKUNTANSI SIGNIFIKAN (lanjutan)**

**a. Pertimbangan dalam penerapan kebijakan
akuntansi (lanjutan)**

Nilai wajar atas instrumen keuangan

Bila nilai wajar aset keuangan dan liabilitas keuangan yang tercatat pada laporan posisi keuangan tidak tersedia di pasar aktif, nilainya ditentukan dengan menggunakan berbagai teknik penilaian termasuk penggunaan model matematika. Masukan untuk model ini berasal dari data pasar yang bisa diamati sepanjang data tersebut tersedia. Bila data pasar yang bisa diamati tersebut tidak tersedia, pertimbangan manajemen diperlukan untuk menentukan nilai wajar. Pertimbangan manajemen tersebut mencakup pertimbangan likuiditas dan masukan model seperti tingkat diskonto, tingkat pelunasan dipercepat, dan asumsi tingkat gagal bayar.

Pajak Penghasilan

Pertimbangan signifikan dilakukan dalam menentukan penyisihan atas pajak Bank. Bank menentukan penyisihan atas pajak penghasilan badan berdasarkan estimasi atas kemungkinan adanya tambahan beban pajak. Jika hasil akhir dari hal ini berbeda dengan jumlah yang dicatat semula, maka perbedaan tersebut akan berdampak pada laba rugi. Bank mengakui liabilitas atas pajak penghasilan badan berdasarkan estimasi penghasilan kena pajak badan (Catatan 2w).

b. Sumber utama ketidakpastian estimasi

Penurunan nilai aset keuangan

Bank menelaah kualitas aset pada setiap tanggal laporan posisi keuangan untuk menilai apakah penurunan harus dicatat dalam laporan laba rugi dan menghasilkan komprehensif lain. Dalam menentukan apakah penurunan nilai harus dibentuk dalam laporan laba rugi, Bank membuat estimasi penilaian apakah terdapat indikasi penurunan kualitas aset. Estimasi tersebut didasarkan pada asumsi dari sejumlah faktor dan hasil akhirnya mungkin berbeda, yang mengakibatkan perubahan pada masa mendatang atas cadangan penurunan nilai.

**3. SIGNIFICANT ACCOUNTING JUDGMENTS,
ESTIMATES AND ASSUMPTIONS (continued)**

**a. Judgment made in applying accounting

Fair value of financial instruments

When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The inputs to these models are derived from observable market data where possible, but when observable market data are not available, management's judgment is required to establish fair values. The management's judgment include considerations of liquidity and model inputs such as discount rates, early payment rates and default rate assumptions.

Income Tax

Significant judgment is involved in determining the provision for tax. The Bank provides tax provision based on estimates whether the additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the profit and loss. The Bank recognizes liabilities for expected corporate income tax issues based on estimates of corporate taxable income (Note 2w).

b. Key sources of estimation uncertainty

Impairment losses on financial assets

The Bank reviews the quality of its assets at each statement of financial position date to assess whether an impairment loss should be recorded in the statement of profit or loss and other comprehensive income. In determining whether an impairment loss should be recorded in the statement of profit or loss, the Bank makes an assessment whether there is any indication of impairment in the quality of the assets. These estimates are based on assumptions of several factors and actual results may differ, resulting in future changes to the allowance for impairment.

**b. Sumber utama ketidakpastian estimasi
(lanjutan)**

Penurunan nilai aset non-keuangan

Penurunan nilai muncul saat nilai tercatat aset atau Unit Penghasil Kas ("UPK") melebihi nilai terpulihnya, yaitu yang lebih besar antara nilai wajar dikurangi biaya yang menjual dan nilai pakainya.

Nilai wajar dikurangi biaya untuk menjual didasarkan pada ketersediaan data dari perjanjian penjualan yang mengikat yang dibuat dalam transaksi normal atas aset serupa atau harga pasar yang dapat diamati dikurangi dengan biaya tambahan yang dapat diatribusikan dengan pelepasan aset.

Nilai pakai ditentukan dengan menggunakan estimasi arus kas masa depan yang didiskontokan ke nilai sekarang dengan menggunakan tingkat diskonto sebelum pajak yang mencerminkan penilaian pasar saat ini terhadap nilai kas kini dan risiko spesifik terhadap aset tersebut. Estimasi nilai yang dapat terulihkan tersebut didasarkan pada asumsi dari sejumlah faktor dan hasil akhirnya mungkin berbeda, yang mengakibatkan perubahan pada masa mendatang atas cadangan penurunan nilai.

Aset pajak tangguhan

Aset pajak tangguhan diakui apabila terdapat kemungkinan besar bahwa jumlah laba fiskal pada masa datang akan memadai untuk mengkompensasi perbedaan temporer yang menimbulkan aset pajak tangguhan tersebut. Justifikasi manajemen diperlukan untuk menentukan jumlah aset pajak tangguhan yang dapat diakui, sesuai dengan waktu yang tepat, dan tingkat laba fiskal pada masa mendatang sejalan dengan strategi rencana perpajakan ke depan (Catatan 2w).

Penyisihan imbalan kerja karyawan

Penyisihan imbalan kerja karyawan ditentukan berdasarkan perhitungan dari aktuaria. Perhitungan aktuaria menggunakan asumsi-asumsi seperti tingkat diskonto, tingkat pengembalian investasi, tingkat kenaikan gaji, tingkat kematian, tingkat pengunduran diri, dan lain-lain (Catatan 2v). Karena imbalan kerja tersebut memiliki sifat jangka panjang, maka perkiraan tersebut memiliki ketidakpastian yang signifikan.

**3. SIGNIFICANT ACCOUNTING JUDGMENTS,
ESTIMATES AND ASSUMPTIONS (continued)**

**b. Key sources of estimation uncertainty
(continued)**

Impairment losses on non-financial assets

An impairment exists when the carrying value of an asset or Cash Generating Unit ("CGU") exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use.

The fair value less costs to sell calculation is based on available data from the binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing the asset.

Value in use is determined using the estimated future cash flows which are discounted using a pre-tax discount rate that reflects current market assessment of the time value of money and the risk specific to the assets. These estimates of recoverable amount are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the allowance for impairment.

Deferred tax assets

Deferred tax assets are recognized to the extent that it is probable that future taxable profit will be available to compensate the temporary differences which result in such deferred tax assets. Management's judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing on level of future taxable income together with future tax planning strategies (Note 2w).

Provision for employee benefits

Provision for employee benefits programs is determined based on actuarial valuation. The actuarial valuation involves assumptions such as discount rate, expected rate of returns on investments, future salary increases, mortality rate, resignation rates and others (Note 2v). Due to the long-term nature of these employee benefits, such estimates are subject to significant uncertainty.

Umur ekonomis aset tetap dan perangkat lunak

Manajemen Bank memperkirakan masa manfaat aset tetap dan perangkat lunak berdasarkan periode dimana aset diharapkan akan tersedia untuk digunakan. Masa manfaat ekonomis aset tetap dan aset tidak berwujud ditinjau secara berkala dan diperbaharui jika memiliki ekspektasi yang berbeda dari perkiraan sebelumnya, karena kerusakan secara fisik dan teknis, atau keusangan secara komersial dan legal atau batasan lainnya atas penggunaan aset tersebut (Catatan 2i dan 2j).

Menentukan jangka waktu kontrak - Bank sebagai lessee

Bank menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, bersama dengan periode yang dicakup oleh opsi untuk memperpanjang masa sewa jika dipastikan akan dilaksanakan.

Bank memiliki kontrak sewa yang mencakup opsi perpanjangan jangka waktu sewa. Bank menerapkan penilaian dalam mengevaluasi apakah dapat dipastikan jika akan menggunakan opsi untuk memperpanjang sewa. Hal tersebut dilakukan dengan mempertimbangkan seluruh fakta dan keadaan yang relevan yang memberikan insentif ekonomi untuk melakukan perpanjangan sewa. Setelah tanggal dimulainya, Bank menilai kembali masa sewa, jika terdapat peristiwa atau perubahan signifikan dalam keadaan yang berada dalam kendali dan mempengaruhi apakah lessee cukup pasti untuk mengeksekusi opsi memperpanjang sewa.

4. KAS

Kas yang dimiliki seluruhnya dalam mata uang Rupiah. Pada tanggal 31 Desember 2022 dan 2021, Bank memiliki saldo kas masing-masing sebesar Rp651 dan Rp224.

Pada tanggal 31 Desember 2022 dan 2021, Bank telah mengasuransikan *cash in safe* dan *cash in transit* kepada PT Asuransi Central Asia Syariah, pihak ketiga, dengan nilai pertanggungan masing-masing sebesar Rp1.500 dan Rp1.000 yang menurut pendapat manajemen cukup untuk menutup kemungkinan kerugian atas risiko yang ada.

Economic life of fixed assets and software

The Bank's Management estimates the useful lives of fixed assets and software based on the period over which the assets are expected to be available for use. The useful life of each item is reviewed periodically and updated if expectations differ from previous estimates due to physical and technical or commercial obsolescence and legal or other limits on the used of the asset (Note 2i and 2j).

Determine the term of the contract - the Bank is the lessee

The Bank determines the lease term as the term of the lease that non-cancellable, along with the period covered by the option to extend the lease if it is certain to be exercised.

The Bank has lease contracts which include an option to extend the lease term. The Bank applies its judgment in evaluating whether it can be ascertained if it will exercise the option to extend the lease. This is done by considering all relevant facts and circumstances that provide economic incentives to extend the lease. After the commencement date, the Bank reassesses the lease term, if there is a significant event or change in circumstances which is under its control and affects whether the lessee is certain enough to exercise the option to extend the lease.

4. CASH

Cash was all denominated in Rupiah. As of December 31, 2022 and 2021, the Bank's cash amounted to Rp651 and Rp224, respectively.

As of December 31, 2022 and 2021, the Bank has insured cash in safe and cash in transit to PT Asuransi Central Asia Syariah, a third party, under blanket policies amounting to Rp1,500 and Rp1,000, respectively, which management believes is adequate to cover possible losses arising from such risks.

15. PERPAJAKAN (lanjutan)

c. Rekonsiliasi Tarif Pajak Efektif (lanjutan)

Perhitungan taksiran penghasilan kena pajak untuk tahun yang berakhir pada tanggal 31 Desember 2022 di atas digunakan sebagai dasar pengisian Surat Pemberitahuan (SPT) Tahunan 2022.

Perhitungan pajak penghasilan badan untuk tahun yang berakhir tanggal 31 Desember 2021 adalah sesuai dengan SPT Tahunan Bank.

Pada tanggal 7 Oktober 2021, Pemerintah Republik Indonesia mengesahkan Undang-Undang (UU) Harmonisasi Peraturan Perpajakan (HPP). Dalam UU HPP tersebut ditetapkan tarif PPH Badan sebesar 22% untuk tahun pajak 2022 dan seterusnya.

Sesuai dengan Peraturan tersebut, Bank telah menghitung pajak penghasilan badan untuk tahun yang berakhir pada tanggal 31 Desember 2022 dan 2021 menggunakan tarif pajak 22%.

d. Aset pajak tangguhan

Aset dan liabilitas pajak tangguhan berasal dari perbedaan temporer pengakuan antara pelaporan komersial dan pajak serta rugi fiskal.

Manfaat yang diperoleh dari aset pajak tangguhan yang diakui Bank tergantung pada adanya penghasilan kena pajak yang lebih besar dari pembalikan perbedaan temporer yang bisa dikurangkan pada masa yang akan datang.

Pada tanggal 31 Desember 2022 dan 2021, manajemen tidak mengakui aset pajak tangguhan karena tidak terdapat bukti yang memadai bahwa aset pajak tangguhan tersebut dapat diutilisasi.

e. Informasi lainnya

Tahun pajak 2018

Pada tanggal 4 Juli 2019, Bank menerima Surat Pemberitahuan Pemeriksaan Lapangan No. S-0800/WPJ.07/KP.0600/2019 tentang pemeriksaan lapangan untuk semua jenis pajak untuk tahun pajak 2018. Dari hasil pemeriksaan yang telah dilakukan, pada tanggal 24 April 2020, Bank menerima Surat Ketetapan Pajak ("SKP") lebih bayar sebesar Rp33.758 (Catatan 11) (sebelumnya Bank melaporkan rugi fiskal sebesar Rp115.000) dan SKP kurang bayar atas pajak lainnya sebesar Rp489.

15. TAXATION (continued)

c. Reconciliation of Effective Tax Rate (continued)

Calculation of estimated taxable income for the year ended December 31, 2022 above, was used as the basis for the amounts reported in the Bank's annual tax returns for 2022.

The calculations of income tax for the year ended December 31, 2021 conform to the Bank's Annual Tax Return.

On October 7, 2021, the Government of the Republic of Indonesia ratified the Harmonization of Tax Regulations (HPP) Law. In the HPP Law, the corporate income tax rate is set at 22% for the fiscal year 2022 and beyond.

In accordance with the Regulation, the Bank has calculated its corporate income tax for the year ended December 31, 2022 and 2021 using the tax rate of 22%.

d. Deferred tax assets

Deferred tax assets and liabilities are originated from temporary differences between commercial and tax reporting and fiscal loss.

The utilization of deferred tax assets recognized by the Bank depends on future availability of taxable income against which the deferred tax assets will be realized.

As of December 31, 2022 and 2021, management did not recognize deferred tax assets due to insufficient evidence that it is probable that the deferred tax assets can be realized.

e. Other information

Fiscal year 2018

On July 4, 2019, the Bank received a Field Inspection Notification Letter No. S-0800/WPJ.07/KP.0600/2019 regarding field inspections for all taxes for the 2018 fiscal year. From the results of the audit that was carried out, on April 24, 2020 the Bank received an overpayment of Tax Assessment Letter ("SKP") amounting to Rp33,758 (Note 11) (previously the Bank reported fiscal loss amounting to Rp115,000) and an underpayment SKP for other taxes amounting to Rp489.

34. MANAJEMEN RISIKO (lanjutan)

Profil Risiko (lanjutan)

b. Pengelolaan Risiko Pasar

Risiko pasar merupakan risiko yang timbul karena adanya pergerakan faktor pasar dari portofolio yang dimiliki oleh Bank, yang dapat merugikan Bank (*adverse movement*). Yang dimaksud dengan faktor pasar adalah suku bunga (imbal hasil) dan nilai tukar. Risiko pasar melekat pada hampir seluruh kegiatan dan aktivitas Bank baik di *banking books* maupun di *trading books*.

Risiko pasar dikelola melalui kebijakan yang komprehensif dan kerangka limit untuk mengukur dan memonitor nilai risiko berdasarkan tingkat risiko yang akan diambil (*risk appetite*) oleh Bank.

1. Pemantauan atas pergerakan nilai tukar telah dilakukan secara cermat dan *real time* sehingga Bank dapat mengelola portofolio mata uang asing pada kondisi yang paling kondusif bagi Bank. Secara bertahap Bank akan mengurangi eksposur mata uang asing sejalan dengan perubahan bisnis Bank.
2. Melakukan pemantauan dan pengukuran risiko pasar termasuk pemantauan limit dealer (limit utilisasi dan batas kerugian transaksi) yang dijalankan oleh unit kerja treasury.
3. Selain pergerakan nilai tukar, Bank juga menghadapi risiko pasar dari perubahan tingkat imbal hasil pasar. Risiko imbal hasil Bank terutama terdapat pada posisi *banking book* (*rate of return in the banking book*). Bank mengelola risiko suku bunga dengan menggunakan pendekatan *gap repricing* sebagai dasar untuk menghitung *Earning-at-Risk* yang dapat memberikan dampak *rate of return changes* terhadap pendapatan Bank dalam jangka pendek.
4. Melakukan perhitungan stress test risiko pasar secara berkala.

34. RISK MANAGEMENT (continued)

Risk Profile (continued)

b. Market Risk Management

Market risk is the risk arising from movement in market variables in portfolios held by the Bank that could incur losses for the Bank (*adverse movement*). Market variables are defined as interest rates (*rate of return risk*) and exchange rates. Market risk is inherent in most of the Bank's operating positions and activities, in the *banking books* and in the *trading books*.

Market risk is managed through a comprehensive policy and limit framework to measure and monitor the amount of risk based on *risk appetite* of the Bank.

1. The Bank monitors exchange rate movements on a real time basis so that the Bank can manage foreign currency portfolio on the favourable condition. Bank gradually reduces the exposure of foreign currency to be in line with the changes of Bank's business.
2. Monitoring and measuring market risk including monitoring dealer limits (*utilization limits and transaction loss limits*) carried out by the treasury work unit.
3. In addition to the movement of exchange rate, the Bank is also exposed to market risks from changes in the market rate of return. The rate of return risk of the Bank mainly is on the *banking book* (*rate of return in the banking book*). The Bank manages its rate of return risk through the use of *repricing gap* as a basis to calculate *Earning-at-Risk* (EAR) that can provide insight on the impact of rate of return changes to the Bank's earnings in short-term.
4. Conduct regular market risk stress test calculations.

c. Pengelolaan risiko likuiditas

Risiko likuiditas adalah risiko yang disebabkan antara lain oleh ketidakmampuan Bank dalam memenuhi kewajiban yang telah jatuh tempo. Risiko likuiditas merupakan salah satu risiko utama yang dihadapi Bank yang harus dikelola secara berkesinambungan.

Risiko likuiditas timbul akibat adanya ketidaksesuaian jatuh tempo antara liabilitas dan tagihan/pembiayaan yang dimiliki Bank. Hal ini dikarenakan pada umumnya Bank memiliki pendanaan dalam jangka pendek dan menyalurkannya ke dalam pembiayaan dengan jangka waktu yang lebih panjang.

Likuiditas dikelola dan di monitor berdasarkan arus kas untuk memastikan kecukupan sumber dana dalam memenuhi liabilitas keuangan dan kewajiban regulator berdasarkan normal bisnis proses dan skenario *stress*. Analisis kesenjangan likuiditas dan *monitoring* terhadap indikator likuiditas telah diterapkan untuk memberikan informasi tambahan dalam mengelola posisi risiko likuiditas. Sumber dana terdiversifikasi untuk meminimalkan konsentrasi pendanaan. Rencana pendanaan darurat likuiditas telah disusun untuk mempersiapkan Bank jika terjadi krisis likuiditas.

c. Liquidity risk management

Liquidity risk is a risk caused among others by the inability of the Bank to meet its obligation associated with financial liabilities at due date. Liquidity risk is one of major concerns for the Bank that must be managed on an on-going basis.

Liquidity risk arises when there is a timing difference between the maturity of the Bank's liabilities and loan/financing. This is due to the short-term nature of the funds obtained by the Bank whereas the Bank uses these funds to finance loans granted to customers which are usually for a longer period of time.

Liquidity is managed and monitored on a cash flow basis to ensure that sufficient sources of funding is available to meet financial and regulatory obligations under business-as-usual (BAU) and stress scenarios. Liquidity gap analysis and monitoring on liquidity indicators have been implemented to serve as supplementary information in managing liquidity risk position. Sources of funding are diversified to minimize funding concentration. Liquidity contingency plan is in place to prepare the Bank in the case of a liquidity crisis.
