Shareholders may use their vote in decision making, especially by voting during the process of decision-making. However, the mechanism of decision-making by voting has not been arranged in a detailed manner whether it is in public or in private.<br><br>The Public Company is recommended to have voting procedures in making decisions on a GMS agenda. The voting procedure must maintain the independence of shareholders. For example, in open voting, it is done by raising hands in accordance with the choice instructions offered by the chairman of the GMS. Meanwhile, closed voting is carried out on decisions that require confidentiality or at the request of shareholders, by using a voting card or electronic voting. | <b>Has Been Implemented</b><br>The Bank has established decision making procedures through open or closed voting in the GMS that emphasizes on the independence and interests of shareholders. These provisions are stipulated in the Bank's Articles of Association and the GMS's Implementation Procedures as follows:<br>1. GMS decisions are taken based on deliberation for consensus<br>2. In the event that a decision based on deliberation for consensus is not reached, the resolution of the GMS is valid if it is approved by more than 1/2 (one half) of the total shares with voting rights present at the GMS, unless the laws and regulations and/or Articles of Association determine that a decision is valid if it is approved by a larger number of affirmative votes.<br>3. Voting regarding individuals and voting on other matters are regulated as follows:<br>a. silent, self-made in writing and unsigned;<br>b. regarding the other things done orally, unless the Chairman of the GMS decides otherwise without objection from 1 (one) or more shareholders present at the GMS. |

|                      | 7.6 The Public Company has a policy of providing long-term incentives to the Board of Directors and employees | <p>Long-term incentives are incentives that are based on the achievement of long-term performance. Long-term incentive plans have the rationales that the company's long-term performance is reflected by the growth in the value of the stock or other long-term targets of the company. Long-term incentives are useful in order to maintain loyalty and provide motivation to the Board of Directors and employees to increase their performance or productivity, that will have an impact on increasing the company's performance over the long term.</p> <p>The existence of a long-term incentive policy is a real commitment of a Public Company to encourage the implementation of providing long-term incentives to the Board of Directors and Employees on terms, procedures, and forms that are tailored to the long-term objectives of the Public Company. Such policy may include, among others: means and objectives of providing long-term incentives, terms and procedures for incentives, as well as conditions and risks that the Public Company should consider in providing incentives. The policy may also be included in the existing remuneration policy of the Public Company</p>                | <p><b>Has been Implemented</b></p> <p>The available Talent and Successor Pool are employees who have been selected and are expected to be the main drivers of the company's business processes. ## KEPUTUSAN YANG PERLU MENDAPAT PERSETUJUAN DEWAN KOMISARIS

Berlandas pada Peraturan Bank Indonesia No. 11/33/PBI/2009 tentang Pelaksanaan *Good Corporate Governance* bagi Bank Umum Syariah dan Unit Usaha Syariah pasal 8 ayat (4), dalam melakukan pengawasan, Dewan Komisaris dilarang terlibat dalam pengambilan keputusan kegiatan operasional Bank. Hal itu tidak termasuk dalam pengambilan keputusan untuk pemberian pembiayaan kepada Direksi sepanjang kewenangan Dewan Komisaris tersebut ditetapkan dalam Anggaran Dasar Bank atau dalam Rapat Umum Pemegang Saham.

Aturan itu juga mengungkapkan bahwa Dewan Komisaris dapat ikut serta dalam pengambilan keputusan atas hal-hal lain yang ditetapkan dalam Anggaran Dasar Bank atau peraturan perundang-undangan. Pengambilan keputusan kegiatan operasional Bank oleh Dewan Komisaris sebagaimana dimaksud di atas merupakan bagian dari tugas pengawasan oleh Dewan Komisaris. Dengan demikian, tidak meniadakan tanggung jawab Direksi atas pelaksanaan kepengurusan Bank.

## SERTIFIKASI MANAJEMEN RISIKO

Bank Muamalat memandang pejabat yang memiliki kompetensi dan keahlian di bidang manajemen risiko merupakan sebuah kebutuhan dalam bisnis bank seiring dengan semakin kompleksnya kegiatan usaha perbankan sehingga potensi risiko yang dihadapi juga semakin besar.

Hal itu juga sesuai dengan Peraturan Bank Indonesia No. 11/19/PBI/2009 tentang Sertifikasi Manajemen Risiko bagi Pengurus dan Pejabat Bank Umum. Dewan Komisaris dan Direksi wajib memiliki Sertifikat Manajemen Risiko yang diterbitkan oleh Lembaga Sertifikasi Profesi.

## DECISIONS REQUIRING THE APPROVAL OF THE BOARD OF COMMISSIONERS

Based on Bank Indonesia Regulation No. 11/33/PBI/2009 on the Implementation of Good Corporate Governance for Sharia Commercial Banks and Sharia Business Units article 8 paragraph (4), in conducting supervision, the Board of Commissioners is prohibited to be involved in the decision making on operational activities of the Bank. This is not included in making decisions to provide financing to the Board of Directors as long as the authority of the Board of Commissioners is stipulated in the Bank's Articles of Association or in the General Meeting of Shareholders.

The regulation also states that the Board of Commissioners can participate in making decisions on other matters stipulated in the Articles of Association of the Bank or laws and regulations. The decision making for the Bank's operational activities by the Board of Commissioners as referred to above is part of the supervisory duties by the Board of Commissioners. Thus, it does not negate the responsibility of the Board of Directors for the implementation of the management of the Bank.

## RISK MANAGEMENT CERTIFICATION

Bank Muamalat considers that officials who have competence and expertise in the field of risk management are a necessity in the bank's business in line with the increasingly complex banking business activities resulting in bigger potential risks to be faced.

This is also in line with Bank Indonesia Regulation No. 11/19/PBI/2009 on Risk Management Certification for Management and Officers of Commercial Banks. The Board of Commissioners and Board of Directors are required to have a Risk Management Certificate issued by a Professional Certification Institute.

## Requirement for Risk Management Certification for the Board of Commissioners

Jika masa berlaku sertifikasi tersebut telah habis, Dewan Komisaris wajib melakukan program pemeliharaan (*refreshment*) secara berkala, minimal 1 (satu) kali dalam 4 (empat) tahun untuk tingkat 1 dan 2, atau 1 (satu) kali dalam 2 (dua) tahun untuk tingkat 3, 4, dan 5. OJK juga mengatur mengenai Dewan Komisaris Independen. ## Concurrent Positions of the Board of Directors as of December 31, 2021

### PENGELOLAAN BENTURAN KEPENTINGAN DIREKSI

Anggota Direksi dilarang mengambil tindakan yang dapat mengurangi aset atau mengurangi keuntungan bank umum syariah dan wajib mengungkapkan benturan kepentingan dalam setiap keputusan, apabila terjadi benturan kepentingan, Hal tersebut sesuai dengan pasal 61 Peraturan Bank Indonesia No. 11/33/PBI/2009 tentang Pelaksanaan *Good Corporate Governance* bagi Bank Umum Syariah dan Unit Usaha Syariah.

Dengan demikian, Direksi wajib untuk:

1. Mengutamakan kepentingan Bank dan tidak mengurangi keuangan Bank dalam hal terjadi benturan kepentingan.
2. Menghindari diri dari pengambilan keputusan dalam situasi dan kondisi adanya benturan kepentingan.
3. Melakukan pengungkapan hubungan kekeluargaan, hubungan keuangan, hubungan kepengurusan, hubungan kepemilikan dengan Anggota Komisaris lain dan/atau anggota Direksi dan/atau pemegang saham pengendali Bank dan/atau pihak lainnya dalam rangka bisnis Bank.
4. Melakukan pengungkapan dalam hal pengambilan keputusan tetap harus diambil pada kondisi adanya benturan kepentingan.

### PROGRAM PENGENALAN PERUSAHAAN BAGI DIREKSI BARU

Program orientasi berupa pengenalan perusahaan kepada Direksi baru dilakukan atas dasar beberapa pertimbangan, selain mandat regulasi. Pertama, mengingat anggota Direksi baru memiliki latar belakang beragam. Kedua, sebagai sarana saling mengenal antar anggota Direksi, yang sangat mungkin belum pernah bekerja dalam satu tim sebelumnya. Dengan demikian, program orientasi menjadi sangat penting untuk dilaksanakan dalam rangka menciptakan suatu tim kerja yang solid.

### MANAGEMENT OF CONFLICTS OF INTEREST FOR THE BOARD OF DIRECTORS

Members of the Board of Directors are prohibited from taking actions that can reduce assets or reduce profits of sharia commercial banks and are required to disclose conflicts of interest in every decision, in the event of a conflict of interest. This is in accordance with article 61 of Bank Indonesia Regulation No. 11/33/PBI/2009 on the Implementation of Good Corporate Governance for Sharia Commercial Banks and Sharia Business Units.

Therefore, the Board of Directors must always:

1. Prioritize the interests of the Bank and not reduce the Bank's finances in the event of a conflict of interest.
2. Refrain from making decisions in situations and conditions of conflict of interest.
3. Disclose family relationships, financial relationships, management relationships, and ownership relationships with fellow Commissioners and/or members of the Board of Directors and/or controlling shareholders of the Bank and/or other parties in the framework of the Bank's business.
4. Making disclosures in terms of decision making must still be made in a condition where there is a conflict of interest.

### ORIENTATATION PROGRAM FOR NEW DIRECTORS

The orientation program in the form of introducing the company to new Directors is carried out on the basis of several considerations, in addition to regulatory mandates. First, considering that the members of the Board of Directors have different backgrounds. Second, as a means of mutual exchange between members of the Board of Directors, who may not have worked in a team before. Thus, the orientation program becomes crucial in order to create a solid work team.

Berikut adalah cakupan prosedur Program Orientasi Bank Muamalat Indonesia:

1. Program orientasi mengenai Bank wajib diberikan kepada Anggota Direksi yang baru pertama kali menjabat di Bank.
2. Tanggung jawab pelaksanaan Program orientasi ada pada Direktur Utama. Jika Direksi Utama berhalangan maka tanggung jawab pelaksanaan program orientasi berada pada Komisaris Utama atau Direktur yang ada.
3. Materi yang diberikan pada Program orientasi meliputi hal-hal sebagai berikut:
  - a. Keterangan mengenai tugas dan tanggung jawab Dewan Komisaris dan Direksi berdasarkan hukum.
  - b. Penjelasan mengenai produk-produk jasa perbankan Bank.
  - c. Pelaksanaan prinsip-prinsip *Good Corporate Governance* oleh Bank.
  - d. Gambaran mengenai Bank berkaitan dengan tujuan, sifat, lingkup kegiatan, kinerja keuangan dan operasi, strategi, rencana usaha jangka pendek dan jangka panjang, posisi kompetitif, risiko dan berbagai masalah strategis lainnya.
  - e. Penjelasan yang berkaitan dengan kewenangan yang didelegasikan, audit internal dan eksternal, sistem dan kebijakan pengendalian internal
  - f. Penjelasan mengenai kewajiban, tugas, tanggung jawab dan hak-hak Dewan Pengawas Syariah, Dewan Komisaris dan Direksi.
  - g. *Team building* yang menyertakan seluruh anggota Direksi, baik yang baru menjabat maupun yang pernah menjabat sebelumnya
4. Program orientasi yang diberikan dapat berupa presentasi, pertemuan atau kunjungan ke fasilitas Bank, pengenalan dengan para karyawan senior dan para karyawan Bank serta program lainnya.

Sepanjang tahun 2021, Bank tidak melaksanakan program orientasi/pengenalan dikarenakan tidak terdapat perubahan struktur keanggotaan Direksi baru.

During 2021, the Bank did not carry out the orientation/introduction program because there were no changes in the membership structure of the Board of Directors.

## RISK MANAGEMENT CERTIFICATION

Competence and expertise in the field of risk management is a necessity in the bank's business, in line with the increasingly complex banking business activities resulting in bigger potential risks to be faced. Thus, it becomes crucial for Bank officials to have the certification

This is also in accordance with Bank Indonesia Regulation No. 11/19/PBI/2009 on Risk Management Certification for Management and Officers of Commercial Banks. The Board of Commissioners and Board of Directors are required to have a Risk Management Certificate that is issued by a Professional Certification Institute.

# Penilaian Dewan Komisaris dan Direksi

## Assessment of the Board of Commissioners and the Board of Directors

### PENILAIAN DEWAN KOMISARIS

#### Prosedur Penilaian

Proses penilaian Dewan Komisaris melalui mekanisme *self-assessment* diawali dengan penisian kerta kerja. Formulir tersebut berisi kriteria/indikator pelaksanaan tugas dan tanggung jawab sesuai ketentuan yang berlaku serta atas kompetensi kinerja selama satu semester/tahun untuk kemudian dilaporkan kepada Otoritas Jasa Keuangan.

Setelah itu, hasil penilaian tersebut dibawa ke RUPS Tahunan untuk disampaikan kepada Pemegang Saham untuk evaluasi. Pada penyerahan laporan, RUPS juga memberikan pelunasan dan pembebasan tanggung jawab sepenuhnya (*volledig acquit et de charge*) kepada Dewan Komisaris atas tindakan pengelolaan (pengawasan) yang dilakukan pada tahun buku yang berakhir pada akhir tahun.

Hasil evaluasi terhadap kinerja secara keseluruhan dan masing-masing anggota Dewan Komisaris secara individual menjadi pertimbangan dalam skema kompensasi dan pemberian insentif. Hasil evaluasi kinerja masing-masing anggota Dewan Komisaris secara individual menjadi salah satu dasar pertimbangan Pemegang Saham untuk memberhentikan dan/atau menunjuk kembali anggota Dewan Komisaris yang bersangkutan.

Hasil evaluasi kinerja Dewan Komisaris, baik sebagai Dewan Komisaris maupun individu merupakan sarana penilaian serta peningkatan efektivitas Dewan Komisaris.

#### Kriteria Penilaian

Kinerja Dewan Komisaris secara umum ditentukan berdasarkan tugas kewajiban yang tercantum dalam peraturan perundang-undangan yang berlaku dan Anggaran Dasar Perusahaan maupun amanat Pemegang Saham. Kriteria evaluasi disampaikan secara terbuka kepada Dewan Komisaris sejak pengangkatan pertamanya.

Kriteria *self-assessment* Dewan Komisaris terbagi menjadi 3 (tiga) aspek: *Governance Structure* (14 indikator), *Governance Process* (20 indikator) dan *Governance Outcome* (8 indikator).

### ASSESSMENT OF THE BOARD OF COMMISSIONERS

#### Assessment Procedure

The assessment process for the Board of Commissioners through the self-assessment mechanism begins with the completion of the work paper. The form contains criteria/indicators of the implementation of duties and responsibilities in accordance with applicable regulations as well as performance competencies for one semester/ year to be reported to the Financial Services Authority.

Subsequently, the assessment results are brought to the Annual GMS to be submitted to the Shareholders for evaluation. At the submission of the report, the GMS also granted full release and discharge (*volledig acquit et de charge*) to the Board of Commissioners for management (supervisory) actions carried out in the fiscal year that ended at the end of the year.

The results of the evaluation on the overall and individual performance of the Board of Commissioners are taken into account in the compensation and incentive schemes. The results of the individual performance evaluation of each member of the Board of Commissioners become one of the basis for the consideration of the Shareholders to dismiss and/or reappoint the relevant member of the Board of Commissioners.

The performance evaluation results on the Board of Commissioners, both as the Board of Commissioners and as individuals, are a means of assessing and increasing the effectiveness of the Board of Commissioners.

#### Assessment Criteria

The performance of the Board of Commissioners is generally determined based on the duties and obligations listed in the applicable laws and regulations and the Company's Articles of Association as well as the mandate of the Shareholders. The evaluation criteria are submitted transparently to the Board of Commissioners since their first appointment.

The Board of Commissioners' self-assessment criteria are divided into 3 (three) aspects: *Governance Structure* (14 indicators), *Governance Process* (20 indicators) and *Governance Outcome* (8 indicators).

### REMUNERASI

Bank Muamalat memiliki tata kelola remunerasi yang mengacu pada peraturan Otoritas Jasa Keuangan No. 59/POJK.03/2017 tentang Penerapan Tata Kelola dalam Pemberian Remunerasi bagi Bank Umum Syariah dan Unit Usaha Syariah yang kemudian diturunkan ke dalam Surat Keputusan No. 50/R/DIR-KPTS/XI/2018 tentang Tata Kelola Pemberian Remunerasi PT Bank Muamalat Indonesia Tbk yang ditandatangani bersama oleh Komisaris Utama dan Direktur Utama pada tanggal 12 November 2018.

### Kebijakan Remunerasi

Kebijakan remunerasi yang diimplementasikan oleh Bank bertujuan untuk mengatur proses dan pendekatan guna menentukan remunerasi bagi seluruh Direksi, Dewan Komisaris dan karyawan berdasarkan jenis pekerjaan, prestasi kerja individu, kontribusi kepada Bank, kewajaran dengan dengan *peer group* dalam industri Bank, serta *performance* dan kemampuan Bank. Hal ini juga tidak terlepas dari ketentuan dan perundang-undangan yang berlaku.

Bank mengkaji ulang remunerasi secara berkala dengan memperhatikan hasil analisis *market* dengan *peer group* industri Bank, kontribusi individual kepada Bank, *performance* serta kemampuan Bank. Termasuk di dalamnya, menerapkan peraturan perundangan yang ada, seperti upah minimum provinsi atau upah minimum kota/kabupaten.

### Cakupan Kebijakan dan Implementasinya

Bank menentukan cakupan kebijakan pemberian remunerasi dengan mempertimbangkan terciptanya manajemen risiko yang efektif, stabilitas keuangan, kecukupan dan penguatan permodalan, kebutuhan likuiditas dan potensi pendapatan Bank serta kesesuaian dengan prinsip syariah. Kebijakan tersebut berlaku pada seluruh unit bisnis pada kantor pusat, kantor wilayah dan kantor cabang yang berlokasi di luar negeri.

### REMUNERATION

Bank Muamalat has a established remuneration management that refers to the Financial Services Authority regulation No. 59/POJK.03/2017 on Implementation of Good Corporate Governance in Providing Remuneration for Sharia Commercial Banks and Sharia Business Units which was later derived into Decree No. 50/R/DIR-KPTS/XI/2018 on Governance for Remuneration of PT Bank Muamalat Indonesia Tbk, which was signed jointly by the President Commissioner and the President Director on November 12, 2018.

### Remuneration Policy

The remuneration policy implemented by the Bank aims to regulate the process and approach to determine remuneration for the Board of Directors, Board of Commissioners and employees based on the type of work, individual work achievement, contributions to the Bank, fairness with peer groups in the banking industry, as well as the Bank's performance and capabilities. This is also inseparable from the applicable laws and regulations.

The Bank regularly reviews the remuneration by taking into account the results of market analysis with the peer group of the Bank's industry, individual contributions to the Bank, as well as the Bank's performance and capabilities. This includes implementing existing laws and regulations, such as the provincial minimum wage or the city/regency minimum wage.

### Coverage of Policy and Its Implementation

The Bank determines the scope of the remuneration policy by taking into account the creation of effective risk management, financial stability, adequacy and strengthening of capital, liquidity needs, and income potential of the Bank, as well as compliance with sharia principles. This policy applies to all business units at the head office, regional offices, and branch offices located overseas.

Dalam memberikan remunerasi, Bank Muamalat Indonesia mengacu pada prinsip syariah dengan memenuhi persyaratan sebagai berikut:

- Pemberian remunerasi harus mempertimbangkan kewajaran dalam harga pasar di industri sejenis dan sesuai dengan kompetensi dan kinerja karyawan.
- Pemberian remunerasi pada awal karyawan bergabung harus disepakati dan tercantum dalam sebuah kontrak kerja yang menganut asas konsensus.
- Pemberian remunerasi harus didasari kesadaran bersama bahwa bekerja merupakan bagian dari mengejar ridha Allah SWT.
- Pemberian remunerasi harus mempertimbangkan beban kerja yang diberikan kepada karyawan atau al *ghunmu bil ghurmi*.

### Remunerasi Dikaitkan dengan Risiko

Dalam menentukan remunerasi kepada karyawannya, Bank Muamalat senantiasa mempertimbangkan potensi risiko yang akan timbul dengan tetap memperhatikan prinsip kehati-hatian. Bank telah menetapkan pihak-pihak yang menjadi *Material Risk Takers* (MRT) berdasarkan pertimbangan tertentu sesuai dengan potensi risiko yang timbul atas suatu jabatan yang dimiliki.

Dalam hal terjadi risiko akibat keputusan yang diambil, maka perusahaan berhak untuk menunda pembayaran atau tidak membayarkan remunerasi yang bersifat variabel yang belum dibayarkan kepada pihak yang telah ditetapkan sebagai MRT.

### Pengukuran Kinerja Terkait Remunerasi

Dalam menetapkan pemberian remunerasi, Bank memiliki mekanisme yang disebut dengan siklus *Performance Management System*. Mekanisme tersebut berisi penentuan metode pengukuran kinerja individu dan jenis risiko yaitu sesuai skala dan kompleksitas usaha Bank. Penilaian kinerja individu ditentukan melalui target atau *Most Important Goals* (MIG) yang telah ditentukan pada awal tahun serta peninjauan pencapaian pada akhir tahun.

Hasil dari penilaian tersebut akan dijadikan dasar dalam peninjauan remunerasi yang dilakukan secara berkala setiap tahun dengan memperhatikan kinerja individu karyawan, posisi upah terhadap struktur upah (*salary*) serta kinerja dan kemampuan Bank.

In providing remuneration, Bank Muamalat Indonesia refers to sharia principles by fulfilling the following requirements:

- Remuneration must consider fairness in market prices in similar industry and in accordance with employee competencies and performance.
- Remuneration at the beginning of joining employees must agreed and stated in a work contract adheres to the principle of consensus.
- Remuneration must be based on that shared awareness that work is part of pursuing the pleasure of Allah.
- Remuneration must consider the workload given to employees or al *ghunmu bil ghurmi*.

### Remuneration in Relations to Risk

In determining remuneration for its employees, Bank Muamalat always considers the potential risks that may arise while taking into account the prudence principle. The Bank has determined the parties to be *Material Risk Takers* (MRT) based on certain considerations in accordance with the potential risks that arise from certain positions.

In the event of a risk due to a decision taken, the Company then has the right to delay payment or not pay variable remuneration that is not yet paid to the party that has been designated as MRT.

### Performance Measurement in Relations to Remuneration

In determining remuneration, the Bank has a mechanism called the *Performance Management System* cycle. The mechanism contains the method determination to measure individual performance and types of risk, namely according to the scale and complexity of the Bank's business. The individual performance assessment is determined through targets or *Most Important Goals* (MIG) that have been determined at the beginning of the year as well as review of achievements at the end of the year.

The results of the assessment will be used in the remuneration review, which is conducted periodically every year, taking into account individual employee performance, wage position towards the wage structure, as well as performance and ability of the Bank.

## Penyesuaian Remunerasi Dikaitkan dengan Kinerja dan Risiko

Bank Muamalat mengacu pada prinsip kehati-hatian dalam memberikan remunerasi, baik untuk remunerasi yang bersifat tetap maupun yang bersifat variabel. Untuk remunerasi yang bersifat variabel bagi anggota Direksi, Dewan Komisaris, anggota Dewan Pengawas Syariah harus mendapatkan persetujuan Komite Nominasi dan Remunerasi.

Bagi karyawan, penetapan remunerasi yang bersifat variabel cukup dengan persetujuan Direksi. Bagi karyawan pada unit kerja pengawasan dilakukan sesuai dengan kinerja individu dengan tetap memperhatikan objektivitas dan independensi.

Salah satu penerapan manajemen risiko remunerasi adalah ketentuan pemberian remunerasi yang bersifat variabel kepada MRT:

- Pembayaran bertahap dalam jangka waktu minimal 3 (tiga) tahun sejak pembayaran pertama.
- Penangguhan pembayaran dapat ditentukan lebih panjang dari 3 (tiga) tahun sesuai dengan potensi dan jangka waktu risiko atau *time horizon of risk*.
- Bank berhak menunda pembayaran atau tidak membayarkan remunerasi yang bersifat variabel yang belum dibayarkan apabila terbukti melakukan tindakan yang merugikan Bank berdasarkan laporan Komite Pemantau Risiko.
- Bank menetapkan jenis tindakan yang merugikan Bank seperti *fraud*, indikasi konflik kepentingan dalam pengambilan keputusan bisnis dan berdampak kepada *Non-Performing Financing* Bank secara keseluruhan.
- Bank dapat menunda pembayaran yang ditangguhkan kepada MRT pada kondisi tertentu.

## Konsultan Terkait Remunerasi

Bank Muamalat menggunakan jasa konsultan Willis Tower Watson untuk mendapatkan data *market peer group*, yang didapat melalui survei yang diikuti oleh sebagian besar industri bank di Indonesia yang menjadi *market peer group*. Konsultan akan memberikan data statistik dari *market* yang ikut serta yang akan digunakan sebagai referensi peninjauan remunerasi bersifat tetap dan pemberian remunerasi bersifat variabel.

## Adjustment of Remuneration in Relations to Performance and Risk

Bank Muamalat refers to the prudence principle in providing remuneration, both fixed and variable remuneration. For variable remuneration for members of the Board of Directors, Board of Commissioners, members of the Sharia Supervisory Board must obtain the approval of the Nomination and Remuneration Committee.

For employees, the determination of variable remuneration with the approval of the Board of Directors is sufficient. For employees in work units, supervision is carried out according to individual performance while still paying attention to objectivity and independence.

One application of remuneration risk management is provisions on variable remuneration for Material Risk Taker (MRT):

- Payment in stages within a minimum period of 3 (three) years since the first payment.
- The deferment of payment can be determined to be longer than 3 (three) years according to the risk potential and period or time horizon of risk.
- The Bank has the right to defer payment or not pay variable remuneration that has not been paid if it has been proven to have taken an adverse action on the basis of the Bank's Risk Monitoring Committee report.
- The Bank determines the types of actions that are detrimental to the Bank such as fraud, indication of conflicts of interest in taking business decisions and impact on Non-Performing Bank Financing as a whole.
- The Bank can delay deferred payments to the MRT under certain conditions.

## Consultant in Relation to Remuneration

Bank Muamalat uses the consulting services of Willis Tower Watson to obtain market peer group data, which is obtained through surveys participated by most of the banking industry in Indonesia as the market peer group. The consultant will provide statistical data from the participating market, which will be used as a reference for reviewing fixed remuneration and the provision of variable remuneration.

Implementasi APU & PPT juga sangat membutuhkan perhatian khusus dan peran aktif dari Direksi dan Dewan Komisaris di samping penanganan oleh unit terkait karena dapat mempengaruhi tingkat pencapaian tujuan organisasi dalam penerapan Program APU dan PPT. Berpijak pada hal di atas, Bank selalu membuat analisis terhadap dampak sosial, ekonomi, dan lingkungan dari kegiatan usahanya. Upaya ini dilakukan untuk memahami dengan tepat kondisi lingkungan usaha dari sudut pandang pihak luar Bank. Dengan begitu, Bank dapat memberikan nilai tambah bagi seluruh pemangku kepentingan secara maksimal. Metode yang digunakan untuk memetakan kondisi tersebut dilakukan melalui uji tuntas atau *due diligence* yang mengacu pada *best practice* yang ada.

### Methods and Scope of *Due Diligence* on the Social, Economic, and Environmental Impact of the Bank's Activities

In order to deliver business operations, BMI's priority is to add value to stakeholders. Therefore, banks strive to minimize the possible negative effects of all bank operations.

Based on the above, the Bank always makes an analysis of the social, economic, and environmental impact of its business activities. This effort is made to understand precisely the environment of the business from outside of the Bank's point of view. In this way, the Bank can maximize the added value to all stakeholders. The method used to map the condition is through due diligence or due diligence as a reference to best practice.

Due diligence is a comprehensive process for assessing the positive and negative effects of company decisions and activities that can affect environmental, economical, and social aspects. Given the Bank's broad operating area, stakeholders have varying expectations in each region. Therefore, this process does much to help the Bank understand the situation.

Through survey methods, the Bank identified various stakeholder groups that had a significant impact on the Bank's business activities, such as shareholders, communities, employees, labor unions, the government, regulators and legislators, customers, partners, the mass media, and security forces. In using these surveys, the Bank achieves optimal results.

Identifikasi tersebut juga dilengkapi dengan *stakeholders* mapping, sehingga Bank mampu memetakan dengan jelas pihak yang paling berkepentingan dengan Bank secara timbal-balik, hubungan apa yang dijalin, materi yang perlu dikomunikasikan, serta bagaimana memaksimalkan media komunikasi. Dengan demikian, hubungan yang efektif antara Bank dengan para pemangku kepentingan dapat tercipta yang pada akhirnya mampu mencapai target yang diharapkan.

## Informasi tentang Isu-isu Penting di Bidang Sosial, Ekonomi dan Lingkungan terkait Dampak Kegiatan Perusahaan

BMI menggunakan hasil Survei Nasional Literasi Keuangan (SNLIK) Otoritas Jasa Keuangan (OJK) sebagai acuan penting dalam menentukan isu terkait dengan kegiatan Bank. Survei terakhir dilakukan untuk tahun 2019, yang dipublikasikan OJK pada Desember 2020. Hasilnya menyatakan bahwa indeks literasi keuangan mencapai 38,03% dan indeks inklusi keuangan 76,19%. Angka tersebut meningkat dibanding hasil survei 2016, dengan capaian masing-masing sebesar 29,7% dan 67,8%.

Sejalan dengan program pemerintah, literasi keuangan ini menjadi isu penting bagi BMI. Karena itu, meskipun persentase masyarakat yang memahami dan memiliki akses terhadap layanan keuangan terus meningkat, akan tetapi upaya peningkatan literasi masyarakat harus selalu dilanjutkan.

Isu lain di bidang sosial yang juga menjadi perhatian Bank mencakup kegiatan ketahanan ekonomi masyarakat, terutama masyarakat menengah ke bawah. Berdasarkan kondisi tersebut, Bank Muamalat berusaha menciptakan produk-produk yang dapat dijangkau oleh masyarakat luas.

## Information on Important Socio-Economic and Environmental Issues Related to the Impact of Company Activities

The results of the Financial Services Authority National Survey on Financial Literacy (SNLIK) are a key reference used by BMI in setting important issues related to the Bank's activities. The last poll was conducted in 2019, and the results were published by OJK in December 2020. The survey showed that the financial literacy index has reached 38.03%, while the financial inclusion index is at 76.19%. Both figures, respectively, increased from 29.7% and 67.8% in 2016.

In accordance with government programs, financial literacy has become an important issue for BMI. Therefore, despite the increasing percentage of people who understand and have access to financial services, efforts to improve public literacy must always continue.

The bank pays close attention to issues in the social sector, including how to sustain the public economy, especially for the middle and lower classes. With this as a reference, Bank Muamalat is seeking to create products that the wider community will find not only affordable but also easy to access.

# Tanggung Jawab Sosial di Bidang Hak Asasi Manusia

## Social Responsibility in the Field of Human Rights

### Komitmen dan Kebijakan

BMI menjadikan prinsip Hak Asasi Manusia (HAM) sebagai pedoman dasar dalam operasional perusahaan, yang berlaku baik bagi internal Bank maupun pihak luar. Bank menjamin terpenuhinya hak dasar tersebut, termasuk juga bagi seluruh nasabah dan pihak terkait lainnya.

Pelaksanaan komitmen dan kebijakan tersebut mengacu pada Undang-Undang No. 39 tahun 1999 tentang Hak Asasi Manusia. Prinsip-prinsip yang tertuang dalam undang-undang tersebut adalah:

- Hak untuk Hidup
- Hak Berkeluarga dan Melanjutkan Keturunan
- Hak Mengembangkan Diri
- Hak Memperoleh Keadilan
- Hak atas Kebebasan Pribadi
- Hak atas Rasa Aman
- Hak atas Kesejahteraan
- Hak Turut Serta dalam Pemerintahan
- Hak Wanita/Kesamaan Gender
- Hak Anak

Penerapan kebijakan dan komitmen HAM tersebut didasari pada pemahaman Bank mengenai HAM, yaitu sebuah konsep hukum dan normatif yang menyatakan bahwa manusia memiliki hak yang melekat pada dirinya karena ia adalah seorang manusia. Hak asasi manusia berlaku kapan pun, di mana pun, dan kepada siapa pun, sehingga sifatnya universal. HAM pada prinsipnya tidak dapat dicabut dan juga tidak dapat dibagi-bagi.

Mengacu pada prinsip tersebut, Bank memberikan kesempatan yang sama bagi seluruh karyawan untuk berkembang. Bank juga tidak mendukung pembiayaan nasabah korporasi yang diindikasikan melanggar HAM, seperti mempekerjakan anak di bawah umur.

### Rumusan Lingkup Tanggung Jawab

Meskipun aktivitas BMI tidak bersinggungan secara langsung dengan isu-isu HAM berat, Bank merumuskan tanggung jawab CSR di bidang HAM mengacu pada isu-isu HAM yang relevan dan berkaitan langsung dengan aktivitas perusahaan. Isu-isu HAM yang relevan dan berkaitan langsung dengan Bank, antara lain terkait dengan bidang ketenagakerjaan dan pelayanan nasabah.

### Commitment and Policy

BMI follows the principle of human rights (HAM) a guiding principle in company operations, which applies to both the internal Bank and external parties. The Bank ensures that these fundamental rights are respected by all clients and linked parties.

Human Rights Law No. 39 of 1999 governs the implementation of these commitments and policies. The following are the legal principles:

- The Right to live
- Family and Continuing Descendants' Rights
- The Right to Self-development
- The Right to Justice
- The Right to Personal Freedom
- The Right to Security
- The Right to Welfare
- The Right to Participate in Government
- Women's Rights/Gender Equality
- The Rights of Children

The Bank's policy and commitment on human rights is based on the understanding that human rights are a legal and normative concept underlying that, as human beings, everybody has inherent rights. Human rights apply anytime, anywhere, and to anyone, making it a universal principle. In principle, human rights are not revocable, nor can they be classified in any thinkable manner.

In accordance with this concept, the Bank provides equitable development opportunities for all employees. The Bank also refuses to lend to companies that are suspected of violating human rights, such as employing underage workers.

### Formulation of the Scope of Responsibility

Despite the fact that Bank Muamalat's entire business operations are not directly exposed to serious human rights issues, the Bank formulates its CSR responsibilities by always referring to the most relevant issues that affect its operations. The direct and most relevant human rights issues related to the bank, among others, are in the fields of manpower and customer service.

Dalam kaitannya dengan hal tersebut, Bank menjunjung kesamaan hak untuk semua karyawan, termasuk tidak memperkerjakan pekerja di bawah umur (usia kerja). Selain itu, Bank juga menerapkan kebijakan berupa pengecekan pembiayaan nasabah korporasi melalui penilaian menyeluruh sebelum disetujui dan disalurkan.

Bank memandang bahwa pelanggaran terhadap ketentuan HAM tetap memberikan peluang risiko, baik bagi Bank maupun para pemangku kepentingan, kendati aktivitas Bank tidak berkaitan erat dengan isu-isu HAM berat. Risiko yang dihadapi, antara lain terkait dengan penegakan hukum, baik perdata, pidana maupun hubungan industrial. Potensi risiko lainnya adalah kerugian material dan non-material yang terkait dengan citra Bank.

### Perencanaan dan Realisasi Kegiatan

Menjunjung tinggi HAM menjadi sebuah keharusan bagi BMI, yang harus selalu diupayakan. Bank juga berkomitmen untuk dapat memenuhi berbagai ketentuan terkait HAM, baik yang berlaku bagi karyawan maupun nasabah. Untuk mewujudkan hal-hal tersebut, Bank telah menyusun perencanaan kegiatan CSR bidang HAM, antara lain berkenaan dengan karyawan yang diuraikan dalam tabel di bawah ini:

In relation to the above, the Bank upholds equal rights for all employees. For instance, the Bank never hires underage workers. The Bank also applies a policy to check corporate customer financing through a comprehensive assessment before it is approved and disbursed.

Even if the Bank's activities are not directly tied to serious human rights issues, the Bank believes that violations of human rights obligations continue to pose a danger to the Bank and its stakeholders. The risks likely faced by the Bank and its stakeholders related to human rights violations are those related to law enforcement, whether civil, criminal, or industrial relations. Further, other risks the Bank may be exposed to are material and non-material reputation risks.

### Planning and Realization Activities

Bank Muamalat Indonesia always upholds human rights and is committed to complying with diverse human rights-related regulatory stipulations, which apply to both employees and customers. To fulfil this commitment, the Bank has compiled a plan for CSR activities in the human rights sector, including employee-related activities, as shown in the table below:

# Tanggung Jawab Sosial di Bidang Lingkungan Hidup

## Social Responsibility in the Environmental Field

### Komitmen dan Kebijakan

BMI memberi perhatian yang tinggi terhadap tanggung jawab sosial di bidang lingkungan hidup yang diwujudkan melalui komitmen dan kebijakan Bank. Kebijakan internal misalnya, tidak mendukung pembiayaan nasabah korporasi yang berpotensi merusak lingkungan, sehingga Bank tidak menyalurkan pembiayaan kepada nasabah dengan profil tersebut. Hal ini selaras dengan Deklarasi Rio 1992, Konferensi Tingkat Tinggi Perserikatan Bangsa Bangsa (PBB) untuk Lingkungan dan Pembangunan.

Sebagai upaya untuk mendeteksi nasabah korporasi yang memiliki kemungkinan merusak lingkungan, Bank mengharuskan calon nasabah mengisi formulir pembiayaan berkelanjutan yang bertujuan untuk melakukan penilaian atas risiko lingkungan, sosial dan tata kelola (LST) nasabah untuk pembiayaan segmen korporat dan komersial. Pengisian formulir tersebut memiliki petunjuk teknis sebagai pedoman dalam *assessment* risiko. Sebelumnya, ketentuan *assessment* risiko LST tercantum dalam Surat Edaran Direksi yang dikhususkan untuk pembiayaan sektor industri kelapa sawit.

Karena itu, dalam memberikan dukungan pendanaan kegiatan investasi para nasabah, terutama nasabah korporasi, Perseroan mensyaratkan pemenuhan seluruh aturan perundangan dibidang lingkungan, mencakup:

1. Kepemilikan izin Analisis Mengenai Dampak Lingkungan (AMDAL) sebagai salah satu aspek legalitas usaha debitur.
2. Perolehan kinerja pada Program Penilaian Peringkat Kinerja Perusahaan terkait lingkungan hidup (PROPER) dari Kementerian Lingkungan Hidup dan Kehutanan (KLHK).

### Commitment and Policy

BMI places high importance on social responsibility in the field of the environment, reflected in the Bank's commitment and policies. Internal policies, for example, refrain from providing financial support to corporate customers with an identified potential to damage the environment; As a result, the Bank does not lend to these types of businesses. This is in accordance with the United Nations (UN) Summit on Environment and Development in 1992, which resulted in the Rio Declaration.

The Bank detects corporate customers who fall under this category by making it mandatory for any prospective debtor to complete a sustainable financing form, which has the purpose of carrying out a risk assessment of environmental, social, and governance (ESG) customers for the financing segment, both corporate and commercial (wholesale banking). The form comes with technical instructions as a guideline in assessing those risks. The provisions for ESG risk assessment were previously established in a Board of Directors' Circular Letter that was intended for financing the palm oil business sector.

In providing funding support for the investment activities of customers, especially corporate customers, the bank requires compliance with all laws and regulations in the environmental sector, including:

1. Possession of an Environmental Impact Analysis (AMDAL) permit as one of the legal aspects of the debtor's business.
2. Achievement of performance in the Environmental-related Company Performance Rating Program (PROPER) from the Ministry of Environment and Forestry (KLHK).

3. Debitur bidang usaha perkebunan, seperti perkebunan kelapa sawit wajib memiliki izin usaha, misalnya Izin Usaha Perkebunan (IUP), Izin Usaha Perkebunan Budidaya (IUP-B), Izin Usaha Perkebunan Pengolahan (IUP-P), Surat Pendaftaran Usaha Perkebunan (SPUP), Sertifikat *Indonesian Sustainable Palm Oil* (ISPO) dan Sertifikat *Roundtable on Sustainable Palm Oil* (RSPO), apabila berorientasi ekspor.
4. Dan persyaratan sejenis lainnya.

## Dampak Kegiatan Perusahaan terhadap Lingkungan

Bank telah memetakan dampak terhadap lingkungan dari kegiatan bisnis Bank ialah risiko pembiayaan terkait lingkungan, sosial, tata kelola Bank (LST) bagi pembiayaan segmen korporat dan komersial, terlebih untuk pembiayaan sektor kelapa sawit dan sektor lain yang mendapatkan sentimen negatif berkenaan dengan lingkungan. Sebagai upaya mengatasi hal tersebut, BMI memiliki kebijakan untuk memasukkan Amdal dalam kebijakan umum pembiayaan, sehingga mampu meminimalkan isu lingkungan.

Selain dari aktivitas bisnis, kegiatan operasional Bank juga memberikan dampak terhadap lingkungan. Beberapa kegiatan operasional yang berpotensi memberikan dampak negatif bagi lingkungan antara lain pemanfaatan energi listrik, penggunaan air dan bahan bakar, yang jika dilakukan secara berlebihan, maka secara tidak langsung akan memberikan dampak negatif bagi lingkungan. Selain itu, operasional Bank juga menghasilkan limbah dan emisi meskipun dalam jumlah yang relatif terbatas.

## Perencanaan Kegiatan

Tidak ada kegiatan CSR terkait lingkungan pada tahun 2021. Hal tersebut dikarenakan pada tahun 2021, Bank memiliki fokus pada kegiatan CSR yang ditujukan kepada masyarakat Indonesia yang terdampak pandemi COVID-19 dan korban bencana alam.

## Pelaksanaan Kegiatan dan Dampak Kuantitatif

1. **Sistem Pengelolaan Limbah**  
BMI mengimplementasikan sejumlah upaya terkait dengan pengelolaan limbah akibat dari kegiatan operasional perusahaan, yang mencakup:
  - a. Penggunaan sistem *Sewage Treatment Plant* di gedung Muamalat Tower dalam pengolahan limbah cair.
  - b. Agar tidak bercampur dengan sampah operasional harian, Bank bekerja sama dengan pihak ketiga untuk pengangkutan sampah limbah Bahan Berbahaya dan Beracun (B3) (oli, tabung freon, dan lampu) sisa operasional untuk dibawa ke tempat pembuangan akhir (TPA) khusus limbah B3.

3. Plantation business debtors, such as oil palm plantations, must have a business license, such as a Plantation Business Permit (IUP), Cultivation Plantation Business Permit (IUP-B), Plantation Processing Business Permit (IUP-P), Plantation Business Registration Letter (SPUP), Indonesian Sustainable Palm Oil (ISPO) Certificate, and a Roundtable on Sustainable Palm Oil (RSPO) Certificate if export-oriented.
4. And other similar requirements.

## The Impact of Company Operations on the Environment

The Bank has mapped the environmental impact of its business activities, specifically financing risks related to environmental, social and governance (ESG) in the corporate and commercial segments, especially in the palm oil sector and other sectors that are rather negatively viewed from an environmental perspective. To overcome this, the Bank has a policy to include an analysis of environmental impacts (Amdal) in its general financing policy to minimize environmental issues.

Apart from economic operations, the Bank's operational activities have an impact on the environment. Some operations that have the potential to cause negative impacts on the environment include electricity, water, and fuel consumption. Excessive use of energy will have indirect impacts on the environment. The Bank's operations produce waste and emissions, although at a relatively low level.

## Activity Planning

In 2021, there were no CSR initiatives relating to the environment. This is because in 2021, the Bank focused its CSR activities on the Indonesian community impacted by the COVID-19 pandemic, and natural disaster victims.

## Implementation of Activities and Quantitative Impacts

1. **Waste Management System**  
BMI has made following efforts to manage waste generated from the company's operational activities:
  - a. Treating wastewater using the Sewage Treatment Plant System in the Muamalat Tower building.
  - b. Working with a third party to transport Toxic and Hazardous (B3) waste (oil, freon tubes, and lamps) from areas of operations to a special landfill for B3 waste to keep this dangerous material from being added to daily operational waste.

- c. Melakukan kerja sama dengan PD PAL Jaya untuk pembuangan kelebihan sisa limbah cair yang tidak diolah kembali sehingga tidak dibuang ke saluran kota.

Sepanjang tahun 2021, upaya pengelolaan limbah pada poin a di atas memberikan efek efisiensi biaya penggunaan PDAM pada gedung operasional yang dimanfaatkan untuk *flushing toilet*, menyiram tanaman, dan air kolam pancuran namun tidak bisa diukur kuantitas penggunaan air limbah tersebut. Sementara untuk poin b dan c sifatnya adalah pembuangan limbah ke TPA melalui institusi resmi sesuai ketentuan pemerintah agar tidak mencemari lingkungan.

## 2. Penurunan Penggunaan Energi Listrik

Pada tahun 2021, pembatasan sosial masih berlangsung akibat pandemi COVID-19. Hal tersebut juga berdampak pada pembatasan karyawan yang bekerja dari kantor atau *Work from Office* (WFO), sehingga pemakaian listrik di area kerja juga berkurang.

Dari kegiatan tersebut, sepanjang tahun 2021, Bank mampu menurunkan penggunaan energi listrik di kantor pusat Bank Muamalat Indonesia menjadi 4.266.360 kwh dari 4.614.520 kWh pada 2020, atau sebesar 8%.

- c. Working with PD PAL Jaya for the disposal of unprocessed excess sewage to prevent it from being disposed of in the city's drainage system.

Throughout 2021, waste management in point a above had an impact on the cost efficiency of using the PDAM in the operational building used for flushing toilets, watering plants, and showering pool water, but not as measured in the quantity of use of the wastewater. Meanwhile, points b and c are transported to the landfill through official institutions according to government regulations so as not to pollute the environment.

## 2. Reducing Power Consumption

Throughout 2021, social restrictions were still in place due to the COVID-19 pandemic. This influenced the restrictions on employees who work in the office or work from office (WFO), resulting in lower electricity consumption in the workplace.

From these activities, the Bank was able to cut the use of electricity at the Bank Muamalat Indonesia main office to 4,266,360 kwh from 4,614,520 kwh in 2021, or a decrease of 8%.

## Responsibility towards Social and Community Development

### Kebijakan dan Komitmen

Bank menyadari sepenuhnya bahwa keberhasilan dalam menjalankan usaha tidak luput dari dukungan masyarakat di sekitar lingkungan unit-unit usaha Bank. Oleh karena itu, Bank memberikan perhatian kepada seluruh elemen masyarakat, yang antara lain diwujudkan melalui pelaksanaan CSR di bidang pengembangan sosial dan kemasyarakatan.

Penyaluran CSR di bidang sosial dan kemasyarakatan dikelompokkan menjadi 2 (dua) jenis penyaluran, yakni:

#### A. Golongan 8 Ashnaf

Kegiatan untuk ashnaf menggunakan dana zakat. Mereka yang termasuk golongan ashnaf adalah:

1. Fakir (orang yang tidak mampu menutupi separuh kebutuhannya);
2. Miskin (orang yang baru bisa memenuhi separuh atau lebih kebutuhannya);

#### B. Bukan Golongan 8 Ashnaf

Masyarakat di luar golongan ashnaf. Kegiatan golongan ini biasanya menggunakan dana infak dan sedekah.

Selain melalui program CSR di bidang pengembangan sosial dan kemasyarakatan, perusahaan afiliasi Bank, yakni Baitulmaal Muamalat juga menyalurkan dana zakat, infak dan sedekah.

### Risiko Sosial yang Dikelola

Beberapa bentuk bantuan, antara lain berupa donasi pendidikan, donasi pembangunan/perbaikan sarana dan prasarana sosial dan sebagainya.

### Policy and Commitment

The Bank understands that business success is inextricably linked to the support of the community surrounding the Bank's business units. As a result, the Bank pays attention to all aspects of society, as evidenced by the implementation of CSR in the field of social and community development.

The distribution of CSR in the social and community sector is classified into two (2) types:

#### A. Group 8 Ashnaf

Zakat funds are used for Ashnaf activities. The Ashnaf people are as follows:

1. The poor (those who are unable to meet half of their basic needs);
2. Impoverished (people who can only meet half or more of their basic needs);
3. Zakat Amil (zakat manager);
4. Mualaf (individuals who have recently converted to Islam);
5. Slaves sahaya (slaves);
6. Al-gharim (indebted people);
7. Fisabilillah (those who fight for religion); and
8. Ibn Sabil (travelers who cannot return to their home country).

#### B. Non-8 Ashnaf Group

People who are not part of the Ashnaf group. This group's activities are typically funded by infaq and alms.

Baitulmaal Muamalat, the Bank's affiliated company, also distributes zakat, infaq, and alms funds in addition to CSR programs in the field of social and community development.

### Managed Social Risk

Risks and social issues that are relevant and managed by the Bank in relation to the community are those of a donation nature, which are generally required by the community. Donations are often needed for education, construction/repair of social facilities and infrastructure, and other general donations.

Sedangkan risiko sosial yang dikelola, antara lain kemiskinan, ketimpangan ekonomi dan sosial serta akses terhadap pendidikan.

Suatu audit melibatkan pelaksanaan prosedur untuk memperoleh bukti audit tentang jumlah-jumlah dan pengungkapan dalam laporan keuangan. Prosedur yang dipilih bergantung pada pertimbangan auditor, termasuk penilaian atas risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan atau kesalahan. Dalam melakukan penilaian risiko tersebut, auditor mempertimbangkan pengendalian internal yang relevan dengan penyusunan dan penyajian wajar laporan keuangan entitas untuk merancang prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal entitas. Suatu audit juga mencakup pengevaluasian atas ketepatan kebijakan akuntansi yang digunakan dan kewajaran estimasi akuntansi yang dibuat oleh manajemen, serta pengevaluasian atas penyajian laporan keuangan secara keseluruhan.

Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

*An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.*

*We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.*

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****c. Allowance for Impairment Losses on Earning and Non-Earning Assets (continued)**

The Bank assesses whether there is any objective evidence that a financial asset is impaired on each date of statement of financial position.

Financial assets are impaired when an objective evidence indicates that a loss event has occurred after the initial recognition of the asset and that the loss event has an impact on the future cash flows of the financial asset that can be estimated reliably.

The criteria used by the Bank to determine objective evidence of impairment are as follows:

- (1) significant financial difficulty of the issuer or obligor;
- (2) any breach of contract, such as a default or delinquency in margin or principal payments;
- (3) the lender, for economic or legal reasons relating to the debtor's financial difficulty, grants the debtor a concession that the lender would not otherwise consider;
- (4) it becomes probable that the debtor will enter into bankruptcy or other financial reorganization;
- (5) the disappearance of an active market of financial assets due to financial difficulties; or
- (6) observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified individually in the portfolio, including:
  - a. adverse changes in the payment status of debtors in the portfolio; and
  - b. national or local economic conditions that correlate with breach of contract of the assets in the portfolio.

The estimated period between the occurrence of an event and loss identification is determined by the management for each identified portfolio. In general, the period varies from 3 (three) months to 12 (twelve) months, in exceptional cases, longer periods are necessary.

**2. IKHTISAR KEBIJAKAN AKUNTANSI  
(Lanjutan)****c. Cadangan Kerugian Penurunan Nilai Aset Produktif dan Aset Non-Produktif (lanjutan)**

Bank pertama kali menentukan apakah terdapat bukti objektif penurunan nilai secara individual atas aset keuangan yang signifikan, dan secara individual atau kolektif untuk aset keuangan yang tidak signifikan secara individual.

Jika Bank menentukan tidak terdapat bukti objektif mengenai penurunan nilai atas aset keuangan yang dinilai secara individual, terlepas aset keuangan tersebut signifikan atau tidak, maka Bank memasukkan aset tersebut ke dalam kelompok aset keuangan yang memiliki karakteristik risiko pembiayaan yang serupa dan menilai penurunan nilai kelompok tersebut secara kolektif. Aset keuangan yang penurunan nilainya dilakukan secara individual, dan untuk itu kerugian penurunan nilai telah diakui atau tetap diakui, tidak termasuk dalam penilaian penurunan nilai secara kolektif.

Bank menetapkan piutang *murabahah* yang harus dievaluasi penurunan nilainya secara individual, jika memenuhi salah satu kriteria di bawah ini:

1. Piutang *murabahah* yang secara individual memiliki nilai signifikan dan memiliki bukti objektif penurunan nilai;
2. Piutang *murabahah* yang direstrukturisasi yang secara individual memiliki nilai signifikan.

Berdasarkan kriteria di atas, Bank melakukan penilaian secara individual untuk piutang *murabahah* dengan plafond lebih besar atau sama dengan Rp25.000.000 dengan kolektibilitas kurang lancar, diragukan dan macet pada tanggal 31 Desember 2021 dan 2020.

Bank menetapkan piutang *murabahah* yang harus dievaluasi penurunan nilainya secara kolektif, jika memenuhi salah satu kriteria di bawah ini:

1. Piutang *murabahah* yang secara individual memiliki nilai signifikan namun tidak memiliki bukti objektif penurunan nilai;
2. Piutang *murabahah* yang secara individual memiliki nilai tidak signifikan;
3. Piutang *murabahah* yang direstrukturisasi yang secara individual memiliki nilai tidak signifikan.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****c. Allowance for Impairment Losses on Earning and Non-Earning Assets (continued)**

The Bank first determines whether there is an objective evidence of impairment on financial assets that are individually significant and individually or collectively on financial assets that are not individually significant.

If the Bank determines that there is no objective evidence of impairment for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar financing risk characteristics and collectively assesses them for impairment. Financial assets that are individually assessed for impairment, and for which an impairment loss is or continues to be recognized, are excluded in the collective assessment of impairment.

The Bank determines *murabahah* receivables to be evaluated for impairment through individual evaluation if one of the following criteria exists:

1. *Murabahah* receivables which individually have significant value with objective evidence of impairment;
2. Restructured *murabahah* receivables which individually have significant value.

Based on the above criteria, the Bank performs individual assessment for *murabahah* receivables with limit greater than or equal to Rp25,000,000 with collectibility classification of substandard, doubtful and loss as of December 31, 2021 and 2020.

The Bank determines *murabahah* receivables to be evaluated for impairment through collective evaluation if one of the following criteria exists:

1. *Murabahah* receivables which individually have significant value but there is no objective evidence of impairment;
2. *Murabahah* receivables which individually have non significant value;
3. Restructured *murabahah* receivables which individually have non significant value.

**2. IKHTISAR KEBIJAKAN AKUNTANSI  
(Lanjutan)****c. Cadangan Kerugian Penurunan Nilai Aset Produktif dan Aset Non-Produktif (lanjutan)**

Perhitungan cadangan kerugian penurunan nilai atas aset keuangan yang dinilai secara kolektif dikelompokkan berdasarkan karakteristik risiko piutang yang sama dengan mempertimbangkan segmentasi piutang berdasarkan pengalaman kerugian masa lalu (*probability of default*).

Bank menggunakan metode *net flow rate* dan *migration analysis* yang merupakan suatu metode analisis statistik, untuk menilai cadangan kerugian penurunan nilai atas piutang yang diberikan secara kolektif. Bank menggunakan data historis minimal 3 (tiga) tahun dalam menghitung *Probability of Default* (PD) dan *Loss of Given Default* (LGD).

Bank menggunakan nilai wajar agunan sebagai dasar arus kas masa datang apabila memenuhi salah satu kondisi berikut:

1. Piutang dan pembiayaan bersifat *collateral dependent*, yaitu jika pelunasan pembiayaan hanya bersumber dari agunan;
2. Pengambilalihan agunan kemungkinan besar terjadi dan didukung dengan perjanjian legal pengikatan agunan.

Kerugian penurunan nilai atas aset keuangan yang dicatat pada biaya perolehan diamortisasi diukur sebesar selisih antara nilai tercatat aset keuangan dengan nilai kini estimasi arus kas masa datang yang didiskonto menggunakan tingkat margin efektif awal dari aset keuangan tersebut.

Kerugian yang terjadi diakui pada laporan laba rugi dan penghasilan komprehensif lain dan dicatat pada akun cadangan kerugian penurunan nilai sebagai pengurang terhadap aset keuangan yang dicatat pada biaya perolehan diamortisasi.

Penerimaan kembali atas aset keuangan yang diberikan yang telah dihapusbukukan, pada tahun berjalan dikreditkan dengan menyesuaikan akun cadangan kerugian penurunan nilai. Penerimaan kembali atas pinjaman yang diberikan yang telah dihapusbukukan pada tahun-tahun sebelumnya dicatat sebagai pendapatan operasional selain margin.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****c. Allowance for Impairment Losses on Earning and Non-Earning Assets (continued)**

The calculation of allowance for impairment losses on financial assets which are evaluated collectively is grouped based on similar receivable risk characteristics and by taking into account the receivable segmentation on the basis of historical loss experience (*probability of default*).

The Bank uses *net flow rate* method and *migration analysis* which is a statistical analysis method to assess allowance for impairment losses on collective receivables. The Bank uses at least 3 (three) years historical data to compute the *Probability of Default* (PD) and *Loss of Given Default* (LGD).

The Bank uses the fair value of collateral as the basis for future cash flow if one of the following conditions is met:

1. Claim and account receivables are *collateral dependent*, i.e. if the source of loans repayment is only from the collateral;
2. Takeover of collateral is most likely to occur and be supported by legally binding collateral agreement.

Impairment losses on financial assets carried at amortized cost are measured as the difference between the carrying amount of the financial assets and present value of estimated future cash flows discounted at the financial assets original effective margin rate.

Losses are recognized in statement of profit or loss and other comprehensive income and reflected in an allowance for impairment losses account against financial assets carried at amortized cost.

The recoveries of written-off financial assets in the current year are credited by adjusting the allowance for impairment losses accounts. Recoveries of written-off loans from previous years are recorded as operational income other than margin income.

(Lanjutan)****p. Aset Tetap (lanjutan)**

Kenaikan nilai tercatat yang timbul dari revaluasi aset tetap dikreditkan pada "surplus revaluasi atas aset tetap" sebagai bagian dari penghasilan komprehensif lainnya. Penurunan yang menghapus nilai kenaikan yang sebelumnya atas aset yang sama dibebankan terhadap "surplus revaluasi atas aset tetap" sebagai bagian dari penghasilan komprehensif; penurunan lainnya dibebankan pada laporan laba rugi dan penghasilan komprehensif lain.

Penyajian revaluasi aset tetap dilakukan melalui akumulasi penyusutan pada tanggal revaluasi dieliminasi terhadap nilai tercatat bruto aset dan nettoanya disajikan kembali sebesar jumlah revaluasi aset. Nilai akumulasi depresiasi dan harga perolehan dinaikkan secara proporsional sehingga nilai bersih aset sama dengan nilai revaluasi.

Setiap periode pelaporan, selisih antara penyusutan berdasarkan nilai revaluasi aset yang diakui di dalam laporan laba rugi dan penghasilan komprehensif lain dan penyusutan harga perolehan awal aset ditransfer dari "surplus revaluasi atas aset tetap" ke dalam "saldo laba".

*Presentation of revaluation of premises and equipment through accumulated depreciation at the date of revaluation is eliminated against the gross carrying value of premises and equipment, and the net is restated at the amount of revaluation of premises and equipment. The value of accumulated depreciation and acquisition price is increased proportionally so that the net value of premises and equipment is equal to the revaluation value.*

*In each reporting period, the difference between depreciation based on the revalued carrying amount of the asset charged to statement of profit or loss and other comprehensive income and depreciation based on the asset's original cost is transferred from "revaluation surplus on premises and equipment" to "retained earnings".*

*The revaluation of premises and equipment is carried out every year or has periodic regularity to ensure that the carrying amount is not different in material respect from the amount determined at fair value at the end of the reporting period, and in the event that premises and equipment is revaluated, all premises and equipment in the same class are revaluated.*

*Premises and equipment acquired in exchange for a non-monetary asset or for a combination of monetary and non-monetary assets are measured at fair values, unless:*

Aset sewa pembiayaan disajikan di laporan posisi keuangan tergabung dalam aset tetap. Penyusutan aset sewa pembiayaan sesuai dengan tarif penyusutan aset tetap.

Pembayaran sewa harus dipisahkan antara bagian yang merupakan beban keuangan dan bagian yang merupakan pengurangan dari liabilitas sewa sehingga mencapai suatu tingkat bunga yang konstan (tetap) atas saldo liabilitas. *Rental* kontingen dibebankan pada periode terjadinya.

Aset pembiayaan dan Aset Hak Guna Sewa disusutkan berdasarkan taksiran masa manfaat ekonomis yang sama dengan aset yang dimiliki sendiri atau disusutkan selama jangka waktu yang lebih pendek antara periode masa sewa dan umur manfaatnya.

Masa manfaat ekonomis, nilai residu dan metode penyusutan direviu setiap akhir tahun dan pengaruh dari setiap perubahan estimasi tersebut berlaku prospektif.

Jika jumlah yang dapat diperoleh kembali dari aset non-keuangan (unit penghasil kas) kurang dari nilai tercatatnya, nilai tercatat aset (unit penghasil kas) dikurangi menjadi sebesar nilai yang dapat diperoleh kembali dan rugi penurunan nilai diakui langsung ke laba rugi.

**Aset Hak Guna dan Liabilitas Sewa**

Bank telah menerapkan PSAK No. 73 "Sewa" sejak tanggal 1 Januari 2020.

PSAK No. 73 menerapkan persyaratan baru atau amandemen sehubungan dengan akuntansi sewa. Standar ini memperkenalkan perubahan signifikan untuk akuntansi *lessee* dengan menghapus perbedaan antara sewa operasi dan pembiayaan, serta mensyaratkan pengakuan aset hak guna dan pengakuan liabilitas sewa pada saat dimulainya sewa untuk seluruh sewa, kecuali:

- Sewa dengan jangka waktu kurang atau sama dengan 12 bulan dan tidak terdapat opsi beli;
- Sewa atas aset dengan nilai rendah.

Berbeda dengan akuntansi *lessee*, persyaratan untuk akuntansi *lessor* sebagian besar tidak berubah. Dampak dari adopsi PSAK No. 73 pada laporan keuangan dijelaskan di bawah ini.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****q. Assets under Finance Lease**

*Assets under finance lease are presented in the statement of financial position as premises and equipment. The depreciation of assets under finance lease are adjusted to the rate of depreciation of premises and equipment.*

*Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Contingent rentals are recognized as expenses in the periods in which they are incurred.*

*Assets under finance leases and right of use assets are depreciated over their expected useful lives on the same basis as owned assets or, whenever shorter, the term of the relevant lease and its useful lives.*

*The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.*

*If the recoverable amount of a non-financial asset (cash generating unit) is less than its carrying amount, the carrying amount of the asset (cash generating unit) is reduced to its recoverable amount and an impairment loss is recognized immediately to profit or loss.*

**Right of Use Assets and Lease Liabilities**

*The Bank has applied SFAS No. 73 "Lease" since January 1, 2020.*

*SFAS No. 73 introduces new or amended requirements with respect to lease accounting. This standard introduces significant changes to lessee accounting by removing the distinction between operating and finance lease, and requiring the recognition of a right-of-use asset and a lease liability at commencement for all leases, except for:*

- Leases with a term of less or equal to 12 months and there is no call option;*
- Leases of low value assets.*

*In contrast to lessee accounting, the requirements for lessor accounting have remained largely unchanged. The impact of the adoption of SFAS No. 73 on the financial statements is described below.*

**2. IKHTISAR KEBIJAKAN AKUNTANSI  
(Lanjutan)****q. Aset Sewa Pembiayaan (lanjutan)****Aset Hak Guna dan Liabilitas Sewa  
(lanjutan)**

Tanggal penerapan awal PSAK No. 73 untuk Bank adalah 1 Januari 2020. Bank telah menerapkan PSAK No.73 menggunakan pendekatan retrospektif yang dimodifikasi dengan mengakui dampak kumulatif dari awal penerapan PSAK No.73.

**a. Dampak definisi baru dari sewa**

Perubahan utama dari definisi sewa berkaitan dengan konsep pengendalian. PSAK No. 73 menentukan apakah kontrak mengandung sewa atas dasar jika terdapat aset identifikasi dan lessee memiliki hak untuk mengendalikan penggunaan aset selama suatu jangka waktu tertentu untuk dipertukarkan dengan imbalan. Hal tersebut merupakan perbedaan penentuan kontrak merupakan, atau mengandung sewa berdasarkan PSAK No. 30 yaitu dengan konsep risiko dan manfaat.

**b. Dampak pada akuntansi lessee**

Bank menerapkan pendekatan pengakuan dan pengukuran tunggal untuk seluruh sewa, kecuali untuk sewa jangka pendek dan sewa aset bernilai rendah. Bank mengakui liabilitas sewa untuk melakukan pembayaran sewa dan aset hak guna yang mewakili hak untuk menggunakan aset pendasar.

Bank mengakui liabilitas sewa sebesar jumlah pembayaran sewa yang masih harus dibayar hingga akhir masa sewa yang didiskontokan dengan menggunakan suku bunga pinjaman inkremental. Sedangkan aset hak guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang dibayarkan, biaya pemulihan dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai sewa, dikurangi insentif sewa yang diterima. Aset hak guna disusutkan dengan metode garis lurus selama jangka waktu yang lebih pendek antara masa sewa dengan estimasi masa manfaat aset.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****q. Assets under Finance Lease (continued)****Right of Use Assets and Lease Liabilities  
(continued)**

The date of initial application of SFAS No. 73 for the Bank is January 1, 2020. The Bank has applied SFAS No. 73 using the modified retrospective approach by recognizing the cumulative impact of the initial application of SFAS No. 73.

**a. Impact of the new definition of a lease**

The major change in definition of a lease mainly relates to the concept of control. SFAS No. 73 determines whether a contract contains a lease on the basis of whether identified asset and lessee has the right to control the use of an asset for a period of time in exchange for consideration. This is in contrast to the focus on 'risks and rewards' in SFAS No.30.

**b. Impact on lessee accounting**

The Bank applies a single recognition and measurement approach to all leases, except for short-term leases and low-value asset leases. The Bank recognized a lease liabilities to make lease payments and right-of-use assets that represent the right to use the underlying asset.

The Bank recognized lease liabilities at the amount of lease payments accrued to the end of the lease term which is discounted using the incremental borrowing rate. While, the right-of-use assets includes the amount of lease liabilities recognized, initial direct costs paid, restoration costs and lease payments on or before the start date of the lease, less lease incentives received. Right-of-use assets are depreciated using the straight-line method over the shorter period between the lease term and the estimated useful life of the asset.

**2. IKHTISAR KEBIJAKAN AKUNTANSI  
(Lanjutan)****q. Aset Sewa Pembiayaan (lanjutan)****Aset Hak Guna dan Liabilitas Sewa  
(lanjutan)****b. Dampak pada akuntansi lessee (lanjutan)**

Jika kepemilikan aset sewa dialihkan ke Bank pada akhir masa sewa atau pembayaran sewa mencerminkan pelaksanaan opsi pembelian, penyusutan dihitung menggunakan estimasi masa manfaat ekonomis aset. Aset hak guna diuji penurunan nilainya sesuai dengan PSAK No. 48 Penurunan Nilai Aset.

Pada tanggal dimulainya sewa, Bank mengakui liabilitas sewa yang diukur pada nilai kini dari pembayaran sewa masa depan yang akan dibayarkan selama masa sewa. Pembayaran sewa termasuk pembayaran tetap (termasuk pembayaran tetap secara-substansi) dikurangi piutang insentif sewa, pembayaran sewa variabel yang bergantung pada indeks atau suku bunga, dan jumlah yang diharapkan akan dibayar dalam jaminan nilai residu. Pembayaran sewa juga termasuk harga eksekusi opsi pembelian yang wajar jika dipastikan akan dilakukan oleh Bank dan pembayaran penalti untuk mengakhiri sewa, jika jangka waktu sewa mencerminkan Bank mengeksekusi opsi penghentian sewa. Pembayaran sewa variabel yang tidak bergantung pada indeks atau suku bunga diakui sebagai beban pada periode di mana peristiwa atau kondisi yang memicu pembayaran terjadi.

Dalam menghitung nilai kini dari pembayaran sewa, Bank menggunakan suku bunga pinjaman inkremental penyewa pada tanggal dimulainya sewa karena suku bunga implisit dalam sewa tidak dapat ditentukan. Setelah tanggal dimulainya sewa, jumlah liabilitas sewa ditingkatkan untuk mencerminkan pertambahan bunga dan dikurangi pembayaran sewa yang dilakukan. Selain itu, jumlah tercatat liabilitas sewa diukur kembali jika terdapat modifikasi, perubahan jangka waktu sewa, perubahan pembayaran sewa, atau perubahan dalam penilaian opsi untuk membeli aset pendasar.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****q. Assets under Finance Lease (continued)****Right of Use Assets and Lease Liabilities  
(continued)****b. Impact on lessee accounting (continued)**

If the ownership of lease asset is transferred to the Bank at the end of the lease term or the lease payments reflect the exercise of the purchase option, depreciation is calculated using the estimated useful life of the assets. Right-of-use assets are tested for impairment in accordance with SFAS No.48.

On the initial lease date, the Bank recognized lease liabilities measured at the present value of future lease payments that will be paid over the lease term. Lease payments include fixed payments (including substantially fixed payments), less lease incentive receivables, variable lease payments that depends on index or interest rate, and the expected amount to be paid in a residual value guarantee. Lease payments also include the reasonable exercise price for the purchase option if it is determined to be made by the Bank and the payment of a penalty to terminate the lease, if the lease term reflects the Bank exercising the lease termination option. Variable lease payments that do not depend on an index or interest rate are recognized as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Bank uses the lessee incremental borrowing rate at the inception date of the lease since the interest rate implicit in the lease cannot be determined. After the inception date of the lease, the amount of the lease liability is increased to reflect the interest increase and less lease payments made. Furthermore, the lease liabilities carrying amount is remeasured if there are modifications, changes in term of the lease, lease payments, or the valuation of the option to purchase the underlying asset.

Informasi yang digunakan oleh pengambil keputusan operasional dalam rangka alokasi sumber daya dan penilaian kinerja mereka terfokus pada kategori dari setiap produk.

**ag. Penggunaan Pertimbangan dan Estimasi Akuntansi yang Signifikan**

Penyusunan laporan keuangan Bank mengharuskan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah yang dilaporkan dari pendapatan, beban, aset dan liabilitas, dan pengungkapan atas liabilitas kontinjensi pada akhir periode pelaporan. Ketidakpastian yang melekat dalam melakukan estimasi, dapat menyebabkan jumlah sesungguhnya yang dilaporkan pada periode yang akan datang berbeda dengan jumlah yang diestimasi.

**Pertimbangan**

Pertimbangan berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Bank yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan Bank sebagai berikut:

**Usaha yang berkelanjutan**

Manajemen Bank telah melakukan penilaian atas kemampuannya untuk melanjutkan kelangsungan usahanya dan berkeyakinan bahwa Bank memiliki sumber daya untuk melanjutkan usahanya di masa mendatang. Selain itu, manajemen tidak mengetahui adanya ketidakpastian material yang dapat menimbulkan keraguan yang signifikan terhadap kemampuan Bank untuk melanjutkan kelangsungan usahanya. Oleh karena itu, laporan keuangan telah disusun atas dasar usaha yang berkelanjutan.

**Nilai wajar instrumen keuangan**

Semua aset dan liabilitas dimana nilai wajar diukur atau diungkapkan dalam laporan keuangan dapat dikategorikan pada level hirarki nilai wajar, berdasarkan tingkatan input terendah yang signifikan atas pengukuran nilai wajar secara keseluruhan:

Level 1: harga kuotasi (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses pada tanggal pengukuran.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****af. Operating Segment Information  
(continued)**

Information reported to the chief operating decision maker for the purpose of resource allocation and assessment of their performance is more specifically focused on the category of each product.

**ag. Use of Significant Accounting Judgment and Estimates**

The preparation of the Bank's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. Due to inherent uncertainty in making estimates, actual results reported in future periods might be based on amounts which differ from those estimates.

**Judgments**

The following judgments are made by management in the process of applying Bank's accounting policies that have the most significant effects on the amounts recognized in Bank's financial statements as follows:

**Going concern**

The Bank's management has made an assessment of its ability to continue as a going concern and is satisfied that the Bank has the resources to continue its business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt on the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

**Fair value of financial instruments**

All assets and liabilities in which fair value is measured or disclosed in the financial statements can be classified in fair value hierarchy levels, based on the lowest level of input that is significant to the overall fair value measurement:

Level 1: quoted prices (without adjustments) in active markets for identical assets or liabilities which are accessible at the measurement date.

Level 2: input selain harga kuotasi yang termasuk dalam level 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung atau tidak langsung.

Level 3: input yang tidak dapat diobservasi untuk aset dan liabilitas.

**Kontinjensi**

Bank sedang terlibat dalam proses hukum. Perkiraan biaya kemungkinan bagi penyelesaian klaim telah dikembangkan melalui konsultasi dengan bantuan konsultan hukum Bank didasarkan pada analisis hasil yang potensial.

Manajemen tidak berkeyakinan bahwa hasil dari hal ini akan mempengaruhi hasil usaha. Besar kemungkinan, bagaimanapun, bahwa hasil operasi di masa depan dapat secara material terpengaruh oleh perubahan dalam estimasi atau efektivitas dari strategi yang terkait dengan hal tersebut.

**Estimasi dan Asumsi**

Asumsi utama masa depan dan sumber utama estimasi ketidakpastian lain pada tanggal pelaporan yang memiliki risiko untuk dapat menyebabkan penyesuaian yang material terhadap nilai tercatat aset dan liabilitas untuk tahun/periode berikutnya, diungkapkan di bawah ini. Bank mendasarkan asumsi dan estimasi yang digunakan pada parameter yang tersedia pada saat laporan keuangan disusun.

Asumsi dan situasi mengenai perkembangan masa depan dapat berubah akibat perubahan pasar atau situasi yang timbul diluar kendali Bank. Perubahan tersebut dicerminkan dalam asumsi yang digunakan pada saat terjadinya.

Level 2: inputs other than quoted prices included in level 1 that are observable for the assets and liabilities, either directly or indirectly.

Level 3 : inputs that are not observable for the assets and liabilities.

**Contingency**

The Bank is currently involved in legal proceedings. The estimate of the probable cost for the resolution of claims has been developed in consultation with the aid of the external legal counsel handling the Bank's defense in this matter and is based upon an analysis of potential results.

Management does not believe that the outcome of this matter will affect the results of operations. It is probable, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

**Estimates and Assumptions**

The key assumptions concerning the future and other key sources of estimating uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year/period are disclosed below. The Bank based its assumptions and estimates on parameters available when the financial statements were prepared.

Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

(Lanjutan)****ag. Penggunaan Pertimbangan dan Estimasi  
Akuntansi yang Signifikan (lanjutan)****Cadangan kerugian penurunan nilai dari  
piutang, pinjaman *qardh* dan pembiayaan**

Manajemen Bank menelaah portofolio piutang, pinjaman *qardh* dan pembiayaan setiap periode untuk menilai penurunan nilai dengan memperbaharui cadangan kerugian penurunan nilai yang dibentuk selama periode yang diperlukan berdasarkan analisis berkelanjutan dan pemantauan terhadap rekening individual oleh petugas.

Estimasi tersebut didasarkan pada asumsi mengenai sejumlah faktor dan hasil aktual yang dapat berbeda, yang mengakibatkan perubahan terhadap jumlah cadangan kerugian di masa yang akan datang.

Asumsi dan situasi mengenai perkembangan masa depan dapat berubah akibat perubahan pasar atau situasi yang timbul diluar kendali Bank. Perubahan tersebut dicerminkan dalam asumsi yang digunakan pada saat terjadinya.

**Penurunan nilai investasi pada surat  
berharga**

Manajemen Bank menentukan bahwa surat berharga memiliki kriteria penurunan nilai yang sama dengan aset keuangan yang dicatat pada biaya perolehan diamortisasi.

**Umur ekonomis aset tetap**

Manajemen Bank memperkirakan masa manfaat aset tetap berdasarkan periode dimana aset diharapkan akan tersedia untuk digunakan. Masa manfaat ekonomis aset tetap ditinjau secara berkala dan diperbarui jika memiliki ekspektasi yang berbeda dari perkiraan sebelumnya, karena kerusakan secara fisik dan teknis, atau keusangan secara komersial dan legal atau batasan lainnya atas penggunaan aset tersebut. Selain hal tersebut, estimasi masa manfaat dari aset tetap didasarkan pada penilaian secara kolektif dengan menggunakan praktik industri, teknik evaluasi internal dan pengalaman dengan aset serupa.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****ag. Use of Significant Accounting Judgment  
and Estimates (continued)****Allowance for impairment losses on  
receivables, funds of *qardh* and financing**

The Bank's management reviews its receivables, funds of *qardh* and financing portfolio to assess impairment in each period by updating the required allowance for impairment losses made during the period based on the continuing analysis and monitoring of individual accounts by the officers.

Such estimates are based on assumptions of several factors and actual results may differ, resulting in future changes in the amount of allowance for losses.

Existing circumstances and assumptions with regard to future developments may change due to market changes or circumstances arising beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

**Impairment of investment in marketable  
securities**

The Bank's management determines that the impairment of marketable securities are based on the same criteria as financial assets carried at amortized cost.

**Useful lives of premises and equipment**

The Bank's management estimates the useful lives of premises and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of premises and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, estimate of the useful lives of premises and equipment is based on collective assessment of industry practice, internal technical evaluation and experience with similar assets.

**2. IKHTISAR KEBIJAKAN AKUNTANSI  
(Lanjutan)****ag. Penggunaan Pertimbangan dan Estimasi  
Akuntansi yang Signifikan (lanjutan)****Umur ekonomis aset tetap (lanjutan)**

Tetap dimungkinkan, bagaimanapun, bahwa hasil masa depan dapat secara material dipengaruhi oleh perubahan estimasi yang disebabkan oleh perubahan faktor-faktor tersebut di atas. Jumlah dan saat pencatatan biaya untuk setiap periode akan dipengaruhi oleh perubahan dari faktor dan keadaan saat pencatatan. Pengurangan dari taksiran masa manfaat dari aset tetap akan meningkatkan beban usaha.

**Revaluasi pada aset tetap**

Bank mengukur aset tetap berdasarkan nilai revaluasi dengan perubahan nilai wajar yang diakui dalam penghasilan komprehensif lain dan dilaporkan dalam ekuitas. Pada tanggal 31 Desember 2021 dan 2020 Bank tidak melakukan Revaluasi pada aset tetap. Lihat Catatan 15 untuk nilai tercatat aset tetap.

**Aset pajak tangguhan**

Aset pajak tangguhan diakui atas jumlah pajak penghasilan terpulihkan (*recoverable*) pada periode mendatang sebagai akibat perbedaan temporer yang boleh dikurangkan. Justifikasi manajemen diperlukan untuk menentukan jumlah aset pajak tangguhan yang dapat diakui, sesuai dengan waktu yang tepat dan tingkat laba fiskal di masa mendatang sejalan dengan strategi rencana perpajakan ke depan.

**Penurunan nilai aset non-keuangan**

Manajemen Bank mengevaluasi penurunan nilai aset non-keuangan apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa nilai tercatat aset non-keuangan tidak dapat dipulihkan kembali.

Faktor-faktor penting yang dapat menyebabkan penelaahan penurunan nilai adalah sebagai berikut:

- a) performa yang tidak tercapai secara signifikan terhadap ekspektasi historis atau proyeksi hasil operasi di masa yang akan datang;
- b) perubahan yang signifikan dalam cara penggunaan aset atau strategi bisnis secara keseluruhan; dan
- c) industri atau tren ekonomi yang secara signifikan bernilai negatif.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****ag. Use of Significant Accounting Judgment  
and Estimates (continued)****Useful lives of premises and equipment  
(continued)**

*It is possible, however, that future results of operations be materially affected by changes in estimates brought about by changes in the aforementioned factors. The amounts and timing of recorded expenses for any period are affected by changes of those factors and circumstances during recording. A reduction in the estimated useful lives of premises and equipment increases the recorded operating expenses.*

**Revaluation of premises and equipment**

*The Bank measures the premises and equipment at revalued amounts with changes in fair value being recognized in other comprehensive income and reported in the equity. As of December 31, 2021, and 2020 the Bank did not carry out revaluation of the premises and equipment. Refer to Note 15 for the carrying values of premises and equipment.*

**Deferred tax assets**

*Deferred tax assets are recognized for the future recoverable taxable income arising from deductible temporary difference. Management's judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing on level of future taxable profits together with strategic future tax planning.*

**Impairment of non-financial assets**

*The Bank's management assesses impairment of non-financial assets whenever events or changes in circumstances indicate that the carrying amount of non-financial asset may not be recoverable.*

*The factors that the Bank considers important which may lead to impairment assessment are the following:*

- a) significant under-performance related to historical expectation or projected future operating results;*
- b) significant changes in the manner of use of the assets or the overall business strategy; and*
- c) significant negative industry or economic trends.*

**2. IKHTISAR KEBIJAKAN AKUNTANSI  
(Lanjutan)****ag. Penggunaan Pertimbangan dan Estimasi  
Akuntansi yang Signifikan (lanjutan)****Penurunan nilai aset non-keuangan  
(lanjutan)**

Bank mengakui kerugian penurunan nilai apabila nilai tercatat aset melebihi nilai yang dapat dipulihkan. Jumlah terpulihkan adalah nilai yang lebih tinggi antara nilai wajar dikurang biaya pelepasan dengan nilai pakai aset (atau unit penghasil kas). Jumlah terpulihkan diestimasi untuk aset individual atau, jika tidak memungkinkan, untuk unit penghasil kas yang mana aset tersebut merupakan bagian daripada unit tersebut.

**Estimasi liabilitas imbalan kerja**

Estimasi liabilitas imbalan kerja ditentukan berdasarkan perhitungan dari aktuaria. Perhitungan aktuaria menggunakan asumsi-asumsi seperti tingkat diskonto, tingkat pengembalian investasi, tingkat kenaikan gaji, tingkat kematian, tingkat pengunduran diri dan lain-lain.

Karena program tersebut memiliki sifat jangka panjang, maka perkiraan tersebut memiliki ketidakpastian yang signifikan.

**ah. Transaksi dan Saldo Mata Uang Asing**

Bank menyelenggarakan catatan akuntansi-nya dalam Rupiah. Transaksi yang melibatkan mata uang asing dicatat pada nilai tukar pada saat terjadinya transaksi.

Pada tanggal laporan posisi keuangan, aset dan liabilitas moneter dalam mata uang asing dijabarkan ke dalam mata uang Rupiah dengan menggunakan kurs *Reuters* pada pukul 16:00 WIB (Waktu Indonesia Bagian Barat) yang dikeluarkan oleh Bank Indonesia.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING  
POLICIES (Continued)****ag. Use of Significant Accounting Judgment  
and Estimates (continued)****Impairment of non-financial assets  
(continued)**

The Bank recognizes an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher amount between fair value less costs of disposal using the asset (or cash generating unit) value in use. Recoverable amounts are estimated for individual assets or, if not possible, for the cash-generating unit to which the asset belongs.

**Estimated liabilities for employee benefits**

Estimated liabilities for employee benefits are determined based on actuarial valuation. The actuarial valuation involves assumptions such as discount rate, expected rate of returns on investments, future salary increase, mortality rate, resignation rate and others.

Due to the long-term nature of this plan, such estimates are subject to significant uncertainty.

**ah. Transaction and Balance in Foreign  
Currency**

The Bank maintains its accounting records in Indonesian Rupiah. Transactions in foreign currencies are recorded at the exchange rates in effect on the date of the transactions.
