**Alhamdulillah Rabbil 'Aalamin, Wa Shalatu Wa Salamu 'Ala Nabiyyina Muhammad,
Wa 'Ala Aalihi Wa Shahbihi Wa Sallam, Amma Ba'du.**

Segala puji bagi Allah SWT yang telah melimpahkan rahmat dan hidayah-Nya kepada kita semua. Shalawat serta salam selalu tercurah dan kita panjatkan kepada junjungan kita Nabi Muhammad SAW.

Para Pemegang Saham dan Pemangku Kepentingan yang Terhormat,

Sebagai institusi keuangan berbasis syariah, PT Bank Mega Syariah menyadari sepenuhnya bahwa sebagai makhluk-Nya kita diwajibkan untuk berkarya sebaik-baiknya. Apa yang kita kerjakan hari ini sesungguhnya merupakan fondasi untuk membangun hari esok yang lebih cerah. Islam mengajarkan setiap Mukmin untuk senantiasa berlomba-lomba dalam kebaikan, tak terkecuali dalam menjalankan kegiatan usaha. Bank Mega Syariah selaku bank yang menjalankan prinsip hukum Islam, turut berupaya mengamalkan kebaikan di setiap langkah sepak terjang dalam berbisnis.

Dengan segala ikhtiar yang telah diupayakan di sepanjang tahun 2024, Bank mampu menjaga posisinya sebagai salah satu bank syariah yang dipercaya oleh nasabah. Ke depan, Dewan Pengawas Syariah (DPS) optimis bahwa Bank dapat terus tumbuh secara sehat dan memberikan nilai tambah bagi nasabah dan pemangku kepentingan lainnya.

Fungsi Pengawasan dan Kinerja Syariah

Pelaksanaan kegiatan DPS sepanjang tahun 2024 merupakan kegiatan yang konsisten dan berkelanjutan dari tahun 2023 dan tahun-tahun sebelumnya. Dijalankan dengan penuh kesungguhan dan tanggung jawab sebagai bagian dari upaya mencapai visi perusahaan yaitu "Tumbuh dan Sejahtera Bersama Bangsa". Secara khusus, DPS juga berperan dalam mewujudkan misi-misi Bank sebagai institusi yang berinovasi mengembangkan produk dan layanan terbaik, berlandaskan prinsip syariah, sesuai kebutuhan masyarakat.

Kami yakin Bank Mega Syariah akan semakin berkembang dan tumbuh lebih pesat dengan tetap berpegang teguh pada prinsip-prinsip syariah. Pada praktik operasionalnya, pelaksanaan pengawasan penerapan prinsip syariah oleh DPS dijalankan sejak sebuah produk dan/atau layanan di Bank masih dalam proses perancangan. DPS telah terlibat dalam perumusannya sehingga produk dan/atau layanan yang ditawarkan kepada publik telah terpenuhi secara prinsip syariah.

All praise be to Allah SWT who has bestowed His mercy and guidance upon us all. Shalawat and salam be always poured out and we offer them to our master, the Prophet Muhammad SAW.

Dear Shareholders and Stakeholders,

As a sharia-based financial institution, PT Bank Mega Syariah fully realizes that as His creatures we are required to work as well as possible. In actuality, our actions today convey the foundation for creating a better tomorrow. Every believer in Islam is taught to always strive for goodness, including when conducting business. In addition to adhering to Islamic law, Bank Mega Syariah strives to conduct business with integrity and goodness at all times.

With all the efforts that have been made throughout 2024, the Bank has been able to maintain its position as one of the sharia banks trusted by customers. In the future, the Sharia Supervisory Board is optimistic that the Bank can continue to grow healthily and provide added value to customers and other stakeholders.

Sharia Supervision and Performance Function

The implementation of Sharia Supervisory Board (DPS) activities throughout 2024 is a consistent and ongoing activity from 2023 and previous years. Carried out with full sincerity and responsibility as part of efforts to achieve the company's vision, namely "Grow and Prosper Together with the Nation". Specifically, Sharia Supervisory Board also plays a role in realizing the Bank's missions as an institution that innovates in developing the best products and services, based on sharia principles, according to the needs of the community.

We are confident that Bank Mega Syariah will continue to develop and grow more rapidly by adhering to sharia principles. In its operational practice, the implementation of supervision of the application of sharia principles by Sharia Supervisory Board has been carried out since a product and/or service at the Bank was still in the design process. The Sharia Supervisory Board has been involved in its formulation so that the products and/or services offered to the public have been met in accordance with sharia principles.

Berdasarkan kinerja di tahun 2024, Bank Mega Syariah telah mencapai beberapa indikator pertumbuhan bank secara baik dibandingkan dengan target Rencana Bisnis Bank yang telah ditetapkan di tahun 2024.

DPS menilai operasi dan produk yang ditawarkan oleh Perseroan telah sesuai dengan prinsip-prinsip syariah. Hal ini termasuk pemeriksaan kontrak, transaksi, dan produk keuangan yang ditawarkan. Di sisi lain, meskipun fokus utama DPS adalah kepatuhan syariah, kami menilai bahwa kinerja keuangan juga merupakan salah satu faktor penting. Dalam hal ini, DPS juga turut berperan dalam memberikan analisis tentang bagaimana kinerja keuangan Perseroan dapat mempengaruhi keberlanjutan dan pertumbuhan jangka panjang. DPS juga memperhatikan isu-isu yang muncul sepanjang tahun, seperti perubahan regulasi atau tantangan dalam pasar, dan bagaimana Perseroan merespons hal tersebut.

Berdasarkan pantauan DPS, Bank telah berhasil melakukan pengembangan teknologi digital untuk meningkatkan layanan perbankan syariah, khususnya dalam hal pengembangan fitur di aplikasi *mobile banking* M-Syariah. Bank juga telah melakukan diversifikasi secara baik yaitu dengan mengembangkan portofolio yang lebih beragam dengan fokus pada sektor-sektor yang sesuai dengan prinsip syariah seperti sektor pendidikan, kesehatan, perdagangan, konstruksi, dan jasa lainnya.

DPS juga memberikan apresiasi terhadap kebijakan strategis Manajemen Bank dalam mengintegrasikan prinsip keberlanjutan dalam setiap aspek operasional dan strategi bisnis, termasuk investasi yang mendukung tujuan pembangunan berkelanjutan sesuai dengan prinsip syariah.

Secara umum, DPS menilai bahwa inisiatif-inisiatif yang telah dibangun oleh Dewan Komisaris dan Direksi sudah tepat dan diharapkan dapat merespons dinamika ekonomi dan industri yang terus berubah, serta memastikan pertumbuhan yang berkelanjutan dan sesuai dengan prinsip syariah. Bank senantiasa mengimplementasikan praktik manajemen risiko yang baik disertai dengan berbagai pencegahan dan mitigasi risiko yang memadai.

Pengawasan Tata Kelola Syariah

Di tahun 2024, DPS melakukan pengawasan terhadap proses pengembangan produk atau aktivitas baru, menilai kualitas pelaksanaan pemenuhan prinsip syariah secara langsung melalui kegiatan kunjungan lapangan dengan mekanisme Uji Petik, mengkaji laporan yang disampaikan oleh dan/atau yang diminta dari Direksi, termasuk laporan pelaksanaan fungsi audit internal dan/atau fungsi kepatuhan untuk mengetahui kualitas pelaksanaan pemenuhan prinsip syariah atas kegiatan penghimpunan dana dan penyaluran dana serta pelayanan jasa Bank.

Based on its performance in 2024, Bank Mega Syariah has outperformed the Bank's Business Plan target set for 2024 in a number of bank growth indicators.

According to the Sharia Supervisory Board, the operations and products offered by the Company are in accordance with sharia principles. This includes examining contracts, transactions, and financial products offered. However, we believe that financial performance is also a significant consideration, even if the Sharia Supervisory Board's priority is sharia compliance. In this case, the Sharia Supervisory Board also contributes by offering analysis on the potential effects of the company's financial performance on long-term growth and sustainability. Sharia Supervisory Board also pay attention to issues that arise throughout the year, such as changes in regulations or challenges in the market, and how the Company responds to them.

Based on the Sharia Supervisory Board monitoring, the Bank has succeeded in developing digital technology to improve sharia banking services, especially in terms of developing features in the M-Syariah mobile banking application. The Bank has also effectively diversified through the development of a more varied portfolio with an emphasis on industries that are in accordance with sharia principles, such as trade, construction, education, health, and other services.

The Sharia Supervisory Board also values the Bank Management's strategic approach to incorporating sustainability principles into all facets of operations and business plans, including investments that promote sharia-compliant sustainable development goals.

In general, the Sharia Supervisory Board evaluates that the projects developed by the Board of Commissioners and Directors are appropriate and are expected to address the constantly shifting economic and industry dynamics while ensuring sustainable growth in accordance with sharia principles. The Bank continues to implement good risk management practices along with a number of suitable risk mitigation and prevention strategies.

Supervision of Sharia Governance

In 2024, the Sharia Supervisory Board oversees the process of creating new products or activities. They also conduct field visits with a Spot Check mechanism to evaluate the implementation of sharia principles and review reports that the Board of Directors has requested or submitted, including reports on the implementation of internal audit and/or compliance functions to evaluate the quality of the implementation of sharia principles for fundraising and fund distribution activities as well as the Bank's service delivery,

DPS menilai bahwa penerapan *Good Corporate Governance* (GCG) Bank telah sejalan dengan prinsip-prinsip syariah. Hal ini mencakup integritas, transparansi, dan akuntabilitas dalam setiap praktik bisnis yang dilakukan. Sementara itu, struktur organisasi manajemen juga telah mendukung penerapan GCG yang efektif. Ini termasuk kejelasan dalam pembagian tugas dan tanggung jawab di antara Dewan Komisaris, Direksi, dan DPS. Kami juga telah melakukan evaluasi terhadap kualitas dan keterbukaan informasi yang disampaikan oleh manajemen kepada pemangku kepentingan, termasuk laporan kepatuhan syariah. Di sisi lain, DPS menilai sistem pengawasan internal yang ada, termasuk efektivitas audit internal dan mekanisme kontrol yang diterapkan untuk mencegah praktik yang tidak sesuai dengan syariah, juga telah berjalan dengan baik.

Di sisi lain, Bank telah mengimplementasikan rekomendasi-rekomendasi yang diberikan regulator sehingga Bank senantiasa menjalankan praktik bisnisnya sesuai arahan, ketentuan, dan rekomendasi dari regulator yang berlandaskan prinsip syariah.

DPS juga melihat sejauh mana komitmen manajemen dalam mengintegrasikan aspek keberlanjutan dan tanggung jawab sosial dalam praktik GCG, sebagai bagian dari komitmen terhadap nilai-nilai syariah. Berdasarkan evaluasi ini, DPS senantiasa memberikan rekomendasi atau umpan balik untuk meningkatkan penerapan GCG di masa mendatang, guna memastikan bahwa Bank tetap beroperasi dengan baik dan sesuai dengan prinsip-prinsip syariah.

Prospek Ke Depan

Menyambut tahun 2025, DPS menilai bahwa iklim perekonomian masih tak lepas dari tantangan ketidakpastian. Untuk itu, Kami harap Bank mampu menghadirkan kepatuhan syariah yang kuat karena hal tersebut mempengaruhi reputasi dan kepercayaan nasabah. Semakin baik kepatuhan, semakin besar kemungkinan pertumbuhan. Prospek bisnis juga bergantung pada kemampuan Perseroan untuk mengembangkan produk dan layanan baru yang sesuai dengan kebutuhan pasar dan prinsip syariah. Inovasi dapat menarik lebih banyak nasabah.

Di sisi lain, DPS juga mempertimbangkan kondisi ekonomi dan tren industri, termasuk permintaan untuk layanan keuangan syariah, yang diperkirakan akan terus tumbuh, terutama di pasar yang sensitif terhadap nilai-nilai syariah. Evaluasi kinerja keuangan saat ini dan proyeksi pertumbuhan yang realistis akan menjadi faktor penting dalam menilai prospek. DPS akan memantau indikator kinerja utama untuk memastikan keberlanjutan yang sesuai dengan prinsip syariah.

The Sharia Supervisory Board states that the implementation of Good Corporate Governance (GCG) of the Bank is in line with sharia principles. This includes integrity, transparency, and accountability in every business practice carried out. Meanwhile, the organizational structure of management has also supported the implementation of effective GCG. This includes clarity in the division of duties and responsibilities among the Board of Commissioners, Board of Directors, and The Sharia Supervisory Board. We have also evaluated the quality and transparency of information submitted by management to stakeholders, including sharia compliance reports. On the other hand, The Sharia Supervisory Board assessed that the existing internal supervision system, including the effectiveness of internal audits and control mechanisms implemented to prevent practices that are not in accordance with sharia, has also been running well.

On the other hand, the Bank has implemented the regulator's recommendations into practice, ensuring that it consistently conducts business in line with its guidelines, regulations, and recommendations based on sharia principles.

As part of its dedication to sharia values, the Sharia Supervisory Board also considers how committed management is to incorporating social responsibility and sustainability into GCG operations. Based on this evaluation, The Sharia Supervisory Board always provides recommendations or feedback to improve the implementation of GCG in the future, to ensure that the Bank continues to operate well and in accordance with sharia principles.

Future Prospects

Welcoming 2025, the Sharia Supervisory Board considers that the economic climate is still not free from the challenges of uncertainty. Therefore, we hope that the Bank is able to present strong sharia compliance because it affects the reputation and trust of customers. The better the compliance, the greater the potential for growth. Business prospects also depend on the Company's ability to develop new products and services that are in accordance with market needs and sharia principles. Innovation can attract more customers.

On the other hand, the Sharia Supervisory Board also considers economic conditions and industry trends, including the demand for sharia financial services, which are expected to continue to grow, especially in markets that are sensitive to sharia values. Evaluation of current financial performance and realistic growth projections will be important factors in assessing prospects. The Sharia Supervisory Board will monitor key performance indicators to ensure sustainability in accordance with sharia principles.

Kami berharap agar segenap Manajemen Bank senantiasa waspada dalam mengidentifikasi dan mengelola risiko, termasuk risiko syariah, yang tentunya berpengaruh pada prospek jangka panjang. Selain itu, fokus pada keberlanjutan dan tanggung jawab sosial juga dapat meningkatkan daya tarik Perseroan di mata nasabah dan investor, serta memberikan kontribusi positif bagi masyarakat. DPS melihat peluang kolaborasi dengan institusi lain yang dapat mendukung pengembangan usaha dan memperluas jaringan masih sangat terbuka di tahun 2025. Hal ini selaras dengan pemanfaatan teknologi dalam layanan keuangan atau digitalisasi yang akan menjadi kunci untuk mendukung peningkatan penetrasi pasar dan memberikan kemudahan bagi nasabah.

Secara keseluruhan, DPS memandang prospek bisnis Perseroan di tahun 2025 masih penuh dengan optimisme jika manajemen mampu mengatasi tantangan dan memanfaatkan peluang yang ada, sambil tetap berpegang pada prinsip syariah yang menjadi landasan operasional.

Akhir kata, Saya mewakili segenap Dewan Pengawas Syariah mengucapkan terima kasih dan apresiasi yang sebesar-besarnya kepada seluruh jajaran Pemegang Saham, Dewan Komisaris, Direksi, Pegawai, Regulator, serta seluruh pemangku kepentingan lainnya yang telah memberikan dukungannya kepada Bank. Mari secara bersama-sama kita dorong Bank semakin berkembang dengan lebih banyak penyempurnaan yang dalam hal ini termasuk juga dari penerapan prinsip Syariah. Semoga kita juga selalu berada dalam taufik dan hidayah serta inayah-Nya untuk dapat mencapai kesuksesan di dunia maupun di akhirat kelak dan kepada-Nya kita selalu berserah diri. Semoga Allah SWT meridhoi segala upaya baik kita dan mendapatkan petunjuk dalam melaksanakannya. *Aamiin ya Robbal 'Alamin*

We hope that all Bank Management would remain alert in detecting and managing risks, including sharia risks, which of course affect long-term prospects. Furthermore, a focus on social responsibility and sustainability can improve the company's appeal to investors and consumers while simultaneously making a beneficial impact on society. The Sharia Supervisory Board sees opportunities for collaboration with other institutions that can support business development and expand networks are still very open in 2025. This is in line with the use of technology in financial services or digitalization which will be the key to supporting increased market penetration and providing convenience for customers.

Overall, DPS is optimistic about the company's business prospects in 2025, if management can overcome obstacles and seize opportunities while upholding the sharia principles that form the foundation of operations.

Finally, I, on behalf of the entire Sharia Supervisory Board, would like to express my deepest gratitude and appreciation to all levels of Shareholders, the Board of Commissioners, the Board of Directors, Employees, Regulators, and all other stakeholders who have provided their support to the Bank. Let us together encourage the Bank to grow further with more improvements, which in this case also includes the implementation of Sharia principles. May we also always be in His guidance and guidance to be able to achieve success in this world and in the hereafter and to Him we always surrender. May Allah SWT bless all our good efforts and receive guidance in carrying them out. *Aamiin ya Robbal 'Alamin*

Dear Shareholders and Stakeholders,

With praise and gratitude to Allah SWT, allow me to represent the entire Board of Commissioners in submitting a report on the performance of PT Bank Mega Syariah for the 2024 financial year. We are proud to be part of the Bank's performance in carrying out the task of supervising the policies and management carried out by the Board of Directors and providing advice to the Board of Directors on the management of the Bank.

The 2024 Annual Report's release demonstrates the Bank's dedication to enforcing responsibility and accountability to shareholders and other stakeholders. We can convey that the Company's financial statements have been audited by an independent auditor, Public Accountant Amir Abadi Jusuf, Aryanto, Mawar & Rekan and received an opinion of "Fair Without Exceptions (WTP)".

Implementation of the Board of Commissioners' Supervisory Function

Throughout 2024, the Board of Commissioners periodically supervised and monitored the Bank's compliance function to ensure the Bank's level of compliance with relevant regulations, that tasks were being carried out effectively, and that other compliance culture-building initiatives were being carried out. Meanwhile, the Bank also periodically measured the achievement of performance targets that have been implemented by the Board of Directors, through an assessment of each member of the Board of Directors based on performance assessment indicators.

The Board of Commissioners continues to supervise compliance with sharia principles, including the implementation of policies that have been set to adhere to sharia principles and not violate applicable rules and regulations. Supervision is also carried out in terms of product and service innovation, where the Board of Commissioners monitors and evaluates the performance of the Board of Directors in developing new products and services that can meet market needs.

Dewan Komisaris melalui Komite Audit, Komite Pemantau Risiko, serta Komite Remunerasi dan Nominasi menyelenggarakan rapat rutin untuk membahas temuan, risiko bisnis, dan pembahasan terkait kepegawaian sehingga dapat mencapai kesimpulan dalam bentuk saran yang kemudian disampaikan kepada Direksi.

Di sepanjang tahun 2024, Dewan Komisaris mengadakan rapat sebanyak 16 kali rapat internal dan 22 kali rapat gabungan dengan mengundang Direksi. Rapat-rapat maupun kunjungan tersebut menjadi forum bagi Dewan Komisaris untuk memantau kinerja dan pencapaian Bank sepanjang tahun 2024.

Dewan Komisaris melakukan pemantauan dan saran atas kinerja Perusahaan yang mengacu pada Rencana Bisnis Bank (RBB) tahun 2024. Kami juga melakukan penilaian tentang faktor-faktor yang mempengaruhi kinerja Bank, khususnya terkait faktor permodalan (*capital*), rentabilitas (*earnings*), profil risiko terutama risiko kredit, risiko pasar dan risiko likuiditas. Hal tersebut selaras dengan pemberian kajian penerapan prinsip syariah atas kebijakan dan/atau prosedur yang belum tersedia dan/atau harus dinkinikan, produk dan/atau aktivitas baru yang akan diterbitkan Bank, serta pengajuan pembiayaan yang diusulkan oleh unit bisnis sesuai ketentuan.

Penilaian Atas Kinerja Direksi dalam Pengelolaan Bank

Dewan Komisaris menyadari bahwa mengarungi tahun 2024 bukanlah hal yang mudah. Terdapat tantangan yang cukup besar bagi Bank untuk menggapai target kinerja usaha. Dalam situasi seperti itu, Bank Mega Syariah harus tetap menjalankan roda usaha. Kami tentu memahami sepenuhnya bahwa sebagian besar nasabah, pemegang saham, dan *stakeholder* lain juga menghadapi situasi dan hal yang serupa. Maka dari itu, patut kita syukuri bahwa kita semua dapat melalui tahun 2024 dengan baik. Tentu saja, dengan dukungan dari seluruh pemangku kepentingan, mulai dari induk Perseroan, Pemerintah, Otoritas Jasa Keuangan (OJK) dan otoritas lainnya, pada tahun 2024, Bank Mega Syariah mampu merealisasikan kinerja yang relatif baik.

Dewan Komisaris meyakini bahwa Direksi telah melakukan upaya untuk menerapkan praktik pengelolaan serta penerapan strategi dengan baik, pengendalian risiko, dan praktik tata kelola perusahaan. Dewan Komisaris mengapresiasi kinerja Direksi dalam hal pencapaian Rencana Bisnis Bank 2024 di tengah kondisi perekonomian yang penuh dengan tantangan dan dinamika. Merupakan hal yang patut disyukuri bahwa Bank berhasil mempertahankan pertumbuhannya di tengah dinamika perekonomian Indonesia yang turut mempengaruhi kualitas pembiayaan pada industri perbankan.

Board of Directors. Meanwhile, functionally, the Board of Commissioners through the Audit Committee, Risk Monitoring Committee, and Remuneration and Nomination Committee holds regular meetings to discuss findings, business risks, and discussions related to personnel so that conclusions can be reached in the form of suggestions which are then submitted to the Board of Directors.

Throughout 2024, the Board of Commissioners held 16 internal meetings and 22 joint meetings by inviting the Board of Directors. These meetings and visits became a forum for the Board of Commissioners to monitor the Bank's performance and achievements throughout 2024.

With reference to the Bank's 2024 Business Plan, the Board of Commissioners maintains updated on the Company's performance and recommends advice. Additionally, we evaluate the elements that impact the Bank's performance, particularly those that are associated with earnings, capital, and risk profiles, particularly credit, market, and liquidity risk. This aligns with the Bank's plans to issue new products and/or activities, study how sharia principles can be applied to policies and/or procedures that are not yet available or need to be updated, and finance applications that business units submit in compliance with the provisions.

Assessment of the Board of Directors' Performance in Managing the Bank

The Board of Commissioners understands how difficult it was to navigate 2024. The Bank has significant obstacles in meeting its business performance goals. In such a situation, Bank Mega Syariah has to continue to run the wheels of business. We are well aware that the majority of shareholders, consumers, and other stakeholders are dealing with comparable issues and circumstances. We should therefore be thankful that we can all successfully navigate 2024. It is obvious that Bank Mega Syariah was able to achieve comparatively good performance in 2024 with the help of all stakeholders, beginning with the parent firm, the government, Financial Services Authority (OJK), and other authorities.

The Board of Commissioners believes that the Board of Directors has strived to accomplish its goal to put corporate governance, risk management, and the implementation of good governance management into practice. The Board of Commissioners appreciates the performance of the Board of Directors in accomplishing the Bank's 2024 Business Plan in the face of dynamic and challenging economic condition. The Bank's ability to sustain its expansion in the face of Indonesian economic dynamics, which also impact the caliber of financing provided by the banking sector, is something for which it should be thankful.

Dalam pandangan Dewan Komisaris, Direksi telah berupaya menjalankan praktik manajemen yang baik melalui implementasi strategi yang terencana, pengendalian risiko, serta praktik tata kelola. Di sisi lain, Dewan Komisaris juga menilai bahwa Direksi masih bisa memberikan yang lebih baik lagi terutama dalam hal menciptakan suatu terobosan yang signifikan agar Bank dapat bertolak ke kondisi pertumbuhan yang ideal serta mengantarkan Bank mewujudkan visi yang dicita-citakan bersama.

Secara finansial, Bank telah menunjukkan pertumbuhan yang baik terkait struktur keuangan dan likuiditasnya. Bank Mega Syariah di tahun 2024 mencatat laba sebelum pajak positif sebesar Rp323,22 miliar atau tumbuh 5,92% YoY, aset pada tahun 2024 sebesar Rp15,99 triliun atau tumbuh 9,80% YoY, pembiayaan sebesar Rp7,76 triliun atau tumbuh 10,97% YoY dimana hal ini menunjukkan bahwa perkembangan Bank masih sangat diminati oleh pasar.

Seiring dengan pertumbuhan ekonomi yang baik, Alhamdulillah, perbankan syariah Indonesia turut membukukan kinerja positif. Bank Mega Syariah selaku bagian dari tren tersebut menyikapinya dengan melancarkan langkah strategis guna meningkatkan pertumbuhan ke tingkat selanjutnya. Dalam menggapai pertumbuhan lebih lanjut, Bank tentunya didukung oleh berbagai pihak yang memiliki peran masing-masing. Dengan bergerak bersama, Bank berfokus mewujudkan pembiayaan yang sehat, perbaikan struktur pendanaan, memperkuat permodalan, serta mengembangkan produk dan layanan sesuai kebutuhan masyarakat; yang didukung oleh pengembangan infrastruktur Informasi Teknologi dan inovasi *digital* hingga memperluas akses dan jaringan layanan keuangan syariah.

Pandangan atas Prospek Usaha yang Disusun Direksi

Memasuki awal tahun 2025, Pemerintahan baru Indonesia melakukan beberapa kebijakan yang tentunya akan memberikan pengaruh pada kinerja Bank, diantaranya adalah kebijakan efisiensi yang salah satu dampaknya adalah berkurangnya pembangunan infrastruktur dan bisnis layanan jasa seperti perhotelan. Deflasi Januari dan Februari menjadi indikator pentingnya kehati-hatian dalam penyaluran pembiayaan dan terus berupaya meningkatkan jumlah *funding* khususnya retail, sehingga bisa menekan *cost of fund*. Dewan Komisaris juga berpendapat bahwa Rencana Bisnis Perbankan yang telah disusun Dewan Direksi, harus dilaksanakan dengan kerja keras dan saling bersinergi terutama di lingkungan ekosistem CT Corp.

The Board of Commissioners believes that the Board of Directors has tried to apply solid management practices by putting planned strategies, risk control, and governance procedures into action. However, the Board of Commissioners also believes that the Board of Directors can still do better, particularly in terms of bringing about a major innovation that will help the Bank move toward optimal growth circumstances and guide the Bank toward realizing its common goal.

Financially, the Bank has shown good growth related to its financial structure and liquidity. Bank Mega Syariah in 2024 recorded a positive pre-tax profit of IDR323.22 billion or grew 5.92% YoY, assets in 2024 amounted to IDR15.99 trillion or grew 9.80% YoY, financing of IDR7.76 trillion or grew 10.97% YoY, which shows that the Bank's development is still in great demand by the market.

Along with good economic growth, Alhamdulillah, Indonesian Islamic banking has also posted positive performance. In response to this trend, Bank Mega Syariah implemented calculated measures to boost growth even further. The Bank is undoubtedly assisted by a number of partners, each of whom plays a certain function, in attaining further expansion. Working together, the Bank prioritizes achieving healthy financing, enhancing funding structures, fortifying capital, and creating goods and services that meet the needs of the community. This is aided by the growth of digital innovation and information technology infrastructure to increase the availability and networks of sharia financial services.

Views on Business Prospects Prepared by the Board of Directors

Entering the beginning of 2025, the new Indonesian government has implemented several policies that will certainly have an impact on the Bank's performance, including efficiency policies, one of the impacts of which is the reduction in infrastructure development and service businesses such as hotels. In order to lower the cost of funds, it is crucial to distribute financing carefully and to keep working to grow funding, particularly retail funding. This is demonstrated by the deflation that occurred in January and February. The Board of Commissioners also thinks that the Banking Business Plan, which was created by the Board of Directors, needs to be carried out with diligence and cooperation, particularly in the context of the CT Corp ecosystem.

Di sisi lain, tahun 2025 juga akan menjadi tahun implementasi pengembangan infrastruktur serta produk dan layanan baru untuk Bank Mega Syariah. Sementara itu, faktor-faktor Kinerja Keuangan dan indikator kinerja perlu diperhatikan seperti profitabilitas, likuiditas, dan rasio kecukupan modal sebagai fondasi kekuatan keuangan. Bank diharapkan juga terus berupaya menciptakan strategi pertumbuhan untuk meningkatkan pangsa pasar, inovasi produk, peningkatan layanan, serta pengelolaan risiko yang baik untuk menciptakan kelangsungan usaha yang berkelanjutan di tahun 2025.

Untuk mencapai tujuan ini, Dewan Komisaris berpendapat bahwa Direksi perlu meningkatkan kualitas kinerja Bank di semua lini dan memfokuskan diri untuk memperbesar porsi pembiayaan yang berkualitas. Direksi diharapkan dapat memanfaatkan ekosistem nasabah korporasi melalui strategi *Business to Business to Consumer* (B2B2C) dimana seluruh pegawai, konsumen, dokter, pelajar, atau ekosistem di dalam nasabah korporasi dapat ditawarkan produk ritel seperti tabungan haji, *mobile banking* M-Syariah, kartu pembiayaan Syariah Card, dan produk ritel lainnya. Khusus pendanaan, perbesar produk simpanan berbasis dana murah seperti tabungan dan giro. Tingkatkan *volume* pembiayaan secara selektif dan fokus pada nasabah dengan kualitas yang baik.

Pastikan seluruh aktivitas dijalankan secara efektif dan efisien serta mendukung peningkatan bisnis yang signifikan. Berikan dukungan penuh kepada seluruh Sumber Daya Insani (SDI) dan pastikan seluruh SDI telah bekerja secara produktif dan memberikan kontribusi terbaiknya bagi Bank Mega Syariah.

Kami percaya bahwa Allah SWT tidak akan memberikan cobaan melebihi kapasitasnya. Kepercayaan ini juga menjadi dasar bagi Bank untuk memandang tahun 2025 dengan penuh optimisme, meski disinyalir kondisi perekonomian masih akan dihadapi oleh ketidakpastian yang dipengaruhi sejumlah faktor eksternal maupun internal. Untuk itu, Dewan Komisaris senantiasa berkomitmen untuk memberikan masukan dan rekomendasi guna memastikan bahwa rencana Direksi selaras dengan tujuan jangka panjang Bank Mega Syariah.

On the other hand, 2025 will also be the year of implementing infrastructure development and new products and services for Bank Mega Syariah. Meanwhile, Financial Performance factors and performance indicators need to be considered, such as profitability, liquidity, and capital adequacy ratio as the foundation of the Bank's financial strength. The Bank is also expected to continue to strive to create growth strategies to increase market share, product innovation, service improvement, and good risk management to create sustainable business continuity in 2025.

To achieve this goal, the Board of Commissioners believes that the Board of Directors needs to improve the quality of the Bank's performance in all lines and focus on increasing the portion of quality financing. Through the Business to Business to Consumer (B2B2C) strategy, the Board of Directors is expected to be able to leverage the corporate customer ecosystem by offering retail products such as Syariah Card financing cards, M-Syariah mobile banking, hajj savings, and other retail products to all employees, consumers, doctors, and students. Increase low-cost fund-based savings products, such current and savings accounts, especially for funding. Selectively increase the volume of funding by concentrating on customers with high financing quality.

In order to enable substantial business growth, make sure that all activities are executed successfully and efficiently. Provide full support to all Human Resources (HR) and ensure that all HR have worked productively and provided their best contribution to Bank Mega Syariah.

We have faith that Allah SWT won't subject us to more challenges than we can handle. This trust serves as the foundation for the Bank's optimistic outlook for 2025, despite its concerns that a variety of internal and external factors will continue to influence the state of the economy. The Board of Commissioners is committed to providing recommendations and input in order to ensure that the Board of Directors' initiatives are in line with Bank Mega Syariah's long-term objectives.

Penilaian Kinerja Komite di Bawah Dewan Komisaris

Dalam menjalankan peran pengawasan, Dewan Komisaris dibantu oleh tiga komite, yakni Komite Audit, Komite Remunerasi dan Nominasi, serta Komite Pemantau Risiko. Selama tahun 2024, komite-komite tersebut telah menunjukkan kinerja yang baik dan telah berkontribusi terhadap pertumbuhan Bank. Selain pelaksanaan program kerja yang tepat, peran dari masing masing komite juga ditingkatkan secara signifikan untuk dapat mendukung tugas dan kewajiban Dewan Komisaris, antara lain, Komite Audit telah meningkatkan perannya melalui penyelenggaraan rapat Komite Audit yang intensif untuk membahas perbaikan terhadap prosedur atau proses pembiayaan ataupun pendanaan, peningkatan kualitas operasional, dan berbagai isu-isu terkait lainnya. Di sisi lain, Komite Remunerasi dan Nominasi telah memberikan rekomendasi atas remunerasi dan nominasi terbaik bagi Pengurus Perseroan, Komite, maupun seluruh pegawai Perusahaan. Peran Dewan Komisaris atas Penerapan dan Pengelolaan *Whistle Blowing System* (WBS)

Peran Dewan Komisaris dalam implementasi *Whistle Blowing System* (WBS) di Bank Mega Syariah sangat penting untuk mendukung tata kelola perusahaan yang baik. Beberapa aspek peran tersebut diimplementasikan pada penyusunan kebijakan dimana Dewan Komisaris berperan dalam merumuskan dan menyetujui kebijakan WBS yang jelas, termasuk prosedur pelaporan, perlindungan *whistleblower*, dan sanksi bagi pelanggar.

Dewan Komisaris melakukan pengawasan dan *monitoring* secara aktif, memantau implementasi WBS, melakukan evaluasi berkala terhadap efektivitas WBS, menindaklanjuti laporan yang diterima, serta memastikan bahwa tindakan perbaikan diambil ketika diperlukan. Dewan Komisaris senantiasa memastikan bahwa WBS ini berjalan efektif dan memberikan hasil yang baik bagi Perusahaan.

Performance Assessment of Committees Under the Board of Commissioners

In carrying out its supervisory role, the Board of Commissioners is assisted by three committees, namely the Audit Committee, the Remuneration and Nomination Committee, and the Risk Monitoring Committee. During 2024, these committees have shown good performance and have contributed to the Bank's growth. In addition to implementing the right work program, the role of each committee has also been significantly increased to support the duties and obligations of the Board of Commissioners, including, the Audit Committee has increased its role by holding intensive Audit Committee meetings to discuss improvements to financing or funding procedures or processes, improving operational quality, and various other related issues. On the other hand, the Remuneration and Nomination Committee has provided recommendations on the best remuneration and nominations for the Company's Management, Committees, and all employees of the Company. Meanwhile, the Risk Monitoring Committee reviews anticipation of economic changes and risks that may impact the sustainability of the company's business.

In 2024 and the years that follow, the committees under the Board of Commissioners continue to play a larger role than they did the year before. The Board of Commissioners continues to promote the use of good governance principles in all facets of the Bank's operations and business with the help of these three committees.

The Role of the Board of Commissioners in the Implementation and Management of the *Whistle Blowing System* (WBS)

The role of the Board of Commissioners in the implementation of the *Whistle Blowing System* (WBS) at Bank Mega Syariah is very important to support good corporate governance. Several aspects of this role are implemented in the preparation of the policy where the Board of Commissioners plays a role in formulating and approving clear WBS policies, including reporting procedures, whistleblower protection, and sanctions for violators.

The Board of Commissioners actively oversees and monitors the WBS's implementation, evaluates its efficacy on a regular basis, investigates reports, and makes sure that remedial measures are implemented when needed. The Board of Commissioners consistently makes sure that the WBS functions well and yields positive outcomes for the company.

Transparansi dan akuntabilitas dari laporan yang diterima dan tindakan yang diambil kepada seluruh pegawai merupakan langkah menciptakan budaya transparansi dan akuntabilitas sehingga dapat membangun budaya etika perusahaan, dimana pelaporan pelanggaran dianggap sebagai tanggung jawab bersama. Dengan peran aktif Dewan Komisaris dalam WBS, Bank Mega Syariah dapat menciptakan lingkungan kerja yang lebih aman dan transparan, serta memperkuat kepercayaan *stakeholders* terhadap komitmen tata kelola perusahaan yang baik.

Namun demikian, PT Bank Mega Syariah senantiasa berusaha secara optimal melalui berbagai kebijakan strategis dalam rangka menjawab tantangan usaha dan mencapai hasil yang maksimal. Laporan tahunan ini menjadi bagian dari pelaporan manajemen atas strategi dan kinerja Bank di sepanjang tahun 2024, sekaligus menjadi dokumentasi atas perjalanan Perseroan untuk mencapai visi dan misi yang telah dicanangkan.

Tinjauan Makro Ekonomi

Sebagaimana dikutip dari laporan yang dirilis Bank Indonesia bertajuk Tinjauan Kebijakan Moneter 2024, menjelaskan bahwa ketidakpastian pasar keuangan global semakin meningkat disertai dengan risiko perlambatan pertumbuhan ekonomi dunia. Rencana kebijakan perdagangan di Amerika Serikat (AS) melalui kenaikan tarif impor dan komoditas di cakupan negara yang lebih luas telah menyebabkan risiko peningkatan fragmentasi perdagangan dunia. Perkembangan ini yang disertai dengan eskalasi ketegangan geopolitik di banyak negara mengakibatkan pertumbuhan ekonomi dunia 2025 diperkirakan melambat menjadi 3,1% dari sebesar 3,2% pada 2024.

Perekonomian Indonesia pada tahun 2024 juga tak lepas dari berbagai tantangan di tengah ketidakpastian global yang meningkat. Berdasarkan laporan dari Badan Pusat Statistik, Perekonomian Indonesia 2024 yang diukur berdasarkan Produk Domestik Bruto (PDB) atas dasar harga berlaku mencapai Rp22.139,0 triliun dan PDB per kapita mencapai Rp78,6 juta atau USD4.960,3.

Ekonomi Indonesia triwulan IV-2024 terhadap triwulan IV-2023 mengalami pertumbuhan sebesar 5,02 persen (y-on-y). Dari sisi produksi, Lapangan Usaha Jasa Lainnya mengalami pertumbuhan tertinggi sebesar 11,36 persen. Sementara itu, Komponen Ekspor Barang dan Jasa pada sisi pengeluaran mengalami pertumbuhan tertinggi sebesar 7,63 persen.

Dear Shareholders and Stakeholders,

All praise be to Allah SWT, the Lord of the Universe, who has bestowed His blessings, mercy, and gifts upon us all. We express our gratitude because thanks to the grace of Allah SWT, PT Bank Mega Syariah has successfully gone through 2024 well. Throughout 2024, All business sectors, including the banking industry, continue to struggle with uncertainty. To address business obstacles and attain the best possible outcomes, PT Bank Mega Syariah still keeps up its best efforts through a variety of strategic initiatives. The Bank's strategy and performance for 2024 are covered in this annual report, which also documents the company's progress toward fulfilling its established vision and mission.

Macroeconomic Review

According to the Monetary Policy Review 2024 study published by Bank Indonesia, there is a growing risk of decreasing global economic development together with the unpredictability of global financial markets. The trade policy plan in the United States (US) through increasing import and commodity tariffs in a wider range of countries has caused the risk of increasing fragmentation of world trade. This development, accompanied by the escalation of geopolitical tensions in many countries, has resulted in global economic growth in 2025 being estimated to slow to 3.1% from 3.2% in 2024.

The Indonesian economy in 2024 is also inextricably linked to a number of issues amidst growing global uncertainty. According to a Central Statistics Agency study, the GDP of Indonesia in 2024 was IDR 22,139.0 trillion at current values, with GDP per capita coming in at IDR 78.6 million, or USD 4,960.3.

Indonesia's economy grew 5.02 percent (y-on-y) in Q4 2024 compared to Q4 2023. With an increase of 11.36 percent, Other Service Business Fields saw the most rise from the production side. On the expenditure side, however, the export component of goods and services grew at the fastest rate, 7.63 percent.

Tinjauan Segmen Industri

Diperkirakan kondisi ekonomi Indonesia sampai tahun 2025 akan dipengaruhi oleh kondisi ketidakpastian global seperti adanya konflik geopolitik timur tengah, perlambatan ekonomi China, wacana kenaikan tingkat suku bunga The Fed, krisis iklim yang terjadi di tahun 2024, serta pergantian pemerintahan pusat dan daerah. Hal ini juga akan mempengaruhi perubahan kebijakan moneter di Indonesia, dimana akan berpengaruh juga pada industri perbankan. Kondisi tersebut menuntut Bank Mega Syariah untuk lebih responsif dan adaptif pada perubahan eksternal bank agar tetap menjaga efektivitas kinerja dan profitabilitas bank.

Berdasarkan data Otoritas Jasa Keuangan (OJK), kinerja intermediasi perbankan tahun 2024 tumbuh positif dengan profil risiko yang terjaga. Pertumbuhan kredit perbankan sepanjang tahun 2024 mencatatkan *double digit growth* sebesar 10,39% yoy menjadi Rp7.827 triliun, didorong oleh Kredit Investasi yang tumbuh tinggi sebesar 13,62% yoy dan Kredit Konsumsi 10,61% yoy, sedangkan Kredit Modal Kerja tumbuh 8,35% yoy. Sementara itu, kualitas kredit tetap terjaga dengan rasio *Non-Performing Loan* (NPL) *gross* sebesar 2,08% dan NPL *net* sebesar 0,74%. *Loan at Risk* (LaR) juga menunjukkan tren penurunan menjadi sebesar 9,28%. Di sisi lain, Dana Pihak Ketiga (DPK) perbankan tercatat tumbuh sebesar 4,48% yoy menjadi Rp8.837 triliun, dengan giro, tabungan, dan deposito masing-masing tumbuh sebesar 3,34%, 6,78%, dan 3,50% yoy.

Ketahanan perbankan terjaga kuat dengan tingkat permodalan atau *Capital Adequacy Ratio* (CAR) Perbankan yang berada di *level* tinggi sebesar 26,68%. Likuiditas perbankan pada Desember 2024 tetap memadai dengan rasio Alat Likuid/*Non-Core Deposit* (AL/NCD) dan Alat Likuid/DPK (AL/DPK) masing-masing tercatat sebesar 112,87% dan 25,59%, jauh di atas *threshold* masing-masing sebesar 50% dan 10%.

Industri perbankan syariah juga mencatatkan kinerja yang baik di 2024, tercermin dari aset perbankan syariah yang tumbuh 12,50% (yoy), lebih tinggi dari tahun sebelumnya sebesar 10,49% (yoy). Selain itu, penyaluran pembiayaan juga tumbuh 13,24% (yoy), lebih tinggi dibandingkan tahun lalu 12,22% (yoy) dan diikuti Dana Pihak Ketiga (DPK) juga tumbuh sebesar 10,43% (yoy). Kinerja perbankan syariah yang baik tersebut juga ditopang oleh kondisi permodalan yang kuat tercermin dari CAR sebesar 25,59%, jauh di atas *threshold*. Diperkirakan perbankan syariah akan mengalami dinamika yang positif terkait implementasi

Industry Segment Review

Global uncertainties like the Middle East geopolitical conflict, China's economic slowdown, the debate surrounding the Fed's interest rate hike, the 2024 climate crisis, and the transition of central and regional governments are predicted to have an impact on Indonesia's economic circumstances through 2025. This will also have an impact on Indonesia's monetary policy adjustments, which will have an impact on the banking sector. These conditions require Bank Mega Syariah to be more responsive and adaptive to external changes in the bank in order to maintain the effectiveness of the bank's performance and profitability.

Banking liquidity in December 2024 remains adequate with the Liquid Assets/*Non-Core Deposit* (AL/NCD) and Liquid Assets/TPF (AL/TPF) ratios recorded at 112.87% and 25.59%, respectively, well above the thresholds of 50% and 10%, respectively.

The Islamic banking industry also recorded good performance in 2024, reflected in Islamic banking assets growing by 12.50% (yoy), higher than the previous year of 10.49% (yoy). In addition, financing distribution also grew by 13.24% (yoy), higher than last year's 12.22% (yoy) and followed by Third Party Funds (TPF) which also grew by 10.43% (yoy). The good performance of Islamic banking is also supported by strong capital conditions reflected in the CAR of 25.59%, well above the threshold. It is estimated that Islamic banking will experience positive dynamics related to the implementation of the spin-off of the

spin-off Unit Usaha Syariah (UUS) dan konsolidasi perbankan syariah sesuai dengan Roadmap Pengembangan dan Penguatan Perbankan Syariah Indonesia (RP3SI) 2023-2027.

Implementasi Kebijakan Strategis dan Capaian di Tahun 2024

Tahun 2024 akan menjadi tahun yang penting bagi Indonesia. Siklus politik lima tahunan melakukan pergantian kepemimpinan eksekutif dan yudikatif pengelola administratif Pemerintahan, yang tentunya peristiwa ini juga akan mempengaruhi pertumbuhan perekonomian Indonesia. Menghadapi prospek perekonomian yang cukup menantang, Indonesia diharapkan mampu mempertahankan kondisi perekonomiannya dengan cukup solid. Prediksi pertumbuhan ekonomi yang cukup baik diharapkan mampu memberikan pengaruh positif bagi perbankan, termasuk Bank Mega Syariah.

Bank telah merancang target rencana bisnis dari beberapa komponen substansial sebagai tolak ukur dalam menilai kinerja Bank. Manajemen menilai bahwa Bank telah berhasil mengarungi tahun 2024 dengan hasil yang baik. Di tahun 2024, Bank merencanakan perolehan dari beberapa komponen substansial sebagai tolak ukur dalam menilai kinerja Perusahaan, sebagai berikut:

1. Pendapatan Pengelolaan Dana oleh Bank sebagai *Mudharib*

Angka tersebut meningkat sebesar 1,77% jika dibandingkan dengan tahun sebelumnya yang sebesar Rp1,23 triliun. Kenaikan tersebut disebabkan oleh peningkatan volume bisnis pembiayaan yang tumbuh sebesar 10.97% dari tahun 2023 ke tahun 2024 terutama pada segmen bisnis konsumen yang tumbuh sebesar 29.06%.

2. Laba Bersih Tahun Berjalan

Selama tahun 2024, laba bersih tahun berjalan tercatat sebesar Rp253,19 miliar, meningkat sebesar Rp14,47 miliar atau naik 6,06% dari capaian laba bersih tahun berjalan di tahun 2023 yang tercatat sebesar Rp238,72 miliar. Implementation of Strategic Policies and Achievements in 2024

For Indonesia, 2024 would be a significant year. The executive and judicial leadership of the government's administrative administration are changed every five years, which naturally has an impact on Indonesia's economic development. Despite a difficult economic future, Indonesia should be able to sustain its economic standing fairly well. Banking, notably Bank Mega Syariah, is anticipated to benefit from forecasts of rather strong economic development.

The Bank has designed a business plan target from several substantial components as a benchmark in assessing the Bank's performance. Management assesses that the Bank has successfully navigated 2024 with good results. In 2024, the Bank plans to obtain several substantial components as a benchmark in assessing the Company's performance, as follows:

1. Income from Fund Management by the Bank as *Mudharib*

The achievement of Income from Fund Management by the Bank as *Mudharib* in 2024 was IDR1.26 trillion, which is 105% of the Bank's target of IDR1.20 trillion. This figure increased by 1.77% compared to the previous year which was IDR 1.23 trillion. The increase was due to an increase in the volume of financing business which grew by 10.97% from 2023 to 2024, especially in the consumer business segment which grew by 29.06%.

2. Current Year Net Profit

During 2024, the current year's net profit was recorded at IDR 253.19 billion, an increase of IDR 14.47 billion or an increase of 6.06% from the current year's net profit achievement in 2023 which was recorded at IDR 238.72 billion. This increase was due to the Bank's success in increasing the growth of the financing business and managing the burden of funds and operational costs effectively and efficiently.

3. Total Assets

The Company's total assets at the end of 2024 were IDR15.99 trillion, an increase compared to the end of 2023, which was IDR14.57 trillion, or an increase of 9.80% to IDR1.42 trillion. This was due to the growth of the bank's financing and securities portfolio.

Sementara itu, kinerja dan profitabilitas dari masing-masing segmen Bank di sepanjang tahun 2024 adalah sebagai berikut:

1. Pembiayaan Komersial dan Konsumer

Pada tahun 2024, Bank Mega Syariah berhasil mencatatkan pembiayaan pada segmen Komersial dan Konsumer, dengan total mencapai Rp5,25 triliun, meningkat sebesar 17.61% dibandingkan pada tahun 2023 yang sebesar Rp4,46 triliun. Peningkatan tersebut disebabkan oleh adanya pengembangan produk baru yaitu syariah card dan juga perluasan penetrasi pasar pada segmen konsumer yang menyebabkan pendapatan atas pembiayaan komersial dan konsumer pada tahun 2024 mencapai Rp445,24 miliar.

2. Pembiayaan *Joint Financing*

Sampai dengan 31 Desember 2024, bank membukukan jumlah pembiayaan pada segmen *Joint Financing* mencapai Rp2,51 triliun atau menurun sebesar 0,75% dibanding tahun 2023 yang mencapai Rp 2,53 triliun. Penurunan tersebut disebabkan oleh menurunnya penjualan kendaraan bermotor secara nasional dikarenakan turunya daya beli masyarakat di Indonesia. Meskipun demikian, pendapatan atas pembiayaan *Joint Financing* pada tahun 2024 tetap meningkat sebesar 8,57% dibanding tahun 2023 atau tumbuh dari Rp254,58 miliar pada tahun 2023 menjadi sebesar miliar Rp276,40 miliar.

3. Penghimpun Dana

Posisi Jumlah Dana Pihak Ketiga pada tahun 2024 sebesar Rp9,96 triliun atau naik 2,82% dari tahun 2023 sebesar Rp9,69 triliun. Kenaikan dana pihak ketiga tahun 2024 terjadi pada Giro yang naik sebesar 47,79%. Sedangkan pada Tabungan mengalami penurunan sebesar 0,71% dan Deposito mengalami penurunan sebesar 4,19% dibanding tahun 2023. Peningkatan pada Giro yang cukup signifikan sejalan dengan rencana strategis bank dalam menjaga beban dana agar tetap terjaga, sehingga bank dapat mencapai profitabilitas yang lebih maksimal. Peningkatan portofolio Giro juga menjadi salah satu kontributor utama dalam peningkatan CASA rasio dana pihak ketiga yang berhasil tumbuh dari 29,76% pada tahun 2023 menjadi 34,54% pada tahun 2024.

Perbandingan antara pencapaian dari tahun ke tahun tersebut menjadi salah satu gambaran yang dipertimbangkan dalam penyusunan target dan strategi bisnis ke depan. Didukung oleh kapasitas serta prospek yang dimiliki, Bank optimis untuk dapat meraih kinerja unggul secara berkelanjutan di masa mendatang.

Meanwhile, the performance and profitability of each Bank segment throughout 2024 were as follows:

1. Commercial and Consumer Financing

In 2024, Bank Mega Syariah successfully recorded financing in the Commercial and Consumer segments, with a total reaching IDR5.25 trillion, an increase of 17.61% compared to 2023 which was IDR4.46 trillion. The increase was due to the development of new products, namely the Syariah Card, and also the expansion of market penetration in the consumer segment, which caused income from commercial and consumer financing in 2024 to reach IDR445.24 billion.

2. Joint Financing

As of December 31, 2024, The bank reported IDR2.51 trillion in total financing in the Joint Financing segment, a 0.75% decrease from 2023's IDR2.53 trillion total financing. The dip was brought on by a drop in national motor vehicle sales as a result of Indonesians' declining purchasing power. Nonetheless, revenue from Joint funding increased from IDR254.58 billion in 2023 to IDR276.40 billion in 2024, a growth of 8.57% from 2023.

3. Fund Collectors

The position of the total third party funds in 2024 was IDR9.96 trillion or an increase of 2.82% from 2023 of IDR9.69 trillion. The increase in third party funds in 2024 occurred in Current Accounts which increased by 47.79%. Meanwhile, Savings experienced a decrease of 0.71% and Deposits experienced a decrease of 4.19% compared to 2023. The significant increase in Current Accounts is in line with the bank's strategic plan to maintain the burden of funds so that the bank can achieve maximum profitability. The increase in the Current Account portfolio is also one of the main contributors to the increase in the CASA ratio of third party funds which has grown from 29.76% in 2023 to 34.54% in 2024.

When creating future business aims and strategies, one of the examples taken into consideration is the comparison of accomplishments from year to year. The Bank is certain that it can continue to achieve excellent performance in the future, strengthened by its capacity and prospects.

Tantangan Usaha 2024 dan Upaya Penanganannya

Di tahun 2024, tantangan dan kendala yang paling besar adalah iklim usaha global dan nasional yang cenderung fluktuatif. Hal ini membuat Direksi selalu mengedepankan tingkat kehati-hatian Bank dan penerapan tata kelola perusahaan yang berada di *level* yang optimal. Sebagai bagian dari tekad Bank Mega Syariah untuk mengatasi tantangan global dan iklim usaha yang cenderung fluktuatif, Direksi terus mengembangkan bisnis Bank Mega Syariah meskipun secara signifikan terkena dampak dari kondisi ekonomi.

Kami percaya bahwa ini adalah waktu yang tepat untuk fokus pada pertumbuhan perbankan ritel sesuai dengan rencana bisnis Bank. Perseroan menyadari bahwa ini adalah kesempatan kami untuk naik ke tingkat pertumbuhan berikutnya dengan fokus pada pengembangan perbankan korporasi yang didukung oleh pertumbuhan ritel dengan melakukan pendekatan berbasis komunitas di 2024. 2024 Business Challenges and Efforts to Handle Them

In 2024, the biggest challenges and obstacles will be the global and national business climate which tends to fluctuate. This makes the Board of Directors always prioritize the Bank's level of prudence and the implementation of corporate governance at an optimal level. As part of Bank Mega Syariah's determination to overcome global challenges and a business climate that tends to fluctuate, the Board of Directors continues to develop Bank Mega Syariah's business even though it is significantly impacted by economic conditions.

In line with the Bank's business plan, we believe that this is the ideal moment for focusing on the expansion of retail banking. By concentrating on building corporate banking backed by retail growth through a community-based approach in 2024, the company recognizes that this is our chance to advance to the next stage of growth. The Bank's risk acceptance criteria are applied to all financing disbursements. Digital development will continue to assist and bolster the Bank's growth in order to accommodate the expansion of its retail customers.

Facing a business climate that tends to fluctuate, the Board of Directors always adapts and applies flexibility in business and always applies good risk management. In addition, the Board of Directors also conducts periodic evaluations of the business strategies that have been implemented. The Board of Directors also always strengthens Human Resources (HR) by implementing various competency improvement strategies and objectively measurable Key Performance Indicators (KPIs) so that it is expected that each employee can productively provide positive contributions to the company's business.

In order to increase market penetration, the Bank will, on the one hand, keep maximizing ecosystem synergy, both inside the CT Corpora environment and with other potential ecosystems, such as the Islamic ecosystems.

Implementation of Good Corporate Governance in 2024

We believe that by consistently implementing transparency, accountability, responsibility, independence, and the principle of fairness in every business process, we can maintain good performance and also provide added value to stakeholders.

Untuk memastikan praktik terbaik GCG di semua tingkatan organisasi, kami telah melakukan program sosialisasi internal secara konsisten untuk meningkatkan kesadaran GCG serta menyempurnakan perangkat GCG seperti *whistleblowing system*, sistem keluhan pelanggan, dan fungsi *Anti Money Laundering* (AML). Selanjutnya, dalam memastikan peningkatan implementasi GCG yang berkelanjutan, kami juga mengadakan penilaian GCG, menggunakan metode *self-assessment* sesuai dengan persyaratan regulasi, dan mengevaluasi kinerja bisnis berdasarkan indikator serta kebijakan dan sistem tertentu yang telah ditentukan.

Analisa Terkait Prospek usaha 2025

Perkembangan ekonomi, baik global maupun domestik, masih menjadi perhatian utama. Berbagai kebijakan maupun regulasi juga ditentukan oleh kondisi peta politik yang akan berlangsung. Sebagaimana dikutip dari Buku Pertemuan Tahunan Bank Indonesia 2024, menjelaskan bahwa secara keseluruhan, program-program yang dirumuskan Pemerintah diharapkan dapat meningkatkan pertumbuhan ekonomi yang lebih tinggi dengan stabilitas makroekonomi yang tetap terjaga. Simulasi capaian kinerja perekonomian sebagai hasil dari implementasi bauran kebijakan transformasi ekonomi nasional perlu terus dievaluasi dengan dinamika yang berkembang dan respons bauran kebijakan yang diperlukan. Sejumlah asumsi mendasari simulasi ini. Pertama, pertumbuhan ekonomi dunia diasumsikan akan meningkat dari 3,2% pada 2024 menjadi 3,4% pada 2030, dengan inflasi dan harga komoditas dunia yang stabil dan suku bunga kebijakan moneter AS akan turun dari 4,5% menjadi 3,5%.

We appreciate the Company's policy that has trusted the dedication of the Board of Directors in developing Bank Mega Syariah to be even more advanced. The Board of Directors is always committed to carrying out this mandate by prioritizing the principles of good corporate governance for the benefit of Shareholders and Other Stakeholders.

Analysis Related to Business Prospects 2025

Economic developments, both global and domestic, are still a major concern. Various policies and regulations are also determined by the conditions of the political map that will take place. As quoted from the Bank Indonesia Annual Meeting Book 2024, it explains that overall, the programs formulated by the Government are expected to increase higher economic growth with maintained macroeconomic stability. Simulations of economic performance achievements as a result of the implementation of the national economic transformation policy mix need to be continuously evaluated with the developing dynamics and the required policy mix responses. A number of assumptions underlie this simulation. First, global economic growth is assumed to increase from 3.2% in 2024 to 3.4% in 2030, with stable global inflation and commodity prices and the US monetary policy interest rate will fall from 4.5% to 3.5%.

Di sisi lain, posisi perbankan juga dihadapkan pada persaingan yang semakin ketat, salah satunya pada perbankan syariah. Pesatnya perkembangan teknologi juga menjadi salah satu tantangan dimana setiap perbankan syariah harus dapat secara kompetitif mengikuti perkembangan zaman dan dapat terus berinovasi menyediakan layanan keuangan terbaik untuk masyarakat. Manajemen risiko terhadap setiap proses bisnis juga menjadi salah satu aspek penting untuk menjaga stabilitas dan keberlanjutan perusahaan.

Berdasarkan analisis kondisi makroekonomi yang telah disampaikan, Bank Mega Syariah telah merumuskan kebijakan strategis yang terarah untuk mencapai target usaha yang berkelanjutan. Bank berupaya memperluas dan melakukan percepatan proses pembiayaan, khususnya pembiayaan nasabah korporasi. Bank akan menerapkan strategi *Business to Business to Consumer* (B2B2C) dimana seluruh ekosistem di nasabah korporasi; baik pegawai, konsumen, pelajar, dokter, dan ekosistem lainnya; akan ditawarkan produk ritel Bank Mega Syariah; baik produk pembiayaan *consumer* (kartu pembiayaan Syariah Card, pembiayaan rumah, pembiayaan tanpa agunan, dan lain sebagainya), pembiayaan *business banking* (pembiayaan produktif segmen ritel), serta produk pendanaan berbasis dana murah di Bank Mega Syariah (seperti tabungan dan giro).

Volume dana murah dihimpun melalui segmen nasabah haji, nasabah *payroll*, dan komunitas. Bank Mega Syariah memberikan layanan *Cash Management Services* (CMS) dan *Virtual Account* (VA) untuk nasabah *non individual* sehingga dapat membantu pengelolaan transaksi finansial nasabah serta diharapkan terdapat peningkatan *volume Giro* dan tabungan *payroll* dengan adanya peningkatan kualitas layanan CMS dan VA.

Bank juga akan menerapkan strategi "*Relationship Base*" dalam mengejar target *volume* pendanaan yang tinggi pada segmen Nasabah Prioritas. Bank Mega Syariah menyediakan layanan khusus bagi nasabah segmen prioritas yaitu layanan Mega First Syariah yang dapat memberikan layanan "*One Stop Sharia Financial Service*" agar dapat meningkatkan *Account Stickiness* nasabah.

Disamping itu, Bank akan fokus untuk meningkatkan *fee based income* melalui berbagai produk seperti Reksa Dana, *bancassurance*, transaksi *mobile banking* M-Syariah, transaksi *forex*, transaksi kartu pembiayaan Syariah Card, serta berbagai sumber *fee based income* lainnya.

On the other hand, the banking position is also faced with increasingly tight competition, one of which is in Islamic banking. The rapid development of technology is also a challenge where every Islamic bank must be able to competitively follow the times and continue to innovate to provide the best financial services for the community. Risk management for each business process is also an important aspect to maintain the stability and sustainability of the company.

Based on the analysis of macroeconomic conditions that have been submitted, Bank Mega Syariah has formulated a strategic policy that is directed to achieve sustainable business targets. The bank seeks to expand and accelerate the financing process, especially financing corporate customers. The bank will implement a Business to Business to Consumer (B2B2C) strategy where the entire ecosystem in corporate customers; both employees, consumers, students, doctors, and other ecosystems; will be offered Bank Mega Syariah retail products; both consumer financing products (Syariah Card financing cards, home financing, unsecured financing, and so on), business banking financing (productive financing for the retail segment), and low-cost fund-based funding products at Bank Mega Syariah (such as savings and current accounts).

The volume of low-cost funds is collected through the hajj customer segment, payroll customers, and communities. Bank Mega Syariah provides Cash Management Services (CMS) and Virtual Account (VA) services for non-individual customers so that they can help manage customer financial transactions and it is hoped that there will be an increase in the volume of Giro and payroll savings with the improvement in the quality of CMS and VA services.

The Bank will also implement a "Relationship Base" strategy in pursuing a high funding volume target in the Priority Customer segment. Bank Mega Syariah provides special services for priority segment customers, namely the Mega First Syariah service which can provide "One Stop Sharia Financial Service" services in order to increase customer Account Stickiness.

In addition, the Bank will focus on increasing fee-based income through various products such as Mutual Funds, bancassurance, M-Syariah mobile banking transactions, forex transactions, Syariah Card financing card transactions, and various other sources of fee-based income.

Penutup

Tahun 2024 telah terlewati walau penuh dengan tantangan. Direksi memberikan apresiasi kepada seluruh pegawai yang telah bekerja dengan penuh dedikasi tinggi. Disamping itu, Direksi juga mengucapkan rasa terima kasih kepada Dewan Pengawas Syariah dan Dewan Komisaris atas kerja sama, nasihat, dan rekomendasi yang diberikan. Atas nama Perseroan, Kami juga memberikan apresiasi kepada seluruh nasabah dan mitra kerja atas kerja sama yang telah terjalin dengan baik dan kepercayaan yang telah diberikan pada Perseroan. Kepada Pemegang Saham, Direksi mengucapkan terima kasih atas kepercayaan yang telah diberikan. Kami optimis, Bank Mega Syariah dapat terus menjalankan usaha dengan integritas yang tinggi dalam menyiarkan nilai tambah dari prinsip-prinsip syariah. Semoga fondasi kuat yang telah dibangun bisa membawa Bank Mega Syariah menuju ke level yang lebih unggul di kancah perbankan syariah di Indonesia.

Closing

The year 2024 has passed even though it was full of challenges. The Board of Directors appreciates all employees who have worked with high dedication. In addition, the Board of Directors also expresses its gratitude to the Sharia Supervisory Board and the Board of Commissioners for their cooperation, advice, and recommendations. On behalf of the Company, we also appreciate all customers and business partners for the cooperation that has been established well and the trust that has been given to the Company. To the Shareholders, the Board of Directors expresses its gratitude for the trust that has been given. We have strong hopes that Bank Mega Syariah would be able to carry on operating with the highest integrity while promoting the benefits of sharia principles. Hopefully, the strong foundation that has been built can bring Bank Mega Syariah to a more superior level in the sharia banking scene in Indonesia.

وَبِاللّٰهِ التَّوْفِيقُ وَالْهِدَايَةُ وَالسَّلَامُ عَلَيْكُمْ وَرَحْمَةُ اللّٰهِ وَبَرَكَاتُهُ

Sejarah Singkat Bank Mega Syariah

Brief History of Bank Mega Syariah

Hingga akhir tahun 2024, Bank Mega Syariah telah beroperasi di 21 provinsi, 28 Kantor Cabang, 32 Kantor Cabang Pembantu, 23 Kantor Fungsional, 1 Kantor Pusat Operasi, dan 66 ATM.

Until the end of 2024, Bank Mega Syariah has been operated in 21 provinces, 28 branch offices, 32 sub-branch offices, 23 functional offices, 1 operations head office, and 66 ATMs.

PT Bank Mega Syariah (selanjutnya disebut "BMS" atau "Bank") secara resmi didirikan di Republik Indonesia pada tanggal 14 Juli 1990 dengan nama PT Bank Umum Tugu (Bank Tugu), berdasarkan Akta Pendirian No. 102 di hadapan notaris Mudofir Hadi, S.H., pada saat itu beralamat di Jakarta. Pada tahun 2001, Bank diakuisisi oleh PT CT Corpora (d/h Para Group) melalui PT Mega Corpora (d/h PT Para Global Investindo) dan PT Para Rekan Investama. Akuisisi ini diikuti dengan konversi kegiatan usaha pada tanggal 27 Juli 2004 yang semula bank umum konvensional menjadi bank umum syariah dengan nama PT Bank Syariah Mega Indonesia (BSMI) serta dilakukan perubahan logo, dan pada 25 Agustus, 2004, BSMI resmi beroperasi.

Pada 7 November 2007, pemegang saham memutuskan untuk melakukan perubahan logo BSMI sehingga lebih menunjukkan identitas sebagai bagian dari grup Mega Corpora. Pada tanggal 16 Oktober, 2008, Bank mendapatkan izin sebagai bank devisa atau sebagai salah satu Bank BUKU II. Bank Mega Syariah memahami bahwa dengan semakin luasnya inklusi keuangan dan pasar keuangan yang terkoneksi, Nasabah membutuhkan sebuah bank syariah yang mampu melayani transaksi valuta asing. Dengan demikian, Bank Mega Syariah mampu memperluas jangkauan bisnis bank dari domestik hingga internasional.

Pada tanggal 8 April 2009, bank mendapatkan izin sebagai Bank Penerima Setoran Biaya Penyelenggaraan Ibadah Haji (BPS BPIH) oleh Kementerian Agama RI, dan Bank Mega Syariah merupakan bank umum kedelapan yang tercatat sebagai BPS BPIH yang tersambung secara *online*

PT Bank Mega Syariah (hereinafter referred to as "BMS" or "Bank") was officially established in the Republic of Indonesia on July 14, 1990 under the name PT Bank Usaha Tugu (Bank Tugu), based on the Deed of Establishment No. 102 before notary Mudofir Hadi, S.H., at that time having his address in Jakarta. In 2001, the Bank was acquired by PT CT Corpora (formerly Para Group) through PT Mega Corpora (formerly PT Para Global Investindo) and PT Para Rekan Investama. This acquisition was followed by the conversion of business activities on July 27, 2004 from a conventional commercial bank to a sharia commercial bank with the name PT Bank Syariah Mega Indonesia (BSMI) as well as a logo change, and on August 25 2004, BSMI officially started its operation.

On November 7, 2007, shareholders decided to change the BSMI logo so that it better shows its identity as part of the Mega Corpora group. On October 16, 2008, the Bank obtained a license as a foreign exchange bank or as a BUKU II Bank. Bank Mega Syariah is aware that customers require a sharia bank that can handle foreign exchange transactions due to the growing financial inclusion and interconnected financial markets. In this way, Bank Mega Syariah is able to broaden its business operations from domestic to international markets.

On April 8, 2009, the bank received permission as a Bank Receiving Deposits for Hajj Organizing Fees (BPS BPIH) by the Indonesian Ministry of Religion, and Bank Mega Syariah is the eighth commercial bank registered as BPS BPIH which is connected online to the Integrated Hajj Computerized System

dengan Sistem Komputerisasi Haji Terpadu (Siskohat) Kementerian Agama RI. Penyesuaian bentuk hukum ini tercatat sebagai tonggak awal bagi Bank Mega Syariah untuk semakin melengkapi kebutuhan perbankan syariah bagi umat di Indonesia. Pada tanggal 2 November 2010 hingga saat ini, bank dikenal sebagai PT Bank Mega Syariah (BMS).

Untuk mewujudkan visi "Tumbuh dan Sejahtera Bersama Bangsa", PT CT Corpora, sebagai pemegang saham utama, berkomitmen menjadikan Bank Mega Syariah sebagai bank umum syariah terdepan di Indonesia. Komitmen ini tercermin dalam upaya memperkuat modal bank, agar dapat memberikan layanan terbaik di tengah persaingan industri perbankan yang semakin ketat. Sebagai langkah konkret, pada tahun 2010, pemegang saham meningkatkan modal dasar dari Rp400 miliar menjadi Rp1,2 triliun melalui RUPS (Rapat Umum Pemegang Saham), dengan modal disetor yang naik dari Rp150,060 miliar menjadi Rp318,864 miliar. Pada tahun 2013, Bank Mega Syariah mengukuhkan posisinya sebagai bank syariah terdepan dengan relokasi kantor pusat ke Menara Mega Syariah. To realize the vision of "Grow and Prosper with the Nation", PT CT Corpora, as the main shareholder, is committed to making Bank Mega Syariah the leading sharia commercial bank in Indonesia. This commitment is reflected in efforts to strengthen bank capital, so that it can provide the best service amidst increasingly tight competition in the banking industry. As a concrete step, in 2010, shareholders increased their authorized capital from IDR 400 billion to IDR 1.2 trillion through a GMS (General Meeting of Shareholders), with paid-up capital increasing from IDR 150,060 billion to IDR 318,864 billion. Analisis & Pembahasan Manajemen

Management Discussion & Analysis

Tinjauan Kondisi Makro Ekonomi

Macroeconomic Condition Review

“

Sebagaimana dikutip dari laporan yang dirilis Bank Indonesia bertajuk **Tinjauan Kebijakan Moneter 2024**, menjelaskan bahwa ketidakpastian pasar keuangan global semakin meningkat disertai dengan risiko perlambatan pertumbuhan ekonomi dunia. Rencana kebijakan perdagangan di Amerika Serikat (AS) melalui kenaikan tarif impor, komoditas, dan cakupan negara yang lebih luas telah menyebabkan risiko peningkatan fragmentasi perdagangan dunia. Perkembangan ini yang disertai dengan eskalasi ketegangan geopolitik di banyak negara mengakibatkan pertumbuhan ekonomi dunia 2025 diperkirakan melambat menjadi 3,1% dari sebesar 3,2% pada 2024.

As quoted from the report released by Bank Indonesia entitled Monetary Policy Review 2024, it explains that global financial market uncertainty is increasing accompanied by the risk of slowing global economic growth. The trade policy plan in the United States (US) through increasing import tariffs, commodities, and wider country coverage has caused the risk of increasing fragmentation of world trade. This development, accompanied by the escalation of geopolitical tensions in many countries, has resulted in global economic growth in 2025 being estimated to slow to 3.1% from 3.2% in 2024.

Inflasi dunia meningkat dibandingkan prakiraan sebelumnya dipengaruhi oleh gangguan rantai suplai. Di Amerika Serikat, penurunan *Fed Funds Rate* (FFR) diperkirakan lebih lambat akibat inflasi yang lebih tinggi tersebut. Sementara itu, kebijakan fiskal AS yang lebih ekspansif mendorong *yield* US *Treasury* tetap tinggi, baik pada tenor jangka pendek maupun jangka panjang. Penguatan mata uang dolar AS secara luas terus berlanjut disertai berbaliknya preferensi investor global dengan memindahkan alokasi portofolionya kembali ke AS. Hal ini meningkatkan tekanan pelemahan berbagai mata uang dunia dan menahan aliran masuk modal asing ke negara berkembang. Perkembangan ekonomi global yang diikuti dengan tetap tingginya ketidakpastian pasar keuangan global tersebut memerlukan respons kebijakan yang kuat untuk memitigasi dampak negatifnya terhadap perekonomian di negara-negara berkembang, termasuk Indonesia.

World inflation has increased compared to previous estimates due to supply chain disruptions. In the United States, the Fed Funds Rate (FFR) reduction is expected to be slower due to higher inflation. Meanwhile, a more expansionary US fiscal policy has pushed US Treasury yields high, both in short-term and long-term tenors. The broad strengthening of the US dollar currency continues accompanied by a reversal in global investor preferences by moving their portfolio allocations back to the US. This increases the pressure on the weakening of various world currencies and restrains the inflow of foreign capital to developing countries. The development of the global economy followed by the continued high uncertainty of the global financial market requires a strong policy response to mitigate its negative impact on the economy in developing countries, including Indonesia.

Tinjauan Kondisi Ekonomi Domestik

Review of Domestic Economic Conditions

Di sisi lain, pertumbuhan ekonomi Indonesia tetap terjaga didukung oleh permintaan domestik. Investasi diperkirakan tumbuh positif pada Triwulan IV 2024 ditopang oleh berlanjutnya penyelesaian berbagai Proyek Strategis Nasional (PSN) dan investasi swasta yang didukung insentif dari Pemerintah. Konsumsi rumah tangga diperkirakan tetap tumbuh didorong oleh keyakinan konsumen, khususnya menengah ke atas, yang terjaga serta dampak positif pelaksanaan Pilkada di berbagai daerah. Konsumsi Pemerintah meningkat seiring dengan kenaikan aktivitas belanja Pemerintah pada akhir tahun.

Sementara itu, ekspor *nonmigas* diperkirakan melambat dipengaruhi ekonomi global yang belum kuat. Strategi Pemasaran

Di tengah kondisi ekonomi global dan dalam negeri yang sedang mengalami pelemahan akibat imbas kenaikan harga komoditi, ketegangan politik di Eropa akibat perang Rusia dan Ukraina, adanya krisis Timur Tengah, serta konflik antara Israel dan Palestina yang masih berlangsung di 2024; industri perbankan dihadapkan pada beberapa kondisi di bawah ini, diantaranya:

1. Pertumbuhan penyaluran pembiayaan mengalami perlambatan atau mengalami penurunan yang mengakibatkan turunnya profitabilitas industri perbankan di Indonesia;
2. Peningkatan rasio *Non Performing Financing* (NPF);
3. Menurunnya pendapatan dari bagi hasil yang berimbas pada penurunan tingkat bagi hasil yang akan diberikan kepada nasabah; dan
4. Penetapan *rate* the Fed atau bank sentral Amerika memangkas suku bunga acuan sebesar 25 basis *point* di tanggal 18 Desember 2024 menjadi sebesar 4,25% - 4,50%. Hal tersebut berdampak terhadap menurunnya nisbah bagi hasil kepada nasabah sehingga dalam akad pembiayaan syariah, *margin* pembiayaan tidak dapat dilakukan kenaikan secara signifikan. Di sisi lain, terjadi peningkatan *Cost of Fund* bank guna menyeimbangkan pemberian nisbah bagi hasil yang tidak begitu besar. Hal ini dapat berpengaruh pada pendapatan bank dari *Net Interest Margin* (NIM).

Namun demikian, di masa kondisi ekonomi saat ini, Pembiayaan pada segmen Korporasi per Desember 2024 sebesar Rp3,38 triliun, mengalami kenaikan sebesar Rp431,9 miliar atau mengalami kenaikan sebesar 12,75% dibandingkan Desember 2023 yoy. Secara umum, Bank Mega Syariah juga mencatatkan kinerja yang cukup baik di tengah kondisi perekonomian yang masih belum stabil.

Terlepas dari kinerja yang cukup baik tersebut, Bank Mega Syariah tetap mengantisipasi peningkatan rasio pembiayaan bermasalah (*Non Performing Financing/NPF*), salah satunya dengan memberikan restrukturisasi kepada nasabah yang *cashflow* keuangannya mengalami penurunan.

Dalam menjaga kolektibilitas segmen pembiayaan Korporasi dimana portofolio pembiayaan dalam kolektibilitas 2 sebesar 2,31% dari total *outstanding* pembiayaan per Desember 2024, maka dilakukan hal-hal sebagai berikut diantaranya:

1. Peningkatan intensitas penagihan kepada nasabah korporasi yang bermasalah;
2. *Monitoring* secara ketat terhadap kondisi terkini nasabah-nasabah korporasi;
3. *Monitoring* dilakukan melalui *site visit* atau *online meeting* secara periodik;
4. Melakukan restrukturisasi pembiayaan sesuai dengan kebijakan regulator.

Marketing Strategy

In the midst of global and domestic economic conditions that are currently weakening due to the impact of rising commodity prices, political tensions in Europe due to the war between Russia and Ukraine, the Middle East crisis, and the ongoing conflict between Israel and Palestine in 2024; the banking industry is faced with several conditions below, including:

1. The growth of financing distribution has slowed down or decreased, resulting in a decrease in the profitability of the banking industry in Indonesia;
2. Increase in the Non-Performing Financing (NPF) ratio;
3. Decreasing income from profit sharing which has an impact on reducing the profit sharing rate that will be given to customers; and
4. The Fed or the American central bank's rate determination cut the benchmark interest rate by 25 basis points on December 18, 2024 to 4.25% - 4.50%. This has an impact on decreasing the profit sharing ratio to customers so that in sharia financing contracts, the financing margin cannot be increased significantly. On the other hand, there was an increase in the bank's Cost of Fund in order to balance the provision of a profit sharing ratio that was not so large. This could affect the bank's income from the Net Interest Margin (NIM).

However, in the current economic conditions, Financing in the Corporate segment as of December 2024 amounted to IDR3.38 trillion, an increase of IDR431.9 billion or an increase of 12.75% compared to December 2023 yoy. In general, Bank Mega Syariah also recorded quite good performance amidst the still unstable economic conditions.

Apart from this quite good performance, Bank Mega Syariah continues to anticipate an increase in the non-performing financing ratio (NPF), one of which is by providing restructuring to customers whose cash flow has decreased.

To ensure the corporate financing segment remains collectible, with the financing portfolio in collectability 2 representing 2.31% of all outstanding financing as of December 2024, the following actions are taken:

1. Increasing the intensity of collections from problematic corporate customers;
2. Strict monitoring of the current condition of corporate customers;
3. Monitoring is carried out through periodic site visits or online meetings;
4. Restructuring financing in accordance with regulatory policies.

Penerapan GCG di Bank Mega Syariah memiliki peran penting dalam memastikan perusahaan tetap menjaga kepercayaan dari pemegang saham dan nasabah, yang merupakan fondasi utama untuk keberlanjutan bisnis. Namun, GCG juga lebih dari sekadar menjaga kepercayaan; GCG merupakan pilar untuk menjaga kepatuhan terhadap regulasi yang berlaku serta memastikan bahwa setiap keputusan bisnis didasarkan pada prinsip etika yang tinggi. Penerapan GCG memberikan keuntungan jangka panjang tidak hanya bagi pemegang saham, tetapi juga bagi industri perbankan nasional secara keseluruhan. Ini semakin relevan seiring dengan meningkatnya kompleksitas dan risiko yang dihadapi oleh sektor perbankan, seperti ketidakpastian ekonomi global dan perubahan regulasi yang cepat.

Penerapan GCG yang konsisten juga memastikan bahwa pengelolaan sumber daya dan aset Bank dilakukan secara efisien dan bertanggung jawab, mengurangi potensi penyalahgunaan wewenang atau konflik kepentingan, serta mendorong budaya perusahaan yang selalu menempatkan kepentingan nasabah dan masyarakat sebagai prioritas utama. This commitment involves all elements of the organization, from top management to all employees.

At Bank Mega Syariah, the implementation of GCG is vital to maintaining the company's customer and shareholder trust, which is the cornerstone of long-term business sustainability. GCG, however, is more than just upholding trust; it is a cornerstone for preserving adherence to relevant laws and guaranteeing that all company choices are founded on the highest ethical standards. Long-term advantages of GCG's implementation extend beyond shareholders to the entire country's banking sector. Together with the growing complexity and risks that the banking industry faces—such as the unpredictability of the global economy and the quick changes in regulations—this is becoming more and more pertinent.

Pelaksanaan dan Sistem Manajemen Risiko

Implementation and Risk Management System

Bank Mega Syariah senantiasa menerapkan sistem manajemen risiko yang baik, berupa penetapan sejumlah risiko utama serta upaya mitigasinya. Bank menerapkan pengelolaan risiko yang menyeluruh dari tingkat Direksi hingga pelaksana termasuk partisipasi aktif Dewan Komisaris dalam pengawasan. Dewan Komisaris dan Direksi dibantu oleh komite-komite risiko yang melibatkan pemimpin Satuan Kerja terkait dalam pengambilan keputusan terkait kebijakan risiko.

Bank Mega Syariah always implements a good risk management system, in the form of determining a number of main risks and mitigating efforts. The Bank implements comprehensive risk management from the Board of Directors to the implementer level, including the active participation of the Board of Commissioners in supervision. The Board of Commissioners and the Board of Directors are assisted by risk committees that involve the leaders of the relevant Work Units in making decisions related to risk policies.

Dalam konteks ini, penerapan sistem manajemen risiko berperan penting dalam memastikan bahwa Bank dapat terus beroperasi dengan stabil, meskipun menghadapi ketidakpastian pasar, peraturan baru, atau perubahan dalam kondisi ekonomi global. Melalui pengelolaan risiko yang tepat, Bank Mega Syariah mampu menjaga keberlanjutan kinerja bisnisnya dalam jangka panjang, serta menjaga kepentingan seluruh pemangku kepentingan, termasuk nasabah, pegawai, dan regulator.

Selain itu, dengan membagi tanggung jawab pengelolaan risiko di setiap Satuan Kerja, Bank Mega Syariah memastikan bahwa seluruh organisasi memiliki kesadaran yang tinggi terhadap potensi risiko yang ada dalam aktivitas bisnis sehari-hari. Hal ini tidak hanya mendukung stabilitas operasional, tetapi juga meningkatkan transparansi dan akuntabilitas dalam pengambilan keputusan, yang merupakan inti dari tata kelola yang baik dan berkelanjutan.

Satuan Kerja khusus yang dikenal sebagai Satuan Kerja Manajemen Risiko (SKMR) di Bank Mega Syariah memiliki peran kunci dalam memastikan independensi dalam pengelolaan risiko. Satuan Kerja ini bertindak secara independen terhadap unit-unit yang mengambil risiko (*risk taking unit*) serta terhadap Satuan Kerja yang fokus pada pengendalian internal. SKMR melapor secara langsung kepada Direktur yang bertanggung jawab atas manajemen risiko. Satuan Kerja tersebut memastikan bahwa risiko dilakukan evaluasi dengan cermat dan dikelola secara efektif, tanpa adanya pengaruh dari pihak lain yang mungkin memiliki konflik kepentingan. Hal ini memungkinkan Bank Mega Syariah untuk mengambil langkah-langkah yang diperlukan dalam menghadapi tantangan dan risiko dengan lebih tepat dan efisien.

Selain itu, Satuan Kerja Manajemen Risiko juga melakukan simulasi *stress testing* yang diperlukan untuk memahami dampak dari potensi skenario risiko yang berbeda. Satuan Kerja Manajemen Risiko juga secara aktif terlibat dalam meninjau dan mengevaluasi proses, aktivitas, dan produk bank dari sudut pandang risiko, serta merumuskan rekomendasi mitigasi untuk mengurangi dampak risiko yang mungkin timbul. Semua ini dilakukan untuk memastikan bahwa Bank Mega Syariah dapat mengelola risiko dengan efektif dan meminimalkan potensi kerugian.

Through proper risk management, Bank Mega Syariah is able to maintain the sustainability of its business performance in the long term, as well as protect the interests of all stakeholders, including customers, employees, and regulators.

In addition, by dividing the responsibility for risk management in each Work Unit, Bank Mega Syariah ensures that the entire organization has a high awareness of the potential risks that exist in daily business activities. This not only supports operational stability, but also increases transparency and accountability in decision making, which are the core of good and sustainable governance.

A special work unit known as the Risk Management Work Unit (SKMR) at Bank Mega Syariah plays a key role in ensuring independence in risk management. This work unit acts independently of risk-taking units and work units that focus on internal control. SKMR reports directly to the Director responsible for risk management. The work unit ensures that risks are carefully evaluated and managed effectively, without any influence from other parties who may have a conflict of interest. This allows Bank Mega Syariah to take the necessary steps to face challenges and risks more appropriately and efficiently.

In addition, the Risk Management Work Unit also conducts stress testing simulations needed to understand the impact of different potential risk scenarios. The Risk Management Work Unit is also actively involved in reviewing and evaluating the bank's processes, activities, and products from a risk perspective, as well as formulating mitigation recommendations to reduce the impact of potential risks. All of this is done to ensure that Bank Mega Syariah can manage risks effectively and minimize potential losses.

dihadapi Bank Mega Syariah sesuai hasil evaluasi profil risiko yang terbentuk, merupakan salah satu pendekatan yang diambil Bank untuk menjaga prinsip *prudential banking* yang dijalankan selama ini.

2. Pilar Kecukupan Kebijakan, Prosedur, dan Penetapan *Limit*

Bank Mega Syariah secara berkala dan terus-menerus melakukan evaluasi serta penyempurnaan kebijakan dan prosedur yang telah ditetapkan, dengan tujuan untuk meningkatkan kualitas penerapan manajemen risiko. Selain kebijakan dan prosedur manajemen risiko, Bank Mega Syariah juga menetapkan dan selalu mengevaluasi *limit* sesuai *risk appetite* dan *risk tolerance* yang ditetapkan, untuk menyesuaikan risiko yang dapat diterima dan menetapkan pengendalian yang dapat mengamankan perusahaan dari kerugian yang tidak diinginkan.

3. Pilar Kecukupan Proses Pengelolaan Risiko

Pengelolaan risiko yang dilaksanakan meliputi proses identifikasi, pengukuran, pemantauan dan pengendalian risiko, serta sistem informasi manajemen risiko. Bank Mega Syariah melakukan identifikasi, pemantauan dan pengendalian risiko melalui kajian profil risiko, serta menetapkan *limit* risiko, baik secara keseluruhan, per jenis risiko, maupun per aktivitas fungsional tertentu yang memiliki eksposur risiko.

Profil risiko secara konsisten dipantau secara bulanan agar tingkat kesehatan selalu terjaga. Manajemen bank selalu mendapatkan informasi terkini mengenai kesesuaian *risk appetite* dan ketepatan *risk tolerance* apabila terjadi pelampauan *limit*. Pemantauan dan pengendalian juga melibatkan seluruh jajaran organisasi mulai dari Dewan Komisaris, Direksi, maupun setiap Satuan Kerja terkait.

Pengukuran dan pemantauan risiko wajib dilakukan secara efektif dan handal dengan dukungan Sistem Informasi Manajemen yang tepat waktu dan Laporan Keuangan yang akurat. Sistem Informasi Manajemen mencakup laporan yang meliputi eksposur risiko, kepatuhan terhadap kebijakan, prosedur dan *limit*, serta pencapaian aktual terhadap target yang ditetapkan.

4. Pilar Tata Kelola Pengendalian Intern yang Menyeluruh

Bank Mega Syariah secara konsisten menerapkan pendekatan pertahanan tiga lapis (*three lines of defences*) dalam merancang dan menerapkan kerangka kerja pengendalian internal yang menyeluruh.

and recommendations on the direction of risk management policies and strategies, including discussions on all aspects of risk faced by Bank Mega Syariah according to the results of the organized risk profile evaluation.

2. Pillar of Adequacy of Policies, Procedures, and Limit Determination

To raise the standard of risk management implementation, Bank Mega Syariah continually and periodically assesses and enhances the current procedures and policies. Along with risk management procedures and policies, Bank Mega Syariah also establishes and continuously assesses limits based on the established risk appetite and risk tolerance, to adjust acceptable risks and establish controls that can protect the company from unwanted losses.

3. Pillar of Adequacy of Risk Management Process

Risk management implemented includes the process of risk identification, measurement, monitoring and control, as well as the risk management information system. Bank Mega Syariah identifies, monitors and controls risks through risk profile studies, and sets risk limits, both overall, per type of risk, and per specific functional activity that has risk exposure.

The risk profile is consistently monitored monthly so that the health level is always maintained. Bank management always receives the latest information regarding the suitability of risk appetite and the accuracy of risk tolerance if there is a limit exceedance. All organizational levels are involved in monitoring and control, beginning with the Board of Commissioners, Directors, and each relevant Work Unit.

Accurate financial reports and a timely management information system are essential for the efficient and dependable execution of risk measurement and monitoring. Reports on risk exposure, compliance with policies, procedures and limits, and actual achievement of the set targets.

4. Pillar of Comprehensive Internal Control Governance

Bank Mega Syariah consistently applies a three-line of defense approach in designing and implementing a comprehensive internal control framework.

Pertahanan lapis pertama wajib terdapat pada seluruh Satuan Kerja sesuai bidang tugas masing-masing sebagai pemilik risiko (*risk owner*) yang merupakan implementasi dari kontrol internal pada setiap Satuan Kerja. Hal ini diwujudkan antara lain melalui mekanisme *maker*, *checker*, dan *approval* atau mekanisme *dual control*; proses verifikasi, validasi atau *proof-sheet*; objektivitas penilaian dan/atau persetujuan pada setiap aktivitas; pemisahan fungsi kerja yang independen satu dengan yang lain sebagai penerapan *four eyes principle*; dan sebagainya.

Pertahanan lapis kedua sebagai bentuk pengawasan dilakukan oleh fungsi-fungsi *risk controller* atau *risk manager*, yaitu Satuan Kerja *Internal Control*, Satuan Kerja Manajemen Risiko, dan Satuan Kerja Kepatuhan. Secara tidak langsung, Satuan Kerja dengan fungsi *Accounting/Finance* pada Bank Mega Syariah juga secara aktif berperan sebagai *risk controller* melalui analisis informasi keuangan yang dihasilkannya.

Pertahanan lapis terakhir berupa pemeriksaan ulang pasca transaksi (*risk examiner*) yang dilakukan oleh Satuan Kerja Audit Internal, termasuk evaluasi kinerja dan kualitas transaksi untuk penyempurnaan lebih lanjut. Sebagai pelengkap yang menyempurnakan, diterapkan pula pemeriksaan oleh eksternal auditor dan eksternal akuntan sebagai *independent assurance*.

5. Pilar Pengelolaan Risiko Melalui Permodalan

Dalam menetapkan kebijakan, Bank Mega Syariah memperhatikan dan memperhitungkan kemampuan serta kecukupan permodalan yang tersedia. Pada setiap keputusan, Direksi selalu mengkaji dan mengaitkannya dengan pemenuhan *Capital Adequacy Ratio* (CAR) yang tersedia. Besarnya risiko atas produk/aktivitas yang akan dijalankan juga dikaji terhadap keterkaitannya dengan pengaruh pada CAR yang tersedia.

Keputusan yang diambil juga mempertimbangkan berbagai sumber permodalan yang tersedia maupun yang dapat ditambahkan untuk mendukung keputusan terkait, serta *benefit* yang akan diterima untuk kepentingan seluruh *stakeholder* maupun Tingkat Kesehatan Bank melalui profil risiko yang tetap terjaga kualitasnya.

The first layer of defense must be present in all Work Units according to their respective fields of duty as risk owners, which is an implementation of internal control in each Work Unit. This is realized, among others, through the maker, checker, and approval mechanisms or dual control mechanisms; verification, validation or proof-sheet processes; objectivity of assessment and/or approval of each activity; separation of independent work functions from one another as an application of the four eyes principle; and so on.

The second layer of defense as a form of supervision is carried out by the risk controller or risk manager functions, namely the Internal Control Work Unit, the Risk Management Work Unit, and the Compliance Work Unit. Indirectly, the Work Unit with the Accounting/Finance function at Bank Mega Syariah also actively plays a role as a risk controller through the analysis of the financial information it produces.

The last layer of defense is in the form of a post-transaction re-examination (risk examiner) carried out by the Internal Audit Work Unit, including evaluation of performance and transaction quality for further improvement. As a complement to perfection, an examination by an external auditor and external accountant is also applied as independent assurance.

5. Pillar of Risk Management Through Capital

In determining policies, Bank Mega Syariah pays attention to and takes into account the ability and adequacy of available capital. In every decision, the Board of Directors always reviews and relates it to the fulfillment of the available Capital Adequacy Ratio (CAR). The magnitude of the risk of the product/activity to be carried out is also reviewed in relation to its influence on the available CAR.

The decisions taken also consider various sources of capital available or that can be added to support related decisions, as well as the benefits that will be received for the benefit of all stakeholders and the Bank's Health Level through a risk profile that is maintained in quality.

Pengelolaan risiko melalui permodalan memperhitungkan seluruh kewajiban kecukupan modal untuk mengcover risiko kredit, risiko pasar, dan risiko operasional; baik dalam kondisi normal maupun kondisi pemburukan (*stress*). Untuk itu, secara berkala, dilakukan *stress-test* perhitungan kecukupan modal dalam berbagai skenario.

Selain acuan 5 pilar utama tersebut di atas, Kebijakan Manajemen Risiko Bank Mega Syariah juga telah mencakup ketentuan yang dipersyaratkan, yang meliputi:

- a. Tata cara penetapan risiko terkait produk dan transaksi yang dimiliki Bank Mega Syariah, sesuai dengan Peraturan Otoritas Jasa Keuangan nomor 24/POJK.02/2015 tentang Produk dan Aktivitas Bank Syariah dan Unit Usaha Syariah serta Peraturan Otoritas Jasa Keuangan nomor 13/POJK.03/2021 tentang Penyelenggaraan Produk Bank Umum.
- b. Penetapan penggunaan parameter pengukuran dan sistem informasi manajemen risiko, dengan Kebijakan Manajemen Risiko Bank Mega Syariah yang telah diuraikan pada masing-masing jenis dari keseluruhan 10 jenis risiko.
- c. Penentuan limit *risk appetite* dan penetapan toleransi risiko, dengan kebijakan yang mencakup akuntabilitas dan jenjang delegasi wewenang dalam setiap *limit*, baik *limit aggregate*, *limit* per risiko atau per aktivitas yang berisiko, pelaksanaan *monitoring* dan evaluasi, serta pendokumentasiannya.
- d. Penetapan penilaian peringkat risiko yang tertuang dalam kebijakan khusus yang mengatur tata cara pengkajian Profil Risiko Bank Mega Syariah dan Pelaporan Tingkat Kesehatan yang telah menggunakan metode *Risk Based Bank Rating* (RBBR).
- e. Penyusunan rencana darurat (*contingency plan*) dalam kondisi terburuk (*worst case scenario*), berupa kebijakan *Business Continuity Plan* dan *Disaster Recovery Plan*, serta telah mencakup pengaturan pelaksanaan *Business Impact Analysis* dan *Risk Assessment* serta *Critical Business Process* yang wajib disediakan pada saat perkiraan kondisi terburuk terjadi.
- f. Penetapan sistem pengendalian intern dalam penerapan manajemen risiko, yang tertuang secara rinci dalam setiap Kebijakan dan Prosedur Operasional, sampai pada tingkat pelaksanaan *internal control* harian dan *internal audit* yang juga telah mengimplementasikan *risk-based audit*.

Risk management through capital takes into account all capital adequacy obligations to cover credit risk, market risk, and operational risk; both in normal and deteriorating conditions (*stress*). For this reason, stress tests are periodically carried out to calculate capital adequacy in various scenarios.

In addition to the five primary pillars of reference mentioned above, necessary clauses have been incorporated into Bank Mega Syariah's Risk Management Policy. These include:

- a. Procedures for determining risks related to products and transactions owned by Bank Mega Syariah, in accordance with Financial Services Authority Regulation number 24/POJK.02/2015 concerning Sharia Bank Products and Activities and Sharia Business Units and Financial Services Authority Regulation number 13/POJK.03/2021 concerning the Implementation of General Bank Products.
- b. Determination of the use of measurement parameters and risk management information systems, with the Bank Mega Syariah Risk Management Policy which has been described in each type of the total 10 types of risk.
- c. Determination of risk appetite limits and determination of risk tolerance, with policies that include accountability and levels of delegation of authority in each limit, both aggregate limits, limits per risk or per risky activity, implementation of monitoring and evaluation, and documentation.

- f. Determination of an internal control system in the implementation of risk management, which is stated in detail in each Operational Policy and Procedure, up to the level of daily internal control and internal audit implementation which has also implemented risk-based audits.

Strategi Manajemen Risiko

Risk Management Strategy

Direksi Bank Mega Syariah memiliki tiga forum utama untuk membahas strategi dan manajemen risiko yaitu Rapat Dewan Direksi, Rapat Asset and Liability Committee, dan Rapat Komite Manajemen Risiko. Satuan Kerja Manajemen Risiko, sebagai Sekretaris Komite Manajemen Risiko, bertanggung jawab membakukan keputusan strategis menjadi kebijakan tertulis untuk panduan seluruh pegawai dalam melaksanakan manajemen risiko.

Melalui Satuan Kerja Manajemen Risiko, Direksi Bank Mega Syariah memperoleh gambaran risiko secara komprehensif melalui kajian Profil Risiko yang disampaikan secara bulanan. Profil Risiko tersebut dilaporkan kepada Otoritas Jasa Keuangan setiap triwulan. Selain itu, Profil Risiko disampaikan kepada Otoritas Jasa Keuangan setiap semester; bersama dengan kajian Tata Kelola, Rentabilitas, dan Permodalan; sebagai bagian dari penilaian Tingkat Kesehatan Bank menggunakan metode *Risk Based Bank Rating*.

Laporan Profil Risiko menggambarkan 10 (sepuluh) jenis risiko yang melekat pada seluruh aktivitas usaha Bank Mega Syariah (*inherent risk*) dan sistem pengendalian risiko (*risk control system*) yang telah dijalankan, atau yang dikenal sebagai Kualitas Penerapan Manajemen Risiko, dan kemudian secara matriks akan menghasilkan peringkat komposit dalam 5 kategori yang biasa dibedakan dengan peringkat (1) *Low*, (2) *Low to Moderate*, (3) *Moderate*, (4) *Moderate to High*, dan (5) *High*.

Dalam melakukan kajian internal terhadap profil risiko, Bank Mega Syariah telah menerapkan pembobotan yang mempertimbangkan signifikansi pengaruh setiap risiko terhadap kelangsungan usaha bank. Hal ini memungkinkan Direksi untuk mengambil keputusan strategis dalam manajemen risiko dengan lebih akurat dan terarah.

The Board of Directors of Bank Mega Syariah has three main forums to discuss strategy and risk management, they are the Board of Directors Meeting, the Asset and Liability Committee Meeting, and the Risk Management Committee Meeting. The Risk Management Work Unit, as the Secretary of the Risk Management Committee, is responsible for standardizing strategic decisions into written policies as a guidance for all employees in implementing risk management.

The Board of Directors of Bank Mega Syariah receives a monthly Risk Profile analysis from the Risk Management Work Unit, which provides a thorough understanding of risk. The Financial Services Authority receives a quarterly report on the Risk Profile. Additionally, as part of the Risk Based Bank Rating method's evaluation of the Bank Health Level, the Risk Profile is submitted to the Financial Services Authority each semester together with studies of Governance, Rentability, and Capital.

The Risk Profile Report describes 10 (ten) types of risks inherent in all business activities of Bank Mega Syariah (*inherent risk*) and the risk control system that has been implemented, or what is known as the Quality of Risk Management Implementation, and then in a matrix will produce a composite rating in 5 categories which are usually distinguished by the ratings (1) *Low*, (2) *Low to Moderate*, (3) *Moderate*, (4) *Moderate to High*, and (5) *High*.

Bank Mega Syariah has implemented a weighting that takes into account the significance of each risk's impact the continuity of the bank's business as part of an internal examination of the risk profile. Identifikasi risiko juga melibatkan analisis data keuangan yang disajikan oleh satuan kerja Akuntansi/*Finance*, mencerminkan pencapaian kinerja dan kualitas Bank Mega Syariah; baik secara keseluruhan, di setiap kantor distribusi, maupun per produk atau layanan. Informasi ini secara rutin disampaikan kepada Direksi melalui rapat-rapat mingguan atau bulanan, seperti rapat Dewan Direksi, rapat *Asset Liabilities Committee* (ALCO), atau rapat Komite Manajemen Risiko. Proses ini memastikan bahwa evaluasi risiko didasarkan pada informasi keuangan yang akurat dan terkini.

Proses identifikasi risiko di Bank Mega Syariah juga melibatkan hasil pemeriksaan *Internal Control* dan *Internal Audit*, opini dari satuan kerja Manajemen Risiko dan Kepatuhan, serta pembahasan dalam rapat antar Departemen maupun Divisi. Proses pengukuran dan penilaian risiko berlangsung secara simultan melalui proses identifikasi dan menggunakan sumber yang sama. Hasilnya tercermin dalam laporan kinerja aktivitas fungsional, pencapaian target, laporan portofolio (eksposur risiko), serta kondisi keuangan lainnya untuk memastikan evaluasi risiko yang holistik dan terperinci.

Sejalan dengan itu, Bank Mega Syariah rutin mengevaluasi asumsi pengukuran risiko dan sumber data yang digunakan, serta meninjau informasi pada industri perbankan sejenis dan perubahan regulasi terkini. Hal ini dilakukan sejalan dengan *self assessment* terhadap profil risiko, memastikan keakuratan dan kecanggihan pengelolaan risiko secara terus-menerus.

Setiap tahunnya, Bank Mega Syariah menyempurnakan parameter dan sistem pengukuran risiko, terutama jika terdapat perubahan signifikan dalam kegiatan usaha atau portofolio produk yang dapat memengaruhi kinerja dan kondisi keuangan Bank. Pemantauan risiko secara formal dilakukan dalam pertemuan bulanan Komite Manajemen Risiko dengan menyampaikan evaluasi Profil Risiko dan *Limit* Risiko, yang kemudian diulas secara berkala setiap hari dan dibahas kembali pada pertemuan bulan berikutnya.

Selanjutnya, penyempurnaan pengukuran risiko dan proses pelaporan tidak harus menunggu satu tahun penuh untuk dilakukan; terutama jika terjadi perubahan signifikan dalam kegiatan usaha, transaksi, produk, teknologi, sistem informasi, atau faktor risiko yang material. Penyempurnaan tersebut bisa dilakukan lebih sering. Hal ini memastikan bahwa pemantauan risiko dilakukan secara tepat sasaran, memberikan kemampuan respons yang lebih cepat terhadap perubahan lingkungan bisnis dan mengoptimalkan proses manajemen risiko secara keseluruhan.

Risk identification also involves analyzing financial data presented by the Accounting/*Finance* work unit, reflecting the achievement of Bank Mega Syariah's performance and quality; both overall, in each distribution office, and per product or service. This information is routinely submitted to the Board of Directors through weekly or monthly meetings, such as Board of Directors meetings, *Asset Liabilities Committee* (ALCO) meetings, or Risk Management Committee meetings. This process ensures that risk evaluation is based on accurate and up-to-date financial information.

The results of Internal Control and Internal Audit assessments, the viewpoints of the Risk Management and Compliance work unit, and conversations at departmental and divisional meetings are all part of Bank Mega Syariah's risk identification process. The risk measurement and assessment process takes place simultaneously through the identification process and uses the same source. The results are reflected in the functional activity performance report, target achievement, portfolio report (risk exposure), and other financial conditions to ensure a holistic and detailed risk evaluation.

In line with that, Bank Mega Syariah regularly assesses the risk measurement assumptions and data sources employed, and analyze information on similar banking industries and current regulatory changes. This is carried out in accordance with the risk profile's self-assessment, guaranteeing the precision and complexity of risk management on an ongoing basis in addition to reviewing data on related banking businesses and new regulatory changes.

Every year, Bank Mega Syariah refines the parameters and risk measurement system, especially if there are significant changes in business activities or product portfolios that can affect the Bank's performance and financial condition. Formal risk monitoring is carried out in monthly meetings of the Risk Management Committee by submitting an evaluation of the Risk Profile and Risk Limit, which is then reviewed periodically every day and discussed again at the following month's meeting.

Furthermore, it is not necessary to wait a full year to implement improvements to risk measuring and reporting procedures, especially, in the event that corporate operations, transactions, goods, technology, information systems, or material risk factors undergo substantial changes. Improvements of this kind can be made more often. This ensures targeted risk monitoring, enables a quicker reaction to changes in the business environment, and enhances the risk management procedure as a whole.

Proses pengelolaan risiko Bank Mega Syariah, termasuk identifikasi, pengukuran, penilaian, pemantauan, dan pengendalian; memerlukan dukungan sistem informasi yang handal. Sebagai contoh, data tentang risiko kredit dan investasi diperoleh dari Satuan Kerja pemroses pembiayaan, sementara informasi tentang risiko hukum diperoleh dari Satuan Kerja *Legal* dan seterusnya.

Data dan informasi terkait risiko dikonsolidasikan dan dianalisis oleh Satuan Kerja *Financial Planning & Accounting*, serta mengalir ke Satuan Kerja Kepatuhan dan *Internal Control/Internal Audit*. Beberapa data sudah terkomputerisasi dan dapat diunduh langsung dari sistem dengan bantuan Satuan Kerja Teknologi Informasi atau Satuan Kerja *Financial Planning & Accounting*. Setiap satuan kerja tersebut mengolah data dan informasi untuk memastikan kepatuhan

Bank Mega Syariah's risk management process, including identification, measurement, assessment, monitoring, and control; requires the support of a reliable information system. This system, which may be developed automatically or manually, is accurate and timely, ensuring prompt and appropriate decision-making.

Bank Mega Syariah ensures that there are periodic reports or at least information that reflects the exposure of the ten risks that need to be managed. Data and information pertaining to the risk exposure addressed must be provided by each Work Unit associated with the supporting function. As an example, the financing processing work unit provides information on investment and credit risks, the legal work unit provides information on legal risks, and so forth.

Data and information related to risks are consolidated and analyzed by the Financial Planning & Accounting Work Unit, and flow to the Compliance and Internal Control/Internal Audit Work Unit. Some data has been computerized and can be downloaded directly from the system with the help of the Information Technology Work Unit or the Financial Planning & Accounting Work Unit. Each work unit processes data and information to ensure compliance with risk management policies and

terhadap kebijakan dan prosedur manajemen risiko serta batasan *limit* eksposur dan wewenang. Hasil pengolahan data mencakup gambaran pelaksanaan manajemen risiko dan pencapaian target per bulan. Hal ini mencakup setiap kantor distribusi, aktivitas/produk, biaya, pendapatan, dan kualitas hasilnya.

Setiap bulan, Satuan Kerja *Financial Planning & Accounting* dan Satuan Kerja Manajemen Risiko menyajikan informasi manajemen risiko kepada Direksi dan/atau Dewan Komisaris melalui rapat atau komite terkait, termasuk *financial highlight* dan profil risiko. Satuan Kerja *Internal Control/Internal Audit* dan Kepatuhan juga memberikan informasi tentang penilaian risiko dan risiko yang muncul, sementara satuan kerja operasional lainnya menyampaikan informasi serupa pada pertemuan dengan Direksi.

Evaluasi sistem informasi manajemen risiko dilakukan setiap tahun dengan mengumpulkan data, informasi, dan laporan selama satu tahun kalender. Tujuan evaluasi ini adalah untuk menilai tingkat akurasi dan efektivitas sistem dalam memenuhi kebutuhan Bank. Evaluasi juga mencakup peninjauan parameter pengukuran risiko dan hasil akhir peringkat profil risiko Bank. Hasil evaluasi ini membantu dalam perbaikan dan penyesuaian sistem agar lebih responsif terhadap dinamika perubahan risiko dan kebutuhan Bank.

procedures as well as exposure and authority limits. The results of data processing include an overview of the implementation of risk management and the achievement of targets per month. This includes each distribution office, activity/product, costs, income, and quality of results.

Every month, through meetings or associated committees, the Financial Planning & Accounting Work Unit and the Risk Management Work Unit provide the Board of Directors and/or the Board of Commissioners with risk management information, including risk profiles and financial highlights. At meetings with the Board of Directors, various operational work units share information about risk assessments and new risks, as does the Internal Control/Internal Audit and Compliance Work Unit.

Evaluation of the risk management information system is carried out annually by collecting data, information, and reports for one calendar year. The purpose of this evaluation is to assess the level of accuracy and effectiveness of the system in meeting the Bank's needs. The evaluation also includes a review of risk measurement parameters and the final results of the Bank's risk profile ranking. The results of this evaluation help in improving and adjusting the system to be more responsive to the dynamics of changes in risk and the Bank's needs.

Sistem Pengendalian Intern yang Menyeluruh

Comprehensive Internal Control System

Bank Mega Syariah menerapkan pendekatan pertahanan tiga lapis (*three lines of defenses*) dalam sistem pengendalian internalnya. Ini mencakup manajemen risiko secara umum, yang merupakan bagian integral dari pengendalian *intern* Bank Mega Syariah. Pendekatan ini melibatkan *risk owner/risk taking unit*, *risk controller/manager*, dan *risk examiner* yang secara efektif mengidentifikasi kelemahan, mengendalikan kegiatan, dan memastikan kepatuhan di seluruh organisasi Bank Mega Syariah, dari hulu ke hilir.

Pendekatan pertahanan tiga lapis yang diterapkan oleh Bank Mega Syariah memainkan peran krusial dalam memastikan kepatuhan terhadap regulasi dan kebijakan internal. Selain itu, pendekatan ini juga menjamin tersedianya informasi keuangan dan manajemen yang lengkap, akurat, tepat guna, dan tepat waktu. Lebih lanjut, sistem ini berkontribusi pada efektivitas dan efisiensi operasional yang berkualitas, yang pada gilirannya membangun budaya risiko (*risk culture*) yang kokoh di seluruh organisasi. Dengan demikian, bank dapat menghadapi tantangan dengan lebih baik dan meningkatkan kinerja serta kepercayaan pemangku kepentingan.

Sistem pengendalian intern Bank Mega Syariah disesuaikan dengan tingkat risiko khususnya pada eksposur risiko kredit yang menjadi fokus utama. Pengendalian internal untuk risiko kredit dirancang dengan ketat untuk memastikan kualitas portofolio pembiayaan tetap terjaga. Hal ini termasuk pendelegasian wewenang dan pembatasan *limit* persetujuan. Satuan Kerja *Internal Control* secara rutin melakukan pemantauan harian terhadap kepatuhan proses dan transaksi, serta penggunaan wewenang oleh pejabat yang terkait.

Satuan Kerja Audit Internal Bank Mega Syariah secara berkala menerapkan pendekatan audit berbasis risiko dalam memeriksa proses dan transaksi. Satuan ini menyajikan hasil audit dalam laporan berbasis risiko (peringkat) yang memberikan pemahaman mendalam tentang eksposur risiko. Selain itu, dilakukan juga evaluasi kecukupan dan keterkinian kebijakan serta prosedur, serta melakukan kajian ulang terhadap sistem informasi manajemen dan prosedur auditnya untuk memastikan kecukupan, objektivitas, dan efektivitasnya. Hal ini bertujuan untuk menilai kualitas penerapan manajemen risiko oleh unit yang diperiksa.

Bank Mega Syariah implements a three-line defense approach in its internal control system. One essential component of Bank Mega Syariah's internal control is general risk management. In order to effectively detect weaknesses, control operations, and ensure compliance throughout Bank Mega Syariah's structure, from upstream to downstream, this strategy entails risk owners/risk taking units, risk controllers/managers, and risk examiners.

The three lines of defense approach implemented by Bank Mega Syariah plays a crucial role in ensuring compliance with regulations and internal policies. In addition, this approach also ensures the availability of complete, accurate, appropriate, and timely financial and management information. Furthermore, this system contributes to quality operational effectiveness and efficiency, which in turn builds a strong risk culture throughout the organization. Thus, the bank can better face challenges and improve performance and stakeholder trust.

Bank Mega Syariah's internal control system is adjusted to the level of risk, especially on credit risk exposure which is the main focus. Internal control for credit risk is designed strictly to ensure the quality of the financing portfolio is maintained. This includes delegation of authority and limitation of approval limits. The Internal Control Work Unit routinely monitors daily compliance with processes and transactions, as well as the use of authority by related officials.

The Internal Audit Work Unit of Bank Mega Syariah periodically applies a risk-based audit approach in examining processes and transactions. This unit presents audit results in a risk-based report (rating) that provides an in-depth understanding of risk exposure. In addition, an evaluation of the adequacy and recency of policies and procedures is also carried out, as well as a review of the management information system and its audit procedures to ensure their adequacy, objectivity, and effectiveness. This aims to assess the quality of risk management implementation by the audited unit.

Risiko Kredit

Risiko kredit merupakan kemungkinan kegagalan pihak untuk memenuhi kewajiban pembayaran kepada Bank, termasuk kegagalan debitur, konsentrasi kredit, *counterparty credit risk*, dan *settlement risk*. Manajemen risiko kredit merupakan salah satu fokus utama Bank Mega Syariah karena mayoritas aktivitasnya terkait dengan penyaluran dana melalui pembiayaan. Bank Mega Syariah mengatur risiko kredit dengan menjaga kualitas pembiayaan, mengendalikan risiko konsentrasi, dan mematuhi ketentuan dalam Kebijakan Pembiayaan Bank sesuai dengan Peraturan Otoritas Jasa Keuangan (POJK) No.42/POJK.03/2017 tentang Kewajiban Penyusunan dan Pelaksanaan Kebijakan Perkreditan atau Pembiayaan Bank Bagi Bank Umum tanggal 12 Juli 2017. Kebijakan Pembiayaan Bank merupakan hirarki tertinggi yang mengatur secara umum ketentuan-ketentuan dasar aktivitas pembiayaan.

Kebijakan Pembiayaan Bank merupakan ketentuan utama yang mendasari beberapa ketentuan spesifik seperti Pedoman Pembiayaan Produktif, Pedoman Pembiayaan Konsumtif, Pedoman Pembiayaan *Account Maintenance*, dan Pedoman Restrukturisasi Pembiayaan. Bank Mega Syariah menerapkan prinsip *four eyes principle* dalam manajemen risiko pada pembiayaan, dengan pemisahan tugas antara fungsi bisnis dan kajian risiko serta mekanisme Komite Pembiayaan. Setiap pembiayaan memerlukan persetujuan oleh lebih dari satu pihak.

Risiko Operasional

Risiko operasional merupakan risiko kedua terbesar setelah risiko kredit di Bank Mega Syariah. Risiko ini meliputi potensi kerugian akibat kekurangan dalam proses internal, kegagalan proses, kesalahan manusia, kegagalan sistem, atau faktor eksternal yang mempengaruhi operasional Bank. Meskipun menjadi risiko kedua, Bank mengutamakan infrastruktur, sumber daya insani, peningkatan kualitas sebagai prioritas utama, serta mengantisipasi perubahan segmentasi dan orientasi pasar. Kebijakan, prosedur, dan proses telah disusun untuk mengendalikan atau mengurangi risiko operasional sesuai dengan peningkatan kompleksitas operasional. Selama tahun berjalan, Bank secara aktif melakukan penyegaran produk penghimpunan dana dan layanan, serta pengembangan layanan *digital* untuk meningkatkan kualitas layanan kepada pelanggan dan memenuhi kebutuhan pasar.

Sejalan dengan hal tersebut, pemisahan fungsi antara satuan kerja operasional dan pengendalian adalah strategi penting dalam pengelolaan risiko operasional di Bank Mega Syariah. Hal ini memastikan bahwa tidak ada konflik kepentingan yang muncul dan meningkatkan keamanan serta integritas operasional.

Credit Risk

Credit risk is the possibility of a party failing to fulfill its payment obligations to the Bank, including debtor failure, credit concentration, counterparty credit risk, and settlement risk. Credit risk management is one of Bank Mega Syariah's main focuses because the majority of its activities are related to the distribution of funds through financing. Bank Mega Syariah manages credit risk by maintaining financing quality, controlling concentration risk, and complying with the provisions of the Bank's Financing Policy in accordance with the Financial Services Authority Regulation (POJK) No.42/POJK.03/2017 concerning the Obligation to Prepare and Implement Bank Credit or Financing Policies for Commercial Banks dated July 12, 2017. The Bank's Financing Policy is the highest hierarchy that generally regulates the basic provisions of financing activities.

Bank Financing Policy is the main provision underlying several specific provisions such as Productive Financing Guidelines, Consumptive Financing Guidelines, Account Maintenance Financing Guidelines, and Financing Restructuring Guidelines. Bank Mega Syariah applies the four eyes principle in risk management in financing, with a separation of duties between business functions and risk assessments and the Financing Committee mechanism. Each financing requires approval from more than one party.

Operational Risk

Operational risk is the second largest risk after credit risk in Bank Mega Syariah. This risk includes potential losses due to deficiencies in internal processes, process failures, human errors, system failures, or external factors that affect the Bank's operations. Despite being the second risk, the Bank prioritizes infrastructure, human resources, quality improvement as the top priority, as well as anticipating changes in segmentation and market orientation. Policies, procedures and processes have been developed to control or mitigate operational risk in line with the increasing complexity of operations. During the year, the Bank actively refreshed its fund raising products and services, and developed digital services to improve the quality of service to customers and meet market needs.

In line with this, the separation of functions between operational and control work units is an important strategy in managing operational risk at Bank Mega Syariah. This ensures that no conflicts of interest arise and improves operational security and integrity. In addition, the implementation of the Know Your

Selain itu, penerapan Prinsip Mengenal Nasabah/*Know Your Customer* (KYC) atau *Customer Due Diligence* secara konsisten ditegakkan sesuai dengan tingkat risiko operasional yang ada. Dengan demikian, Bank dapat mengidentifikasi potensi risiko yang terkait dengan nasabah dan mengambil langkah-langkah preventif yang sesuai untuk mengurangi kemungkinan terjadinya risiko tersebut.

Risiko Strategik

Risiko strategik di Bank Mega Syariah melibatkan ketidaktepatan dalam pengambilan dan pelaksanaan keputusan strategik, serta kegagalan dalam mengantisipasi perubahan lingkungan bisnis. Hal ini menjadi perhatian utama Direksi, terutama dalam menyesuaikan segmentasi pasar dan memantau kinerja Bank dibandingkan dengan bank sejenis. Mitigasi risiko strategik dimulai sejak perencanaan produk dan aktivitas baru dalam Rencana Bisnis Bank. Pengukuran risiko ini didasarkan pada kinerja bank yang dibandingkan dengan rencana bisnis, dengan faktor-faktor lain seperti kesesuaian strategi dengan lingkungan bisnis dan kondisi ekonomi makro.

Risiko Pasar

Risiko pasar di Bank Mega Syariah adalah risiko pada neraca dan rekening administratif akibat perubahan harga pasar, termasuk perubahan nilai aset yang dapat diperdagangkan atau disewakan. Risiko ini terdiri dari risiko nilai tukar dan risiko pergerakan harga sukuk, yang dikategorikan dalam nilai wajar. Bank Mega Syariah mengelola risiko pasar berdasarkan portofolio penyaluran dana mayoritas dalam bentuk pembiayaan dan sebagian dalam bentuk surat berharga sukuk sebagai cadangan likuiditas. *Treasury* tidak melakukan aktivitas perdagangan *over the counter* untuk *proprietary trading*, sehingga eksposur risiko pasar tergolong rendah. Fokusnya adalah pada perubahan perilaku dan menjaga kepercayaan nasabah pada saat kenaikan suku bunga acuan pasar, disesuaikan dengan pembiayaan mayoritas yang memiliki *margin* tetap.

Risiko Likuiditas

Risiko likuiditas adalah kemungkinan bank tidak dapat membayar kewajiban yang jatuh tempo atau menjual investasi secara instan karena permintaan pasar rendah. Pengelolaan likuiditas krusial karena kekurangan likuiditas dapat mengganggu sistem perbankan nasional. Kebijakan manajemen risiko likuiditas Bank Mega Syariah ditujukan untuk memenuhi kebutuhan operasional dan kebutuhan yang tak terduga, seperti penarikan dana besar nasabah. Ini mencakup strategi likuiditas, cadangan likuiditas, dan akses pendanaan antar bank.

Customer (KYC) Principle or Customer Due Diligence is consistently enforced in accordance with the existing level of operational risk. Thus, the Bank can identify potential risks associated with customers and take appropriate preventive measures to reduce the possibility of such risks occurring.

Strategic Risk

Strategic risk at Bank Mega Syariah involves inaccuracy in making and implementing strategic decisions, as well as failure to anticipate changes in the business environment. This is a major concern for the Board of Directors, especially in adjusting market segmentation and monitoring the Bank's performance compared to similar banks. Strategic risk mitigation begins with the planning of new products and activities in the Bank's Business Plan. This risk measurement is based on the bank's performance compared to the business plan, with other factors such as the suitability of the strategy to the business environment and macroeconomic conditions.

Market Risk

Market risk at Bank Mega Syariah is the risk on the balance sheet and administrative accounts due to changes in market prices, including changes in the value of tradable or leaseable assets. This risk consists of exchange rate risk and the risk of sukuk price movements, which are categorized at fair value. Bank Mega Syariah manages market risk based on a portfolio of fund distribution, the majority of which is in the form of financing and some in the form of sukuk securities as liquidity reserves. *Treasury* does not conduct over-the-counter trading activities for proprietary trading, so market risk exposure is relatively low. The focus is on changing behavior and maintaining customer trust during increases in market benchmark interest rates, adjusted to the majority of financing that has a fixed margin.

Liquidity Risk

Liquidity risk is the possibility that a bank will not be able to pay maturing obligations or sell investments instantly due to low market demand. Liquidity management is crucial because a lack of liquidity can disrupt the national banking system. Bank Mega Syariah's liquidity risk management policy is intended to meet operational needs and unexpected needs, such as large customer withdrawals. This includes liquidity strategies, liquidity reserves, and interbank funding access.

Risiko Kepatuhan

Risiko Kepatuhan adalah risiko ketidakpatuhan Bank terhadap peraturan, undang-undang, dan prinsip Syariah. Sebagai bank syariah, risiko ini juga mencakup kepatuhan terhadap prinsip syariah yang ditetapkan oleh Dewan Syariah Nasional - Majelis Ulama Indonesia. Pengelolaan risiko kepatuhan Bank Mega Syariah diperhatikan secara ketat untuk memastikan kepatuhan penuh. Meskipun terdapat kekurangan kecil, seperti keterlambatan pelaporan atau kesalahan manusia, hal ini dinilai tidak signifikan dan tidak mengubah persepsi terhadap kondisi atau laporan keuangan bank.

Risiko Reputasi

Risiko reputasi muncul akibat publikasi negatif atau persepsi buruk terhadap Bank, yang dapat mengakibatkan penurunan kepercayaan pemangku kepentingan. Reputasi dan kepercayaan adalah hal krusial dalam industri perbankan, karena kegagalan dalam menjaga reputasi dapat berdampak signifikan pada kinerja keuangan dan memerlukan biaya pemulihan yang besar. Untuk mengendalikan risiko reputasi, Bank Mega Syariah secara terus-menerus memantau faktor penyebab risiko seperti publikasi negatif tentang pemilik bank, pemberitaan buruk dari mitra bisnis, liputan negatif di media, dan keluhan nasabah.

Untuk mengurangi risiko reputasi, Bank Mega Syariah melakukan pemantauan terhadap pemberitaan negatif dan menanggapi keluhan nasabah dengan cepat. Bank juga secara aktif menanggapi pemberitaan media dan mempublikasikan aktivitasnya untuk meningkatkan *awareness* dan reputasi yang positif.

Pada tahun 2024, terdapat 7 pemberitaan negatif yang dimuat di media massa terkait penurunan kinerja perusahaan secara *year on year* (yoy). Meski demikian, pemberitaan tersebut tidak berpengaruh signifikan terhadap kondisi bisnis bank.

Risiko Hukum

Risiko hukum timbul dari kelemahan aspek yuridis yang dapat mengakibatkan tuntutan hukum. Hal ini bisa disebabkan oleh kekurangan dalam peraturan perundang-undangan atau lemahnya perikatan seperti syarat sah kontrak yang tidak terpenuhi. Setiap kelemahan dalam perjanjian pembiayaan atau perjanjian dengan pihak ketiga dapat mengarah pada tuntutan hukum yang berdampak pada kinerja keuangan Bank. Bank memiliki Satuan Kerja *Legal* yang bertanggung jawab atas penyusunan akad, pemeriksaan, dan penilaian risiko hukum. Sebelum digunakan, format-format perjanjian selalu dikaji bersama dengan satuan kerja terkait, termasuk Kepatuhan dan pemeriksaan prinsip syariah.

Compliance Risk

Compliance Risk is the risk of the Bank's non-compliance with regulations, laws, and Sharia principles. As a sharia bank, this risk also includes compliance with sharia principles set by the National Sharia Council - Indonesian Ulema Council. Bank Mega Syariah's compliance risk management is closely monitored to ensure full compliance. Although there are minor deficiencies, such as late reporting or human error, this is considered insignificant and does not change the perception of the bank's financial condition or statements.

Reputation Risk

Stakeholder trust may decline as a result of negative publicity or a poor impression of the Bank, which gives rise to reputation risk. In the banking sector, trust and reputation are essential as a loss of either can have a big effect on financial performance and necessitate high recovery expenses. Bank Mega Syariah keeps a close eye on risk variables such unfavorable press about the bank's owners, bad news from business associates, unfavorable media coverage, and client complaints in order to manage reputation risk.

To reduce reputation risk, Bank Mega Syariah monitors negative news and responds to customer complaints quickly. The Bank also actively responds to media coverage and publishes its activities to increase awareness and a positive reputation.

In 2024, 7 unfavorable news stories on the company's declining performance year over year (yoy) were released in the mass media. The news, however, had no appreciable effect on the bank's operations.

Legal Risk

Legal risk arises from weaknesses in the legal aspects that can result in lawsuits. This can be caused by deficiencies in laws and regulations or weak obligations such as unfulfilled contractual requirements. Any weakness in a financing agreement or agreement with a third party can lead to lawsuits that impact the Bank's financial performance. The Bank has a Legal Work Unit that is responsible for drafting contracts, examining, and assessing legal risks. Before being used, agreement formats are always reviewed together with related work units, including Compliance and examination of sharia principles.

Profil Risiko

Risk Profile

Laporan Profil Risiko Bank Mega Syariah menyajikan 10 jenis risiko yang terdapat dalam seluruh aktivitas bank dan sistem pengendalian risiko yang telah diterapkan, dengan peringkat komposit yang terbagi dalam 5 kategori yaitu *Low*, *Low to Moderate*, *Moderate*, *Moderate to High*, dan *High*. Melalui penerapan proses manajemen risiko, bank secara berkala melakukan penilaian mandiri (*self assessment*) terhadap semua risiko yang dihadapi; termasuk dari aktivitas transaksi, layanan, dan pemasaran produknya. Hasil penilaian mandiri tersebut tertuang dalam Laporan Profil Risiko bulanan, yang menilai masing-masing jenis risiko beserta kualitas pengelolaannya, serta menetapkan peringkat risiko komposit berdasarkan kombinasi nilai risiko dan kualitas penerapan manajemen risiko.

Bank Mega Syariah melakukan pembobotan risiko berdasarkan signifikansinya terhadap kelangsungan usaha bank, serta memastikan keputusan strategis yang diambil Direksi telah akurat. Laporan Profil Risiko secara rutin disampaikan kepada Direksi, Dewan Komisaris, dan Otoritas Jasa Keuangan serta dibahas dalam rapat-rapat Komite Manajemen Risiko dan rapat tingkat Direksi lainnya bila diperlukan.

Tabel berikut di bawah ini menyajikan Profil Risiko Bank Mega Syariah untuk posisi pelaporan akhir tahun 2023 dan tahun 2024:

Bank Mega Syariah's Risk Profile Report presents 10 types of risks found in all bank activities and the risk control system that has been implemented, with a composite rating divided into 5 categories, namely *Low*, *Low to Moderate*, *Moderate*, *Moderate to High*, and *High*. Through the implementation of the risk management process, the bank periodically conducts self-assessments of all risks faced; including from transaction activities, services, and product marketing. The results of the self-assessment are stated in the monthly Risk Profile Report, which assesses each type of risk along with the quality of its management, and determines the composite risk rating based on the combination of risk value and the quality of risk management implementation.

Bank Mega Syariah weights risks based on their significance to the continuity of the bank's business, and ensures that strategic decisions taken by the Board of Directors are accurate. The Risk Profile Report is routinely submitted to the Board of Directors, Board of Commissioners, and Financial Services Authority and discussed in Risk Management Committee meetings and other Board-level meetings if necessary.

The following table below presents Bank Mega Syariah's Risk Profile for the reporting position at the end of 2023 and 2024:

Jenis Risiko Risk Type	Desember 2024 December 2024	Desember 2023 December 2023
	Peringkat Komposit Composite Rating	Peringkat Komposit Composite Rating
Kredit Credit	2	2
Pasar Market	2	2
Likuiditas Liquidity	2	2
Operasional Operational	2	2
Stratejik Strategic	2	2
Hukum Legal	2	2
Kepatuhan Compliance	2	2
Reputasi Reputation	1	1
Imbal Hasil Rate of Return	2	2
Investasi Investment	1	1
Peringkat Komposit Composite Rating	2	2

Profil Risiko Bank Mega Syariah secara komposit berada pada peringkat 2. Secara keseluruhan, penerapan manajemen risiko dinilai baik. Proses pembiayaan dijalankan dengan pruden, tercermin dari kemampuan Bank Mega Syariah untuk menjaga *Non Performing Financing* (NPF) di bawah 1%. Di sisi lain, walaupun terjadi peningkatan persentase pembiayaan kualitas rendah yang disebabkan adanya pembiayaan restruktur baru, pembiayaan kualitas rendah masih berada pada *risk appetite* yang dimiliki Bank.

Risiko inheren berada pada peringkat 2 (*Low to Moderate*). Selain penjelasan terkait pembiayaan di atas, penilaian peringkat risiko inheren tersebut juga didasarkan pada kondisi likuiditas Bank Mega Syariah yang dinilai memadai, ditunjukkan dengan rasio aset likuid yang cukup tinggi. Dari sisi sumber dana, sebagian besar berasal dari deposito-deposito besar dan mudah terpengaruh oleh kenaikan suku bunga pasar. Namun demikian, beberapa upaya telah dilakukan agar rasio *Cost of Fund* (COF) dan pencapaian *Net Interest Margin* (NIM) tetap terkendali.

Kualitas Penerapan Manajemen Risiko (KPMR) tetap berada pada peringkat 2 (*Satisfactory*). Dewan Direksi dan Komisaris senantiasa berupaya melakukan langkah-langkah untuk memitigasi risiko inheren yang ada, salah satunya adalah dengan terus dilakukannya pengembangan layanan *digital* maupun produk baru. Upaya tersebut merupakan langkah manajemen untuk membangun struktur neraca keuangan yang lebih kuat, sehingga diharapkan Bank Mega Syariah dapat memperoleh sumber dana yang lebih stabil.

Selain itu, pembiayaan juga terus dijaga untuk mengalami pertumbuhan. Untuk menjaga tingkat konsentrasi pembiayaan, bank melakukan pemantauan konsentrasi pembiayaan dan melakukan pembatasan *limit* sektor ekonomi, dengan menjaga kualitas pembiayaan. Hal ini secara tidak langsung menunjukkan tingkat kualitas penerapan manajemen risiko yang baik. Penilaian tingkat kesehatan dilakukan secara kuantitatif terhadap parameter yang dinilai, persyaratan minimum terpenuhi, pelaksanaan yang cukup memadai, namun masih rendahnya kualitas sumber daya yang dimiliki Bank Mega Syariah menjadi perhatian penilaian.

Bank Mega Syariah's composite risk profile rating is 2. Overall, the implementation of risk management is considered good. The financing process is carried out prudently, reflected in Bank Mega Syariah's ability to maintain Non Performing Financing (NPF) below 1%. On the other hand, low-quality financing is still within the Bank's risk appetite even though the ratio of low-quality financing has increased as a result of new restructured financing.

Inherent risk rating is 2 (Low to Moderate). In addition to the explanation related to financing above, the assessment of the inherent risk rating is also based on Bank Mega Syariah's liquidity conditions which are considered adequate, indicated by a fairly high liquid asset ratio. In terms of funding sources, most of them come from large depositors and are easily affected by increases in market interest rates. However, several efforts have been made to keep the Cost of Fund (COF) ratio and Net Interest Margin (NIM) achievement under control.

The Quality of Risk Management Implementation (KPMR) rating remains 2 (Satisfactory). The Board of Directors and Commissioners always strive to take steps to mitigate the existing inherent risks, one of which is by continuing to develop digital services and new products. These efforts are management steps to build a stronger financial balance sheet structure, so that it is hoped that Bank Mega Syariah can obtain more stable sources of funds.

Furthermore, financing is also continuously maintained to experience growth. To maintain the level of financing concentration, the bank monitors financing concentration and limits the economic sector, while maintaining financing quality. This indirectly shows a good level of risk management implementation quality. The assessment of the health level is carried out quantitatively against the parameters assessed, minimum requirements are met, implementation is quite adequate, but the low quality of resources owned by Bank Mega Syariah is a concern for the assessment.

Tanggung Jawab Sosial dan Lingkungan

Corporate Social Responsibility (CSR)

Prinsip Dasar dan Komitmen Terhadap Tanggung Jawab Sosial Lingkungan

Basic Principles and Commitment Towards Social
and Environmental Responsibility

Komitmen dan Kebijakan Tanggung Jawab Sosial Perusahaan (TJSL) Bank Mega Syariah dalam menerapkan kegiatan tanggung jawab sosialnya mengacu pada prinsip keberlanjutan (*sustainability*) sebagai bentuk komitmen Perusahaan untuk mendukung kampanye *Sustainable Development Goals* (SDGs) yang dicanangkan oleh Perserikatan Bangsa-Bangsa (PBB).

Bank Mega Syariah's Corporate Social Responsibility (CSR) Commitment and Policy in implementing its social responsibility activities refers to the principle of sustainability as a form of the Company's commitment to support the Sustainable Development Goals (SDGs) campaign initiated by the United Nations (UN).

Selain itu, Bank senantiasa mempertimbangkan dampak dari setiap keputusan dan kegiatan usahanya terhadap masyarakat dan lingkungan melalui perilaku yang transparan dan beretika. Program tanggung jawab sosial perusahaan (*Corporate Social Responsibility* atau CSR) tidak hanya sekedar menjalankan kewajiban tetapi juga merupakan sebuah kebutuhan. Sebagai sebuah entitas bisnis berbasis syariah, dalam syariat Islam telah diatur bahwa sedemikian pentingnya bagi perusahaan untuk menerapkan etika bisnis Islam sesuai dengan semangat moralitas dan religiusitas sebagaimana telah diajarkan oleh Nabi Muhammad *Shallallahu Alaihi wa Sallam*.

Sebagai entitas perbankan syariah, Bank Mega Syariah berkomitmen agar setiap aktivitas bisnis yang dilakukan memenuhi tanggung jawab etik berbasis syariah. Kami juga berkomitmen untuk menjalankan norma-norma keislaman dalam seluruh kegiatan operasional perusahaan. Seluruh insan perusahaan juga berkomitmen agar seluruh kegiatan CSR yang dilakukan perusahaan dapat menciptakan kebajikan di tengah-tengah masyarakat, sesuai dengan visi Bank Mega Syariah, yaitu Tumbuh dan Sejahtera Bersama Bangsa.

Bank Mega Syariah menganggap bahwa kinerja usaha yang baik harus didukung dengan kontribusi positif kepada lingkungan dan para pemangku kepentingan. Dengan mengadopsi kerangka Lingkungan, Sosial, dan Tata Kelola (*Environmental, Social, & Governance* atau ESG); Bank Mega Syariah memastikan bahwa setiap kegiatan Tanggung Jawab Sosial Lingkungan (TJSL) yang dilaksanakan dapat memberikan manfaat jangka panjang, mengoptimalkan penggunaan sumber daya, dan mendukung keberlanjutan lingkungan. Program-program ini mencakup berbagai inisiatif yang mendukung peningkatan kualitas hidup masyarakat, termasuk pendidikan, kesehatan, dan pelestarian lingkungan, yang pada akhirnya memperkuat peran Bank sebagai agen perubahan sosial dan ekonomi yang positif.

Dengan pendekatan yang holistik, pelaksanaan program TJSL dilakukan mulai dari perencanaan hingga evaluasi. Pada tahap awal, Bank membuat pemetaan mengenai dampak sosial, ekonomi, dan lingkungan atas kegiatan operasi dan bisnis yang dilakukan, kemudian dituangkan dalam rencana kebutuhan nyata pemangku kepentingan dengan mempertimbangkan kemampuan Bank.

Furthermore, through transparent and ethical behavior, the Bank always takes into account how every choice and business activity will affect society and the environment. In addition to being required, the Corporate Social Responsibility (CSR) program is essential. Islamic law has stated that, as a sharia-based commercial entity, it is crucial for firms to apply Islamic business ethics in line with the moral and religious principles provided by the Prophet Muhammad *Shallallahu Alaihi wa Sallam*.

As a sharia banking entity, Bank Mega Syariah is committed to ensuring that every business activity carried out fulfills sharia-based ethical responsibilities. We are also committed to implementing Islamic norms in all of the company's operational activities. All company personnel are also committed to ensuring that all CSR activities carried out by the company can create goodness in the community, in accordance with Bank Mega Syariah's vision, namely Growing and Prospering Together with the Nation.

Bank Mega Syariah believes that good business performance must be supported by positive contributions to the environment and stakeholders. By adopting the Environmental, Social, and Governance (ESG) framework; Bank Mega Syariah ensures that every Social and Environmental Responsibility (TJSL) activity carried out can provide long-term benefits, optimize the use of resources, and support environmental sustainability. These programs include various initiatives that support improving the quality of life of the community, including education, health, and environmental preservation, which ultimately strengthens the Bank's role as an agent of positive social and economic change.

From planning to evaluation, the TJSL program is implemented using a comprehensive approach. The Bank maps the social, economic, and environmental effects of its operations and business activities in the first step, after which it incorporates the Bank's capabilities into a plan for the actual demands of stakeholders.

The annual report is expected to be made available to us after the date of this auditors' report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take appropriate actions in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Bank.

Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, tetapi bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas efektivitas pengendalian internal Bank.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- *Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.*
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*

- Menyimpulkan ketepatan penggunaan basis akuntansi atas kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Bank untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Bank tidak dapat mempertahankan kelangsungan usaha.
- Mengevaluasi penyajian, struktur, dan isi laporan keuangan secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit, serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan, jika relevan, pengamanan terkait.

- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.*

- *Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

g. Cadangan Kerugian Penurunan Nilai (CKPN) Aset Keuangan

Aset keuangan Bank terdiri dari piutang *murabahah*. Sesuai dengan PSAK 402, "Akuntansi *Murabahah*" dan PAPS I 2013, Bank menghitung CKPN individual untuk piutang *murabahah* sesuai dengan ketentuan di PSAK 239, "Instrumen Keuangan: Pengakuan dan Pengukuran".

Bank mengevaluasi apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan mengalami penurunan nilai pada setiap tanggal laporan posisi keuangan.

Aset keuangan mengalami penurunan nilai jika bukti objektif menunjukkan bahwa peristiwa yang merugikan telah terjadi setelah pengakuan awal aset keuangan dan peristiwa tersebut berdampak pada arus kas masa datang atas aset keuangan yang dapat diestimasi secara handal.

Kriteria yang digunakan oleh Bank untuk menentukan bukti objektif dari penurunan nilai adalah sebagai berikut:

1. kesulitan keuangan signifikan yang dialami penerbit atau pihak peminjam;
2. pelanggaran kontrak, seperti terjadinya wanprestasi atau tunggakan pembayaran pokok atau margin;
3. pihak pemberi pinjaman, dengan alasan ekonomi atau hukum sehubungan dengan kesulitan keuangan yang dialami pihak peminjam, memberikan keringanan (konsesi) pada pihak peminjam yang tidak mungkin diberikan jika pihak peminjam tidak mengalami kesulitan tersebut;
4. terdapat kemungkinan bahwa pihak peminjam akan dinyatakan pailit atau melakukan reorganisasi keuangan lainnya;
5. hilangnya pasar aktif dari aset keuangan akibat kesulitan keuangan;
6. data yang dapat diobservasi mengindikasikan adanya penurunan yang dapat diukur atas estimasi arus kas masa datang dari kelompok aset keuangan sejak pengakuan awal aset

g. Allowance for Impairment Losses on Financial Assets

The Bank's financial assets consist of *murabahah* receivables. In accordance with PSAK 402, "Accounting for *Murabahah*" and PAPS I 2013, the Bank calculates individual CKPN for *murabahah* receivables in accordance with the provisions in PSAK 239, "Financial Instruments: Recognition and Measurement".

The Bank evaluates whether there is objective evidence that a financial asset or a group of financial assets is impaired at each statement of financial position date.

Financial assets are impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the financial asset and the event has an impact on the future cash flows of the financial asset that can be estimated reliably.

The criteria used by the Bank to determine objective evidence of impairment are as follows:

1. significant financial difficulties experienced by the issuer or borrower;
2. breach of contract, such as default or arrears in payment of principal or margin;
3. the lender, for economic or legal reasons in connection with the financial difficulties experienced by the borrower, gives concessions to the borrower which would not be possible if the borrower did not experience these difficulties;
4. there is a possibility that the borrower will be declared bankrupt or perform other financial reorganization;
5. loss of an active market for financial assets due to financial difficulties;
6. observable data indicates that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of the said assets, although

dimaksud, meskipun penurunannya belum dapat diidentifikasi terhadap aset keuangan secara individual dalam kelompok aset tersebut;

7. memburuknya status pembayaran pihak peminjam dalam kelompok tersebut; dan
8. kondisi ekonomi nasional atau lokal yang berkorelasi dengan wanprestasi atas aset dalam kelompok tersebut.

Estimasi periode antara terjadinya peristiwa dan teridentifikasinya kerugian ditentukan oleh manajemen untuk setiap portofolio yang diidentifikasi. Pada umumnya, periode tersebut bervariasi antara 3 (tiga) sampai 12 (dua belas) bulan, untuk kasus tertentu diperlukan periode yang lebih lama.

Bank pertama kali menentukan apakah terdapat bukti objektif penurunan nilai secara individual atas aset keuangan yang signifikan, dan secara individual atau kolektif untuk aset keuangan yang tidak signifikan secara individual.

Jika Bank menentukan tidak terdapat bukti objektif mengenai penurunan nilai atas aset keuangan yang dinilai secara individual, terlepas aset keuangan tersebut signifikan atau tidak, maka Bank memasukkan aset tersebut ke dalam kelompok aset keuangan yang memiliki karakteristik risiko pembiayaan yang serupa dan menilai penurunan nilai kelompok tersebut secara kolektif. Aset keuangan yang penurunan nilainya dilakukan secara individual, dan untuk itu kerugian penurunan nilai telah diakui atau tetap diakui, tidak termasuk dalam penilaian penurunan nilai secara kolektif.

Bank menetapkan piutang *murabahah* yang CKPN dihitung secara individual, jika memenuhi salah satu kriteria di bawah ini:

1. Piutang *murabahah* yang memiliki kolektibilitas kurang lancar, diragukan dan macet, yang memiliki nilai piutang secara individual diatas Rp10 miliar (dalam nilai penuh).
2. Piutang *murabahah* yang direstrukturisasi dan yang secara individual memiliki nilai piutang diatas Rp10 miliar (dalam nilai penuh).

Perhitungan cadangan kerugian penurunan nilai atas aset keuangan yang dinilai secara kolektif dikelompokkan berdasarkan karakteristik risiko piutang yang sama

the decrease cannot yet be identified with the individual financial assets in the group of assets;

7. *worsening of the payment status of borrowers in the group; and*
8. *national or local economic conditions that correlate with defaults on assets in the group.*

The estimated period between the occurrence of an event and the identification of a loss is determined by management for each identified portfolio. In general, the period varies between 3 (three) to 12 (twelve) months, for certain cases a longer period is required.

The Bank first determines whether there is objective evidence of impairment individually for significant financial assets, and individually or collectively for financial assets that are not individually significant.

If the Bank determines that there is no objective evidence of impairment for financial assets that are assessed individually, regardless of whether the financial assets are significant or not, the Bank includes these assets in a group of financial assets that have similar financing risk characteristics and assesses the group for impairment as a collective. Financial assets that are individually assessed for impairment and for which an impairment loss has been or continues to be recognized, are not included in a collective assessment of impairment.

Banks determine murabahah receivables for which CKPN is calculated individually, if they meet one of the criteria below:

1. *Murabahah receivables that have substandard, doubtful and loss collectibility, which have an individual receivable value of over Rp10 billion (in full amount).*
2. *Restructured murabahah receivables and which individually have a receivable value of more than Rp10 billion (in full amount).*

Calculation of allowance for impairment losses on financial assets that are assessed collectively are grouped based on the same receivable risk characteristics by considering

dengan mempertimbangkan segmentasi piutang berdasarkan pengalaman kerugian masa lalu (*probability of default*).

Bank menggunakan metode *migration analysis* yang merupakan suatu metode analisis statistik, untuk menilai cadangan kerugian penurunan nilai atas piutang yang diberikan secara kolektif. Bank menggunakan data historis minimal 3 (tiga) tahun dalam menghitung *Probability of Default* (PD) dan *Loss of Given Default* (LGD).

Bank menerapkan konsep *one obligor* untuk perhitungan CKPN individual. Apabila nasabah memiliki pembiayaan selain akad *murabahah* maka penurunan nilai untuk pembiayaan terkait dihitung dengan perhitungan CKPN individual.

Nilai tercatat aset keuangan diturunkan nilainya melalui pembentukan akun CKPN dan jumlah kerugian yang terjadi diakui pada laporan laba rugi. Pendapatan margin tetap diakui atas nilai tercatat yang telah diturunkan tersebut berdasarkan tingkat imbal hasil efektif awal yang digunakan untuk mendiskonto arus kas masa datang dari aset tersebut. Jika pada periode berikutnya, jumlah estimasi penyisihan penurunan nilai meningkat atau menurun karena peristiwa yang terjadi setelah pengakuan kerugian penurunan nilai, maka kerugian penurunan nilai yang sudah diakui sebelumnya dinaikkan atau diturunkan dengan menyesuaikan akun CKPN. Aset keuangan dan penyisihan yang terkait dihapuskan jika tidak ada peluang yang realistis untuk pengembalian masa datang dan semua agunan telah terealisasi atau sudah diambil alih oleh Bank. Penerimaan kembali aset keuangan yang telah dihapusbukukan dicatat sebagai pengurang penyisihan penurunan nilai di laba rugi.

Untuk piutang *murabahah* yang secara individual tidak signifikan (di bawah Rp10 miliar (dalam nilai penuh)) dan di atas Rp10 miliar (dalam nilai penuh) dengan kolektibilitas lancar dan dalam perhatian khusus (tidak direstrukturisasi), pembentukan CKPN dihitung secara kolektif.

the segmentation of receivables based on past loss experience (probability of default).

The Bank uses the migration analysis method, which is a method of statistical analysis, to collectively assess allowance for impairment losses on receivables. The Bank uses historical data for at least 3 (three) years in calculating the Probability of Default (PD) and Loss of Given Default (LGD).

The Bank applies the one obligor concept for individual CKPN calculations. If the customer has financing other than a murabahah contract, the impairment for related financing is calculated by calculating individual CKPN.

The carrying value of financial assets is impaired through the establishment of a CKPN account and the amount of the loss is recognized in the statement of profit or loss. Fixed margin income is recognized on the reduced carrying amount based on the initial effective rate of return used to discount the future cash flows of the asset. If in a subsequent period, the amount of the estimated allowance for impairment increases or decreases because of an event that occurred after the impairment loss was recognized, then the previously recognized impairment loss is increased or decreased by adjusting the Allowance for Impairment Losses account. Financial assets and the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been taken over by the Bank. Recoveries of financial assets that have been written off are recorded as a deduction for allowance for impairment in value in the profit or loss.

For murabahah receivables that are individually insignificant (under Rp10 billion (in full amount)) and above Rp10 miliar (in full amount) with current collectibility and on special mention (not restructured), the provision for CKPN is calculated collectively.

Untuk tujuan evaluasi penurunan nilai secara kolektif, aset keuangan dikelompokkan berdasarkan kesamaan karakteristik risiko kredit seperti mempertimbangkan segmentasi kredit dan status tunggakan. Karakteristik yang dipilih adalah relevan dengan estimasi arus kas masa datang dari kelompok aset tersebut yang mengindikasikan kemampuan debitur atau rekanan untuk membayar seluruh liabilitas yang jatuh tempo sesuai persyaratan kontrak dari aset yang dievaluasi.

Arus kas masa datang dari kelompok aset keuangan yang penurunan nilainya dievaluasi secara kolektif, diestimasi berdasarkan kerugian historis yang pernah dialami atas aset-aset yang memiliki karakteristik risiko kredit yang serupa dengan karakteristik risiko kredit kelompok tersebut di dalam Bank. Kerugian historis yang pernah dialami kemudian disesuaikan berdasarkan data terkini yang dapat diobservasi untuk mencerminkan kondisi saat ini yang tidak berpengaruh pada periode terjadinya kerugian historis tersebut, dan untuk menghilangkan pengaruh kondisi yang ada pada periode historis namun sudah tidak ada lagi saat ini.

Bank menggunakan *statistical model analysis method*, yaitu *migration analysis method* untuk penilaian penurunan nilai aset keuangan secara kolektif dengan menggunakan data historis tiga tahun.

For the purpose of collective impairment evaluation, financial assets are grouped based on similar credit risk characteristics, such as considering credit segmentation and arrears status. The characteristics selected are relevant to the estimated future cash flows from the group of assets which indicate the ability of the debtor or counterparty to pay all liabilities that are due in accordance with the contractual terms of the assets being evaluated.

Future cash flows from groups of financial assets that are collectively evaluated for impairment, are estimated based on historical losses that have been experienced for assets with credit risk characteristics similar to those in the Bank. Historical losses that have been experienced are then adjusted based on the latest observable data to reflect current conditions that did not affect the period in which the historical losses occurred, and to eliminate the effects of conditions that existed in the historical period but no longer exist today.

The Bank uses the statistical model analysis method, namely the migration analysis method for collectively assessing impairment of financial assets by using three-year historical data.

h. Current Accounts and Placements with Bank Indonesia

Placements with Bank Indonesia consist of *wadiah* current accounts (entrusted), and Bank Indonesia Sharia Deposit Facility (FASBIS) which are deposit facilities provided by Bank Indonesia in the context of sharia "*standing facilities*" under the *wadiah* principle. Current accounts and placements with Bank Indonesia are stated at nominal balances.

i. Current Account with Other Banks

Current accounts with sharia commercial banks are stated at their outstanding balances net of allowance for impairment losses. Bonuses received from commercial banks are recognized as other main operating income. Current account income from conventional commercial banks is not recognized as bank income but is used for benevolent funds (*qardhul hasan*).

o. Aset Ijarah

Aset yang diperoleh untuk *ijarah* adalah aset yang dijadikan obyek sewa (*ijarah*) dan diakui sebesar biaya perolehan. Objek sewa dalam transaksi *ijarah* disusutkan sesuai kebijakan penyusutan aset sejenis, sedangkan objek sewa dalam *muntahiyah bittamlik* disusutkan sesuai masa sewa.

Aset yang diperoleh untuk *ijarah* disajikan sebesar nilai perolehan dikurangi dengan akumulasi penyusutan.

p. Aset Tetap

Bank menerapkan kebijakan akuntansi model revaluasi untuk aset tetap berupa tanah dan bangunan. Untuk aset tetap selain tanah dan bangunan menggunakan model biaya.

Tanah dan bangunan disajikan sebesar nilai wajar, dikurangi akumulasi penyusutan untuk bangunan, kecuali untuk tanah yang tidak terdepresiasi. Penilaian terhadap tanah dan bangunan dilakukan oleh penilai independen eksternal yang telah memiliki sertifikasi.

Akumulasi penyusutan pada tanggal revaluasi dieliminasi terhadap nilai tercatat bruto aset, dan nilai netonya disajikan kembali sebesar nilai revaluasian aset tetap.

Kenaikan nilai tercatat yang timbul dari revaluasi tanah dan bangunan dicatat sebagai "Surplus Revaluasi Aset Tetap" dan disajikan sebagai "Penghasilan Komprehensif Lain". o. Assets of Ijarah

Assets acquired for ijarah represent assets/objects for lease transactions (ijarah) and are recognized at the acquisition cost. The leased object in an Ijarah transaction are depreciated using straight-line method based on the estimated useful life, while leased objects in muntahiyah bittamlik transaction are depreciated based on lease term.

Assets acquired for Ijarah are presented at the acquisition cost less accumulated depreciation.

p. Property and Equipment

The Bank applies the revaluation model accounting policy for property and equipment in the form of land and buildings. For property and equipment other than land and buildings using the cost model.

Land and buildings are stated at fair value, less accumulated depreciation for buildings, except for land which is not depreciated. Appraisal of land and buildings is carried out by certified external independent appraisers.

The valuation of these assets is carried out periodically to ensure that the fair value of the assets being revalued is not materially different from their carrying value. Accumulated depreciation at the revaluation date is eliminated against the gross carrying value of the assets, and the net amount is restated at the revalued amount of the property and equipment.

The increase in the carrying amount arising from the revaluation of land and buildings is recorded as "Property and Equipment Revaluation Surplus" and presented as "Other Comprehensive Income". A decrease in carrying amount arising from a revaluation, if any, is recorded as an expense in the current year. If the asset has a balance of "Property and Equipment Revaluation Surplus", then the difference in carrying value is charged against "Property and Equipment Revaluation Surplus" which is presented as "Other Comprehensive Income" and the remainder is recognized as current year expense.

Surplus revaluasi yang dipindahkan secara periodik ke saldo laba adalah sebesar perbedaan antara jumlah penyusutan berdasarkan nilai revaluasian aset dengan jumlah penyusutan berdasarkan biaya perolehan aset tersebut. Selanjutnya, akumulasi penyusutan pada tanggal revaluasian dieliminasi terhadap jumlah tercatat bruto dari aset dan jumlah tercatat neto setelah eliminasi disajikan kembali sebesar jumlah revaluasian dari aset tersebut. Pada saat penghentian aset, surplus revaluasi untuk aset tetap yang dijual dipindahkan ke saldo laba.

Aset tetap lainnya dinyatakan sebesar biaya perolehan dikurangi akumulasi penyusutan dan rugi penurunan nilai. Biaya perolehan termasuk biaya penggantian bagian aset tetap saat biaya tersebut terjadi, jika memenuhi kriteria pengakuan. Selanjutnya, pada saat inspeksi yang signifikan dilakukan, biaya inspeksi itu diakui ke dalam jumlah tercatat aset tetap sebagai suatu penggantian jika memenuhi kriteria pengakuan. Semua biaya perbaikan dan pemeliharaan yang tidak memenuhi kriteria pengakuan diakui dalam laba rugi pada saat terjadinya.

Penyusutan dihitung dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomis aset tetap sebagai berikut:

	<u>Tahun/Year</u>	
Bangunan	20	Building
Instalasi bangunan	10	Building installation
Peralatan kantor	5	Office equipment
Inventaris kantor	5	Office inventory
Kendaraan	8	Vehicles

Biaya pengurusan legal hak atas tanah ketika tanah diperoleh pertama kali diakui sebagai bagian dari biaya perolehan aset tanah. Biaya pengurusan perpanjangan atau pembaharuan legal hak atas tanah diakui sebagai aset takberwujud dan diamortisasi sepanjang umur hukum hak atau umur ekonomis tanah, mana yang lebih pendek.

A periodic annual transfer from the asset revaluation surplus to retained earnings is made for the difference between depreciation based on the revalued carrying amount of the assets and depreciation based on the original cost of the assets. Subsequently, accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net carrying amount after elimination is restated at the revalued amount of the asset. Upon asset retirement, the revaluation surplus for property and equipment sold is transferred to retained earnings.

Other property and equipment are stated at cost less accumulated depreciation and any impairment loss. Such cost includes the cost of replacing part of the property and equipment when the cost is incurred, if the recognition criteria are met. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the assets as a replacement if the recognition criteria are met. All other repairs and maintenance costs that do not meet the recognition criteria are recognized in profit or loss as incurred.

Depreciation is computed using the straight-line method over the estimated useful lives of the assets as follows:

Costs associated with the acquisition of legal right of land when the land was first acquired are recognized as part of the cost of land. Costs associated with the extension or renewal of legal right of land are recognized as an intangible asset and amortized over the legal life of the land rights or economic life of the land, whichever is shorter.

q. Sewa

Sebagai Penyewa

Bank menilai apakah sebuah kontrak mengandung sewa, pada tanggal inisiasi kontrak. Bank mengakui aset hak guna dan liabilitas sewa terkait sehubungan dengan seluruh kesepakatan sewa di mana Bank merupakan penyewa, kecuali untuk sewa jangka pendek (yang didefinisikan sebagai sewa yang memiliki masa sewa 12 bulan atau kurang) dan sewa yang aset pendasarnya bernilai rendah. Untuk sewa-sewa tersebut, Bank mengakui pembayaran sewa sebagai beban operasi secara garis lurus selama masa sewa kecuali dasar sistematis lainnya lebih merepresentasikan pola konsumsi manfaat penyewa dari aset sewa.

Liabilitas sewa awalnya diukur pada nilai kini pembayaran sewa masa depan yang belum dibayarkan pada tanggal permulaan, yang didiskontokan menggunakan suku bunga implisit dalam sewa. Jika suku bunga ini tidak dapat ditentukan, Bank menggunakan suku bunga pinjaman inkremental khusus untuk penyewa.

Pembayaran sewa yang diperhitungkan dalam pengukuran liabilitas sewa terdiri atas:

1. pembayaran tetap (termasuk pembayaran tetap secara substansi), dikurangi insentif sewa;
2. pembayaran sewa variabel yang bergantung pada indeks atau suku bunga yang pada awalnya diukur dengan menggunakan indeks atau suku bunga pada tanggal permulaan;

The carrying value of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the assets is charged to profit or loss in the year the assets is derecognized.

The residual values, estimated useful lives, and depreciation method are reviewed and adjusted, at year end, if necessary.

Property and equipment which is discontinued and held for sale, ceased of being depreciated and reclassified as asset held for sale in other assets account.

q. Lease

As Lessee

The Bank assesses whether a contract is or contains a lease, at the inception of the contract. The Bank recognizes a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Bank recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Bank uses the incremental borrowing rate specific to the lessee.

Lease payments included in the measurement of the lease liability comprise:

1. *fixed payments (including in-substance fixed payments), less any lease incentives;*
2. *variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;*

3. jumlah yang diperkirakan akan dibayarkan oleh penyewa dalam jaminan nilai residual;
4. harga eksekusi opsi beli jika penyewa cukup pasti untuk mengeksekusi opsi tersebut; dan
5. pembayaran penalti karena penghentian sewa, jika masa sewa merefleksikan penyewa mengeksekusi opsi untuk menghentikan sewa.

Liabilitas sewa disajikan sebagai liabilitas lain-lain dalam laporan posisi keuangan.

Liabilitas sewa selanjutnya diukur dengan meningkatkan jumlah tercatat untuk merefleksikan bunga atas liabilitas sewa (menggunakan metode suku bunga efektif) dan dengan mengurangi jumlah tercatat untuk merefleksikan sewa yang telah dibayar.

Setiap pembayaran sewa dialokasikan antara liabilitas dan biaya keuangan. Biaya keuangan dibebankan pada laba rugi selama periode sewa sehingga menghasilkan tingkat suku bunga periodik yang konstan atas saldo liabilitas untuk setiap periode.

Bank mengukur kembali liabilitas sewa (dan melakukan penyesuaian terkait terhadap aset hak guna) jika:

1. terdapat perubahan dalam masa sewa atau perubahan dalam penilaian atas eksekusi opsi pembelian, di mana liabilitas sewa diukur dengan mendiskontokan pembayaran sewa revisian menggunakan tingkat diskonto revisian;
2. terdapat perubahan sewa masa depan sebagai akibat dari perubahan indeks atau perubahan perkiraan pembayaran berdasarkan nilai residual jaminan di mana liabilitas sewa diukur kembali dengan mendiskontokan pembayaran sewa revisian menggunakan tingkat diskonto awal (kecuali jika pembayaran sewa berubah karena perubahan suku bunga mengambang, di mana tingkat diskonto revisian digunakan); atau
3. kontrak sewa dimodifikasi dan modifikasi sewa tidak dicatat sebagai sewa terpisah, di mana liabilitas sewa diukur dengan mendiskontokan pembayaran sewa revisian menggunakan tingkat diskonto revisian.

3. the amount expected to be payable by the lessee under residual value guarantees;
4. the exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
5. payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as other liabilities in the statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect the interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

The Bank remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use assets) whenever:

1. the lease term has changed or there is a change in the assessment of the exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
2. the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used); or
3. a lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.

Aset hak guna terdiri dari pengukuran awal atas liabilitas sewa, pembayaran sewa yang dilakukan pada saat atau sebelum permulaan sewa dan biaya langsung awal. Aset hak guna selanjutnya diukur sebesar biaya dikurangi akumulasi penyusutan dan kerugian penurunan nilai.

Jika Bank dibebankan kewajiban atas biaya membongkar dan memindahkan aset sewa, merestorasi tempat di mana aset berada atau merestorasi aset pendasar ke kondisi yang disyaratkan oleh syarat dan ketentuan sewa, provisi diakui dan diukur sesuai PSAK 237. Biaya tersebut diperhitungkan dalam aset hak guna terkait, kecuali jika biaya tersebut terjadi untuk memproduksi persediaan.

Aset hak guna selanjutnya diukur dengan harga perolehan dikurangi akumulasi penyusutan dan penurunan nilai. Aset hak guna disusutkan secara garis lurus selama jangka waktu sewa yang lebih pendek dan estimasi masa manfaat aset, sebagai berikut:

	<u>Tahun/Year</u>	
Bangunan	2 - 13	Building
Aset hak guna disusutkan selama periode yang lebih singkat antara masa sewa dan masa manfaat aset pendasar. Jika sewa mengalihkan kepemilikan aset pendasar atau jika biaya perolehan aset hak guna merefleksikan Bank akan mengeksekusi opsi beli, aset hak guna disusutkan selama masa manfaat aset pendasar. Penyusutan dimulai pada tanggal permulaan sewa.		
Aset hak guna disajikan sebagai bagian dari "Aset Tetap" pada laporan keuangan.		

The right-of-use assets comprise the initial measurements of the corresponding lease liability, lease payments made at or before the commencement day and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the Bank incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying assets to the conditions required by the terms and conditions of the lease, a provision is recognized and measured under PSAK 237. The costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Right-of-use assets are depreciated over the shorter of the lease term and the useful life of the underlying asset. If the lease transfers ownership of the underlying asset or if the cost of the right-of-use asset reflects the Bank's intention to exercise the call option, the right-of-use asset is depreciated over the useful life of the underlying asset. Depreciation starts on the commencement date of the lease.

Right-of-use assets are presented as part of "Property and Equipment" in the financial statements.

r. Penurunan Nilai Aset Nonkeuangan

Pada setiap akhir periode pelaporan, Bank menelaah nilai tercatat aset nonkeuangan untuk menentukan apakah terdapat indikasi bahwa aset tersebut telah mengalami penurunan nilai. Jika terdapat indikasi tersebut, nilai yang dapat diperoleh kembali dari aset diestimasi untuk menentukan tingkat kerugian penurunan nilai (jika ada). Bila tidak memungkinkan untuk mengestimasi nilai yang dapat diperoleh kembali atas suatu aset individu, Bank mengestimasi nilai yang dapat diperoleh kembali dari unit penghasil kas atas aset.

r. Impairment of Non Financial Asset

The Bank assesses at each reporting period whether there is an indication that an asset may be impaired. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). If it is not possible to estimate the recoverable amount of an individual asset, the Bank estimates the recoverable amount of the cash-generating unit for the asset.

Rugi penurunan nilai diakui sebagai rugi tahun berjalan, kecuali aset nonkeuangan yang dicatat dengan nilai penilaian kembali.

Rugi penurunan nilai akan dipulihkan jika terdapat perubahan dalam taksiran yang digunakan untuk menentukan nilai aset nonkeuangan yang dapat dipulihkan (*recoverable amount*). Rugi penurunan nilai hanya akan dipulihkan sampai sebatas nilai tercatat aset nonkeuangan tidak boleh melebihi nilai terpulihkannya maupun nilai tercatat yang seharusnya diakui, setelah dikurangi depresiasi atau amortisasi, jika tidak ada pengakuan rugi penurunan nilai aset nonkeuangan. Pembalikan rugi penurunan nilai diakui dalam laba rugi.

s. Agunan yang Diambil Alih

Agunan yang diambil alih sehubungan dengan penyelesaian pembiayaan (disajikan dalam akun "Aset lain-lain") diakui sebesar nilai neto yang dapat direalisasi. Nilai neto yang dapat direalisasi adalah nilai wajar aset setelah dikurangi estimasi biaya pelepasan.

Apabila nilai agunan yang diperoleh, baik melalui lelang maupun penyerahan secara sukarela, lebih kecil daripada pembiayaan atau piutang, maka selisihnya dibebankan pada penyisihan penghapusan pembiayaan atau piutang. Jika nilai agunan yang diperoleh, baik melalui lelang maupun penyerahan sukarela, lebih besar dari pada pembiayaan atau piutang maka selisihnya dikembalikan ke nasabah.

Agunan akan diambil alih ketika tidak ada lagi sumber pengembalian yang bisa diharapkan dari nasabah. Indikasi atas tidak adanya sumber pengembalian adalah buruknya kondisi keuangan nasabah selama beberapa periode dan terdapat tunggakan angsuran lebih dari 1 tahun dan termasuk dalam kolektibilitas macet.

Manajemen mengevaluasi nilai agunan yang diambil alih secara berkala. Penyisihan penghapusan agunan yang diambil alih dibentuk atas penurunan nilai yang terjadi disajikan sebagai pengurang dari akun agunan yang diambil alih. Selisih antara nilai agunan yang diambil alih dengan hasil penjualannya diakui sebagai keuntungan atau kerugian pada saat penjualan agunan.

Impairment losses are recognized in the current year's profit or loss, unless non financial assets carried at revalued amounts.

An impairment loss is reversed if there has been a change in the estimate used to determine the recoverable amount of a non financial asset. An impairment loss is only reversed to the extent that the non financial asset's carrying amount does not exceed the recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss of non financial assets has been recognized. Reversal of an impairment loss is recognized in the profit or loss.

s. Foreclosed Collaterals

Foreclosed collaterals repossessed in connection with the settlement of financing (presented under "Other assets") is recognized at net realizable value. The net realizable value is the fair value of the asset after deducting the estimated costs of disposal.

If the value of the collateral obtained, either through auction or voluntary delivery, is less than the financing or receivables, then the difference is charged to the allowance for possible losses on financing or receivables. If the value of the collateral obtained, either through auction or voluntary delivery, is greater than the financing or receivables, then the difference is returned to the customer.

The collateral will be foreclosed on when there is no longer any source of return that can be expected from the customer. An indication of the absence of a source of return is the poor financial condition of the customer for several periods and there are arrears in installments of more than 1 year and are included in bad collectability.

Management evaluates the value of foreclosed collaterals periodically. Allowance for possible losses on foreclosed assets is provided for impairment that occurs and is presented as a deduction from the foreclosed collaterals account. The difference between the value of the foreclosed assets and the sale proceeds is recognized as a gain or loss when the collateral is sold.

y. Dana Syirkah Temporer

Dana *syirkah* temporer merupakan investasi dengan akad *mudharabah muthlaqah* dimana pemilik dana (*shahibul maal*) memberikan kebebasan kepada pengelola dana (*mudharib/Bank*) dalam pengelolaan investasinya, dan akan memperoleh bagi hasil sesuai dengan nisbah yang disepakati. Dana *syirkah* temporer terdiri dari giro *mudharabah*, tabungan *mudharabah*, dan deposito *mudharabah*.

Giro *mudharabah* merupakan investasi dana nasabah pada Bank yang penarikannya dapat dilakukan sesuai kesepakatan dengan menggunakan cek, bank garansi, dan sarana perintah pembayaran lainnya.

Tabungan *mudharabah* merupakan investasi yang hanya bisa ditarik sesuai dengan persyaratan tertentu yang disepakati. Tabungan *mudharabah* dinyatakan sebesar nilai investasi pemegang tabungan di Bank.

Deposito berjangka *mudharabah* merupakan investasi yang hanya bisa ditarik pada waktu tertentu sesuai dengan perjanjian antara pemegang deposito berjangka *mudharabah* dengan Bank. Deposito berjangka *mudharabah* dinyatakan sebesar nilai nominal sesuai dengan perjanjian antara pemegang deposito berjangka dengan Bank.

Dana *syirkah* temporer tidak dapat digolongkan sebagai liabilitas. Hal ini karena Bank tidak mempunyai liabilitas, ketika mengalami kerugian, untuk mengembalikan jumlah dana awal dari pemilik dana kecuali akibat kelalaian atau wanprestasi Bank. Dana *syirkah* temporer tidak dapat digolongkan sebagai ekuitas karena mempunyai waktu jatuh tempo dan pemilik dana tidak mempunyai hak kepemilikan yang sama dengan pemegang saham seperti hak *voting* dan hak atas *voting* dan hak atas realisasi keuntungan yang berasal dari aset lancar dan aset noninvestasi.

Dana *syirkah* temporer merupakan salah satu unsur laporan posisi keuangan, dimana hal tersebut sesuai dengan prinsip syariah yang memberikan hak kepada Bank untuk mengelola dan menginvestasikan dana, termasuk untuk mencampur dana yang dimaksud dengan dana lainnya.

Pendapatan atas piutang *murabahah* menggunakan metode setara tingkat imbal hasil efektif (margin efektif). Margin efektif adalah margin yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari piutang *murabahah*.

Pada saat menghitung margin efektif, Bank mengestimasi arus kas di masa datang dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, tetapi tidak mempertimbangkan kerugian piutang di masa mendatang. Perhitungan ini mencakup seluruh komisi, provisi dan bentuk lain yang diterima oleh para pihak dalam kontrak yang merupakan bagian tak terpisahkan dari margin efektif, biaya transaksi dan seluruh premi atau diskon lainnya.

Pendapatan sewa (*ijarah*) diakui selama masa akad secara proporsional.

Pendapatan bagi hasil *mudharabah* diakui dalam periode terjadinya hak bagi hasil sesuai nisbah yang disepakati.

Income on *murabahah* receivables uses the method equivalent to the effective rate of return (effective margin). The effective margin is the margin that exactly discounts the estimated future cash payments or receipts over the expected life of the *murabahah* receivables.

When calculating the effective margin, the Bank estimates future cash flows by considering all contractual terms of the financial instrument, but does not consider future receivable losses. This calculation includes all commissions, fees and other forms received by the parties to the contract which are an integral part of the effective margin, transaction costs and all other premiums or discounts.

Rental income (*ijarah*) is recognized proportionally over the term of the contract.

Revenue from *mudharabah* is recognized during the period of profit sharing in accordance with the agreed nisbah.

Revenue from *musyarakah* which becomes the right of the passive partner is recognized in the period in which the profit sharing right occurs according to the agreed nisbah.

cc. Post-employment benefits liabilities

Pension costs under the Bank's defined benefit pension plans are determined by periodic actuarial calculation using the projected-unit-credit method and applying the assumptions on discount rate, return on plan assets and annual rate of increase in compensation.

Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the statement of financial position with a charge or credit recognized in other comprehensive income in the period in which they occur in order for the net pension asset or liability recognized in the statement of financial position to reflect the full value of the plan deficit and surplus. Remeasurement recognized in other comprehensive income is reflected immediately as a separate item under other comprehensive income in equity and will not be reclassified to profit or loss.

Past service costs are recognized at the earlier of when the amendment or curtailment occurs and when the related restructuring or termination costs are recognized.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. Defined benefit costs are categorized as follows:

- *Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements),*
- *Net interest expense or income,*
- *Remeasurement.*

The Bank presents the first two components of defined benefit costs in profit or loss. Curtailment gains and losses are accounted for as past service costs.

dd. Perpajakan

Beban pajak adalah jumlah gabungan pajak kini dan pajak tangguhan yang diperhitungkan dalam menentukan laba rugi pada suatu tahun. Pajak kini dan pajak tangguhan diakui dalam laba rugi, kecuali pajak penghasilan yang timbul dari transaksi atau peristiwa yang diakui dalam penghasilan komprehensif lain atau secara langsung di ekuitas. Dalam hal ini, pajak tersebut masing-masing diakui dalam penghasilan komprehensif lain atau ekuitas.

Jumlah pajak kini untuk tahun berjalan dan tahun sebelumnya yang belum dibayar diakui sebagai liabilitas. Jika jumlah pajak yang telah dibayar untuk tahun berjalan dan periode-periode sebelumnya melebihi jumlah pajak yang terutang untuk tahun tersebut, maka kelebihanannya diakui sebagai aset.

Liabilitas (aset) pajak kini untuk tahun berjalan dan tahun sebelumnya diukur sebesar jumlah yang diperkirakan akan dibayar kepada (direstitusi dari) otoritas perpajakan, yang dihitung menggunakan tarif pajak (dan undang-undang pajak) yang telah berlaku atau secara substantif telah berlaku pada akhir tahun pelaporan.

Manfaat terkait dengan rugi pajak yang dapat ditarik untuk memulihkan pajak kini dari tahun sebelumnya diakui sebagai aset. Aset pajak tangguhan diakui untuk akumulasi rugi pajak belum dikompensasi dan kredit pajak belum dimanfaatkan sepanjang kemungkinan besar laba kena pajak masa depan akan tersedia untuk dimanfaatkan dengan rugi pajak belum dikompensasi dan kredit pajak belum dimanfaatkan.

Seluruh perbedaan temporer kena pajak diakui sebagai liabilitas pajak tangguhan, kecuali perbedaan temporer kena pajak yang berasal dari:

3. Pertimbangan Akuntansi Penting dan Sumber Utama Ketidakpastian Estimasi

3. Critical Accounting Judgments and Key Sources of Estimation Uncertainty

Penyusunan laporan keuangan Bank mengharuskan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah yang dilaporkan dari pendapatan, beban, aset dan liabilitas, dan pengungkapan atas liabilitas kontinjensi pada akhir periode pelaporan.

The preparation of the Bank's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the end of the reporting period.

a. Pertimbangan

Dalam proses penerapan kebijakan akuntansi Bank, manajemen telah membuat keputusan berikut, yang memiliki pengaruh paling signifikan terhadap jumlah yang diakui dalam laporan keuangan:

a. Judgment

In the process of implementing the Bank's accounting policies, management has made the following decisions, which have the most significant impact on the amounts recognized in the financial statements:

Penentuan Kelompok Investasi

Dalam mengklasifikasikan investasi pada surat berharga sebagai "diukur pada biaya perolehan diamortisasi" dan "diukur pada nilai wajar melalui penghasilan komprehensif lain", Bank telah menetapkan bahwa investasi tersebut telah memenuhi persyaratan klasifikasi sebagaimana dijabarkan dalam Catatan 2j.

Investment Group Determination

In classifying investments in securities as "measured at amortized cost" and "measured at fair value through other comprehensive income", the Bank has determined that these investments have met the classification requirements as described in Note 2j.

Penentuan Mata Uang Fungsional

Mata uang fungsional Bank adalah mata uang dari lingkungan ekonomi primer dimana entitas beroperasi. Mata uang tersebut adalah mata uang yang mempengaruhi pendapatan dan beban dari jasa yang diberikan. Berdasarkan penilaian manajemen Bank, mata uang fungsional Bank adalah Rupiah.

Functional Currency Determination

The functional currency of the Bank is the currency of the primary economic environment in which the entity operates. The currency is the currency that affects the income and expense of the services provided. Based on the Bank's management assessment, the Bank's functional currency is Rupiah.

b. Estimasi dan asumsi

Asumsi utama masa depan dan ketidakpastian sumber estimasi utama yang lain pada tanggal pelaporan yang memiliki risiko signifikan bagi penyesuaian yang material terhadap nilai tercatat aset dan liabilitas untuk tahun berikutnya diungkapkan di bawah ini. Bank mendasarkan asumsi dan estimasi pada parameter yang tersedia pada saat laporan keuangan disusun. Asumsi dan situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi di luar kendali Bank. Perubahan tersebut dicerminkan dalam asumsi terkait pada saat terjadinya.

Cadangan kerugian penurunan nilai dari piutang murabahah

Manajemen Bank menelaah portofolio piutang *murabahah* setiap periode untuk menilai penurunan nilai dengan memperbarui cadangan kerugian penurunan nilai yang dibentuk selama periode yang diperlukan berdasarkan analisis berkelanjutan dan pemantauan terhadap rekening individual oleh petugas.

Estimasi tersebut didasarkan pada asumsi mengenai sejumlah faktor dan hasil aktual yang dapat berbeda, yang mengakibatkan perubahan terhadap jumlah cadangan kerugian di masa yang akan datang.

Asumsi dan situasi mengenai perkembangan masa depan dapat berubah akibat perubahan pasar atau situasi yang timbul diluar kendali Bank.

Revaluasi Aset Tetap

Revaluasi aset tetap Bank bergantung pada pemilihan asumsi yang digunakan oleh penilai independen dalam menghitung jumlah-jumlah tersebut. Asumsi tersebut termasuk antara lain: tingkat diskonto, nilai tukar, tingkat inflasi dan tingkat kenaikan pendapatan dan biaya. Bank berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan dalam asumsi yang ditetapkan Bank dapat mempengaruhi secara material nilai aset tetap yang direvaluasi (Catatan 12).

b. Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are disclosed below. The Bank bases assumptions and estimates on the parameters available at the time the financial statements were prepared. Assumptions and circumstances regarding future developments may change due to market changes or circumstances beyond the control of the Bank. Such changes are reflected in the associated assumptions when they occur.

Provision for impairment losses on murabahah receivables

The Bank's management reviews the murabahah receivables portfolio, each period to assess impairment by updating the allowance for impairment losses formed during the required period based on continuous analysis and monitoring of individual accounts by officers.

These estimates are based on assumptions regarding a number of factors and actual results may differ, which may result in changes to the amount of allowance for possible losses in the future.

Assumptions and situations regarding future developments may change due to market changes or situations that arise beyond the control of the Bank.

Property and Equipment Revaluation

The revaluation of the Bank's property and equipment depends on the selection of assumptions used by independent appraisers in calculating these amounts. These assumptions include among others: discount rate, exchange rate, inflation rate and rate of increase in income and expenses. The Bank believes that these assumptions are reasonable and appropriate, significant differences in the assumptions set by the Bank could materially affect the revalued value of property and equipment (Note 12).

Penyusutan Aset Tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen mengestimasi masa manfaat ekonomis aset tetap antara 5 sampai dengan 20 tahun. Ini adalah umur yang secara umum diharapkan dalam industri dimana Bank menjalankan bisnisnya. Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi. Penjelasan lebih rinci diungkapkan dalam Catatan 2 dan 12.

Imbalan Pasca Kerja

Penentuan liabilitas imbalan kerja Bank bergantung pada pemilihan asumsi yang digunakan oleh aktuaris independen dalam menghitung jumlah-jumlah tersebut. Asumsi tersebut termasuk antara lain, tingkat diskonto, tingkat kenaikan gaji tahunan, tingkat pengunduran diri karyawan tahunan, tingkat kecacatan, umur pensiun dan tingkat kematian. Hasil aktual yang berbeda dari asumsi yang ditetapkan Bank diakui segera pada laporan posisi keuangan dengan debit atau kredit ke ekuitas melalui penghasilan komprehensif lain dalam periode terjadinya. Sementara Bank berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan pada hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan Bank dapat mempengaruhi secara material liabilitas diestimasi atas imbalan kerja dan beban imbalan kerja neto. Penjelasan lebih rinci diungkapkan dalam Catatan 2 dan 32.

Pajak Penghasilan

Pertimbangan signifikan dilakukan dalam menentukan provisi atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya adalah tidak pasti dalam kegiatan usaha normal. Bank mengakui liabilitas atas pajak penghasilan badan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan.

Pajak tangguhan

Pajak tangguhan diakui atas seluruh perbedaan temporer yang dapat dikurangkan, sepanjang besar kemungkinannya bahwa penghasilan kena

Depreciation of Property and Equipment

The cost of property and equipment is depreciated using the straight-line method over their estimated useful lives. Management estimates the useful lives of the property and equipment to be between 5 and 20 years. This is the age that is generally expected in the industry in which the Bank does business. Changes in levels of usage and technological developments may affect the economic useful lives and residual values of assets, and therefore future depreciation charges may be revised. A more detailed explanation is disclosed in Notes 2 and 12.

Post-Employment Benefits

Determination of the Bank's employee benefits liability depends on the selection of assumptions used by independent actuaries in calculating these amounts. These assumptions include, among others, discount rate, annual salary increase rate, annual employee resignation rate, disability rate, retirement age and death rate. Actual results that differ from the assumptions set by the Bank are recognized immediately in the statement of financial position by debit or credit to equity through other comprehensive income in the period in which they occur. While the Bank believes that these assumptions are reasonable and appropriate, significant differences in actual results or significant changes in the Bank's assumptions may materially affect the estimated liability for employee benefits and net employee benefits expense. A more detailed explanation is disclosed in Notes 2 and 32.

Income tax

Significant judgment is exercised in determining the provision for corporate income tax. There are certain transactions and calculations for which the final tax determination is uncertain in normal business activities. The Bank recognizes liability for corporate income tax based on estimates of whether there will be an additional corporate income tax.

Deferred tax

Deferred tax is recognized for all deductible temporary differences, to the extent that it is probable that taxable income will be available against which the temporary

pajak akan tersedia sehingga perbedaan temporer tersebut dapat digunakan. Estimasi signifikan oleh manajemen disyaratkan dalam menentukan total pajak tangguhan yang dapat diakui, berdasarkan saat penggunaan dan tingkat penghasilan kena pajak serta strategi perencanaan pajak masa depan.

Aset Hak Guna

Liabilitas sewa diukur pada nilai kini pembayaran sewa yang belum dibayar pada tanggal permulaan, didiskontokan dengan menggunakan suku bunga implisit dalam sewa atau jika suku bunga tersebut tidak dapat ditentukan, maka menggunakan suku bunga pinjaman *incremental* (IBR). IBR adalah tingkat bunga yang harus dibayar Bank untuk meminjam dalam jangka waktu yang sama, dan dengan jaminan serupa, dana yang diperlukan untuk memperoleh aset dengan nilai yang sama dengan aset hak guna dalam lingkungan ekonomi yang sama. Oleh karena itu, IBR mencerminkan apa yang 'harus dibayar' oleh Bank, yang memerlukan perkiraan ketika tidak ada tarif yang tersedia sebagai acuan atau Ketika perlu disesuaikan untuk mencerminkan syarat dan ketentuan sewa. Bank memperkirakan IBR menggunakan input yang dapat diamati (seperti suku bunga pasar).

Bank menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, bersama dengan periode yang dicakup oleh opsi untuk memperpanjang masa sewa jika dipastikan akan dilaksanakan, atau periode apa pun yang dicakup oleh opsi untuk menghentikan sewa, jika cukup wajar untuk tidak dilakukan. Hal tersebut dilakukan dengan mempertimbangkan seluruh fakta dan keadaan yang relevan yang memberikan insentif ekonomi untuk melakukan perpanjangan atau penghentian sewa. Setelah tanggal dimulainya, Bank menilai kembali masa sewa, jika terdapat peristiwa atau perubahan signifikan dalam keadaan yang berada dalam kendali dan mempengaruhi apakah lessee cukup pasti untuk mengeksekusi opsi memperpanjang atau menghentikan sewa.

differences can be used. Significant estimation by management is required in determining the total deferred tax that can be recognized, based on the timing and level of taxable income and future tax planning strategies.

Right-of-Use Asset

The lease liability is measured at the present value of the lease payments that have not been paid at the commencement date, discounted using the interest rate implicit in the lease or if the interest rate cannot be determined, then using the incremental borrowing rate (IBR). IBR is the interest rate that must be paid by the Bank to borrow within the same term, and with similar collateral, the funds required to acquire assets of the same value as usufructuary assets in the same economic environment. The IBR therefore reflects what the Bank 'pays', which requires estimates when no rate is available as a reference or when it needs to be adjusted to reflect the terms and conditions of the lease. Banks estimate IBR using observable inputs (such as market interest rates).

The Bank defines the lease term as the non-cancellable lease term, together with the period covered by the option to extend the lease term if it is reasonably certain that it will be exercised, or any period covered by the option to terminate the lease, if it is reasonable not to do so. This is done by considering all relevant facts and circumstances that provide economic incentives to extend or terminate the lease. After the commencement date, the Bank reassesses the lease term, if there are significant events or changes in circumstances that are within its control and affect whether the lessee is certain to exercise the option to extend or terminate the lease.

Analisis sensitivitas kuantitatif untuk asumsi yang signifikan pada tanggal 31 Desember 2024 sebagai berikut:

Quantitative sensitivity analysis for significant assumptions as of December 31, 2024 is as follows:

	1% Kenaikan/ Increase	1% Kenaikan/ Increase	
Tingkat diskonto	6.84%	7.25%	<i>Discount rate</i>
Dampak kewajiban manfaat pasti - neto	(1,074,668)	(1,360,284)	<i>Impact on the net defined benefits obligations - net</i>

Dampak kewajiban manfaat pasti manfaat pasti - neto	1,134,887	1,457,693	<i>Impact on the net defined benefits obligations - net</i>

Analisis sensitivitas didasarkan pada perubahan atas satu asumsi aktuarial dimana asumsi lainnya dianggap konstan. Dalam praktiknya, hal ini jarang terjadi dan perubahan beberapa asumsi mungkin saling berkorelasi. Dalam perhitungan sensitivitas kewajiban imbalan pasti atas asumsi aktuarial utama, metode yang sama (perhitungan nilai kini kewajiban imbalan pasti dengan menggunakan metode *projected unit credit* di akhir periode) telah diterapkan seperti dalam penghitungan kewajiban pensiun yang diakui dalam laporan posisi keuangan.

Sensitivity analysis is based on changes in one actuarial assumption where other assumptions are held constant. In practice, this rarely happens and changes in some of the assumptions may be correlated. In calculating the sensitivity of the defined benefit obligation to the main actuarial assumptions, the same method (calculating the present value of the defined benefit obligation using the projected unit credit method at the end of the period) has been applied as in calculating the pension obligation recognized in the statement of financial position.

35. Manajemen Risiko

Sebagai bank yang beroperasi secara syariah maka Bank tidak hanya menerapkan manajemen pada 8 risiko seperti yang dijalankan oleh bank yang beroperasi secara konvensional, tetapi menerapkan 10 jenis manajemen risiko, yaitu risiko kredit, risiko operasional, risiko pasar, risiko likuiditas, risiko strategis, risiko hukum, risiko reputasi, risiko kepatuhan, dan tambahan 2 risiko khusus untuk bank syariah, yaitu risiko imbal hasil dan risiko investasi.

a. Pengelolaan Risiko Kredit

Risiko kredit merupakan potensi kerugian akibat kegagalan nasabah (wanprestasi) dalam memenuhi kewajibannya. Eksposur timbul sebagai konsekuensi kegiatan usaha Bank menyalurkan pembiayaan atau bentuk penyediaan dana lainnya yang mengandung risiko kredit.

Komposisi keuangan Bank didominasi oleh penyaluran dana dalam bentuk pembiayaan, sehingga pengelolaan risiko ini menjadi perhatian utama Bank, baik dalam usaha meningkatkan pertumbuhan volumenya, menjaga kualitas (kolektibilitas), dan menjaga penyebaran risikonya secara portofolio (konsentrasi).

Secara *framework*, Bank menjalankan *four eyes principle* sebagai penerapan manajemen risiko pada aktivitas pembiayaan (risiko kredit). Terdapat pemisahan yang tegas pada struktur organisasi, adanya fungsi bisnis dan fungsi kajian risiko (*financing reviewer*) serta diberlakukannya mekanisme Komite Persetujuan Pembiayaan. Tidak satupun pembiayaan yang dapat disetujui maupun diproses hanya dengan *single approval*.

Risiko kredit maksimum

Eksposur risiko kredit terhadap aset neto sesudah penyisihan penurunan nilai pada laporan posisi Keuangan pada tanggal-tanggal 31 Desember 2024 dan 2023 adalah sebagai berikut:

35. Risk Management

As a bank that operates in sharia, the Bank does not only implement management on 8 risks as carried out by banks that operate conventionally, but implements 10 types of risk management, namely credit risk, operational risk, market risk, liquidity risk, strategic risk, legal risk, reputation risk, compliance risk, and additional 2 specific risks for Islamic banks, namely rate of return risk and investment risk.

a. Credit Risk Management

Credit risk is a potential loss due to the failure (defaults) of customers in fulfilling their obligations. Exposure arises as a consequence of the Bank's business activities in providing financing or other forms of provision of funds that contain credit risk.

The Bank's financial composition is dominated by distribution of funds in the form of financing, so that managing this risk is a major concern of the Bank, both in terms of improving volume growth, maintaining the quality (collectibility), and maintaining the spread of risk in the portfolio (concentration).

In terms of framework, the Bank implements four eyes principles as the implementation of risk management in financing activities (credit risk). There is a clear separation in the organizational structure, the existence of a business function and a risk review function (*financing reviewer*) and the implementation of the Financing Approval Committee mechanism. None of the financing can be approved or processed with only a single approval.

Maximum credit risk

Credit risk exposure to net assets after allowance for impairment in the statements of financial position as of December 31, 2024 and 2023 are as follows:

Agunan

Agunan digunakan untuk mengurangi eksposur maksimum terhadap risiko kredit. Umumnya agunan diperlukan dalam setiap pemberian pembiayaan sebagai sumber terakhir pelunasan pembiayaan dan sebagai salah satu bentuk mitigasi risiko kredit. Sumber utama pelunasan pembiayaan adalah dari hasil usaha debitur.

Agunan yang dapat diterima oleh Bank dibagi atas 2 (dua) kelompok besar yaitu:

- 1) Agunan tunai yaitu deposito, tabungan, dan/atau rekening giro nasabah yang diblokir,
- 2) Agunan nontunai, yaitu agunan yang tidak termasuk dalam jenis jaminan seperti pada agunan tunai di atas

Rincian dari aset nonkeuangan yang diperoleh Bank melalui pengambilalihan kepemilikan agunan yang merupakan jaminan terhadap aset keuangan pada tanggal 31 Desember 2024 dan 2023 yang disajikan pada nilai wajar agunan yang diambil alih yaitu, tanah dan bangunan sebesar Rp27.038.140 dan Rp27.393.215.

b. Pengelolaan Risiko Pasar

Risiko pasar adalah risiko akibat perubahan harga pasar, antara lain risiko dari perubahan nilai aset yang dapat diperdagangkan. Risiko pasar terdiri dari dua jenis risiko: risiko nilai tukar dan risiko pergerakan harga sukuk yang diklasifikasikan pada nilai wajar.

Collateral

Collateral is used to reduce the maximum exposure to credit risk. Collateral is generally required in every financing provision as the final source of repayment of financing and as a form of credit risk mitigation. The main source of repayment of financing is from the business results of the debtor.

Collateral that can be received by the Bank is divided into 2 (two) major groups, namely:

- 1) Cash collateral, namely deposits, savings, and/or customer checking accounts that are blocked,
- 2) Non cash collateral, which is collateral that is not included in the type of collateral as in the cash collateral above

Details of the non financial assets acquired by the Bank through a takeover of collateral which are collateral for financial assets as of December 31, 2024 and 2023 are presented at the fair value of the foreclosed assets, namely, land and buildings amounting to Rp27,038,140 and Rp27,393,215.

b. Market Risk Management

Market risk is the risk due to changes in market prices, including the risk from changes in the value of tradable assets. Market risk consists of two types of risk: exchange rate risk and risk of movement in the price of sukuk which are classified at fair value.

Pengelolaan risiko pasar Bank dilakukan berdasarkan aktivitas bisnis utama dengan portofolio penyaluran dana mayoritas berbentuk pembiayaan. Karakteristik posisi keuangan Bank terdiri atas pembiayaan dan sebagian kecil investasi dalam bentuk surat berharga sukuk. Aktivitas perdagangan pada *treasury* secara *over the counter* dengan tujuan *proprietary trading* tidak dilakukan, sehingga paparan risiko pasar tergolong rendah, lebih kepada perubahan perilaku dan menjaga loyalitas nasabah penyimpan dana pada saat terjadi kenaikan suku bunga konvensional di pasar, serta memadukannya dengan pembiayaan yang kebanyakan bersifat margin tetap.

Risiko Nilai Tukar

Risiko nilai tukar merupakan risiko yang timbul karena adanya gap posisi valuta asing yang dimiliki Bank yang tercermin dalam Posisi Devisa Neto (PDN). Termasuk dalam posisi valuta asing tersebut yaitu posisi *trading book* yang dilakukan dengan tujuan untuk mendapatkan keuntungan transaksi valuta asing dalam jangka pendek maupun posisi *banking book* dalam rangka pengendalian PDN.

Perhitungan PDN didasarkan pada Peraturan Bank Indonesia No. 5/13/PBI/2003 tanggal 1 Juli 2003 sebagaimana telah diubah terakhir dengan Peraturan Bank Indonesia No. 17/5/PBI/2015 tanggal 29 Mei 2015. Berdasarkan peraturan tersebut, Bank diwajibkan untuk menjaga rasio PDN maksimum 20% dari jumlah modal. PDN adalah penjumlahan nilai absolut yang dinyatakan dalam Rupiah dari selisih neto antara aset dan liabilitas dalam mata uang asing dan selisih neto dari tagihan dan liabilitas komitmen dan kontinjensi yang dicatat dalam rekening administratif yang didenominasi dalam setiap mata uang asing.

Tabel di bawah ini menunjukkan PDN dan sensitivitas terhadap kemungkinan perubahan atas nilai tukar terhadap laba rugi dengan asumsi bahwa semua variabel lain yang dimiliki adalah konstan untuk tahun yang berakhir pada tanggal-tanggal 31 Desember 2024 and 2023 (tidak diaudit):

The Bank's market risk management is carried out based on the main business activities with the majority of the fund disbursement portfolio in the form of financing. The characteristics of the Bank's financial position consist of financing and a small portion of investment in the form of sukuk securities. Trading activities in the treasury over the counter with the aim of proprietary trading are not carried out, so that market risk exposure is relatively low, it is more about changing behavior and maintaining customer loyalty when there is an increase in conventional interest rates on the market, as well as combining it with financing which is mostly fixed margin.

Exchange Rate Risk

Exchange rate risk is a risk that arises due to a gap in the Bank's foreign exchange position which is reflected in the Net Open Position (NOP). Included in the foreign exchange position are trading book positions carried out with the aim of gaining short-term foreign exchange transaction benefits as well as banking book positions in the framework of PDN control.

NOP calculation is based on Bank Indonesia Regulation No. 5/13/PBI/2003 dated July 1, 2003 as last amended by Bank Indonesia Regulation No. 17/5/PBI/2015 dated May 29, 2015. Based on this regulation, Banks are required to maintain a maximum PDN ratio of 20% of total capital. NOP is the sum of the absolute values expressed in Rupiah from the net difference between assets and liabilities in foreign currencies and the net difference from commitments and contingencies receivables and liabilities recorded in an administrative account denominated in each foreign currency.

The table below shows the NOP and the sensitivity to possible changes in exchange rates against profit or loss assuming that all other variables held constant for the years ended December 31, 2024 and 2023 (unaudited):

Risiko Pergerakan Harga Sukuk

Risiko pergerakan harga sukuk merupakan risiko yang timbul akibat dari perubahan harga sukuk di pasar, seperti nilai tukar dan imbal hasil, yang akan berdampak pada pendapatan dan nilai instrumen keuangan yang dimiliki Bank. Tujuan dari pengelolaan risiko pergerakan harga sukuk adalah untuk mengelola dan mengawasi eksposur risiko pergerakan harga sukuk dengan menggunakan parameter-parameter yang dapat diterima, dan pada saat yang sama dapat mengoptimalkan pendapatan.

Dalam melaksanakan proses manajemen risiko pergerakan harga sukuk, Bank melakukan identifikasi, pengukuran, pemantauan dan pengendalian terhadap faktor-faktor risiko harga sukuk. Kebijakan yang dijalankan Bank dalam pengendalian terhadap risiko imbal hasil sukuk mencakup:

- Melakukan simulasi perhitungan pendapatan margin bersih terhadap semua kemungkinan perubahan tingkat imbal hasil sukuk.
- Melakukan pemantauan terhadap *Asset and Liabilities Repricing Gap Profile* secara keseluruhan dalam mengantisipasi pergerakan tren imbal hasil sukuk yang dapat menyebabkan kerugian.

Risk of Sukuk Price Movements

The risk of movement in the price of sukuk is the risk that arises as a result of changes in the price of sukuk in the market, such as exchange rates and yields, which will have an impact on the income and value of the financial instruments owned by the Bank. The objective of managing the risk of movement in sukuk prices is to manage and monitor the risk exposure to movements in the price of sukuk using acceptable parameters, and at the same time optimize income.

In carrying out the risk management process for the movement of sukuk prices, the Bank identifies, measures, monitors and controls the risk factors for sukuk prices. Policies implemented by the Bank in controlling the risk of yield on sukuk include:

- Perform simulations of calculating net margin income for all possible changes in the rate of yield on sukuk.
- Monitor the Assets and Liabilities Repricing Gap Profile as a whole in anticipating movements in the trend of yields on sukuk which can cause losses.

c. Pengelolaan Risiko Likuiditas

Risiko likuiditas adalah potensi timbulnya kerugian akibat ketidakmampuan bank dalam membayar seluruh kewajiban yang jatuh tempo. Risiko ini juga muncul pada saat bank tidak dapat mencairkan atau menjual aset berupa investasi surat berharga dengan seketika karena permintaan pasar sangat rendah.

Pengelolaan likuiditas menjadi penting dalam industri karena kekurangan likuiditas dapat mengganggu sistem perbankan secara nasional. Kebijakan manajemen risiko likuiditas Bank ditujukan untuk memenuhi kebutuhan operasional serta kebutuhan tak terduga seperti penarikan dana nasabah dalam jumlah signifikan. Kebijakan ini mencakup penetapan strategi likuiditas, pemeliharaan cadangan likuiditas, dan akses pendanaan antar bank.

Bank selalu mengelola rasio likuiditas pada tingkat aman yang dapat menunjang kegiatan usaha Bank. Bank juga selalu memantau kemungkinan sumber-sumber dana lainnya yang dapat diandalkan untuk menopang risiko likuiditas apabila kemungkinan buruk terjadi.

Perilaku nasabah penyimpan dana pada Bank secara historikal juga menunjukkan tingkat loyalitas yang tinggi, dan kualitas pelayanan kepada nasabah tampak semakin ditingkatkan setiap tahun, dengan berbagai program untuk menjaga hubungan baik antara Bank dengan nasabah.

c. Liquidity Risk Management

Liquidity risk is the potential for losses due to the bank's inability to pay all obligations that are due. This risk also arises when banks are unable to liquidate or sell assets in the form of investment securities immediately because market demand is very low.

Liquidity management is important in the industry because a lack of liquidity can disrupt the national banking system. The Bank's liquidity risk management policy is aimed at meeting operational needs as well as unexpected needs such as withdrawing significant amounts of customer funds. This policy includes establishing a liquidity strategy, maintaining liquidity reserves, and accessing interbank funding.

The Bank always manages the liquidity ratio at a safe level with condition that can support the Bank's business activities. The Bank also always monitors the possibility of other sources of funds that can be relied upon to support liquidity risk if something bad happens.

The behavior of customers depositing funds at the Bank historically also shows a high level of loyalty, and the quality of service to customers seems to be getting improved every year, with various programs to maintain good relations between the Bank and customers.

The following is a table regarding the analysis of the maturity of assets and liabilities as of December 31, 2024 and 2023, based on the remaining time until the maturity date:

d. Pengelolaan Risiko Operasional

Risiko operasional merupakan risiko signifikan kedua setelah risiko kredit pada Bank. Risiko ini adalah potensi kerugian yang diakibatkan oleh proses internal yang kurang memadai, kegagalan proses internal, kesalahan manusia, kegagalan sistem, dan/atau adanya kejadian-kejadian eksternal yang mempengaruhi operasional Bank.

d. Operational Risk Management

Operational risk is the second significant risk after credit risk in the Bank. This risk is a potential loss caused by inadequate internal processes, internal process failures, human errors, system failures, and/or external events that affect the Bank's operations.

CATATAN ATAS LAPORAN KEUANGAN

Pada Tanggal 31 Desember 2024 dan 2023
(Disajikan dalam ribuan Rupiah,
kecuali dinyatakan lain)

Signifikan pada urutan kedua bukan berarti risiko ini besar atau tidak dapat dikelola dengan baik, namun Bank menyadari bahwa dengan adanya perubahan segmentasi dan orientasi pasar, maka baik infrastruktur, sarana-prasarana, dan peningkatan kualitas sumber daya manusia menjadi prioritas utama.

e. Pengelolaan Risiko Kepatuhan

Selain itu, dalam rangka pengendalian, dilakukan pemisahan fungsi antara satuan kerja operasional dan satuan kerja yang melaksanakan fungsi pengendalian, serta penerapan Prinsip Mengenal Nasabah (KYC) atau yang sekarang dikenal sebagai *Customer Due Diligence*, secara konsisten sesuai dengan paparan risiko operasional yang ada.

Risiko kepatuhan terjadi jika bank tidak mematuhi dan/atau tidak melaksanakan regulasi berupa peraturan perundang-undangan dan ketentuan berlaku yang ditetapkan Pemerintah melalui Bank Indonesia, OJK, maupun instansi lain yang terkait. Sebagai bank yang menjalankan kegiatan usaha secara syariah, risiko kepatuhan juga mencakup pemenuhan pelaksanaan prinsip syariah yang ditetapkan oleh Dewan Syariah Nasional - Majelis Ulama Indonesia.

Pengelolaan risiko kepatuhan Bank senantiasa dijaga dan diupayakan untuk sama sekali tidak ada. Dapat disampaikan bahwa seluruh regulasi dan prinsip syariah selalu dipenuhi dengan baik. Beberapa kekurangan kecil lebih diakibatkan karena keterlambatan penyampaian laporan karena kendala waktu yang sangat terbatas atau karena *human error* informasi yang sama sekali tidak signifikan mengubah persepsi kondisi atau laporan keuangan yang terbentuk.

Kepatuhan terhadap pemenuhan rasio-rasio keuangan yang ditetapkan melalui regulasi dapat terjaga dengan baik, seperti pemenuhan rasio Giro Wajib Minimum (GWM), *Capital Adequacy Ratio* (CAR), pemenuhan Cadangan Kerugian Penurunan Nilai (CKPN) dan/atau Penyisihan Penghapusan

Significant in the second place does not mean that this risk is large or cannot be managed properly, but the Bank realizes that with changes in market segmentation and orientation, infrastructure, facilities and improving the quality of human resources are a top priority.

e. Compliance Risk Management

In addition, in the context of control, segregation of functions is carried out between operational work units and work units that carry out the control function, as well as application of Know Your Customer (KYC) Principles or what is now known as Customer Due Diligence, consistently in accordance with the existing operational risk exposure.

Compliance risk occurs if a bank does not comply with and/or does not implement regulations in the form of laws and regulations set by the Government through Bank Indonesia, OJK, or other related agencies. As a bank that carries out sharia-compliant business activities, compliance risk also includes compliance with the implementation of sharia principles stipulated by the National Sharia Council - Indonesian Ulema Council.

The Bank's compliance risk management is always maintained and strived to be completely non-existent. It can be said that all sharia regulations and principles are always properly complied with. Several minor deficiencies were caused by delays in submitting reports due to very limited time constraints or due to human error information which did not significantly change the perception of conditions or the financial reports that were formed.

Compliance with the fulfillment of financial ratios stipulated through regulations can be well maintained, such as fulfillment of the Minimum Statutory Reserves ratio (GWM), Capital Adequacy Ratio (CAR), fulfillment of Allowance for Impairment Losses (CKPN) and/or Allowance for Earning

Aktiva Produktif (PPAP), *Non Performing Financing* (NPF), Batas Maksimum Pembiayaan (BMP) maupun rasio-rasio lain.

Satuan kerja Kepatuhan Bank wajib dan aktif mengkaji setiap proposal pembiayaan, proposal kerja sama atau rencana penerbitan produk baru maupun aktivitas baru, yang memerlukan opini dari sisi kepatuhan terhadap regulasi, sehingga sejak awal seluruh kegiatan usaha Bank selalu terjaga kepatuhannya.

f. Pengelolaan Risiko Strategis

Risiko strategis adalah risiko akibat ketidak tepatan dalam pengambilan dan/atau pelaksanaan suatu keputusan strategis, serta kegagalan dalam mengantisipasi perubahan lingkungan bisnis.

Risiko ini menempati urutan ketiga terkait dengan perhatian khusus Direksi dalam mencermati terpenuhinya peralihan segmentasi pasar yang menjadi bidikan Bank dan untuk memantau kinerja Bank dibandingkan dengan *peer banks*.

Untuk memudahkan pengawasan terhadap implementasi produk dan aktivitas, mitigasi risiko strategis dilakukan sejak tahap perencanaan penerbitan produk dan aktivitas baru yang dicantumkan dalam Rencana Bisnis Bank.

Pengukuran risiko strategis dan parameter pengukurannya dilakukan berdasarkan kinerja Bank, yaitu dengan membandingkan hasil yang dicapai dengan rencana bisnis. Faktor-faktor lain dalam identifikasi risiko strategis meliputi kesesuaian strategi dengan kondisi lingkungan bisnis, keahlian dan posisi bank di pasar, serta kondisi makro ekonomi.

Kinerja Bank secara konsisten mampu mendukung pertumbuhan permodalan. Permodalan bank dinilai cukup kuat yang diukur melalui rasio permodalan (*capital adequacy ratio*) sebesar 28,71%, jauh dari batas minimum yang diwajibkan regulator yaitu sebesar 9%.

Assets (PPAP), *Non Performing Financing* (NPF), Maximum Financing Limit (BMP) and other ratios.

The Bank's Compliance Work Unit is required to actively review every financing proposal, cooperation proposal or plan to issue new products or new activities, which require opinion from a regulatory compliance perspective, so that from the start all the Bank's business activities are always in compliance.

f. Strategic Risk Management

Strategic risk is the risk due to inaccuracy in making and/or implementing a strategic decision, as well as failure to anticipate changes in the business environment.

This risk ranks third in relation to the special attention of the Board of Directors in observing the fulfillment of market segmentation shifts that are the target of the Bank and to monitor the Bank's performance compared to peer banks.

To facilitate supervision of the implementation of products and activities, strategic risk mitigation is carried out from the planning stage for the issuance of new products and activities which are included in the Bank's Business Plan.

Strategic risk measurement and measurement parameters are carried out based on the Bank's performance, namely by comparing the results achieved with the business plan. Other factors in the identification of strategic risk include the suitability of the strategy with the conditions of the business environment, expertise and bank position in the market, as well as macroeconomic conditions.

The Bank's performance is consistently able to support capital growth. Bank capital is considered quite strong as measured by a capital adequacy ratio of 28.71%, far from the minimum required by the regulator, which is 9%.

Beberapa keputusan strategis masih terus dilanjutkan pada tahun 2024 untuk menyeimbangkan komposisi portofolio pendanaan retail dan komposisi portofolio pembiayaan komersial. Diharapkan pula kedepan, penyelesaian portofolio pembiayaan yang sudah tidak lagi digarap akan semakin mengecilkan signifikansinya pada kondisi keuangan Bank.

g. Pengelolaan Risiko Reputasi

Risiko reputasi dapat terjadi antara lain karena disebabkan adanya publikasi negatif terkait dengan kegiatan usaha atau persepsi negatif terhadap bank. Reputasi dan kepercayaan merupakan pondasi penting dalam industri perbankan. Kegagalan menjaga reputasi dan kepercayaan nasabah akan menimbulkan dampak yang signifikan pada kinerja keuangan, dan pemulihannya kembali akan membutuhkan biaya yang besar.

Pemantauan risiko reputasi Bank dilakukan secara terus menerus berdasarkan faktor-faktor penyebab timbulnya risiko, meliputi publikasi negatif pemilik bank dan perusahaan terkait, pemberitaan negatif oleh mitra bisnis, pemberitaan negatif pada media, dan keluhan nasabah.

Mitigasi risiko dilakukan melalui pemantauan pemberitaan negatif Bank, penyelesaian keluhan nasabah secepatnya, sigap menyikapi dan menanggapi pemberitaan pada media secara aktif dan tertulis, dan hal sebaliknya juga aktif mempublikasikan aktivitas Bank untuk meningkatkan *awareness* maupun reputasi Bank di mata masyarakat.

Selama tahun 2024 tidak terdapat pemberitaan yang secara signifikan mempengaruhi reputasi Bank. Keluhan nasabah hampir seluruhnya berasal dari permasalahan penggunaan kartu ATM yang bersumber dari kelalaian nasabah sendiri, beberapa karena putusnya jaringan informasi.

Several strategic decisions will continue in 2024 to balance the composition of the retail funding portfolio and the composition of the commercial financing portfolio. It is also hoped that in the future, the settlement of financing portfolios that are no longer being worked on will further diminish its significance to the Bank's financial condition.

g. Reputation Risk Management

Reputation risk can occur, among others, due to negative publications related to business activities or negative perceptions of the bank. Reputation and trust are important foundations in the banking industry. Failure to maintain the reputation and trust of customers will have a significant impact on financial performance, and recovery will require substantial costs.

Bank reputation risk monitoring is carried out continuously based on the factors that cause risk, including negative publications by bank owners and related companies, negative news by business partners, negative news in the media, and customer complaints.

Risk mitigation is carried out through monitoring the Bank's negative publicity, resolving customer complaints as soon as possible, responding swiftly to and responding to news in the media actively and in writing, and on the other hand actively publicizing the Bank's activities to increase awareness and reputation of the Bank in the eyes of the public.

During 2024 there was no news that significantly affected the Bank's reputation. Almost all customer complaints stem from problems using ATM cards originating from the customer's own negligence, some due to a breakdown in the information network.

h. Pengelolaan Risiko Hukum

Risiko hukum timbul karena kelemahan aspek yuridis yang kemudian berakibat pada adanya tuntutan hukum. Kelemahan aspek yuridis antara lain disebabkan ketiadaan atau lemahnya peraturan perundang-undangan yang mendukung, atau kelemahan perikatan seperti tidak dipenuhinya syarat sah kontrak, dan pengikatan agunan yang tidak sempurna.

Kelemahan dari setiap perjanjian pembiayaan atau perjanjian-perjanjian dengan pihak ketiga lainnya dapat mengakibatkan adanya tuntutan hukum yang kemudian berdampak pada kinerja keuangan. Bank memiliki satuan kerja Legal yang bertugas dan bertanggung jawab selain sebagai pembuat (*drafting*) akad, juga memiliki peran untuk memeriksa, mengkaji, menerbitkan opini hukum, dan memastikan risiko hukum dapat terjaga serendah-rendahnya.

Format-format perjanjian/akad selalu dikaji bersama dengan satuan kerja lainnya yang terkait, termasuk pemeriksaan dari satuan kerja Kepatuhan, dan pemeriksaan pemenuhan prinsip syariahnya, sebelum diproduksi dan digunakan oleh Bank.

Seluruh pembuatan perjanjian/akad Bank wajib berasal dari satuan kerja Legal, dan hanya pejabat tertentu yang diberikan pendelegasian wewenang menanda tangani perjanjian/akad, dengan ketentuan tidak diperkenankan adanya *single authorized signer*.

Sepanjang tahun 2024 tidak terdapat tuntutan terhadap Bank yang disebabkan karena kelemahan perikatan hukum. Beberapa risiko hukum terjadi karena disebabkan lebih pada terjadinya risiko kredit dan risiko operasional.

i. Pengelolaan Risiko Imbal Hasil

Berbeda dengan bank konvensional yang memberikan imbalan bunga secara pasti, terdapat risiko imbal hasil (*rate of return risk*) pada bank syariah sebagai akibat perubahan tingkat imbal hasil yang dibayarkan bank kepada nasabah penyimpan dana, karena terjadinya perubahan tingkat imbal hasil yang diterima bank dari kegiatan penyaluran dana.

h. Legal Risk Management

Legal risks arise due to weaknesses in the juridical aspect which then result in lawsuits. Weaknesses in the juridical aspect, among others, are caused by the absence or weakness of supporting laws and regulations, or weaknesses in agreements such as non-compliance with the legal terms of the contract, and imperfect binding of collateral.

Weaknesses in any financing agreements or agreements with other third parties can result in lawsuits which then have an impact on financial performance. The Bank has a Legal work unit whose duties and responsibilities aside from drafting contracts, also have the role of examining, reviewing, issuing legal opinions, and ensuring that legal risks are kept as low as possible.

The agreement/contract formats are always reviewed together with other related work units, including inspections from the Compliance work unit, and inspections of compliance with sharia principles, before being produced and used by the Bank.

All agreements/agreements made by the Bank must come from the Legal work unit, and only certain officials are given the delegation of authority to sign agreements/contracts, provided that a single authorized signer is not permitted.

Throughout 2024 there were no claims against the Bank due to weaknesses in the legal agreement. Several legal risks occur due to credit risk and operational risk.

i. Pengelolaan Risiko Imbal Hasil

In contrast to conventional banks which provide definite interest rewards, there is a risk of return (rate of return risk) on Islamic banks as a result of changes in the rate of return paid by banks to customers depositing funds, due to changes in the rate of return received by banks from channeling activities fund.

Realisasi imbal hasil yang belum pasti dapat mempengaruhi perilaku nasabah dana pihak ketiga bank syariah. Perbedaan antara ekspektasi awal dengan realisasi tingkat imbal hasil yang diterima nasabah dari bank syariah dapat memicu perpindahan simpanan dana pada Bank ke bank-bank lainnya.

Perbedaan antara ekspektasi awal dengan realisasi tingkat imbal hasil juga dapat disebabkan faktor internal seperti menurunnya nilai aset Bank dan/atau faktor eksternal seperti naiknya *return*/imbal hasil yang ditawarkan bank lain.

Risiko imbal hasil Bank pada tahun 2024 dapat terjaga dengan baik walaupun *Non Core Depositors* (NCD) atau nasabah penyimpan dana besar masih merupakan mayoritas *funding* Bank. Hubungan kedekatan, pemeliharaan kualitas layanan, dan tingkat loyalitas nasabah yang tinggi merupakan faktor kualitatif yang dikelola dengan baik selama ini.

Meskipun terjadi tren peningkatan suku bunga pasar selama tahun 2024, tidak mempengaruhi tingkat loyalitas nasabah penghimpunan dana.

j. Pengelolaan Risiko Investasi

Risiko investasi (*equity investment risk*) juga merupakan risiko yang spesifik melekat pada kegiatan usaha bank syariah. Risiko akan timbul pada saat bank membuka pembiayaan berbasis bagi hasil, dimana konsep pembiayaan ini adalah kemitraan.

Bank dan nasabah saling bermitra dan menanggung bersama hasil usaha nasabah, baik dengan menggunakan metode *net revenue sharing* maupun *profit and loss sharing*. Risiko terjadi pada saat usaha nasabah tidak mampu menghasilkan laba, yang berarti kerugian pun akan ditanggung bersama sesuai porsi yang telah disepakati sebelumnya.

Uncertain yield realization can affect the behavior of Islamic bank third party fund customers. The difference between initial expectations and the actual rate of return received by customers from Islamic banks can trigger a transfer of funds from the bank to other banks.

The difference between the initial expectation and the actual rate of return can also be caused by internal factors such as a decrease in the value of the Bank's assets and/or external factors such as an increase in the returns offered by other banks.

The risk of the Bank's returns in 2024 can be well maintained even though Non Core Depositors (NCD) or large depositors still make up the majority of the Bank's funding. Relationship closeness, maintenance of service quality, and high levels of customer loyalty are qualitative factors that have been well managed so far.

Even though there is an increasing trend in market interest rates during 2024, it does not affect the level of customer loyalty in raising funds.

j. Investment Risk Management

Investment risk (equity investment risk) is also a specific risk inherent in Islamic banking business activities. Risk will arise when a bank opens profit-sharing-based financing, where the concept of this financing is a partnership.

Banks and customers partner with each other and share the results of the customer's business, using both the net revenue sharing and profit and loss sharing methods. The risk occurs when the customer's business is unable to generate profits, which means that losses will be shared according to the previously agreed portion.

Risiko investasi tidak terjadi pada bank konvensional karena besar kecilnya hasil usaha bahkan kerugian usaha nasabah tidak serta merta mengurangi atau menghilangkan kewajiban pembayaran kepada bank pemberi kredit, dan berbagai upaya lain dapat dilakukan oleh bank konvensional untuk menghindari kerugian, termasuk proses restrukturisasi bila dimungkinkan.

Perhitungan pembiayaan syariah berbasis bagi hasil dapat didasarkan atas jumlah pendapatan atau penjualan yang diperoleh nasabah, atau dihitung dari keuntungan usaha yang dihasilkan nasabah. Keduanya tetap akan mempengaruhi jumlah pendapatan margin yang diterima bank menjadi berfluktuasi (*unfixed rate*). Selama tahun 2024, Bank sanggup menjaga kualitas pembiayaan berbasis bagi hasil dengan rasio pembiayaan bermasalah yang sangat rendah.

Portofolio pembiayaan berbasis bagi hasil pada Bank yaitu 63,15% dari total pembiayaan, sehingga risiko investasi masih rendah, dan didukung dengan kinerja pembiayaan berbasis bagi hasil selama tahun 2024 yang berkualitas sangat baik, terdapat pembiayaan bermasalah sebesar 0,91%.

Investment risk does not occur in conventional banks because the size of the business results and even customer business losses does not necessarily reduce or eliminate payment obligations to lending banks, and various other efforts can be made by conventional banks to avoid losses, including the restructuring process if possible.

The calculation of profit-sharing-based sharia financing can be based on the amount of income or sales earned by the customer, or calculated from the business profit generated by the customer. Both will still affect the amount of margin income received by the bank to fluctuate (un-fixed rate). During 2024, the Bank is able to maintain the quality of profit-sharing-based financing with a very low non-performing financing ratio.

The profit-sharing-based financing portfolio at the Bank is 63.15% of total financing, so the investment risk is still low, and is supported by the performance of profit-sharing-based financing during 2024 which is of very good quality, there is problematic financing of 0.91%.
