Assalamualaikum Warohmatullahi Wabarokatuh  
Bismillaahirrohmaanirrohiim

Alhamdulillah Rabbil'Aalamin, Wa Shalatu Wa Salamu 'Ala Nabiyyina Muhammad,  
Wa 'Ala Aalihi Wa Shahbihi Wa Sallam, Amma Ba'du.

### Para Pemegang Saham dan Pemangku Kepentingan yang Terhormat,

Puji dan syukur kita panjatkan kehadirat Allah Subhanahu Wa Ta'ala atas rahmat dan karunia-Nya yang telah diberikan kepada kita semua. Shalawat serta salam semoga tercurah untuk Baginda Rasulullah SAW, beserta seluruh keluarga dan kerabatnya.

Dalam kesempatan ini, izinkan kami menyampaikan laporan atas tugas dan fungsi Dewan Pengawas Syariah (DPS) untuk tahun buku 2021, sesuai dengan ketentuan regulasi. Kami menyadari, pada tahun tersebut perekonomian masih bergerak dinamis, sehingga mendorong Bank untuk semakin berhati-hati dalam menentukan langkah bisnis. Kendati demikian, Dewan Pengawas Syariah sangat mengapresiasi seluruh jajaran manajemen yang secara aktif dan responsif melakukan langkah penguatan pada PT Bank Muamalat Indonesia Tbk melalui peningkatan dalam proses bisnis, permodalan serta tata kelola yang baik.

### Esteemed Shareholders and Stakeholders,

On behalf of the Sharia Supervisory Board (DPS), allow us to submit the report on the duties and functions of the DPS for the 2021 financial year, in accordance with regulatory provisions. We are aware that in that year the economy was still moving dynamically, thus encouraging the Bank to be more careful in determining business initiatives. Nevertheless, the Sharia Supervisory Board appreciates the active and responsive initiatives at all management levels at strengthening PT Bank Muamalat Indonesia Tbk through improvements in business processes, capital, and good governance.

Dewan Pengawas Syariah telah mengadakan rapat dan koordinasi/komunikasi yang baik secara berkala dengan Dewan Komisaris dan Direksi dalam rangka menentukan strategi yang tepat untuk mendorong pengembangan bisnis Bank Muamalat.

## FOKUS 2021

Pada tahun 2021, fokus pengawasan dilakukan terhadap aspek kepatuhan prinsip syariah secara lebih komprehensif. Tujuannya agar pelaksanaan prinsip syariah pada produk dan layanan jasa di Bank Muamalat dapat dilakukan dengan baik.

Kami berpandangan, masih terdapat beberapa aspek dalam pelaksanaan di lapangan yang perlu ditingkatkan dan disempurnakan. Sedangkan untuk yang telah berjalan dengan baik, harus terus dipertahankan, sehingga Bank Muamalat Indonesia dapat terus tumbuh berkembang dari sisi bisnisnya, dengan tetap menjaga koridor kesyariahnya.

Pada tahun 2021, Dewan Pengawas Syariah memberikan fokus perhatian terhadap operasional Bank Muamalat, yang antara lain terkait dengan:

- Penyempurnaan pada kebijakan dan proses transaksi yang dilakukan oleh Bank dalam rangka memenuhi prinsip-prinsip syariah.

In carrying out its duties and responsibilities, the Sharia Supervisory Board held regular meetings and coordination/communication with the Board of Commissioners and the Board of Directors in order to determine the right strategy to facilitate Bank Muamalat's business development.

## FOCUS IN 2021

In 2021, supervision is focused on aspects of compliance with sharia principles in a more comprehensive manner. The goal is to ensure that the implementation of sharia principles in products and services at Bank Muamalat can be carried out properly.

It is our view that the actual implementation of sharia principles still left some areas in need of improvement and enhancement. Meanwhile, other areas that have been carried out properly need to be maintained, so that Bank Muamalat Indonesia can continue to grow in terms of its business while staying within the sharia corridor.

In 2021, the Sharia Supervisory Board focuses its attention on the operations of Bank Muamalat related to the following:

- Improvements to policies and transaction processes carried out by the Bank in order to comply with sharia principles.
- Development of analytical tools and supervision of sharia aspects in order to provide appropriate and implementable inputs to the Bank's management.
- Improvement of skills and knowledge of all employees at all levels in terms of knowledge of Islamic banking products/activities and services, both conceptually and in implementation.
- Focus on service excellence to maintain and improve competitiveness, especially in the Islamic banking industry, and with the COVID-19 pandemic.

## REALISASI KEGIATAN DEWAN PENGAWAS SYARIAH

Kami senantiasa memastikan kesesuaian syariah terhadap produk dengan adanya opini syariah dari Dewan Pengawas Syariah sebelum produk dikeluarkan. Dewan Pengawas Syariah juga melakukan *review* terhadap *Standard Operating Procedure* (SOP), dokumen akad, dan hal-hal lain yang berhubungan dengan produk tersebut. Untuk melengkapi fungsi dan tanggung jawabnya, Dewan Pengawas Syariah melakukan rapat rutin setiap bulan. Selain itu, Dewan Pengawas Syariah telah melakukan uji petik terhadap kegiatan operasional penyaluran dan penghimpunan dana, *sharing knowledge*, serta pemberian nasihat.

Hal tersebut merupakan bagian dari pelaksanaan prinsip kehati-hatian dan kepatuhan khususnya terhadap ketentuan syariah serta tata kelola perusahaan yang baik.

## ACTIVITIES OF THE SHARIA SUPERVISORY BOARD

We always ensure the sharia conformity of a product with the sharia opinion from the Sharia Supervisory Board before the product is issued. The Sharia Supervisory Board also reviews the Standard Operating Procedure (SOP), contract documents, and other matters related to the product. ## Board of Commissioners Report

Dewan Komisaris menilai, pencapaian Bank Muamalat yang baik pada tahun 2021 tidak dapat dipisahkan dari strategi yang diterapkan oleh manajemen dalam merespons situasi yang dinamis. Seluruh lini organisasi telah menjalankan tugasnya dan Direksi melaksanakan peran serta fungsinya dengan baik.

The Board of Commissioners believes that Bank Muamalat's good performance in 2021 cannot be separated from the strategy implemented by the management in responding to dynamic situations. All lines of the organization have carried out their duties well and the members of the Board of Directors have carried out their roles and functions well.

Assalamualaikum Warohmatullahi Wabarokatuh  
Bismillahirrohmaanirrohiim

Alhamdulillah Rabbil'Aalamin, Wa Shalatu Wa Salamu 'Ala Nabiyyina Muhammad,  
Wa 'Ala Aalihi Wa Shahbihi Wa Sallam, Amma Ba'du.

### Para Pemegang Saham dan Pemangku Kepentingan yang Terhormat,

Berkat nikmat dan karunia Allah SWT, PT Bank Muamalat Indonesia Tbk ("BMI", "Bank") mampu melewati tahun 2021 dengan baik. Bukan hanya Bank mampu bertahan di tengah suasana eksternal yang dinamis, baik dari aspek sosial maupun ekonomi, tetapi juga Bank mampu meraih pencapaian yang positif.

Pada kesempatan ini, izinkan kami menguraikan pandangan Dewan Komisaris atas kinerja Bank selama tahun 2021 serta kinerja Direksi dalam mengelola Bank Muamalat Indonesia. Hal ini merupakan mandat dari regulasi, yang antara lain tertuang dalam Undang-Undang Nomor 40 tahun 2007 tentang Perseroan Terbatas dan Peraturan Otoritas Jasa Keuangan (OJK) Nomor 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik. Peraturan perundang-undangan tersebut menegaskan tentang tugas Dewan Komisaris untuk melakukan pengawasan atas jalannya kegiatan usaha Bank serta memberikan nasihat kepada Direksi untuk kepentingan tersebut.

### Dear Distinguished Shareholders and Stakeholders,

We are grateful for the blessings and grace of Allah SWT, which allowed PT Bank Muamalat Indonesia Tbk ("BMI", "Bank") to successfully navigate 2021. Not only was the Bank able to survive the external social and economic conditions, but also recorded positive achievements.

We would like to take this opportunity to outline the views of the Board of Commissioners on the Bank's performance throughout 2021 and the performance of the Board of Directors in managing Bank Muamalat Indonesia. This is a regulatory mandate under Law Number 40 of 2007 concerning Limited Liability Companies and the Financial Services Authority (FSA) Regulation Number 33/POJK.04/2014 concerning the Board of Directors and the Board of Commissioners of Issuers or Public Companies. These laws and regulations emphasize the Board of Commissioners' duty to supervise the Bank's business activities and provide advice to the Board of Directors.

Dewan Komisaris menyadari bahwa tahun 2021 masih penuh dengan tantangan bagi usaha perbankan. Pandemi COVID-19 belum sepenuhnya pulih, walaupun telah menunjukkan tanda-tanda terkendali. Apalagi pada tengah semester muncul dinamika varian baru COVID-19, yaitu varian Delta, sehingga pemerintah harus menerapkan kebijakan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM) guna menahan laju penyebaran pandemi.

Kebijakan tersebut berdampak pada terbatasnya aktivitas sosial masyarakat dan dunia usaha. Pada akhirnya, perbankan yang merupakan lembaga intermediasi di bidang keuangan terkena imbas. Penyaluran pembiayaan mengalami keterbatasan, sementara risiko pembiayaan yang telah disalurkan mengalami peningkatan.

Dalam kondisi yang penuh tantangan itu, Dewan Komisaris menilai Direksi telah merespons dengan sangat baik. Bank Muamalat meraih pencapaian finansial yang relatif baik, termasuk adanya peristiwa penting yaitu beralihnya Pemegang Saham Pengendali Bank dari sebelumnya Islamic Development Bank (IsDB) kepada Badan Pengelola Keuangan Haji (BPKH) serta berlangsungnya Penambahan Modal dengan Memberikan Hak Memesan Efek Terlebih Dahulu VI (PMHMETD VI) pada akhir tahun 2021.

## PENILAIAN TERHADAP KINERJA DIREKSI

### Dasar Penilaian

Dewan Komisaris setidaknya memiliki 2 (dua) pertimbangan penting dalam memberikan pandangan atau penilaian atas kinerja Direksi dalam mengelola Bank. Pertama, terkait dengan pencapaian aspek finansial dan kedua, non finansial. Faktor utama yang diukur dari pencapaian finansial ialah pemenuhan target-target yang sebelumnya telah ditetapkan dan disepakati dalam Rencana Bisnis Bank.

Beberapa indikator di bidang keuangan, misalnya perkembangan nilai aset, total Dana Pihak Ketiga (DPK), total penyaluran pembiayaan, biaya operasional, pendapatan operasional. Selanjutnya, juga diukur rasio-rasio penting seperti rasio *Non-Performing Financing* (NPF), *Return on Asset* (ROA), *Return on Equity* (ROE) serta indikator keuangan lainnya yang lazim digunakan sebagai alat ukur kinerja Bank.

Untuk pencapaian dari aspek non finansial, mencakup di antaranya kinerja operasional, dan penerapan tata kelola perusahaan yang baik atau *Good Corporate Governance* (GCG). Selain itu, pencapaian-pencapaian strategis juga menjadi pertimbangan Dewan Komisaris untuk memberikan penilaian terhadap kinerja Direksi dalam mengelola Bank.

The Board of Commissioners realizes that 2021 was still full of challenges for the banking industry. The COVID-19 pandemic had not yet been fully contained, although it had shown signs of being under control. Moreover, in the middle of the year, there was an emergence of a new COVID-19 variant, namely the Delta variant, forcing the government to implement Enforcement of Community Activity Restrictions (PPKM) to curb the spread of the pandemic.

This policy limited social activities of the community and the business world. Banks, which are intermediary institutions in the financial sector, were adversely affected. The distribution of financing was limited, while the risk associated with disbursed financing increased.

The Board of Commissioners believes that the Board of Directors responded very well to these challenging conditions. Bank Muamalat accomplished a relatively good performance financial. The Bank's achievements included changing the Bank's Controlling Shareholder from the Islamic Development Bank (IsDB) to the Hajj Fund Management Agency (BPKH) and the ongoing Capital Increase with Pre-emptive Rights VI (PMHMETD VI) at the end of 2021.

## ASSESSMENT OF THE PERFORMANCE OF THE BOARD OF DIRECTORS

### Basis of Assessment

The Board of Commissioners has at least 2 (two) important considerations when assessing the performance of the Board of Directors. These include the Bank's financial and non-financial achievements. The main yardstick by which the financial achievements are measured includes the fulfillment of the targets set in the Bank's Business Plan.

In addition, there are several indicators in the financial sector including the growth of asset value, total Third Party Funds (TPF), distribution of financing, operational costs and operating income. Other financial indicators such as the ratio of Non-Performing Financing (NPF), Return on Assets (ROA), and Return on Equity (ROE) are also commonly used to measure the Bank's performance.

Non-financial achievements include operational performance and Good Corporate Governance (GCG). In addition, the Board of Commissioners also takes into account strategic achievements when assessing the performance of the Board of Directors.

## Hasil Penilaian

Mengacu pada sejumlah pertimbangan tersebut serta kondisi eksternal, seperti pandemi COVID-19 yang berdampak pada kinerja Bank, Dewan Komisaris berpandangan bahwa kinerja Direksi pada tahun buku 2021 sangat baik. Hal itu tercermin dari beragam pencapaian yang diperoleh BMI.

Dari sisi non finansial, Direksi telah berhasil merealisasikan rangkaian proses penguatan permodalan Perseroan yang diawali dengan masuknya Badan Pengelola Keuangan Haji (BPKH) sebagai mitra strategis dalam mengembangkan Bank. Sebagai Pemegang Saham Pengendali, BPKH telah menyuntikkan modal sebesar Rp1 triliun untuk memperkuat modal inti Bank melalui proses PMHMETD VI. Dewan Komisaris sangat mengapresiasi selesainya proses tersebut, karena akan sangat membantu pengembangan kinerja BMI ke depannya.

BMI juga telah menjalankan inisiatif *rebuild financing portfolio*, yaitu upaya menjaga kualitas pembiayaan yang sehat, termasuk pemulihan pembiayaan bermasalah. Upaya Bank menyelesaikan aset bermasalah dari pembiayaan tersebut bekerja sama dengan PT Perusahaan Pengelola Aset (PPA). Dewan Komisaris menyambut baik inisiatif tersebut karena telah berhasil menurunkan NPF, sehingga Bank kedepannya akan lebih leluasa dalam menyalurkan pembiayaan kepada nasabah di tengah ekonomi yang mulai pulih.

Adapun inisiatif *digital and transformation* merupakan pengembangan bisnis Bank berbasis teknologi. Bank secara berkesinambungan terus melakukan pengembangan digital melalui *Muamalat Digital Islamic Network* (MDIN). Dewan Komisaris memandang penting hal ini, mengingat pandemi COVID-19 telah ikut mempercepat transformasi dalam transaksi perbankan, sejalan dengan adanya pergeseran perilaku nasabah yang kian gemar melakukan transaksi *digital banking*.

Inovasi di bidang teknologi informasi ini telah mendapatkan pengakuan dari para pemangku kepentingan eksternal, seperti ditunjukkan melalui beragam penghargaan yang diterima pada tahun 2021. Di antaranya, sebagai bank syariah dengan inovasi digital terbaik dalam ajang Anugerah Syariah Republika.

Beragam inisiatif dan upaya yang telah dilakukan memberikan dukungan pada kinerja finansial Bank, yang rata-rata menunjukkan hasil relatif baik. Mengacu pada posisi keuangan Bank, BMI telah mencatat adanya peningkatan total aset sebesar 14,94% dari Rp51,24 triliun miliar pada tahun 2020 menjadi Rp58,90 triliun pada Desember 2021.

## Assessment results

Taking into consideration a number of these considerations as well as external conditions, such as the COVID-19 pandemic which has had an impact on the Bank's performance, the Board of Commissioners is of the view that the performance of the Board of Directors in 2021 financial year was very good. This is reflected in the various achievements of BMI.

On the non-financial side, the Board of Directors has succeeded in realizing a series of processes for strengthening the Company's capital, which began with the inclusion of the Hajj Fund Management Agency (BPKH) as the Bank's strategic partner. As the Controlling Shareholder, BPKH has injected Rp1 trillion to strengthen the Bank's core capital through the PMHMETD VI process. The Board of Commissioners appreciates this process since it will greatly assist BMI's performance.

BMI has also rebuilt its financing portfolio to maintain sound financing, including the recovery of non-performing financing. The Bank's efforts to resolve problem assets from the financing are in collaboration with PT Perusahaan Pengelola Aset (PPA). The Board of Commissioners welcomes the initiative to reduce NPF, which will allow the Bank to be more flexible in the disbursement of financing to customers amid the recovering economy.

The Bank carries out digital development through the Muamalat Digital Islamic Network (MDIN). The Board of Commissioners believe that this is important, considering that the COVID-19 pandemic has accelerated the transition to digital banking transactions, in line with the shift in customer behavior.

The Bank's information technology innovations received recognition from external stakeholders, as shown by the various awards received in 2021. One of these was an award for being a sharia bank with the best digital innovations at the Anugerah Syariah Republika event.

Various initiatives and efforts have been made to support the Bank's financial performance, which on average has shown relatively good results. Referring to the Bank's financial position, BMI recorded an increase in total assets of 14.94% from Rp51.24 trillion in 2020 to Rp58.90 trillion in December 2021.

Ikhtiar Bank yang sedang menjaga kualitas pembiayaan agar tetap sehat, ikut membuahkan hasil. Tingkat NPF Bank pada tahun 2021 hanya 0,08%, jauh di bawah rata-rata pencapaian industri perbankan syariah. Hingga akhir tahun 2021, gelombang pandemi COVID-19 memberikan dampak bagi Bank Muamalat dalam proses penyaluran pembiayaan, di mana dampak dari pandemi ini mengharuskan bank untuk lebih selektif dalam menyalurkan pembiayaan. Akibatnya posisi pembiayaan Bank mengalami penurunan menjadi Rp18,04 triliun, dibandingkan tahun sebelumnya yang berjumlah Rp29,08 triliun.

Sementara kinerja Dana Pihak Ketiga mengalami kondisi sebaliknya. Dana Pihak Ketiga tumbuh 13,16% menjadi Rp46.871 miliar dibandingkan tahun 2020 yang berjumlah Rp41.425 miliar. Hal ini patut diapresiasi dimana pencapaian tersebut menunjukkan tingkat kepercayaan nasabah kepada Bank yang masih tinggi.

Melalui kekuatan dan keunggulan yang dimiliki Bank, manajemen terus mengoptimalkan kegiatan bisnis melalui penyaluran dana, penghimpunan dana serta penyediaan jasa layanan perbankan lainnya, yang didukung oleh rekomendasi dari Dewan Komisaris. Hal itu bertujuan agar BMI kian mampu menghadapi tantangan dan menangkap peluang yang ada.

Berdasarkan perkembangan tersebut, Dewan komisaris sangat mengapresiasi langkah-langkah strategis yang telah dilakukan oleh Direksi sepanjang tahun 2021 dalam menjalankan usaha Bank. Dewan Komisaris berpandangan bahwa segala yang dilakukan oleh Direksi pada tahun buku tersebut telah sangat baik.

## Pengawasan terhadap Perumusan dan Implementasi Strategi

Dewan Komisaris menilai, pencapaian BMI yang baik pada tahun 2021 tidak dapat dipisahkan dari strategi yang diterapkan oleh manajemen dalam merespons situasi. Seluruh lini organisasi telah menjalankan tugasnya dan Direksi telah melaksanakan peran serta fungsinya dengan baik.

Setidaknya terdapat 3 (tiga) langkah strategis yang telah direalisasikan pada tahun 2021: *business turnaround*, *rebuild financing portfolio*, dan *digital transformation*.

*Business turnaround* merupakan titik balik Bank untuk menjalankan bisnis yang efisien dan berkelanjutan. Upaya itu dilaksanakan melalui sejumlah strategi, di antaranya:

1. Fokus pada penyaluran pembiayaan di sektor yang prospektif yaitu sektor-sektor yang bersifat *low-risk*, namun mampu memberikan hasil yang maksimal (*high yield*), serta mengembangkan *Islamic segment* sebagai bentuk komitmen dalam membangun ekonomi syariah di Indonesia.

The Bank's efforts to maintain the quality of financing also yielded results. The Bank's NPF level in 2021 was only 0.08%, far below the average NPF of the Islamic banking industry. Up to the end of 2021, the COVID-19 pandemic had an impact on Bank Muamalat's financing distribution process. It also required the Bank to be more selective in distributing financing. As a result, the Bank's financing position decreased to Rp18.04 trillion from Rp29.08 trillion in 2020.

Meanwhile, Third Party Funds grew by 13.16% to Rp46,871 billion from Rp41,425 billion in 2020. This achievement shows the high level of customer trust in the Bank.

The management has continued to optimize business activities through fund distribution, fundraising and the provision of other banking services, supported by the recommendations of the Board of Commissioners. This aims to ensure that BMI is increasingly more able to encounter challenges and seize opportunities.

Based on these developments, the Board of Commissioners appreciates the strategic steps that have been taken by the Board of Directors throughout 2021. The Board of Commissioners is of the view that everything done by the Board of Directors in the financial year has been very good.

## Supervision of Strategy Formulation and Implementation

The Board of Commissioners believes that BMI's good performance in 2021 cannot be separated from the strategy implemented by the management. All lines of the organization have carried out their duties well and the members of the Board of Directors have carried out their roles and functions well.

There are at least 3 (three) strategic steps that were realized in 2021: *business turnaround*, *rebuilding the financing portfolio*, and *digital transformation*.

Business turnaround marks a turning point for the Bank to run an efficient and sustainable business. These efforts were carried out through a number of strategies, including:

1. Focus on financing distribution in prospective sectors, namely sectors that are low-risk but capable of yielding maximum results (high yield), as well as developing the Islamic segment as a form of commitment to developing the sharia economy in Indonesia.

2. Pembiayaan di segmen *retail* akan fokus menjadi pembiayaan konsumen pada produk multiguna, kredit kepemilikan rumah (KPR), *employee benefit program*, serta pembiayaan pada *Islamic business*. Segmen *wholesale* fokus pada pembiayaan kepada BUMN, *large company*/konglomerasi serta *low-risk customer* lainnya.
3. Dari sisi pendanaan, Bank tetap fokus pada peningkatan dana murah berbasis tabungan dan giro melalui serangkaian produk dan program yang inovatif serta sesuai dengan kebutuhan nasabah.
4. Kontribusi pendapatan berbasis jasa terus ditingkatkan melalui pengembangan produk-produk *wealth management*, *bancassurance*, *trade*, dan *transactional*.

*Rebuild financing portfolio* merupakan upaya Bank menjaga kualitas pembiayaan yang sehat, termasuk pemulihan pembiayaan berkualitas rendah. Inisiatifnya, antara lain melalui:

1. Perbaikan kualitas portofolio dengan mendukung terciptanya manajemen portofolio yang proaktif serta komprehensif yang didukung oleh penerapan manajemen risiko yang ketat untuk mencegah penurunan kualitas pembiayaan.
2. Pemulihan pembiayaan bermasalah, termasuk menyediakan pencadangan yang cukup untuk menutupinya. Akselerasi penyelesaian pembiayaan bermasalah melalui pemulihan dan penagihan juga terus dilakukan agar mampu menghasilkan pendapatan yang optimal.
3. Menjaga penyaluran pembiayaan untuk tetap fokus dan disiplin pada target pasar dan kriteria *risk acceptance* yang telah ditentukan.

*Digital and Transformation*, yaitu pengembangan bisnis Bank berbasis teknologi. Hal itu dilakukan melalui:

1. Fokus pengembangan pada *Digital Islamic Network* (DIN), termasuk *Smart Account Opening* serta penambahan fitur layanan melalui kemitraan strategis dengan pihak ketiga. Bank juga melakukan transformasi pada *sales and distribution channel* serta layanan cabang melalui meningkatkan kolaborasi dengan komunitas dan ekosistem syariah.
2. Peningkatan dan perbaikan sistem, prosedur dan kebijakan sebagai bagian dari transformasi demi mendukung aktivitas utama Bank. BMI juga akan merumuskan kembali visi dan misi agar sesuai dengan kondisi dan target usaha.
3. Berupaya menyediakan layanan yang optimal dan menjunjung prinsip *smart and excellent operation* bagi seluruh pemangku kepentingan, baik dari sisi bisnis maupun pendukungnya, melalui penerapan standar yang konsisten.

2. Financing in the retail segment will focus on consumer financing for multipurpose products, housing or mortgage loans (KPR), employee benefit programs, as well as Islamic business financing. The wholesale segment focuses on financing for SOEs, large companies/conglomerates and other low-risk customers.
3. In terms of funding, the Bank remains focused on increasing low-cost funds based on savings and current accounts through a series of innovative products and programs that are customized to specific customer needs.
4. The contribution of fee-based income continues to increase through the development of wealth management, bancassurance, trade, and transactional products.

The bank's focus on rebuilding its financing portfolio aims to maintain sound financing quality, including recovery of low-quality financing. These initiatives include:

1. Improvement of portfolio quality through proactive and comprehensive portfolio management supported by the implementation of strict risk management to prevent a decline in financing quality.
2. Recovery of non-performing financing, including providing sufficient allowance to cover it. Acceleration of recovery and collection of non-performing financing is also continuously carried out in order to generate optimal income.
3. Ensuring that the distribution of financing remains focused on the target market and takes into account the predetermined risk acceptance criteria.

Digital Transformation, namely the Bank's technology-based business development, has been achieved through the following:

1. Focus on developing the Digital Islamic Network (DIN), including Smart Account Opening, as well as adding service features through strategic partnerships with third parties. The Bank is also transforming its sales and distribution channel and branch office services by increasing collaboration with the sharia community and ecosystem.
2. Improvement of systems, procedures and policies as a part of the transformation that supports the Bank's main activities. BMI will also reformulate its vision and mission to suit business conditions and targets.
3. Provision of optimal services and upholding the principles of smart operations for all stakeholders, both in terms of business and the supporting ecosystem.

Berbagai rumusan strategi tersebut merupakan upaya manajemen melakukan perbaikan dan penyesuaian agar Bank mampu menghadapi dinamika perekonomian nasional dan kondisi bisnis. Karena itu, Dewan Komisaris mendukung seluruh inisiatif tersebut, sekaligus melakukan pengawasan dan pemberian nasihat terhadap implementasi strategi agar pelaksanaan perbaikan kinerja Bank dapat terealisasi sesuai target yang telah ditetapkan.

## PANDANGAN ATAS PROSPEK USAHA

Dewan Komisaris telah melakukan *review* terhadap prospek usaha yang disusun Direksi untuk tahun depan. Dalam dokumen tersebut telah termuat dasar pertimbangan, baik terkait dengan kondisi eksternal maupun internal Bank yang berpotensi mempengaruhi kinerja BMI pada tahun depan. Prospek usaha tersebut juga menyampaikan target serta strategi yang ingin dicapai.

Mengacu pada perkembangan kinerja tahun 2021, Dewan Komisaris menilai bahwa prospek usaha yang disusun dengan berbagai pertimbangannya adalah realistis. Proyeksi Bank Indonesia serta pemerintah dalam Anggaran Pendapatan dan Belanja Negara (APBN) tahun 2022 tentang perekonomian nasional yang akan kembali tumbuh di level 5% dapat menjadi momentum ekspansi bisnis BMI. Karena itu, Dewan Komisaris sangat mendukung prospek usaha yang telah disusun tersebut.

Kendati demikian, Dewan Komisaris mengingatkan agar pelaksanaannya kelak tetap menerapkan unsur kehati-hatian sebagai bagian dari mitigasi risiko, apalagi pandemi belum sepenuhnya pulih. Karena itulah, Dewan Komisaris akan mengawasi serta berkoordinasi dengan Direksi secara berkala untuk memastikan bahwa implementasinya sejalan dengan yang direncanakan serta sesuai dengan peraturan perundangan-undangan dan praktik terbaik di industri.

The various strategies represent the management's effort to ensure that the Bank is able to deal with the dynamics of the domestic economy and business conditions. The Board of Commissioners supports all these initiatives, as well as supervising and providing advice on strategy implementation so that the Bank's performance can reach the set targets.

## BUSINESS PROSPECTS

### Dear Distinguished Shareholders and Stakeholders,

Praise be to Allah Subhanahu Wa Ta'ala, the Lord of the Universe. It is thanks to his blessings, mercy, and gifts that PT Bank Muamalat Indonesia Tbk was able to pass the year 2021 successfully amid the dynamic economic conditions caused by the COVID-19 pandemic.

The pandemic has been putting pressure on the banking industry since 2020. Meanwhile, in 2021, amid the recovery that started at the beginning of the year, there was a second wave of the pandemic due to the emergence of the Delta variant in the middle of the year, which forced the

COVID-19 varian Delta pada pertengahan tahun yang memaksa masyarakat untuk membatasi aktivitas dan terjadinya penurunan berbagai aktivitas ekonomi domestik. Pemerintah merespons keadaan tersebut, antara lain melalui kebijakan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM), kebijakan suku bunga rendah dan pelaksanaan vaksinasi massal COVID-19. Kebijakan tersebut kemudian berdampak positif terhadap pemulihan ekonomi Indonesia yang berangsur membaik pada triwulan II tahun 2021.

PT Bank Muamalat Indonesia Tbk ("Bank", "BMI") juga turut memberikan kontribusi positif terhadap perekonomian Indonesia dengan mendukung program vaksinasi pemerintah dimana Bank menggelar vaksinasi gratis COVID-19 untuk karyawan, keluarga karyawan dan masyarakat umum. Pada saat yang sama, Bank melanjutkan kerja sama dengan nasabah yang terdampak pandemi terkait relaksasi restrukturisasi pembiayaan dan secara aktif mendukung inisiatif Pemulihan Ekonomi Nasional pemerintah.

Bank Muamalat terus menunjukkan komitmennya untuk memberikan dukungan kepada nasabah dan pemangku kepentingan lainnya, dengan mempercepat transformasi transaksi perbankan melalui sistem digital. Dalam kondisi seperti itu, kemampuan sistem digital Bank Muamalat yang mumpuni memberikan dampak positif bagi kinerja Bank serta menciptakan nilai tambah bagi seluruh pemangku kepentingan.

## PERUBAHAN PENTING

Pada tahun 2021 telah terjadi perubahan penting pada Bank Muamalat. Upaya Bank memperkuat permodalan telah berhasil direalisasikan dengan masuknya Badan Pengelola Keuangan Haji (BPKH) sebagai investor strategis pada tanggal 16 November 2021 yang mengakibatkan beralihnya Pemegang Saham Pengendali Bank dari sebelumnya Islamic Development Bank (IsDB) kepada Badan Pengelola Keuangan Haji (BPKH).

Seiring dengan terjadinya perubahan itu, BPKH sebagai Pemegang Saham Pengendali telah menyuntikkan modal *Tier-1* sebesar Rp1 triliun melalui mekanisme Penambahan Modal dengan Hak Memesan Efek Terlebih Dahulu VI (PMHMETD VI). Suntikan modal tersebut telah meningkatkan rasio kecukupan modal (CAR) Bank, dari sebelumnya 15,21% menjadi 23,76%.

Selanjutnya pada awal tahun 2022, akan ada injeksi modal sebesar Rp2 triliun sebagai *Tier-2* melalui penerbitan sukuk subordinasi. Suntikan dana tersebut akan memperkuat struktur permodalan Bank sekaligus fasilitas untuk ekspansi usaha. Kehadiran BPKH diharapkan mampu memberikan energi dan harapan baru bagi Bank, karena terciptanya

government to limit public activities triggering a decline in various domestic economic activities. The government responded to this by issuing the policy of Enforcement of Community Activity Restrictions (PPKM), a low-interest rate policy and a mass vaccination program. This had a positive impact on Indonesia's economy, which gradually improved in the second quarter of 2021.

PT Bank Muamalat Indonesia Tbk ("Bank", "BMI") also contributed positively to the Indonesian economy by supporting the government's vaccination program. The Bank held free COVID-19 vaccinations for its employees, their families, and the general public. The Bank also continued to assist customers affected by the pandemic through finance restructuring and actively supporting the government's National Economic Recovery initiative.

Bank Muamalat continues to demonstrate its commitment to providing support to customers and other stakeholders by accelerating the transformation to digital banking transactions. Bank Muamalat's digital system has had a positive impact on the Bank's performance and has created added value for all stakeholders.

## IMPORTANT CHANGES

In 2021, there were some significant changes at Bank Muamalat. The Bank strengthened its capital with the admission of the Hajj Fund Management Agency (BPKH) as a strategic investor on November 16, 2021, which resulted in the change of the Bank's Controlling Shareholder from the Islamic Development Bank (IsDB) to the Hajj Fund Management Agency (BPKH).

Along with this change, BPKH, as the Controlling Shareholder, injected Tier-1 capital of Rp1 trillion into the Bank through the capital addition mechanism with Pre-emptive Rights VI (PMHMETD VI). The capital injection increased the Bank's capital adequacy ratio (CAR) from 15.21% to 23.76%.

Furthermore, at the beginning of 2022, capital injection amounted to Rp2 trillion as Tier-2 through the issuance of subordinated sukuk. The injection of funds will strengthen the Bank's capital structure and facilities for business expansion. The presence of BPKH is expected to provide new energy and hope for the Bank due to the creation of a

landasan keuangan yang lebih kuat dan sehat. Bank akan lebih leluasa dalam menyalurkan pembiayaan, sehingga berpeluang mendorong perbaikan rentabilitas Bank. Tak kalah pentingnya, perubahan yang terjadi pada Bank di tahun 2021 ini dapat memberikan manfaat bagi masyarakat sejalan dengan meningkatnya kemampuan Bank.

## KINERJA USAHA TAHUN 2021

### Kendala dan Tantangan

Sepanjang tahun 2021, Bank telah memetakan sejumlah kendala yang dihadapi. Kondisi pandemi misalnya, telah memberikan dampak yang sangat luas. Dari meningkatnya pengangguran hingga menurunnya kemampuan banyak korporasi serta usaha kecil dan menengah. Tak sedikit pula yang pailit, sehingga meningkatkan risiko pembiayaan.

Upaya pemerintah menekan penyebaran pandemi melalui pembatasan sosial seperti PPKM berimplikasi pada penurunan aktivitas ekonomi. Kebijakan ini berperan dalam perlambatan pertumbuhan ekonomi pada kuartal ketiga yang menurun menjadi 3,51% dari kuartal sebelumnya yaitu 7,07%.

Pandemi COVID-19 berdampak pada industri perbankan Indonesia. Terganggunya aktivitas ekonomi domestik mengakibatkan permintaan pembiayaan yang melemah. Pada saat bersamaan, tingkat permintaan terhadap pembiayaan perbankan juga melemah, walaupun suku bunga telah turun tajam. Dunia usaha lebih berkonsentrasi menjaga stabilitas bisnis ketimbang melakukan ekspansi. Sementara nasabah individu lebih bertendensi menabung daripada konsumsi.

Kebijakan pembatasan sosial juga mengubah perilaku masyarakat dalam melakukan transaksi perbankan. Dari sebelumnya interaksi fisik menjadi virtual, demikian pula dengan penyelesaian pembayarannya. Kondisi tersebut mendorong Bank Muamalat untuk meninjau dan mempercepat inisiatif Teknologi Informasi dan digital untuk mengoptimalkan layanan dan kenyamanan nasabah dalam bertransaksi di tengah pandemi.

### Strategi dan Kebijakan Strategis

Di tengah pandemi COVID-19 yang masih berlangsung, Bank Muamalat memastikan telah merumuskan strategi dan kebijakan untuk merespons kondisi yang ada. Manajemen Bank Muamalat menjabarkan strategi dan kebijakan tersebut dalam rencana Bisnis Bank (RBB) tahun 2021 yang telah disampaikan kepada pemegang saham Perseroan pada Rapat Umum Pemegang Saham Tahunan (RUPST).

stronger and more sound financial foundation. As a result, the Bank will be more flexible in channeling financing, which is likely to improve its profitability. Equally important, the changes that occurred at the Bank in 2021 can benefit the community in line with the increasing capacity of the Bank.

## BUSINESS PERFORMANCE IN 2021

### Impediments and Challenges

Throughout 2021, the Bank faced a number of challenges. The pandemic had an extensive impact on the world, from rising unemployment to the declining performance of many corporations and small and medium enterprises. Many businesses went bankrupt, increasing the risk associated with financing.

The government's efforts to suppress the spread of the pandemic through social restrictions such as PPKM reduced economic activity. This policy played a role in the slowdown of economic growth in the third quarter of the year, which decreased to 3.51% from 7.07% the previous quarter.

The COVID-19 pandemic has had an adverse impact on the Indonesian banking industry. Disruptions to domestic economic activity resulted in weak financing demand. Demand for bank financing also weakened, even though interest rates fell sharply. This is because the business world was focused on maintaining business stability rather than expanding. Meanwhile, individual customers tended to save money rather than spend.

The social restriction policy has also shifted people's preference from physical to virtual transactions and payment settlements. This prompted Bank Muamalat to review and speed up the development of Information Technology and digital initiatives to optimize customer service and convenience in making banking transactions in the midst of a pandemic.

### Strategic Plans and Policies

Bank Muamalat has formulated strategies and policies to respond to the ongoing COVID-19 pandemic. The management of Bank Muamalat has outlined the strategies and policies in the Bank's 2021 Business Plan (BBP), which was submitted to the Company's shareholders at the Annual General Meeting of Shareholders (AGMS).

Bank Muamalat terus melanjutkan kebijakan *turnaround* yang telah ditetapkan, yaitu mencakup 3 (tiga) prioritas inisiatif, yaitu: *business turnaround*, *rebuild financing portfolio*, dan *digital transformation*.

Bank Muamalat menerapkan strategi penyaluran pembiayaan yang hati-hati. Bank juga melakukan restrukturisasi pembiayaan bagi nasabah yang terdampak pandemi. Hal itu sejalan dengan kebijakan stimulus yang diterapkan oleh Pemerintah dan Otoritas Jasa Keuangan (OJK) di mana relaksasi restrukturisasi kredit COVID-19 diperpanjang sampai dengan 31 Maret 2023. Upaya tersebut sangat membantu dunia usaha dari dampak pandemi COVID-19 seperti ancaman gagal bayar yang dapat berdampak lebih serius terhadap bisnis, sekaligus menjaga stabilitas Bank Muamalat.

Dari sisi pembiayaan baru, Bank terus memberikan beragam kemudahan kepada nasabah. Di antaranya, menawarkan tingkat margin/bagi hasil yang menarik, sehingga dunia usaha diharapkan segera kembali pulih dan pada akhirnya memberikan dampak positif kepada perbankan, termasuk Bank Muamalat.

Bank Muamalat juga melakukan transformasi struktural model bisnis dengan mengakselerasi layanan digital. Pandemi terbukti telah mempercepat terjadinya pergeseran perilaku nasabah dalam bertransaksi, baik dalam melakukan pembayaran (*payment*) maupun untuk konsumsi, yang beralih kepada digital. Bank terus meninjau dan menyempurnakan proses layanan digitalnya secara menyeluruh untuk mempercepat waktu layanan sesuai dengan kebutuhan nasabah.

Bersamaan dengan pengembangan produk dan layanan keuangan digital, BMI ikut berupaya mendorong peningkatan inklusi keuangan syariah. Inisiatif ini sejalan dengan prioritas kemitraan global untuk inklusi keuangan G20, yang fokus pada inklusi keuangan digital dan keuangan usaha kecil menengah (UKM).

Selain itu, Bank juga merealisasikan kebijakan strategis *income initiative* dalam rangka meningkatkan pendapatan Bank, baik berupa *profit margin* ataupun *fee-based income*. Untuk meningkatkan *fee-based income*, Bank telah mengulirkan sejumlah program terkait *trade finance*, *bancassurance*, dan lain-lain.

Kebijakan strategis lain, misalnya *margin expenses initiative*. Kebijakan ini merupakan program untuk menekan laju pertumbuhan biaya, dengan menurunkan *cost of fund*, implementasi *new sales culture* serta peningkatan dana murah (CASA).

Bank Muamalat's turnaround policy includes 3 (three) priority initiatives, namely: business turnaround, rebuilding the financing portfolio, and digital transformation.

Bank Muamalat has a prudent financing strategy. The bank has also restructured financing for customers affected by the pandemic. This is in line with the stimulus policy implemented by the Government and the Financial Services Authority (FSA) that extended the relaxation of the COVID-19 credit restructuring until 31 March 2023. This has helped shield businesses from the impact of the COVID-19 pandemic, most notably from the threat of default, which had the potential to seriously affect the business community. It also helped to maintain the stability of Bank Muamalat.

In terms of new financing, the Bank continues to provide various services to customers, such as attractive margin/sharing rates to enable businesses to recover and ultimately have a positive impact on banks, including Bank Muamalat.

Bank Muamalat has also carried out a structural transformation of its business model by accelerating digital services. The pandemic has accelerated the shift in customer behavior to digital banking transactions. The Bank continues to review and refine its entire digital service process to speed up service times.

Along with the development of digital financial products and services, BMI also strives to increase Islamic financial inclusion. This initiative is in line with the priorities of the G20 global partnership for financial inclusion, which focuses on digital financial inclusion and small and medium enterprise (SME) financing.

In addition, the Bank has also implemented a strategic income initiative policy in order to increase its income, either in the form of profit margin or fee-based income. To increase fee-based income, the Bank has rolled out a number of programs related to trade finance, bancassurance, and others.

Another strategic policy is the margin expenses initiative. This policy is a program to reduce the cost growth rate, by reducing the cost of funds, implementing a new sales culture and increasing low-cost funds (CASA).

## Peran Direksi dalam Perumusan Strategi dan Memastikan Implementasi Strategi

Dalam merumuskan strategi Bank, Direksi bertanggung jawab penuh atas penetapan arah dan prioritas strategis Bank serta menerapkan prinsip tata kelola perusahaan pada setiap kegiatan usaha Bank di semua lini organisasi untuk memastikan bahwa penerapan strategi berjalan dengan benar dan sesuai dengan visi dan misi Bank Muamalat.

Direksi membentuk unit kerja dan komite sebagai perpanjangan tangan Direksi untuk menyampaikan strategi perusahaan. Di antaranya adalah Komite Aset dan Liabilitas atau *Asset and Liability Committee* (ALCO). Komite ini membantu pelaksanaan tugas Direksi dalam memelihara struktur neraca yang kuat. Dari analisis serta perumusan kebijakan dan strategi, pengambilan keputusan, pengawasan dalam pengelolaan risiko likuiditas, risiko pasar dan permodalan sejalan dengan peraturan Bank Indonesia atau Otoritas Jasa Keuangan maupun strategi bisnis Bank. Selain itu, Bank memaksimalkan fungsi *Business Finance & Planning* yang mendukung Direksi dalam merumuskan rencana bisnis Bank serta memantau pelaksanaannya dengan menyusun laporan realisasi dibandingkan rencana bisnis.

Untuk mengevaluasi pelaksanaan strategi dan kebijakan strategis, Direksi juga menerima laporan secara berkala dari komite-komite yang dibentuk terkait dengan realisasi di bidang operasional untuk kemudian dilakukan evaluasi dan pengembangan lebih lanjut. Direksi juga menindaklanjuti temuan audit dan rekomendasi audit dari audit internal Bank, rekomendasi auditor eksternal dan hasil pengawasan yang dilakukan oleh Otoritas Jasa Keuangan (OJK), dan /atau otoritas lainnya.

## Kinerja Usaha

Pada triwulan III-2021, situasi pandemi kembali terkendali, setelah sebelumnya sempat terjadi gelombang kedua akibat varian virus baru. Aktivitas sosial dan ekonomi masyarakat bergerak, seperti ditunjukkan melalui tingkat konsumsi rumah tangga yang tumbuh positif. Kondisi ini sangat mendukung BMI yang selalu berusaha untuk mencapai target yang telah ditetapkan di tengah kondisi perekonomian yang bergerak dinamis.

Dengan penerapan strategi yang tepat dalam menghadapi kondisi yang dinamis, Bank berhasil membukukan sejumlah pencapaian yang baik. Total aset meningkat sebesar 14,94% dari Rp51,24 triliun pada tahun 2020 menjadi Rp58,90 triliun pada Desember 2021, namun lebih rendah dari target yang ditetapkan.

Dari sisi pembiayaan, gelombang pandemi COVID-19 memberikan dampak bagi Bank Muamalat dalam proses penyaluran pembiayaan, di mana dampak

## The Role of the Board of Directors in Strategy Formulation and Ensuring Strategy Implementation

The Board of Directors is responsible for determining the strategic direction and priorities of the Bank as well as applying the principles of corporate governance in every business activity and all lines of the organization to ensure that the implementation of the strategy is carried out in accordance with the Bank's vision and mission.

The Board of Directors has established work units and committees to convey the company's strategy. Among them is the Asset and Liability Committee (ALCO). This committee assists the Board of Directors in maintaining a strong balance sheet structure. Its duties include the analysis and formulation of policies and strategies, decision making, supervision of managing the liquidity risk, market risk and capital in line with Bank Indonesia and the Financial Services Authority regulations, as well as the Bank's business strategy. In addition, the Bank's Business Finance & Planning function supports the Board of Directors in formulating the Bank's business plan and monitoring its implementation through target realization reports.

To evaluate the implementation of the strategic plan and policies, the Board of Directors also receives regular reports on operational realization from the established committees. In addition, the Board of Directors also follows up audit findings and audit recommendations from the Bank's internal audit, recommendations from external auditors and the results of the supervision carried out by the Financial Services Authority (FSA), and/or other authorities.

## Business Performance

In the third quarter of 2021, the pandemic was again under control after the second wave due to a new virus variant. As a result, the social and economic activities of the community were back on track, as indicated by the positive growth in household consumption. This condition was very supportive to BMI which always strives to achieve targets that have been set amidst dynamic movement of economic condition.

Despite the challenges, the Bank's strategy resulted in a number of positive achievements. The total assets increased by 14.94% from Rp51.24 trillion in 2020 to Rp58.90 trillion in December 2021. Although this was still lower than the pre-determined target.

The COVID-19 pandemic impacted Bank Muamalat's financing distribution process, forcing the Bank to be more selective when disbursing financing. In 2021, in a series

dari pandemi ini memaksa Bank untuk lebih selektif dalam menyalurkan pembiayaan. Di tahun 2021, dalam rangkaian aksi korporasi untuk memperbaiki posisi keuangannya, Bank juga telah melakukan kerjasama pengelolaan aset berkualitas rendah sebesar Rp10 triliun yang dilakukan dengan PT Perusahaan Pengelola Aset (Persero). Akibatnya pada tahun 2021, pembiayaan Bank mengalami penurunan menjadi Rp18,04 triliun, dibandingkan tahun sebelumnya yang berjumlah Rp29,08 triliun. Pencapaian tersebut masih lebih rendah dari target yang ditetapkan sebesar Rp22,08 triliun. Penyaluran pembiayaan yang masih di bawah target ikut mempengaruhi perolehan laba sebelum pajak Bank Muamalat yang sebesar 48% atau Rp13 miliar dari target Rp25 miliar. Kondisi ini dikarenakan Bank berupaya menjaga kualitas pembiayaan agar tetap sehat, termasuk pemulihan pembiayaan berkualitas rendah. Situasi tersebut memberikan pengaruh terhadap penyaluran pembiayaan karena Bank menjadi lebih selektif dan penyaluran pembiayaan difokuskan pada jenis dan target yang memiliki bobot risiko rendah.

Realisasi rasio KPMM per Desember 2021 tercatat sebesar 23,76% di atas ketentuan Otoritas Jasa Keuangan, namun lebih rendah dari target yang ditetapkan sebesar 30,13%. Hal ini disebabkan oleh adanya pergeseran penyelesaian penerbitan Sukuk Subordinasi yang rampung pada triwulan 1 2022.

Sedangkan untuk menjaga kualitas pembiayaan secara keseluruhan, Bank telah bekerja sama dengan mitra strategis untuk pengelolaan aset berkualitas rendah sebesar Rp10 triliun. Langkah aksi korporasi tersebut membuat rasio *non performing financing* (NPF) Bank di akhir tahun 2021 turun signifikan menjadi 0,08% lebih baik dibandingkan target. *Return on Asset* (ROA) Bank Muamalat pada bulan Desember 2021 tercatat sebesar 0,02% atau lebih rendah dari target yang ditetapkan sebesar 0,04%. Hal serupa juga terjadi pada Rasio *Return on Equity* (ROE) yang tercatat sebesar 0,20% atau lebih rendah dari target yang ditetapkan sebesar 0,42%.

Sementara kinerja Dana Pihak tumbuh 13,16% menjadi Rp46,87 triliun dibandingkan tahun 2020 yang berjumlah Rp41,25 triliun atau mencapai 103,64% dari target yang ditetapkan sebesar Rp45,22 triliun. Hal ini sejalan dengan perubahan tendensi masyarakat untuk menabung selama pandemi COVID-19.

Sepanjang tahun buku 2021, Bank membukukan pendapatan operasional lainnya sebesar Rp584 miliar, lebih tinggi 101,56% dibandingkan tahun sebelumnya yang Rp575 miliar. Rasio BOPO tercatat 99,29% atau lebih tinggi jika dibandingkan target sebesar 98,49%. Ke depannya, Bank berupaya untuk terus mengoptimalkan Pendapatan Operasional dengan beberapa inisiatif seperti upaya optimalisasi pendapatan berbasis layanan (*fee-based income*), melakukan upaya efisiensi dan peningkatan produktivitas.

of corporate actions to improve its financial position, the Bank has also collaborated in managing low-quality assets of Rp10 trillion with PT Perusahaan Pengelola Aset (Persero). As a result, in 2021, the Bank's financing decreased to Rp18.04 trillion from Rp29.08 trillion the previous year. This achievement was lower than the Rp22.08 trillion target. The below-the-target disbursement of financing affected Bank Muamalat's profit before tax which was 48% (or Rp13 billion) lower than the set target of Rp25 billion. This was due to the Bank's efforts to maintain the quality of financing to ensure financial soundness and focus on the recovery of low quality financing. This has had an impact on the distribution of financing, making the Bank more selective with a focus on the distribution of financing with low risk.

The realization of the Bank's CAR as of December 2021 was 23.76%. This was above the requirement set by the Financial Services Authority, but lower than the set target of 30.13%. This was due to a shift in the completion of the issuance of Subordinated Sukuk which was completed in the 1<sup>st</sup> quarter of 2022.

Meanwhile, to maintain the overall quality of financing, the Bank collaborated with strategic partners to manage low-quality assets in the amount of Rp10 trillion. This corporate action move resulted in the significant decrease of non-performing financing (NPF) ratio to 0.08% in 2021, better than the target. Bank Muamalat's Return on Assets (ROA) in December 2021 was recorded at 0.02%, lower than the set target of 0.04%. The Return on Equity Ratio (ROE) was recorded at 0.20%, lower than the set target of 0.42%.

Meanwhile, the Bank's Third Party Funds grew 13.16% to Rp46.87 trillion from Rp41.42 trillion in 2020, reaching 103.64% of the target of Rp45.22 trillion. This was in line with the people's tendency to save more during the COVID-19 pandemic.

Throughout the 2021 financial year, the Bank recorded an other operating income of Rp584 billion, a 101.56% increase from Rp575 billion in 2020. The BOPO ratio was recorded at 99.29%, higher than the target of 98.49%. Going forward, the Bank will strive to continue to optimize its Operating Income with several initiatives such as optimizing fee-based income, carrying out efficiency efforts and increasing productivity.

## ANALISIS PROSPEK USAHA 2021 DAN HAL PENTING YANG DIPERKIRAKAN TERJADI PADA MASA MENDATANG

### Prospek Usaha

Bank memperkirakan kondisi perekonomian 2022 akan lebih baik dibandingkan kondisi tahun 2021. Optimisme ini sejalan dengan proyeksi Bank Indonesia bahwa perekonomian nasional akan tumbuh di kisaran 4,7%-5,5%. Perbaikan tersebut didorong oleh berlanjutnya perbaikan ekonomi global yang berdampak pada kinerja ekspor yang tetap kuat, serta meningkatnya permintaan domestik dari kenaikan konsumsi dan investasi sejalan dengan kondisi pandemi yang mereda.

Proyeksi tersebut didukung oleh langkah-langkah yang akan diambil oleh Bank Indonesia melalui 5 (lima) instrumen kebijakan, yaitu: kebijakan moneter, kebijakan makroprudensial, kebijakan sistem pembayaran, kebijakan pengembangan pasar uang, dan kebijakan UMKM dan ekonomi keuangan syariah.

Pemerintah juga yakin bahwa kinerja perekonomian akan jauh lebih baik. Seperti tertuang dalam Undang-Undang No. 6 tahun 2021 tentang Anggaran Pendapatan dan Belanja Negara (APBN) Tahun Anggaran 2022, Pemerintah memproyeksikan pertumbuhan ekonomi nasional bisa mencapai 5,2%.

Seiring dengan optimisme tersebut, BMI yakin pertumbuhan pembiayaan perbankan pada tahun 2022 akan lebih baik dibanding tahun 2021. Melimpahnya likuiditas perbankan akan mengalir deras untuk memenuhi potensi terjadinya kenaikan permintaan terhadap pembiayaan yang akan pulih bersamaan dengan makin terkendalinya pandemi.

Sinyal perbaikan penyaluran pembiayaan sudah ada sejak November 2021. Penyaluran kredit perbankan mengalami pertumbuhan positif pada seluruh segmen, baik kredit investasi, modal kerja, maupun konsumsi. Penyaluran pembiayaan perbankan syariah juga menunjukkan pertumbuhan melampaui periode satu tahun sebelumnya. Pertumbuhan tersebut yang meningkat sebesar 7,86% (yoy) melampaui penyaluran kredit dan pembiayaan perbankan nasional yang tumbuh sebesar 3,26% (yoy).

Dengan demikian, Bank memandang industri perbankan akan tumbuh pada tahun 2022 karena jasa keuangan merupakan salah satu industri yang tetap memiliki laju pertumbuhan positif selama pandemi COVID-19 yang berlangsung sejak tahun 2020. BMI telah siap menghadapi perkembangan positif yang akan terjadi pada tahun 2022, apalagi mengingat posisi permodalan Bank yang semakin kuat. BMI akan lebih leluasa untuk berinovasi dan melakukan ekspansi pada tahun depan.

## ANALYSIS OF BUSINESS PROSPECTS IN 2022

### Business Prospects

The Bank estimates that the economic conditions in 2022 will be better than those in 2021. This optimism is in line with Bank Indonesia's projection that the national economy will grow in the range of 4.7%-5.5%. This projection is driven by the continued improvement of the global economy that has increased export performance, and improved domestic consumption and investment in line with the easing of the pandemic.

This projection is supported by Bank Indonesia through 5 (five) policy instruments, namely: monetary policy, macroprudential policy, payment system policy, money market development policy, MSME policy and Islamic finance economy.

The government also believes that economic performance will be much better in 2022. As stated in Law No. 6 of 2021 concerning the State Revenue and Expenditure Budget (APBN) for the Fiscal Year 2022, national economic growth in 2022 might reach 5.2%.

Along with this optimism, BMI believes that bank financing growth in 2022 will be better than 2021. The abundance of banking liquidity will flow rapidly to meet the demand for financing, which will recover along with the increasingly controlled pandemic.

Signals of the improvement in financing distribution could be seen since November 2021. Bank lending has experienced positive growth in all segments, including investment credit, working capital, and consumption. The distribution of Islamic banking financing has also shown growth, increasing by 7.86% (yoy). This growth surpassed the national banking credit distribution and financing, which grew by 3.26% (yoy).

The Bank believes that the banking industry will grow in 2022 because financial services continued to experience positive growth during the COVID-19 pandemic. BMI is ready to take advantage of the positive developments that will occur in 2022, especially considering the Bank's increasingly strong capital position. As a result, BMI will be more flexible to innovate and expand next year.

## Hal-hal Penting yang Diperkirakan Terjadi pada Masa Mendatang

Proyeksi pertumbuhan ekonomi oleh Bank Indonesia dan pemerintah yang kembali berada di atas 5% didasari oleh makin terkendalinya kasus COVID-19. Perekonomian diharapkan segera pulih dan tumbuh.

Kendati demikian, BMI menyadari bahwa ke depan, masih ada tantangan yang harus diantisipasi. Dalam jangka pendek misalnya, terkait dengan ketidakpastian berakhirnya pandemi mengingat tetap ada potensi varian baru, seperti lahirnya varian Delta dan Omicron yang terjadi pada tahun 2021. Kondisi pandemi tersebut akan berpengaruh besar bagi proses pemulihan ekonomi, begitu juga dengan sektor usaha perbankan.

Selain itu, terdapat sejumlah tantangan struktural yang masih harus dihadapi. Skala usaha BMI serta kemampuannya bersaing dalam industri perbankan secara umum masih perlu terus ditingkatkan dan diperluas.

Selain itu, kian berkembangnya ekonomi digital secara pesat telah menjadi perhatian serius industri keuangan. Kesadaran terhadap teknologi pada industri perbankan berkembang sangat pesat selama masa pandemi. Hal itu, antara lain dipicu oleh kebiasaan nasabah yang mengalami pergeseran dari biasanya transaksi secara fisik (*offline*) menjadi lebih banyak menggunakan *digital banking*.

BMI tentu saja akan merespons kondisi tersebut dengan inovasi pada aspek digital, seperti yang telah dilakukan hingga saat ini. Dari perkembangan terakhir, yaitu kemampuan Bank menyediakan layanan pembukaan rekening secara *online*, akan dilanjutkan dengan tawaran produk dan layanan baru untuk memenuhi kebutuhan nasabah yang beragam dan terus berkembang.

Pesatnya perkembangan keuangan digital itu ikut mengubah perilaku ekonomi masyarakat, sehingga berpengaruh terhadap ekspektasi pada produk dan layanan perbankan yang sesuai. Hal ini juga menjadi tantangan bagi Bank, termasuk tingkat literasi masyarakat terhadap perbankan syariah yang masih perlu ditingkatkan.

Berbagai tantangan tersebut perlu direspons secara cermat dan tepat melalui kolaborasi yang erat oleh seluruh pemangku kepentingan. Penguatan di lingkungan internal juga akan terus dilakukan agar Bank semakin mudah beradaptasi terhadap perubahan.

## Significant Future Events

The projection by Bank Indonesia that economic growth in 2022 will be above 5% is based on the increasingly controlled COVID-19 cases. The economy is expected to recover and grow.

Nevertheless, BMI realizes that there are still many potential challenges. In the short term, for example, these are related to the uncertainty about the end of the pandemic considering that there is still a potential for new variants, as demonstrated by the emergence of the Delta and Omicron variants in 2021. The pandemic has had a major impact on the economic recovery process, as well as the banking business sector.

In addition, there are a number of structural challenges that still need to be addressed. The business scale of BMI and its ability to compete in the banking industry still needs to be improved.

In addition, the rapid development of the digital economy has become a serious concern for the financial industry. Awareness of technology in the banking industry has been grown very rapidly during the pandemic. This was triggered by customers' habits, who shifted from making transactions at branches (*offline*) to using digital banking.

Of course, BMI will respond to these changes with digital innovations, as it has done so far. From the latest development, namely the Bank's ability to provide online account opening services, it will continue to release new product and service offerings to meet the diverse and growing needs of its customers.

The rapid development of digital finance has also changed people's economic behavior, thus affecting expectations about banking products and services. This has also presented a challenge for the Bank since the level of public literacy in Islamic banking still needs to be improved.

These challenges need to be addressed through close collaboration between all stakeholders. In addition, strengthening the internal environment of the Bank will also continue to be carried out so that the Bank can more easily adapt to changes.

## PENERAPAN TATA KELOLA PERUSAHAAN

BMI senantiasa berupaya meningkatkan implementasi prinsip-prinsip tata kelola perusahaan yang baik atau *Good Corporate Governance* (GCG) di lingkungan Bank secara berkelanjutan. Ikhtiar tersebut diawali oleh proses internalisasi di lingkungan Bank. Hal ini bertujuan agar semua unit di lingkungan organisasi Bank memiliki kesepahaman yang sama tentang pentingnya penerapan GCG.

Bank menyadari bahwa penerapan GCG yang konsisten dan kualitas kepatuhan Bank terhadap peraturan perundang-undangan yang terus terjaga secara penuh akan sangat mendukung pencapaian usaha Bank. Dewan Komisaris dan Direksi meyakini bahwa penerapan GCG secara baik dan konsisten juga mampu meningkatkan daya saing dan kinerja Bank serta kepercayaan dari seluruh pemangku kepentingan. Dengan keyakinan tersebut, Dewan Komisaris dan Direksi berkomitmen untuk terus menjaga tingkat kepatuhan dan pengembangan terhadap pelaksanaan GCG Bank secara berkesinambungan.

Dalam penerapan prinsip-prinsip GCG, Anggaran Dasar Perusahaan dan kebijakan GCG berperan sebagai pijakan dasar yang menjadi acuan bagi Insan BMI. Pedoman tersebut disusun dengan mengacu pada berbagai peraturan perundang-undangan yang relevan serta praktik terbaik di industri. Direksi terus berupaya menjaga dan meningkatkan penerapan prinsip-prinsip Tata Kelola Perusahaan yang Baik dan menyempurnakan implementasinya. Prinsip transparansi, akuntabilitas, responsibilitas, profesional dan kewajaran senantiasa menjadi pedoman *best practice* Bank dalam mengaktualisasikan bisnis syariah yang sehat dan berkesinambungan serta kompetitif dalam persaingan. Pada tahun 2021, Bank Muamalat Indonesia melakukan penilaian sendiri (*self-assessment*) pelaksanaan GCG secara individual dan konsolidasi dengan hasil peringkat 2 (dua) yang mencerminkan Manajemen Bank telah melakukan penerapan *Good Corporate Governance* yang secara umum baik. Hal ini tercermin dari penerapan atas prinsip-prinsip *Good Corporate Governance* yang memadai. Apabila terdapat kelemahan dalam penerapan prinsip GCG maka secara umum kelemahan tersebut kurang signifikan dan dapat diselesaikan dengan tindakan normal oleh manajemen Bank.

Salah satu komitmen Bank Muamalat untuk mendukung penerapan tata kelola perusahaan yang baik dan praktik bisnis yang beretika diwujudkan melalui *Whistleblowing System* (WBS), menindaklanjuti seluruh temuan dari audit internal, audit eksternal dan hasil pengawasan Otoritas Jasa Keuangan serta berupaya melakukan perbaikan berdasarkan rekomendasi yang diberikan.

## IMPLEMENTATION OF GOOD CORPORATE GOVERNANCE

BMI always strives to improve the implementation of the principles of Good Corporate Governance (GCG) in the Bank's environment. This effort was initiated by the internalization process within the Bank. This was done to ensure that all units within the Bank's organizational environment have the same understanding of the importance of implementing GCG.

The Bank realizes that the consistent implementation of GCG and the quality of the Bank's compliance with laws and regulations that are fully maintained will support the Bank's business. The Board of Commissioners and the Board of Directors believe that the implementation of good and consistent GCG is also able to improve the competitiveness and performance of the Bank as well as the trust of all stakeholders. With this belief, the Board of Commissioners and the Board of Directors are committed to continuing to maintain compliance and development of the Bank's GCG implementation.

BMI's implementation of GCG is based on the Company's Articles of Association and GCG policies. The Board of Directors continues to strive to maintain and improve the application of the Bank's Good Corporate Governance principles. In 2021, Bank Muamalat Indonesia conducted a self-assessment of the implementation of GCG individually and consolidated with a rating of 2 (two) which reflects that the Bank's Management has implemented Good Corporate Governance which is generally good. This is reflected in the adequate application of the principles of Good Corporate Governance. However, if there are weaknesses in applying GCG principles, they are generally not very significant and can be resolved by normal actions by the management of the Bank.

One of Bank Muamalat's commitments to supporting the implementation of good corporate governance and ethical business practices has been realized through the Whistleblowing System (WBS). The system is based on the findings of internal audits, external audits and the results of the supervision of the Financial Services Authority.

### Produk

Bank Muamalat membagi produk perbankan syariah ke dalam dua kategori besar yakni produk penghimpunan dana dan produk pembiayaan. Produk penghimpunan dana terdiri dari beragam produk yang disesuaikan dengan tujuan dan preferensi nasabah. Sementara itu, produk pembiayaan merupakan sarana untuk menyalurkan dana yang dihimpun oleh Bank dalam bentuk pembiayaan, baik untuk usaha produktif maupun untuk keperluan konsumtif.

Bank Muamalat juga melakukan penempatan dana berkerja sama dengan mitra strategis dengan melakukan pembiayaan *channelling* maupun *executing* melalui Lembaga Keuangan Mikro Kecil yaitu, BMT (Baitul Maal Wa-Tamwil), Bank Perkreditan Rakyat Syariah (BPRS) dan perusahaan pembiayaan. Dalam rangka menjaga posisi likuiditas jangka pendek, Perseroan juga melakukan penempatan dana pada bank lain serta pembelian surat-surat berharga berdasarkan prinsip syariah. Selain itu, Perseroan meningkatkan intensitas pembiayaan yang ditujukan pada pasar yang selama ini mempunyai kinerja pembiayaan yang baik dengan mengalokasikan porsi yang lebih besar kepada UMKM dalam realisasi portofolio pembiayaan. Adapun uraian dari produk penghimpunan dana dan produk pembiayaan diurai dalam tabel sebagai berikut:

### Products

Bank Muamalat divides its sharia banking products into two broad categories, namely fundraising products and financing products. Fundraising products consist of various products tailored to customer goals and preferences. Financing products are also the means for the bank to channel funds collected by the Bank in the form of financing, for productive businesses as well as for consumptive purposes.

Bank Muamalat also conducts fund placements in collaboration with strategic partners by conducting channeling and executing financing through Small Micro Financial Institutions, namely, BMT (Baitul Maal Wa-Tamwil), Sharia Rural Banks (BPRS) and financing companies. In order to maintain a short-term liquidity position, the Bank also places funds with other banks and purchases securities based on sharia principles. The Bank increases the intensity of financing aimed at markets that have had good financing performance by allocating a larger portion to MSMEs in the realization of the financing portfolio. The descriptions of fundraising products and financing products are described in the following table:

## Profile of Subsidiaries and Associates

Bank Muallamat Indonesia memiliki lima entitas anak yakni PT Al Ijarah Indonesia Finance (ALIF), Baitulmaal Muamalat, Dana Pensiun Lembaga (DPLK) Muamalat, Muamalat Institute, dan PT Syarikat Takaful Indonesia. Berikut ialah profil singkat dari masing-masing entitas anak tersebut:

### 1. PT AL IJARAH INDONESIA FINANCE (ALIF)

ALIF merupakan perusahaan keuangan syariah yang didirikan untuk memenuhi kebutuhan pembiayaan keuangan masyarakat Indonesia. Pada mulanya, ALIF ditujukan untuk melayani kebutuhan pembiayaan bagi komunitas bisnis Indonesia dan Asia Tenggara dengan menawarkan pembiayaan minimal sebesar Rp2 miliar per transaksi dan jasa konsultasi keuangan.

Namun sayangnya, krisis ekonomi global yang dimulai tahun 2010 lalu telah mendorong ALIF untuk mengubah fokus bisnis pada pembiayaan ritel. Selain untuk meningkatkan sumber pendanaan, fokus bisnis baru tersebut juga untuk mengambil manfaat dari pertumbuhan sektor konsumsi yang sangat besar di Indonesia dewasa ini dan di masa mendatang.

Kini, beragam jenis produk pembiayaan ditawarkan oleh ALIF, mulai dari pembiayaan komersial untuk investasi barang modal untuk keperluan usaha seperti mesin dan alat berat maupun pembiayaan konsumtif (ritel) seperti mobil dan sepeda motor. Semua produk pembiayaan tersebut mengacu pada prinsip keuangan syariah dengan menggunakan skema pembiayaan ijarah *muntahia bittamlik* (sewa dan beli), dan *murabahah* (jual dan beli). ALIF didirikan pada bulan November 2006 di Jakarta, ALIF memulai operasionalnya pada tanggal 27 Agustus 2007. Adapun modal awal yang disetorkan ialah sebesar Rp105 miliar, yang ditempatkan sama rata oleh tiga lembaga keuangan terkemuka Indonesia dan Timur Tengah, yaitu Bank Muamalat Indonesia, Bank Boubyan Kuwait, International Leasing & Investment Company (ILIC). Adapun saat ini pemegang saham utama dari PT Al Ijarah Indonesia Finance (ALIF) telah berubah dengan kepemilikan mayoritas adalah pemegang saham lokal.

Bank Muallamat Indonesia has five subsidiaries, namely PT Al Ijarah Indonesia Finance (ALIF), Baitulmaal Muamalat, Muamalat Pension Fund (DPLK), Muamalat Institute, and PT Syarikat Takaful Indonesia. The following is a brief profile of each of these subsidiaries:

### 1. AL-IJARAH INDONESIA FINANCE

ALIF is a sharia-based financial company that was established to meet the financial needs of the Indonesian people. Initially, its purpose was to serve the financing needs of the Indonesian and Southeast Asian business communities by offering a minimum financing of Rp2 billion per transaction and financial consulting services.

Unfortunately, the global economic crisis that hit in 2010 prompted ALIF to shift its business focus to retail financing. In addition to increasing funding sources, the new business focus is also aimed to take advantage of the huge growth in the consumption sector in Indonesia today and in the future.

Nowadays, ALIF offers various types of financing products, ranging from commercial financing to investing in capital goods for business purposes such as machinery and heavy equipment as well as consumer financings (retail) such as cars and motorbikes. All of these financing products refer to the principles of sharia finance using the ijarah *muntahia bittamlik* (lease and purchase) and *murabahah* (buy and sell) financing schemes. ALIF was established in November 2006 in Jakarta, ALIF started operations on August 27, 2007. The initial paid-up capital was Rp105 billion, which was placed equally by three leading Indonesian and Middle Eastern financial institutions, namely Bank Muamalat Indonesia, Bank Boubyan Kuwait, International Leasing & Investment Company (ILIC). tertinggi dibandingkan komponen lainnya. Pertumbuhan ekspor dan impor tersebut memberikan sinyal positif bahwa permintaan global mulai menguat dan pelaku usaha domestik mulai mempersiapkan diri untuk memasuki tahap pemulihan ekonomi.

Memasuki semester II-2021, penyebaran COVID-19 kembali menanjak akibat adanya varian baru, yaitu Delta. Hal ini menyebabkan kondisi ekonomi mengalami tekanan, disertai pelemahan nilai tukar rupiah terhadap dolar Amerika Serikat (AS).

Mengantisipasi penyebaran varian Delta yang begitu cepat, pemerintah menerapkan kebijakan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM) secara berjenjang berdasarkan wilayah. Kebijakan PPKM ini berhasil menekan penyebaran COVID-19, sehingga kegiatan sosial dan ekonomi masyarakat turut berangsur bangkit.

Pada triwulan III-2021, pertumbuhan ekonomi kembali bergerak positif sebesar 3,51% dibandingkan periode tahun sebelumnya. Dari sisi produksi, sektor usaha jasa kesehatan dan kegiatan sosial tumbuh sebesar 14,06% (yoy). Sedangkan dari sisi pengeluaran, komponen ekspor barang dan jasa juga tumbuh sebesar 29,16%.

Hingga akhir tahun, Badan Pusat Statistik (BPS) mencatat perekonomian Indonesia secara kumulatif sepanjang 2021 berhasil tumbuh positif mencapai 3,69%, atau lebih baik dibandingkan 2020 yang mengalami kontraksi 2,07%.

highest compared to other components. The growth in exports and imports indicated a positive signal that global demand is starting to strengthen and domestic businesses are preparing to enter the economic recovery phase.

Entering the second semester of 2021, the outbreak of COVID-19 increased due to the new variant, namely Delta. This led to pressure on the economic conditions, which was accompanied by the weakening of the rupiah exchange rates against the United States (US) dollar.

In anticipating the rapid outbreak of the Delta variant, the government implemented the Community Activity Restriction (PPKM) policy in stages based on region. The PPKM policy managed to suppress the outbreak of COVID-19, subsequently social and economic activities of the community also gradually recover.

In the third quarter of 2021, economic growth returned to a positive direction with 3.51%, compared to the period in the previous year. In terms of production, the health services and social activity sector grew by 14.06%. Furthermore, in terms of expenditure, the component of exports of goods and services also grew by 29.16%.

Up to the end of the year, the Central Statistics Agency (BPS) posted that during 2021, Indonesia's economy cumulatively managed to grow positively, reaching 3.69%, or better compared to 2020, which contracted by 2.07%.

# Tinjauan Industri Perbankan

## Banking Industry Review

Penguatan sinergi kebijakan nasional dalam mengatasi pandemi COVID-19 terus mengalami penguatan dalam rangka menjaga stabilitas dan mendorong perbaikan ekonomi nasional. Tingginya ekspektasi terhadap pemulihan ekonomi nasional mendorong tetap tumbuhnya pembiayaan di industri perbankan syariah. Penyaluran pembiayaan dari perbankan syariah terus meningkat menjadi sebesar Rp409,88 triliun atau tumbuh 6,75% (yoy), baik untuk kategori Bank Umum Syariah (BUS) maupun Unit Usaha Syariah (UUS).

Tumbuhnya pembiayaan yang disalurkan oleh perbankan syariah sampai dengan saat ini terbatas pada transaksi kegiatan dalam negeri dan belum secara aktif menggarap pasar untuk transaksi kegiatan ekspor impor. Pertumbuhan pembiayaan syariah tertinggi masih tercatat dari sektor lain-lain yang didorong oleh penyaluran pembiayaan konsumsi untuk subsektor rumah tangga, diikuti oleh sektor perdagangan.

Perseroan optimis proyeksi usahanya akan berjalan lebih baik dibandingkan tahun 2021, hal itu dilihat dari beberapa indikator ekonomi Indonesia. Stabilitas makroekonomi juga terjaga dengan inflasi yang diperkirakan terkendali pada kisaran  $3\pm 1\%$  serta nilai tukar rupiah yang akan bergerak stabil dan berpotensi menguat. Stabilitas eksternal diestimasikan terjaga, dengan surplus neraca pembayaran didukung defisit transaksi berjalan yang rendah di sekitar

The strengthening of national policy synergies in overcoming the COVID-19 pandemic continues to be strengthened in order to maintain stability and encourage national economic improvement. High expectations for national economic recovery encouraged a continued growth in the sharia banking industry. Financing disbursements from sharia banking continued to increase to Rp409.88 trillion, or a growth of 6.75% (yoy), both in the category of Sharia Commercial Banks (BUS) and Sharia Business Units (UUS).

The growth of disbursed financing by sharia banking is currently limited to domestic activity transactions and has not actively developed on the market of export and import activity transactions. The highest growth for sharia financing is still posted from other sectors, which is driven by the disbursement in consumption financing for the household sub-sector, followed by the trade sector.

The company is optimistic that its business projections will perform better than in 2021, this is evidenced from several Indonesian economic indicators. Macroeconomic stability is also maintained with inflation predicted to be under control in the range of  $3\pm 1\%$  and the rupiah exchange rate, which will have a stable movement with the potential to strengthen. External stability is estimated to be maintained, with a balance of payments surplus supported by a low current

1,0%-2,0% PDB. Stabilitas sistem keuangan juga semakin membaik, dengan rasio permodalan yang tinggi, NPL yang rendah, serta pertumbuhan DPK dan pembiayaan yang masing-masing meningkat ke sekitar 7%-9% pada 2021 secara nasional. Perseroan memperkirakan kondisi perekonomian 2022 akan membaik dibandingkan ekonomi Indonesia sampai dengan tahun 2021, yang mengalami pertumbuhan sekitar 3,5%-4,0%.

Perseroan memandang industri perbankan akan tetap akan tumbuh pada tahun 2022 karena industri perbankan merupakan salah satu industri yang tetap memiliki laju pertumbuhan PDB positif selama pandemi COVID-19 berlangsung di tahun 2020 dan 2021. Walaupun laju pertumbuhan PDB dari sektor Jasa Keuangan dan Asuransi hanya sebesar 1,03% pada tahun 2020 dan cenderung menurun dibandingkan dengan pertumbuhan kumulatif tahun sebelumnya namun pertumbuhannya jika dibanding sektor usaha lainnya lebih baik karena masih memberikan kontribusi pertumbuhan positif. Peningkatan didukung dari peningkatan *flow* hasil investasi asuransi jiwa, adanya kenaikan penghimpunan dana pihak ketiga serta penurunan beban klaim/manfaat produk asuransi sosial.

account deficit in the range of 1.0%-2.0% of GDP. The stability of the financial system has also improved, with a high capital ratio, low NPL, and growth in deposits and financing, each of which increased to 7%-9% in 2021 nationally. The company estimates that the economic conditions in 2022 will improve compared to the Indonesian economy until 2021, which experienced a growth of around 3.5%-4.0%.

The Company assesses that the banking industry will continue to grow in 2022, given that the banking industry is one of the industries that will continue to have a positive GDP growth rate during the COVID-19 pandemic in 2020 and 2021. Although the GDP growth rate of the Financial Services and Insurance sectors is only posted at 1.03% in 2020 with the tendency to decrease compared to the cumulative growth in the previous year, its growth compared to other business sectors is better, as it still contributes to positive growth. The increase was supported by an increase in the flow of life insurance investment returns, an increase in the collection of third-party funds and a decrease in the expense of claims/benefits of social insurance products.

## Strategi Tahun 2021

Bank Muamalat Indonesia melakukan sejumlah strategi untuk mendorong kinerja segmen *treasury* yang mencakup:

1. Melayani jual beli sukuk *retail* dan sukuk pemerintah mata uang IDR dan USD untuk nasabah individu dan korporasi sebagai pilihan investasi.
2. Melayani transaksi *forex* baik *tod tom spot* dan juga *hedging* dalam berbagai mata uang.
3. Meningkatkan kerja sama *cross selling* dengan produk bank lainnya, baik *wholesale* maupun *retail*.
4. Melakukan pembelian sukuk untuk portofolio banking yang memberikan imbal hasil yang optimal.
5. Mengoptimalkan cabang Kuala Lumpur dalam memberikan layanan transaksi *foreign exchange*.

## Kinerja

Volume transaksi *forex* nasabah pada tahun 2021 melambat. Per 31 Desember 2021, volume *forex* sebesar USD742 juta, menurun 11,57% dari posisi tahun 2020 yang sebesar USD97,19 juta. Penurunan volume *forex* disebabkan oleh perokonomian selama tahun 2021 masih belum pulih akibat pandemic COVID-19, kebutuhan penggunaan mata uang asing juga mengalami penurunan.

Adapun volume transaksi sukuk nasabah yang pada tahun 2021 tercatat sebesar Rp119,86 miliar, meningkat 68% atau Rp48,66 miliar dari Rp71,20 miliar pada tahun 2020. Kenaikan volume sukuk nasabah ini dipicu adanya peningkatan layanan jual beli sukuk nasabah, tidak hanya untuk sukuk ritel tetapi juga untuk sukuk pemerintah dengan mata IDR dan USD. Nasabah Bank Muamalat Indonesia merasa perlu melakukan pembelian ke sukuk sebagai bagian dari diversifikasi investasinya, terutama di saat pandemi COVID-19 yang belum usai.

## 2021 Strategy

Bank Muamalat Indonesia conducts a number of strategies to boost the performance of the treasury segment, which includes:

1. Serving trade of retail and government sukuk in IDR and USD currency for individual and corporate customers as investment option.
2. Serving *forex* transactions, both *tod tom spot* and also *hedging* in various currencies.
3. Increasing the *cross selling* cooperation with other Banking products, both *wholesale* or *retail*.
4. Purchasing sukuk for banking portfolios that provide optimal return.
5. Optimizing Kuala Lumpur branch in providing foreign exchange transactions services.

## Performance

The volume of customer *forex* transactions in 2021 slowed down. As of 31 December 31, 2021, *forex* volume amounted to USD742 million, a decrease of 11.57% compared to the 2020 position, which amounted to USD97.19 million. The decline in *forex* volume was due to the economy during 2021 that has not recovered due to the COVID-19 pandemic, which reduced the need for the use of foreign currencies.

The volume of customer sukuk transactions in 2021 was posted at Rp119.86 billion, an increase of 68% or Rp48.66 billion from Rp71.20 billion in 2020. The increase in customer sukuk volume was driven by an increase in customer sukuk trading services, not only for retail sukuk but also for government sukuk denominated in IDR and USD. Bank Muamalat Indonesia customers feel the need to make sukuk purchases as part of their investment diversification, especially during the ongoing COVID-19 pandemic.

## Aset Lancar

Hingga 31 Desember 2021, Bank mencatatkan aset lancar sebesar Rp34,59 triliun, naik Rp18,33 triliun atau 53% dari periode yang sama tahun sebelumnya yang tercatat sebesar Rp16,25 triliun. Kenaikan aset lancar tersebut lebih banyak disebabkan oleh meningkatnya investasi Bank pada surat berharga. Peningkatan akun tersebut dikarenakan Bank membeli sukuk korporasi dengan nilai yang material di tahun 2021. ## Aset Tidak Lancar

Bank membukukan aset tidak lancar pada tahun 2021 sebesar Rp24,31 triliun, turun dari tahun buku 2020 yang sebesar Rp34,99 triliun. Perubahan tersebut disebabkan oleh dampak dari penjualan portofolio piutang dan pembiayaan sebagai bagian dari transaksi aksi korporasi di tahun 2021.

## LIABILITAS

Compared to the previous year, which amounted to Rp1.61 trillion, there was a decrease of Rp223.53 billion or 13.88%. This is closely related to the decrease in income distributed by the Bank. Pendapatan operasional lainnya yang berhasil dibukukan oleh Bank Muamalat pada tahun 2021 tercatat sebesar Rp583,69 miliar, naik sebesar Rp9,05 miliar atau 1,58% dari tahun 2020 yang mencapai Rp574,64 miliar. Pendapatan operasional lainnya mayoritas disumbang oleh pos pendapatan Jasa administrasi maupun pendapatan jasa lainnya. Peningkatan pendapatan operasional lainnya mengindikasikan sudah semakin terdiversifikasinya pendapatan yang dimiliki oleh Bank.

## Beban Operasional Lainnya

Bank berhasil menurunkan beban operasional lainnya pada tahun 2021 hingga 1,48% atau Rp19,86 miliar, dari Rp1,35 triliun pada tahun 2020 menjadi Rp1,33 triliun. ## Labanya Operasional

Pada tahun 2021, Bank Muamalat mencatatkan laba operasional sebesar Rp19,49 miliar, lebih tinggi 18,83% atau naik Rp3,09 miliar dibandingkan realisasi tahun 2020 yang tercatat sebesar Rp16,39 miliar. Peningkatan pendapatan operasional lainnya, penurunan bagi hasil dana syirkah temporer, penurunan beban operasional lainnya berhasil mengeliminasi penurunan pendapatan bank sebagai mudharib. Hal tersebut menyebabkan laba operasional Bank Muamalat di tahun 2021 mengalami peningkatan.

## Labanya Sebelum Pajak

Sementara laba sebelum pajak yang berhasil dibukukan pada tahun 2021 adalah sebesar Rp12,51 miliar. Dibandingkan dengan tahun 2020 yang sebesar Rp15,02 miliar, terjadi penurunan 16,68% atau Rp2,50 miliar. Penurunan itu diakibatkan oleh peningkatan beban non-operasional ditahun 2021.

## Total Labanya (Rugi) Komprehensif

Bank menutup tahun buku 2021 dengan laba komprehensif sebesar Rp19,64 miliar, turun sebesar 33,50% atau Rp9,89 miliar dibandingkan tahun sebelumnya yang mencapai Rp29,53 miliar. Kondisi itu diakibatkan oleh turunnya nilai aset keuangan atas efek-efek yang tersedia dijual yang belum direalisasi.

## Other Operating Expenses

The Bank managed to reduce other operating expenses in 2021 by 1.48% or Rp19.86 billion, from Rp1.35 trillion in 2020 to Rp1.33 trillion. This causes Bank Muamalat's operating profit in 2021 to increase.

## Profit Before Tax

Moreover, profit before tax successfully posted in 2021 amounted to Rp12.51 billion. Compared to 2020, which amounted to Rp15.02 billion, there was a decrease of 16.68% or Rp2.50 billion. The decrease was due to an increase in non-operating expenses in 2021.

### Laporan Distribusi Bagi Hasil

Di tahun 2021, bagi hasil yang didistribusikan oleh Bank mengalami penurunan dari Rp1,61 triliun menjadi Rp1,39 triliun. Hal tersebut lebih disebabkan oleh faktor eksternal yang di antaranya yaitu masih belum pulihnya kemampuan nasabah dalam melakukan pembayaran piutang dan pembiayaan akibat Pandemi COVID-19 yang pada gilirannya mempengaruhi nilai pendapatan yang dibagi-hasilkan kepada nasabah. Namun, penurunan tersebut juga masih sejalan dengan kondisi industri perbankan pada umumnya yang juga mengalami penurunan tingkat imbal hasil yang dibayarkan kepada nasabah.

### Profit Sharing Distribution Report

In 2021, profit sharing distributed by the Bank decreased from Rp1.61 trillion to Rp1.39 trillion. This is mostly due to external factors, including the ability of customers to make payments for receivables and financing that still have not recovering due to the COVID-19 pandemic, which in turn affects the value of profit-sharing distributed to customers. However, the decline was also still in line with the condition of the banking industry in general, which also experienced a decline in the rate of return paid to customers.

## DIVIDEN

### Kebijakan

Mengacu peraturan perundang-undangan di Indonesia dan Anggaran Dasar Bank, keputusan pembagian dividen ditetapkan melalui persetujuan Pemegang Saham pada RUPS tahunan. Pembahasan tersebut diawali oleh rekomendasi dari Direksi Bank dengan memperhatikan sejumlah faktor.

Faktor-faktor tersebut yaitu posisi keuangan Bank, tingkat kesehatan, posisi permodalan, target dan proyeksi kecukupan modal di masa depan, kepatuhan terhadap peraturan yang berlaku, rencana dan prospek usaha Bank di masa depan, dan hal-hal lain yang dipandang relevan oleh Direksi Bank.

Namun demikian, tidak ada jaminan bahwa Bank akan memiliki kemampuan atau akan membayar dividen atau keduanya pada masa yang akan datang. Demikian pula apabila ditentukan oleh regulator, Bank dapat tidak membagikan dividen kepada Pemegang Saham BMI, seperti dalam hal Bank membutuhkan dana untuk melakukan pengembangan usaha atau pemenuhan kecukupan modal yang ditentukan oleh regulator.

Dengan demikian, Bank hanya akan membayar dividen dari laba bersih berdasarkan peraturan perundang-undangan yang berlaku di Indonesia. Pembayaran dividen dapat dilakukan dalam bentuk pembayaran secara tunai, penerbitan saham dividen atau kombinasi dari keduanya.

Anggaran Dasar Bank memperbolehkan distribusi laba tahun berjalan Bank dalam bentuk pembagian dividen interim selama dividen interim tersebut tidak menyebabkan nilai aset bersih Bank menjadi lebih kecil dari modal ditempatkan dan disetor. Selain itu, Bank harus memperhatikan ketentuan mengenai penyesuaian cadangan wajib sebagaimana yang disyaratkan dalam UU Perseroan Terbatas.

Distribusi dividen interim tersebut akan ditetapkan berdasarkan keputusan Direksi Bank setelah disetujui Dewan Komisaris. Jika pada akhir tahun keuangan Bank mengalami kerugian, distribusi dividen interim harus dikembalikan oleh para Pemegang Saham kepada Bank, dan Direksi Bersama-sama dengan Dewan Komisaris akan bertanggung jawab secara tanggung-renteng dalam hal dividen interim tidak dikembalikan ke Bank.

## DIVIDEND

### Policy

Pursuant to the laws and regulations in Indonesia and the Articles of Association of the Bank, the decision to distribute dividends is determined through the approval of the Shareholders at the annual GMS. The discussion is initiated by a recommendation from the Bank's Board of Directors by taking into account a number of factors.

These factors are the Bank's financial position, soundness level, capital position, targets and projections of future capital adequacy, compliance with applicable regulations, the Bank's business plans and outlook in the future, as well as other matters deemed relevant by the Bank's Board of Directors.

However, there are no guarantees that the Bank will have the ability or will pay dividends or both in the future. Likewise, if determined by the regulator, the Bank may not distribute dividends to the Shareholders of BMI, such as in the event that the Bank requires funds to develop a business or fulfilling the capital adequacy as determined by the regulator.

Accordingly, the Bank will only pay dividends from net income based on the prevailing laws and regulations in Indonesia. Dividend payments can be made in the form of cash payments, the issuance of dividend shares, or a combination of both.

The Bank's Articles of Association allow the distribution of the Bank's profit for the year in the form of an interim dividend as long as the interim dividend does not cause the value of the Bank's net assets to be less than the issued and paid-up capital. In addition, the Bank must take into account the provisions regarding the provision for mandatory reserves as required in the Limited Liability Company Law.

The distribution of the interim dividend will be determined based on the decision of the Bank's Board of Directors after being approved by the Board of Commissioners. If at the end of the fiscal year the Bank suffers a loss, the distribution of interim dividends must be returned by the Shareholders to the Bank, and the Board of Directors together with the Board of Commissioners will be jointly and severally responsible in the event that the interim dividend is not returned to the Bank.

## PERFORMANCE ASSESSMENT

Employee performance assessment uses the Performance Management System (PMS) that has proved beneficial in previous years. Assessments are conducted based on the Most Important Goals (MIG), which are determined at the beginning of the year, before being reviewed in the middle of the year and at the end of the year through the Human Capital Information System (Muamalat Human Power/MHP). Additionally, employee performance assessment is completed in stages, from self-assessment by the employee and evaluation by a direct supervisor, which is then reviewed and evaluated by a senior work unit leader. This system was established to ensure that employee performance is in line with the Bank's performance, to encourage, motivate, and direct employees to continue to improve their performance, as well as create a clear relationship between the achievement of employee plans with employee career development.

BMI also applies Shared MIG to ensure that each work unit supports each other's achievements. This mechanism aims to strengthen the alignment between work units, create a mutually supportive climate, and ultimately achieve the Bank's targets. Shared MIG itself consists of several

Untuk memperkuat *monitoring* dan *coaching culture* dalam mendukung performa individual yang baik, Bank juga telah mengembangkan mekanisme *coaching*. Realisasi kegiatan tersebut didukung oleh sistem melalui aplikasi M-Coach, M-Direct, dan i-SAM.

## PENGEMBANGAN KARIER

Manajemen pengembangan karier Bank Muamalat bertujuan untuk memastikan ketersediaan karyawan dengan kualifikasi dan pengalaman yang tepat, meningkatkan kepuasan kerja karyawan, serta membantu karyawan dalam memahami peluang karier dan menentukan jalur karier yang dipilih.

Pengembangan karier ini secara konsisten membantu karyawan dalam memahami potensi dan keahliannya, sehingga akan membantu pencapaian tujuan individu dan Bank sebagai hubungan timbal balik yang bermanfaat bagi kesejahteraan karyawan dan tujuan perusahaan. Selain itu, terlaksananya manajemen pengembangan karier yang baik dapat menurunkan tingkat *turnover*, dan menurunkan biaya tenaga kerja, khususnya anggaran untuk mengembangkan karyawan baru.

BMI juga menerbitkan dan menerapkan kebijakan mutasi, promosi, dan demosi. Hal ini dilakukan agar seluruh karyawan mendapatkan informasi yang jelas dan transparan mengenai mekanismenya secara terperinci. Pengajuan mutasi dapat diajukan oleh karyawan dengan mengakses menu e-movement di sistem HC perusahaan, Muamalat Human Power (MHP). Dengan demikian, pengajuan mutasi dapat diproses dengan lebih efisien dan efektif karena berbasis digital. Adapun proses promosi dan demosi karyawan dilakukan melalui pengajuan dari pimpinan unit kerja terkait untuk selanjutnya dilakukan evaluasi dan/atau asesmen dengan mempertimbangkan kinerja dan kompetensi karyawan.

In addition, the implementation of proper career development management has the ability to reduce the employee turnover rate, and consequently reduce the employment cost, particularly the budget to develop new employees.

BMI publishes and implements transfer, promotion, and demotion policies. This is done to provide all employees with clear and transparent information regarding the mechanisms in detail. Transfers can be submitted by employees by accessing the e-movement menu on the Company's HC system, Muamalat Human Power (MHP), which means transfer applications can be processed more efficiently and effectively due to being digitally based. Meanwhile, the process of employee promotion and demotion is carried out through submissions from the head of the relevant work unit for further evaluation and/or assessment, taking into account the performance and competence of employees.

In relation to cases of employment, settlements are conducted through a process that complies with statutory provisions by prioritizing bipartite/internal settlements without involving third parties. In 2021, there was a lawsuit against BMI which is currently in the handling and settlement process. Taking lessons from this lawsuit, BMI continuously reviews the implementation of outsourcing to ensure that it is always in line with applicable laws and regulations.

## Risk Management

### SISTEM MANAJEMEN RISIKO

Perkembangan di sektor perbankan saat semakin kompleks dan kompetitif dibandingkan tahun-tahun sebelumnya. Kondisi tersebut merupakan respons dari perubahan yang terjadi secara cepat di tingkat global maupun lokal dari sisi ekonomi, teknologi informasi, politik, hukum, hingga sosial dan budaya.

Perubahan yang cepat tersebut ikut meningkatkan risiko yang dihadapi perbankan syariah, terutama pada aktivitas operasional, baik langsung maupun tidak. Dalam situasi seperti itu, Bank Muamalat Indonesia ("BMI", "Bank") merespons pengelolaan risiko pada setiap aktivitas bisnis atau operasional Bank dengan berlandaskan pada prinsip kehati-hatian dan Tata Kelola Perusahaan yang baik (*Good Corporate Governance*).

Komitmen tersebut juga diiringi oleh pengelolaan risiko dengan mekanisme yang sejalan dengan ketentuan dari regulator. Penerapan manajemen risiko yang komprehensif diharapkan dapat melindungi Bank secara individu maupun dengan perusahaan anak dari potensi kerugian yang mungkin timbul akibat pelaksanaan beragam aktivitas bisnis dan operasional. Di sisi lain, penerapan manajemen risiko dapat menciptakan nilai tambah bagi pemangku kepentingan perusahaan.

### Kerangka Manajemen Risiko

Kerangka manajemen risiko BMI dikembangkan selaras dengan strategi bisnis Bank, struktur organisasi, ketentuan internal, serta ketersediaan infrastruktur Bank, sebagaimana disajikan pada gambar berikut ini.

### RISK MANAGEMENT SYSTEM

The developments in the banking sector are more complex and competitive than ever. This is a response to rapid changes at the global and local levels in terms of economy, information technology, politics, law, and culture.

Such rapid changes also increase the risks associated with Islamic banking, particularly in direct and indirect operational activities. As such, Bank Muamalat Indonesia ("BMI", "Bank") has a risk management process for each of the Bank's business activities or operations based on the principle of prudence and Good Corporate Governance.

This commitment is also accompanied by risk management processes that align with the regulatory provisions. The implementation of comprehensive risk management is expected to protect the Bank and its subsidiaries from potential losses that may arise due to the implementation of various business and operational activities. The implementation of risk management could also create added value for the Bank's stakeholders.

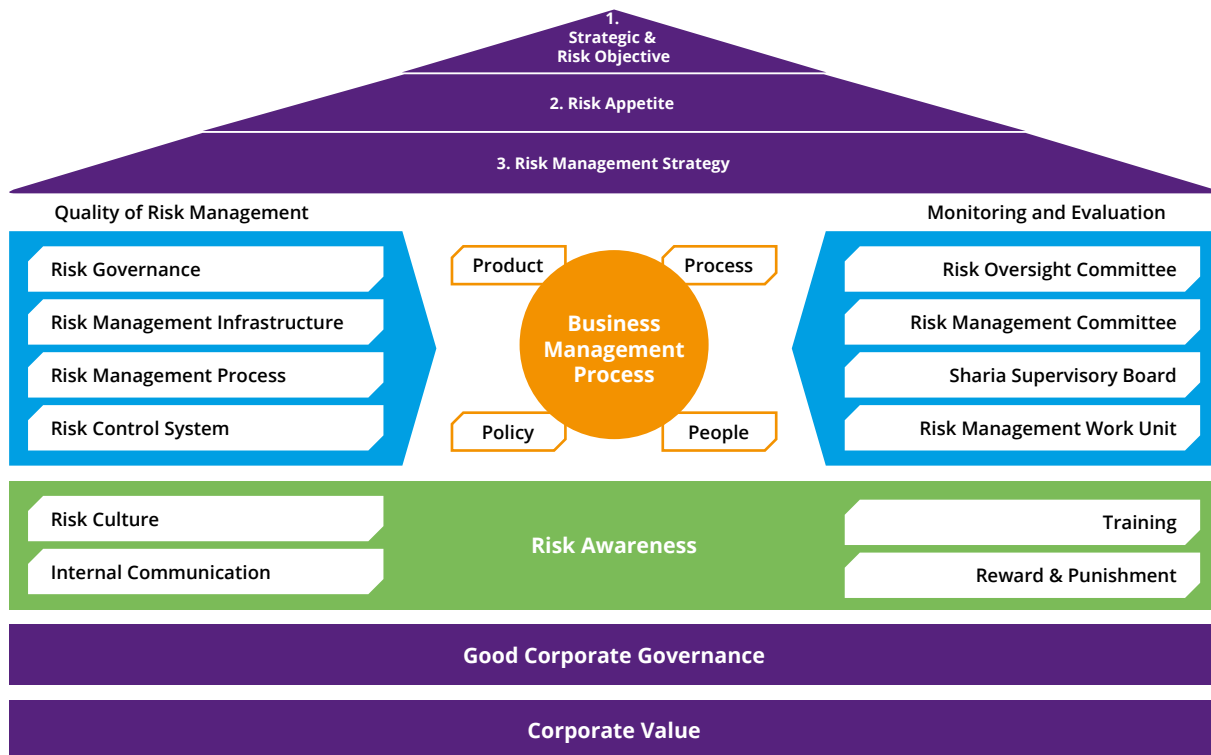

### Risk Management Framework

BMI's risk management framework has been developed in line with the Bank's business strategy, organizational structure, internal regulations, and available infrastructure, as presented in the following graphics.

## Kerangka Manajemen Risiko Bank Muamalat Indonesia

## Bank Muamalat Indonesia Risk Management Framework

Kunci keberhasilan Bank dalam menerapkan manajemen risiko karena berlandaskan pada kerangka manajemen risiko. Kerangka tersebut dibangun dari nilai-nilai *Good Corporate Governance* dan *Corporate Value* serta penguatan *Risk Awareness* di seluruh lini kerja Bank. Upaya tersebut direalisasikan melalui implementasi budaya risiko, komunikasi internal yang baik, kecukupan pelatihan dan sertifikasi terkait manajemen risiko, serta penerapan *reward and punishment* sebagaimana diatur dalam *Ittifaq* Bank Muamalat Indonesia.

Dengan kerangka yang kuat tersebut, Bank Muamalat melakukan proses bisnis dengan ditopang oleh kebijakan, produk, proses dan sumber daya manusia. Pelaksanaan proses bisnis dilakukan dengan senantiasa memperhatikan 2 (dua) pilar manajemen risiko.

The Bank's risk management is based on a risk management framework. The framework is built on the values of Good Corporate Governance and Corporate Values as well as the desire to strengthen Risk Awareness in all business lines within the Bank. Such efforts are realized through the implementation of risk culture, good internal communication, adequate training and certification related to risk management, as well as the application of a reward and punishment system as stipulated in the *Ittifaq* of Bank Muamalat Indonesia.

Bank Muamalat's business processes are supported by policies, products, and human resources. The business processes are implemented in line with the 2 (two) pillars of risk management.

## Dua Pilar Manajemen Risiko

Pilar mitigasi risiko yang memadai sesuai jenis risiko inheren yang dapat diidentifikasi, dalam bentuk tata kelola, infrastruktur, proses manajemen risiko, dan pengendalian risiko.

Pilar pemantauan dan evaluasi secara berkelanjutan atas proses bisnis yang dilakukan antara lain melalui *Risk Oversight Committee* di level Dewan Komisaris, *Risk Management Committee* di level Direksi, Dewan Pengawas Syariah (DPS) dan unit kerja Manajemen Risiko.

BMI senantiasa berupaya mencapai dan melaksanakan *corporate strategy* dan *risk objective*, baik jangka panjang, menengah, maupun pendek, dan menjaga eksposur risiko sesuai *risk appetite* Bank, ditopang oleh dengan landasan dan pilar yang kuat.

Dalam mengimplementasikan manajemen risiko di Bank, pelibatan seluruh unsur dalam organisasi mulai dari manajemen hingga karyawan pelaksana menjadi hal yang penting. Seluruh unsur tersebut berperan aktif dalam konteks “Tiga Lini Pertahanan” manajemen risiko, di bawah pengawasan Dewan Komisaris dan Direksi.

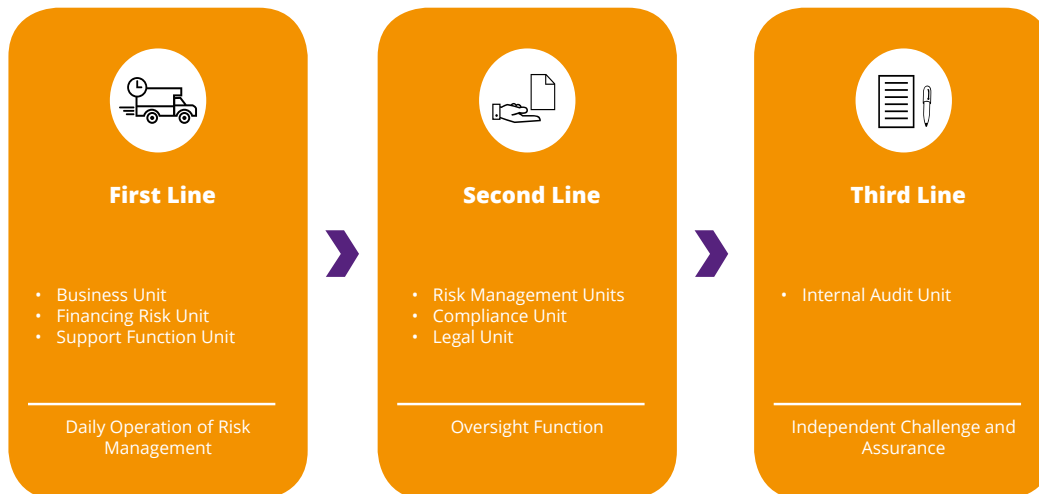

## Two Pillars of Risk Management

The pillar of adequate risk mitigation is according to the type of inherent risk in the form of governance, infrastructure, risk management processes, and risk control.

The pillar of continuous monitoring and evaluation of business processes is carried out through the Risk Oversight Committee at the level of the Board of Commissioners, the Risk Management Committee at the level of the Board of Directors, the Sharia Supervisory Board (DPS) and the Risk Management work unit.

BMI strives to achieve and implement corporate strategy and risk objectives, including those in the long, medium and short term, and maintains risk exposure in accordance with the Bank's risk appetite, supported by strong foundations and pillars.

Risk management at the Bank involves all elements within the organization, from the management to the employees. All of these elements play an active role in the context of the “Three Lines of Defense” risk management under the supervision of the Board of Commissioners and the Board of Directors.

### Lini-1: First Line of Defense

*First line of defense* atau lini pertahanan pertama terdiri dari unit kerja pengambil dan pemilik risiko yang melaksanakan fungsi bisnis dan unit kerja pendukung bisnis di mana seluruh aktivitas hariannya melekat berbagai jenis dan risiko yang dihadapi. Seluruh unit pada lini pertahanan pertama bertanggung jawab untuk mengidentifikasi dan mengelola risiko pada setiap produk, proses, kegiatan, dan sistem yang dijalankan dengan menerapkan nilai-nilai budaya sadar risiko untuk menciptakan sistem manajemen risiko yang efektif.

### Line-1: First Line of Defense

The first line of defense consists of risk units that perform business functions, as well as the business support units. In running daily activities, these units deal directly with various types of risks. All functions in the first line of defense are responsible for identifying and managing the inherent risks in every product, activity, process and system, and are expected to have high risk awareness to manage risks effectively.

### Lini-2: Second Line of Defense

Lini pertahanan kedua terdiri dari unit kerja manajemen risiko (SKMR), kepatuhan dan hukum sebagai fungsi pengawasan yang bertanggung jawab untuk mengembangkan dan melaksanakan strategi manajemen risiko di Bank, termasuk memelihara kecukupan atas ketersediaan *tools* pengendaliannya.

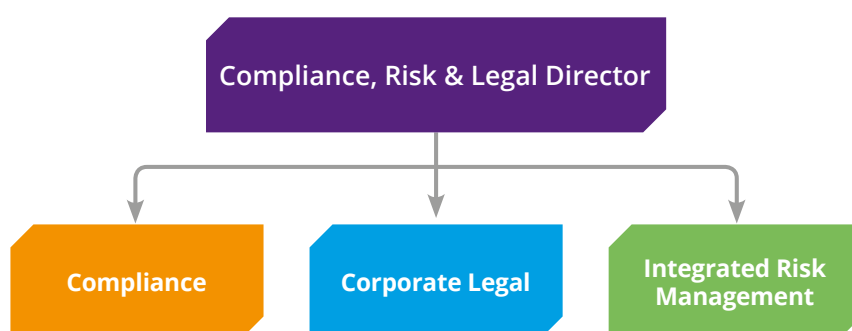

### Lini-3: Third Line of Defense

*Third line of defense* atau lini pertahanan ketiga ialah unit internal audit sebagai unit independen yang bertugas melakukan *risk-based audit* kepada lini pertahanan pertama dan kedua untuk memastikan bahwa seluruh elemen Bank telah melaksanakan fungsi dan tanggung jawabnya dengan baik, termasuk memastikan kesesuaian dengan kebijakan manajemen Bank dan regulasi yang berlaku.

### Organisasi Manajemen Risiko

BMI memiliki unit kerja manajemen risiko sebagai *second line of defense* di bawah Compliance, Risk & Legal Director guna memastikan pelaksanaan tata kelola manajemen risiko, menyediakan dan memperbaharui kerangka manajemen risiko, memastikan terlaksananya proses manajemen risiko, sistem informasi dan sumber daya manusia serta pelaksanaan sistem pengendalian risiko. Unit kerja manajemen risiko merupakan unit kerja yang independen dari unit bisnis dan unit operasional Bank, serta memiliki tanggung jawab utama untuk memastikan proses penerapan manajemen risiko telah berjalan efektif di Bank.

Struktur organisasi di bawah Compliance, Risk & Legal Director adalah sebagai berikut:

### Line-2: Second Line of Defense

The second line of defense consists of risk management, compliance and legal unit as a supervisory function responsible for develop and implement management strategies risks in the Bank, including maintaining the adequacy of availability of control tools.

### Line-3: Third Line of Defense

The third line of defense is the internal audit unit. The Internal audit unit functions as an independent unit in charge of conducting risk-based audits that provide added value to the first and second lines of defense and ensuring that all elements of the Bank have completed their functions including compliance with Bank Muamalat's management policies and regulations.

### Risk Management Organization

BMI maintains risk management unit as the second line of defense under the Compliance, Risk & Legal Director to ensure the implementation of risk management governance, provide and update the risk management framework, and ensure the implementation of risk management processes, information systems, and risk control. The risk management unit is independent from the Bank's business units and operational units. It has the main responsibility of ensuring the appropriate implementation of the risk management process at the Bank.

The organizational structure under the Compliance, Risk & Legal Director is as follows:

Masing-masing unit memiliki tanggung jawab yang diuraikan dalam tabel berikut ini.

Each unit is assigned set responsibilities as described in the following table.

| Nama Unit<br>Unit Name     | Tanggung Jawab                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Responsibilities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

Salah satu metode lainnya untuk melihat efektivitas atas kebijakan dan prosedur Bank adalah pemeriksaan yang dilakukan oleh unit kontrol operasi yang secara berkala melakukan pemeriksaan secara *sampling* atas transaksi operasional Bank. Atas kebijakan dan prosedur yang dipandang tidak efektif dan atau tidak relevan lagi berdasarkan *review* berkala, dilakukan penyempurnaan lebih lanjut yang dilakukan oleh pemilik ketentuan.

### Risk Appetite

Penetapan *risk appetite* dan *risk tolerance* dapat membantu Bank dalam rangka mencapai target bisnis yang ingin dicapai, dalam implementasinya bisa dilakukan secara dua arah, yakni *bottom up* dan *top down*.

Dalam menetapkan *risk appetite* dan *risk tolerance*, Bank perlu mempertimbangkan strategi dan tujuan bisnis Bank serta kemampuan Bank dalam mengambil risiko (*risk bearing capacity*). *Risk appetite* dan *risk tolerance* dituangkan dalam bentuk limit risiko dan *threshold*, yang dipantau secara berkala untuk memastikan posisi Bank terhadap risiko yang dihadapi. Apabila terjadi perubahan atas kondisi Bank dan atau kondisi eksternal Bank, limit dapat disesuaikan lebih cepat sehingga selalu terbaru dan sesuai dengan kondisi yang dihadapi.

### Stress Test

*Stress test* atas risiko kredit, likuiditas, pasar dan operasional dilakukan secara berkala oleh SKMR. *Stress test* dimaksud dilakukan untuk melihat kerentanan kondisi permodalan Bank terhadap kondisi stres yang mungkin dihadapi Bank. Asumsi yang digunakan dalam perhitungan *stress test* tahun buku 2021 antara lain:

1. *Stress test* atas risiko likuiditas: penarikan dana yang mungkin dilakukan oleh nasabah sesuai dengan kontraknya, dan juga penarikan dana dari nasabah-nasabah yang sensitif atas kondisi atau pemberitaan atas Bank.
2. *Stress test* atas risiko pasar: perubahan nilai tukar terhadap Posisi Devisa Neto (PDN) Bank.
3. *Stress test* atas risiko kredit: kinerja nasabah pembiayaan yang terdampak maupun tidak terdampak COVID-19 dalam kondisi pandemi COVID-19.
4. *Stress test* risiko operasional: kesiapan *Data Recovery Center* (DRC) untuk menguji kerentanan atas sistem IT.

### Bank Policies and Procedures

The effectiveness of the Bank's policies and procedures is regularly reviewed by the internal regulations owners in coordination with the relevant units. These reviews take into account the audit results and the input from the internal audit unit and external auditors, with the aim of improving the Bank's internal processes and procedures. In determining the risk appetite and risk tolerance, the Bank needs to consider the Bank's strategy and business objectives as well as the Bank's risk bearing capacity. The Bank's risk appetite and risk tolerance are stated in the form of risk limits and thresholds, which are monitored regularly. Should there be any changes in the Bank's internal condition or the external conditions, the limit can be adjusted.

### Stress Test

Stress tests of credit, liquidity, market and operational risks are regularly performed by SKMR. The stress tests are conducted to identify any vulnerabilities related to the Bank's capital condition. The assumptions used in calculating the stress test for the 2021 fiscal year included:

1. Stress test of liquidity risk: withdrawals of funds that may be made by customers in accordance with their contracts, as well as withdrawals of funds made by customers who are sensitive to conditions or news concerning the Bank.
2. Stress test of market risk: changes in the exchange rate against the Bank's Net Open Position (NOP).
3. Stress testing on credit risk: the performance of debtors, both those affected as well as not affected by COVID-19, during the COVID-19 pandemic.
4. Stress test of operational risk: the readiness of the Data Recovery Center (DRC) to test the vulnerability of the IT system.

Pelaksanaan *stress test* yang dijalankan oleh Bank pada dasarnya menggunakan model yang dikembangkan dari data historis Bank, atau menggunakan pendekatan lainnya. Hasil *stress test* dilaporkan kepada Direksi dan dikoordinasikan dengan unit terkait untuk dilakukan mitigasi dan tindak lanjut untuk meminimalkan terjadinya kondisi terburuk.

Pelaporan kepada Direksi, Dewan Komisaris dan Dewan Pengawas Syariah telah dilakukan dengan media yang tersedia sehingga dapat diambil keputusan yang tepat waktu.

Sistem manajemen risiko telah diterapkan oleh seluruh jajaran di Bank. Setiap unit kerja terlibat secara aktif dalam mengidentifikasi risiko inheren yang dihadapi dan memastikan telah dilakukan kontrol atas risiko tersebut sehingga dapat diminimalkan. Penerapan manajemen risiko diperkuat dengan adanya budaya risiko yang selalu ditekankan untuk dilaksanakan, sebagai bagian yang terintegrasi dalam aktivitas bisnis dan operasional di seluruh unit kerja di Bank.

## PENERAPAN MANAJEMEN RISIKO TERINTEGRASI

Sesuai Peraturan OJK No. 45/POJK.03/2020 tentang Konglomerasi Keuangan, struktur konglomerasi keuangan antara BMI sebagai entitas utama dengan PT Al-Ijarah Finance (ALIF) sebagai anggota konglomerasi dinyatakan bubar karena Konglomerasi Keuangan Muamalat tidak lagi memenuhi kriteria sebagai Konglomerasi Keuangan. Pembubaran ini dinyatakan berlaku dimulai tahun 2021. Meskipun demikian, pemantauan perkembangan grup keuangan BMI tetap dilakukan melalui penyampaian tertulis kepada OJK secara berkala.

## EKSPOSUR PERMODALAN DAN RISIKO PENGUNGKAPAN PERMODALAN

BMI fokus pada pengelolaan struktur permodalan yang sehat untuk menyerap risiko serta memenuhi ketentuan permodalan sesuai dengan peraturan yang berlaku. Hal tersebut juga ditujukan untuk mendukung pertumbuhan bisnis yang sehat.

The stress tests carried out by the Bank adopt a model based on the Bank's historical data or other approaches. The results of the stress tests are reported to the Board of Directors and the related units to ensure risk mitigation and follow-ups.

## The Adequacy of the Risk Management System

The risk management system is an integrated process used to manage the Bank's risk in a measurable manner. In 2021, the Bank took the appropriate measures to ensure the adequacy of its risk management system via risk management governance, study results, risk management framework, internal regulations, regular review of risk limits, and the implementation of internal control. This was supported by the Bank's infrastructure. The reports for the Board of Directors, the Board of Commissioners and the Sharia Supervisory Board enable a timely decision making process.

The risk management system has been implemented at all levels of the Bank. Each business unit is actively involved in identifying all inherent risks and ensuring that all controls have been implemented to minimize them. The implementation of risk management has been strengthened by the existence of risk culture, which is an integrated part of business and operational activities at all business units within the Bank.

## IMPLEMENTATION OF INTEGRATED RISK MANAGEMENT

According to the FSA Regulation No. 45/POJK.03/2020 concerning Financial Conglomerates, the structure of the financial conglomerate that included BMI as the main entity and PT Al-Ijarah Finance (ALIF) as a member of the conglomerate was dissolved since the Muamalat Financial Conglomerate no longer met the criteria of a Financial Conglomerate. The dissolution took place in 2021. Nevertheless, the monitoring of the BMI financial group is still conducted through periodic written reports to the FSA.

## CAPITAL EXPOSURE AND RISK DISCLOSURE

### A. Capital Structure

BMI focuses on ensuring a healthy capital structure to absorb risks and to comply with capital requirements in accordance with the prevailing regulations. This also intends to support healthy business growth.

Untuk mewujudkan hal tersebut, Bank senantiasa berupaya agar dapat memaksimalkan segala potensi yang dimiliki, utamanya modal yang telah ada. Beragam inisiatif memaksimalkan permodalan telah dilakukan Bank antara lain dengan melakukan perbaikan pada struktur pembiayaan yang sangat memperhatikan faktor risiko yang ada.

Selain itu, pada tahun 2021, Bank juga terus melakukan upaya untuk memperkuat modal, di antaranya Penambahan Modal dengan Memberikan Hak Memesan Efek Terlebih Dahulu VI (PMHMETD VI) Bank Muamalat Indonesia Tahun 2021 dengan menerbitkan sebanyak-banyaknya 39.810.039.107 (tiga puluh sembilan miliar delapan ratus sepuluh juta tiga puluh sembilan ribu seratus tujuh) saham baru.

Detail terkait struktur permodalan Bank per 31 Desember 2021 dapat dilihat pada tabel Struktur Permodalan Bank Muamalat Indonesia dalam Laporan Tahunan ini.

## B. Kecukupan Permodalan

Sejalan dengan perkembangan dunia usaha yang dibayangi dengan ketidakpastian maka potensi risiko akan semakin besar. Mengacu pada hal tersebut, perhitungan kecukupan modal tidak hanya bertujuan untuk menyerap potensi kerugian yang timbul dari profil risiko umum yang dihadapi Bank, namun juga dari risiko lain yang material sehingga perlu terus dilakukan penyesuaian.

Mengantisipasi kemungkinan-kemungkinan tersebut, BMI senantiasa menjaga kecukupan modal Bank untuk dapat menutupi risiko kredit, risiko pasar dan risiko operasional yang tercermin dari Kewajiban Penyediaan Modal Minimum (KPMM).

Per 31 Desember 2021, Rasio Kecukupan Modal Bank mencapai 23,76%, meningkat jika dibandingkan dengan Rasio Kecukupan Modal tahun 2020 sebesar 15,21%. Capaian tersebut telah memenuhi Peraturan Otoritas Jasa Keuangan No. 21/POJK.03/2014 tentang Kewajiban Penyediaan Modal Minimum Bank Umum Syariah, di mana Rasio Kecukupan Modal minimum dikaitkan dengan profil risiko Bank yang ditetapkan OJK adalah berkisar 9%-10%.

## B. Adequacy of Capital

The current developments in the business world, which have been overshadowed by uncertainty, mean that the potential risks will be even greater. As such, the calculation of capital adequacy is not only aimed at absorbing potential losses arising from the Bank's general risk profile, but also from other material risks that need to be continuously adjusted.

Anticipating these possibilities, BMI maintains its capital adequacy to cover credit risk, market risk and operational risk as reflected in the Capital Adequacy Requirements (CAR).

As of December 31, 2021, the Bank's Capital Adequacy Ratio reached 23.76%, which increases from 15.21% in 2020. This percentage has met the Financial Services Authority Regulation No. 21/POJK.03/2014 concerning Minimum Capital Adequacy Requirements for Islamic Commercial Banks, in which the minimum Capital Adequacy Ratio associated with the Bank's risk profile required by the FSA is within the range of 9%-10%.

### Kebijakan Pengelolaan Risiko Konsentrasi Pembiayaan

Bank melakukan pengelolaan risiko konsentrasi pembiayaan melalui melalui penetapan limit antara lain atas sektor ekonomi tertentu dan eksposur pembiayaan pada nasabah dan atau grup nasabah.

Beberapa *tools* yang digunakan untuk pengelolaan risiko konsentrasi antara lain:

1. Batas Maksimum Pemberian Pembiayaan (BMPP) yang merupakan batasan maksimum penyediaan dana terhadap modal Bank yang ditetapkan sesuai dengan ketentuan regulator. Untuk kehati-hatian, Bank mengimplementasikan juga limit BMPP internal yang diterapkan pada persentase tertentu dari limit BMPP yang ditetapkan oleh regulator.
2. *Target Market* dan *Financing Allocation Limit* (FAL) yang merupakan batasan maksimum pembiayaan pada suatu sektor/sub sektor ekonomi tertentu dengan mempertimbangkan *risk appetite* Bank dan potensi serta risiko sektor/sub sektor ekonomi tersebut. *Tools* ini diimplementasikan oleh unit bisnis terkait pembiayaan dalam bentuk *target market* dan *risk acceptance criteria* (RAC) yang ditetapkan berdasarkan segmen pembiayaan atau sektor/sub sektor ekonomi tertentu.

### Risk Management Policy Concentration of Financing

The Bank manages the risk of financing concentration by setting limits, such as for certain economic sectors and financing exposures to customers and/or groups of customers.

Some of the tools used for concentration risk management include:

1. Maximum Limit for Financing (BMPP) which is the maximum limit for providing funds to the Bank's capital, which is determined in accordance with regulatory requirements. For the purpose of adopting prudent principles, the Bank also implements an internal BMPP limit which is applied to a certain percentage of the BMPP limit required by the regulator.
2. Target Market and Financing Allocation Limit (FAL) which is the maximum limit of financing in a certain economic sector/sub-sector by considering the Bank's risk appetite and the potential and risks of the relevant economic sector/sub-sector. These tools are implemented by business units related to financing in the form of target markets and risk acceptance criteria (RAC) which are determined based on financing segments or certain economic sectors/sub-sectors.

Penguatan sistem pengendalian internal, mencakup pengawasan oleh Dewan Komisaris dan Direksi secara berkala dan budaya pengendalian risiko yang melibatkan seluruh unit kerja terkait pembiayaan, pemeriksaan internal secara berkala dilakukan oleh unit internal audit yang ditindaklanjuti oleh unit kerja terkait dan pemeriksaan oleh unit kerja kontrol operasional;
2. Melakukan penutupan asuransi atas agunan, pembiayaan dan atau jiwa nasabah untuk menutup risiko kredit yang mungkin terjadi.

1. Strengthening the internal control system, including regular supervision by the Board of Commissioners and Directors and risk control culture involving all business units related to financing, regular internal audits performed by internal audit unit followed up by the relevant business units and inspections by the operational control unit;

## Definisi Tagihan Jatuh Tempo dan Tagihan Mengalami Penurunan Nilai

Bank mendefinisikan tagihan yang telah jatuh tempo sebagaimana diatur pada SEOJK No. 34/SEOJK.03/2015 tentang Perhitungan Aset Tertimbang Menurut Risiko untuk Risiko Kredit dengan Menggunakan Pendekatan Standar bagi Bank Umum Syariah yang diubah dengan SE OJK No. 13/SEOJK.03/2018 tentang Perubahan atas SE OJK No. 34/SEOJK.03/2015 tentang Perhitungan Aset Tertimbang Menurut Risiko untuk Risiko Kredit dengan Menggunakan Pendekatan Standar bagi Bank Umum Syariah, yakni tagihan yang telah jatuh tempo lebih dari 90 (sembilan puluh) hari, baik atas pembayaran pokok dan/atau pembayaran bagi hasil atau *margin* atau *ujrah*.

## Pendekatan Pembentukan Cadangan Kerugian Penurunan Nilai (CKPN) Individual dan Kolektif

Perhitungan CKPN yang dilakukan oleh Bank hanya untuk eksposur dengan akad murabahah saja, sesuai dengan penerapan PSAK 50/55 (Revisi 2006) sementara PSAK Syariah tidak mengatur secara detail. Perhitungan CKPN dilakukan dalam 2 (dua) pendekatan, yaitu:

1. CKPN Individual dihitung berdasarkan jumlah ekspektasi arus kas yang diterima di masa akan datang, dikurangi jumlah tercatat.
2. CKPN Kolektif dihitung dengan mempertimbangkan *Probability of Default* dan *Loss Given Default* dengan menggunakan data historis 3 (tiga) tahun terakhir.

## Metode Statistik dalam Perhitungan CKPN

Penggunaan metode statistik dalam perhitungan CKPN sebagaimana dijelaskan pada butir sebelumnya hanya diperuntukkan pada perhitungan CKPN Kolektif. Metode statistik yang digunakan oleh Bank adalah:

1. *Probability of Default*, yakni tingkat kemungkinan kegagalan nasabah memenuhi kewajiban, yang diukur menggunakan metode *Migration* untuk segmen Wholesale dan SME, sedangkan untuk segmen Consumer menggunakan metode *Net Flow Rate*.
2. *Loss Given Default*, yaitu tingkat kerugian yang diakibatkan oleh kegagalan nasabah memenuhi kewajibannya. Perhitungan dilakukan menggunakan metode *Collateral Short Fall*.

## Pengungkapan Mitigasi Risiko Kredit dengan Menggunakan Pendekatan Standar

Mengacu pada POJK terkait perhitungan ATMR untuk risiko kredit yang disebutkan sebelumnya, Bank juga mengakui keberadaan agunan, garansi, penjaminan atau asuransi kredit sebagai teknik mitigasi risiko kredit (MRK). Bank menggunakan Teknik MRK-Agunan dengan pendekatan sederhana untuk sebagian besar portofolionya, di mana jenis agunan keuangan yang diakui dalam Teknik MRK-Agunan mengacu kepada ketentuan yang berlaku.

## Definition of Accounts Due and Impaired Bills

The Bank defines the maturity of its receivables as stipulated in SEOJK No. 34/SEOJK.03/2015 concerning Calculation of Risk-Weighted Assets for Credit Risk Using the Standard Approach for Islamic Commercial Banks as amended by SEOJK No. 13/SEOJK.03/2018 concerning Amendments to SEOJK No. 34/SEOJK.03/2015 concerning Calculation of Risk-Weighted Assets for Credit Risk Using the Standard Approach for Islamic Commercial Banks, as those which have matured more than 90 (ninety) days old, both for principal payments and/or profit-sharing payments or margin or *ujrah*.

## Approach to Establishment of Allowance of Impairment Losses (CKPN) for Individual and Collective Allowance

Calculation of CKPN performed by the Bank is only for exposures under murabahah contracts, in accordance with the adoption of PSAK 50/55 (Revised 2006) while PSAK Syariah does not govern in details. Calculation of CKPN is made in 2 (two) approaches, namely:

1. Individual CKPN is calculated based on the amount of expected future cash flows, less the carrying amount.
2. Collective CKPN is calculated by considering the Probability of Default and Loss Given Default using historical data for the last 3 (three) years.

## Statistical Methods in Calculation of CKPN

The adoption of statistical methods in calculating CKPN as described above is only for the calculation of Collective CKPN. The statistical methods used by the Bank are:

1. Probability of Default, which is the level of probability of a customer's default to meet liabilities, which is measured using the Migration method for the Wholesale and SME segments, while for the Consumer segment using the Net Flow Rate method.
2. Loss Given Default, namely the level of losses due to the failure of the customer to meet liabilities. Calculations are made using the Collateral Short Fall method.

## Credit Risk Mitigation Disclosure Using Standard Approach

Referring to POJK regarding the calculation of RWA for credit risk mentioned above, the Bank also recognizes collateral, guarantees, or credit insurance as a credit risk mitigation technique (MRK). The Bank adopts the MRK-Collateral Method with a simple approach for most of its portfolios, whereby the type of financial collateral recognized in the MRK-Collateral Method refers to the prevailing regulations.

Meskipun tidak diikutsertakan dalam perhitungan MRK, Bank juga menerima jenis agunan lainnya seperti tanah dan bangunan, kendaraan bermotor, mesin dan agunan/ jaminan lainnya yang telah diatur dalam kebijakan Bank. Dalam ketentuan internal, juga diatur mengenai kecukupan agunan yang harus dipenuhi oleh nasabah, pihak yang melaksanakan penilaian dan pemeriksaan agunan, aturan dan prosedur penilaian baik internal maupun eksternal, serta frekuensi penilaian berdasarkan jenis agunan.

Penjelasan mengenai sekuritisasi aset dijelaskan lebih lanjut pada tabel eksposur risiko.

## **Risiko Pasar**

### **Pengungkapan Eksposur dan Penerapan Manajemen Risiko Pasar**

Risiko pasar adalah risiko pada posisi neraca dan rekening administratif akibat perubahan harga pasar, antara lain risiko berupa perubahan nilai dari aset yang dapat diperdagangkan atau disewakan.

Sebagai bank devisa, BMI memiliki portofolio valuta asing di mana nilai dari aset dan kewajiban tersebut selalu terkait dengan perubahan nilai tukar valuta asing terhadap rupiah. Selain itu, Bank juga menghadapi risiko pasar terkait dengan portofolio surat-surat berharga jenis *trading* yang dimiliki. Dampak terhadap kegiatan usaha Bank akibat perubahan nilai tukar valuta asing terhadap rupiah dan perubahan harga surat-surat berharga akibat adanya perubahan imbal hasil di pasar dapat mempengaruhi ruang gerak ekspansi bisnis melalui perhitungan permodalan perusahaan.

### **Organisasi Manajemen Risiko Pasar**

Organisasi manajemen risiko pasar untuk memastikan bahwa Dewan Pengawas Syariah, Dewan Komisaris dan Direksi beserta komite di bawahnya melaksanakan fungsinya dengan baik. Termasuk dalam organisasi manajemen risiko adalah dibentuknya unit kerja terkait dengan risiko pasar yang terdiri dari tiga lini pertahanan manajemen risiko dengan fungsinya masing-masing.

Untuk meminimalkan risiko pasar sesuai dengan prinsip kehati-hatian perbankan, Bank telah memiliki organisasi manajemen risiko pasar yang mencakup:

Although not included in the calculation of the MRK, the Bank also accepts other types of collateral such as land and buildings, motor vehicles, machinery and other collateral/ guarantees as stipulated in the Bank's policy. Based on the internal regulations, it also regulates the adequacy of collateral that must be met by customers, the parties who perform the assessment and inspection of collateral, internal and external valuation policies and procedures, as well as the frequency of assessment based on the type of collateral.

### **Asset Securitization Disclosure**

The explanation of asset securitization is explained further on risk exposure table

## **Market Risk**

### **Disclosure of Market Risk Exposure and Implementation of Market Risk Management**

Market risk is the risk in the balance sheet and off-balance sheet positions due to changes in market prices including the risk in the form of changes in assets value that can be traded or leased.

As a foreign exchange bank, BMI has a foreign exchange portfolio where the value of these assets and liabilities is always linked to changes in the foreign exchange rate against the Rupiah. Moreover, the Bank also copes with market risk related to its trading portfolio of securities. The impact on the Bank's business activities due to changes in the foreign exchange rate against the Rupiah and changes in the price of securities due to changes in market yields may affect the scope for business expansion through the calculation of the Bank's capital.

### **Market Risk Management Organization**

Market risk management organization is to ensure that the Sharia Supervisory Board, Board of Commissioners and Directors and the committees under them carry out their functions properly. Included in the risk management organization is the establishment of a work unit related to market risk which consists of three risk management defense lines with their respective functions.

To minimize market risk in accordance with the prudential banking principle, the Bank has a market risk management organization that includes:

### Strategi Manajemen Risiko Pasar

Bank memiliki strategi manajemen risiko pasar sebagai berikut:

1. Menjaga tingkat PDN pada level 2% atau lebih rendah daripada yang ditetapkan regulator;
2. Memantau limit *dealer* untuk transaksi *foreign exchange*, *money market*, dan *fixed income*, baik terhadap limit utilisasi maupun kerugian;
3. Memantau rasio PLN Bank agar tidak melanggar ketentuan regulator;
4. Melakukan perbaikan *end to end treasury process* dengan memastikan fungsi *middle office* dan kaidah *four-eyes principles*, termasuk di dalamnya melakukan perbaikan dan pengembang sistem *treasury*;
5. Melakukan *stress test* risiko pasar secara berkala;
6. Menentukan besaran *risk factor* untuk transaksi valuta asing.

### Pengelolaan Portofolio Trading Book dan Banking Book serta Metodologi Evaluasi

Risiko pasar pada *trading book* adalah risiko yang muncul dari potensi kerugian pada aktivitas *trading*, sebagai akibat dari adanya perubahan pada faktor pasar yaitu *benchmark* tingkat *margin*/bagi hasil pasar dan nilai tukar. Pengelolaan risiko pasar Bank dilakukan dengan menerapkan prinsip *segregation of duties* yaitu memisahkan fungsi dan tanggung

### Strategy of Market Risk Management

The Bank has a market risk management strategy as follows:

1. Maintain the NOP level at 2% or lower than that is set by the regulator;
2. Monitor dealer limits for foreign exchange, money market, and fixed income transactions, both on utilization and loss limits;
3. Monitor the Bank's PLN ratio so as not to violate the provisions of the regulator;
4. Improve the end-to-end treasury process by ensuring the middle office function and the four-eyes principles, including making improvements and developing the treasury system;
5. Periodically conduct market risk stress tests;
6. Determine the amount of risk factor for foreign exchange transactions.

### Trading Book and Banking Book Portfolio Management and Evaluation Methodology

Market risk in the trading book is the risk that arises from potential losses in trading activities, as a result of changes in market factors, namely the benchmark level of market margin/profit sharing and exchange rates. The Bank's market risk management is carried out by applying the principle of *segregation of duties*, namely separating functions and

jawab secara independen atas transaksi treasury, yang terdiri dari:

1. *Front office*: unit treasury sebagai unit pelaksana transaksi treasury dan investasi.
2. *Middle office*: unit SKMR sebagai unit yang melakukan pemantauan, menilai serta menginformasikan risiko yang timbul dari kegiatan *trading* yang dilakukan oleh unit *front office*.
3. *Back office*: unit operasional treasury sebagai unit yang melakukan pencatatan dan valuasi terhadap seluruh eksposur pada aktivitas *trading* secara harian dengan menggunakan harga pasar dari sumber yang independen.

Risiko pasar pada *banking book* juga muncul akibat adanya perubahan atas nilai tukar yang selanjutnya akan mempengaruhi profitabilitas Bank. Pengelolaan risiko pasar *banking book* Bank dilakukan dengan mengoptimalkan struktur neraca agar mendapatkan imbal hasil yang maksimal dengan tingkat risiko yang dapat diterima.

Dalam menghitung ATMR untuk Risiko Pasar, Bank mengacu pada POJK No. 21/POJK.03/2014 tentang Kewajiban Penyediaan Modal Minimum Bank Umum Syariah dan SEOJK No. 35/SEOJK.03/2015 tentang Perhitungan Aset Tertimbang Menurut Risiko untuk Risiko Pasar dengan menggunakan Metode Standar bagi Bank Umum Syariah. Risiko pasar yang wajib diperhitungkan dalam beban modal untuk pendekatan standar adalah:

1. Posisi instrumen keuangan dalam *trading book* yang terekspos risiko *benchmark margin*/bagi hasil.
2. Posisi valuta asing dalam *trading book* dan *banking book* yang terekspos risiko nilai tukar.

Sedangkan untuk keperluan perhitungan modal minimum dengan menggunakan metode standar, Bank menghitung seluruh posisi instrumen keuangan dalam *trading book* yang terekspos pada *benchmark margin*/risiko bagi hasil, seperti pada portofolio efek, serta instrumen derivatif lainnya seperti *FX Forward* dan *FX Swap*. Untuk risiko nilai tukar, Bank menghitung seluruh posisi *on* dan *off balance sheet*, baik dalam portofolio *trading book* dan *banking book*.

Setiap harinya, SKMR melakukan pemantauan terhadap pelampauan limit transaksi *dealer*. Penetapan limit berfungsi untuk membatasi konsentrasi eksposur risiko pada suatu posisi, jenis risiko, tipe instrumen dan/atau pasar tertentu. Penetapan limit ini mengacu kepada *risk tolerance* Bank dengan mempertimbangkan target profit dan risiko dari aktivitas perdagangan.

responsibilities independently of treasury transactions, which consist of:

1. Front office: treasury unit as the executing unit for treasury and investment transactions.
2. Middle office: Risk Management Work unit (SKMR) as the unit that monitors, assesses and informs the risks arising from trading activities carried out by the front office unit.
3. Back office: treasury operational unit as the unit that records and evaluates all exposures to trading activities on a daily basis using market prices from independent sources.

Market risk in the banking book also arises due to changes in the exchange rate which in turn will affect the profitability of the Bank. The Bank's banking book market risk management is carried out by optimizing the balance sheet structure in order to obtain maximum returns with an acceptable level of risk.

In calculating RWA for Market Risk, the Bank refers to POJK No. 21/POJK.03/2014 concerning Minimum Capital Adequacy Requirements for Islamic Commercial Banks and SEOJK No. 35/SEOJK.03/2015 concerning Calculation of Risk-Weighted Assets for Market Risk using the Standard Method for Islamic Commercial Banks. The market risks that must be taken into account in the capital expense for the standard approach are:

1. The position of financial instruments in the trading book exposed to the risk of benchmark margin/profit sharing.
2. Foreign exchange positions in the trading book and banking book exposed to exchange rate risk.

Meanwhile, for the purposes of calculating minimum capital using the standard method, the Bank calculates all financial instrument positions in the trading book that are exposed to benchmark margin/profit sharing risk, such as in the securities portfolio, as well as other derivative instruments such as *FX Forward* and *FX Swap*. For exchange rate risk, the Bank calculates all on and off-balance sheet positions, both in the trading book and banking book portfolios.

SKMR monitors excess dealer transaction limit. Determination of limits serves to regulate the concentration of risk exposure in a particular position, type of risk, type of instrument and/or market. The determination of this limit refers to the Bank's risk tolerance by considering the profit and risk targets of trading activities.

## Risiko Likuiditas

### Pengungkapan Eksposur dan Penerapan Manajemen Risiko Likuiditas

Risiko likuiditas adalah risiko akibat ketidakmampuan bank untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat dilikuidasi segera dan/atau diagunkan tanpa mengganggu aktivitas keuangan bank.

### Organisasi Manajemen Risiko Likuiditas

Organisasi manajemen risiko likuiditas untuk memastikan bahwa Dewan Pengawas Syariah, Dewan Komisaris dan Direksi beserta komite di bawahnya melaksanakan fungsinya dengan baik. Termasuk dalam organisasi manajemen risiko adalah dibentuknya unit kerja terkait dengan likuiditas yang terdiri dari tiga lini pertahanan manajemen risiko dengan fungsinya masing-masing.

Untuk meminimalkan risiko likuiditas sesuai dengan prinsip kehati-hatian perbankan, Bank telah memiliki organisasi manajemen risiko likuiditas sebagai berikut:

## Liquidity Risk

### Exposure Disclosure and Implementation of Liquidity Risk Management

Liquidity risk is the risk due to the bank's inability to meet maturing obligations from cash flow funding sources and/or from high quality liquid assets that can be liquidated immediately and/or pledged without disrupting the bank's financial activities.

### Liquidity Risk Management Organization

Liquidity risk management organization is to ensure that the Sharia Supervisory Board, Board of Commissioners and Directors and the committees under them carry out their functions properly. Included in the risk management organization is the establishment of a liquidity working unit which consists of three risk management defense lines with their respective functions.

To minimize liquidity risk in accordance with the prudential banking principle, the Bank has had liquidity risk management organization as follows:

| Organisasi<br>Organization                                                                                                                                                                                                                                                                                      | Tanggung Jawab                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Responsibilities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

### Strategi Manajemen Risiko Likuiditas

Pada tahun 2021, Bank telah melakukan strategi manajemen risiko likuiditas, di antaranya dengan:

1. Menjaga likuiditas Bank tetap sehat yang dipantau secara harian.
2. Menetapkan strategi peningkatan likuiditas dengan tetap menyesuaikan pada fokus strategi bisnis Bank tahun 2021, yaitu dengan fokus pada pertumbuhan dana murah dan mengoptimalkan pendapatan berbasis jasa.
3. Memperkuat posisi pendanaan Bank melalui pemenuhan kebutuhan nasabah melakukan transaksi yang diharapkan dapat meningkatkan loyalitas nasabah dalam menggunakan layanan Bank.

### Teknik Mitigasi Risiko Likuiditas termasuk Indikator Peringatan Dini Permasalahan

Setiap harinya, Bank melakukan pemantauan atas risiko likuiditas melalui pelaporan atas pencapaian rasio-rasio likuiditas yang terangkum dalam *Liquidity Key Risk Indicator* (LKRI). Indikator-indikator yang masuk dalam laporan tersebut ialah parameter likuiditas yang menggambarkan fungsinya masing-masing, baik sebagai penyangga likuiditas, tingkat konsentrasi, ketergantungan pendanaan dan tingkat ekspansi bisnis Bank.

Penilaian atas kondisi likuiditas Bank diperoleh melalui hasil pemeringkatan secara komposit atas seluruh parameter, sehingga sebagai *output* penilaiannya akan diketahui tingkat risiko dari kondisi likuiditas Bank. Hasil penilaian atas kondisi likuiditas ini diinformasikan kepada Direksi secara harian sehingga ketika kondisi likuiditas terlihat menurun dapat diberikan arahan atas langkah-langkah pemulihan likuiditas yang harus dilakukan.

### Likuiditas dan Rencana Pendanaan Darurat

Dalam hal pemantauan dan pengelolaan risiko likuiditas saat kondisi krisis, BMI telah mempunyai kebijakan yaitu *Contingency Funding Plan* (CFP), yang pelaksanaannya direpresentasikan melalui pelaksanaan rapat *Liquidity Crisis Mitigation Team* (LCMT) yang lebih intensif.

Pelaksanaan rapat LCMT dijalankan dengan mempertimbangkan hasil pemantauan status kondisi likuiditas Bank yang tercantum pada laporan LKRI dengan kondisi tertentu. Rapat LCMT ini diharapkan dapat mempercepat proses pemulihan atas kondisi likuiditas Bank, terutama melalui perbaikan atas kinerja pendanaan dari sisi nasabah, maupun alternatif sumber pendanaan yang dapat diupayakan dari pasar uang.

### Liquidity Risk Management Strategy

In 2021, the Bank has implemented a liquidity risk management strategy, including:

1. Keeping sound Bank's liquidity which is monitored on a daily basis;
2. Establish a strategy to increase liquidity while still adjusting to the focus of the Bank's business strategy in 2021, namely the growth of low-cost funds and optimizing service-based income;
3. Strengthening the Bank's funding position through meeting the needs of customers conducting transactions which are expected to increase customer loyalty in using the Bank's services.

### Liquidity Risk Mitigation Techniques including Early Warning Problem Indicators

The Bank monitors daily liquidity risk through reporting of liquidity ratios which are summarized in the Liquidity Key Risk Indicator (LKRI). The indicators included in the report are liquidity parameters that describe their respective functions, both as a liquidity buffer, concentration level, funding dependence and the Bank's level of business expansion.

The assessment of the Bank's liquidity condition is obtained through a composite rating of all parameters, so that the output of the assessment will determine the level of risk from the Bank's liquidity condition. The assessment result of liquidity conditions are informed to the Board of Directors on a daily basis so that when liquidity conditions appear to be declining, they can be given direction on liquidity recovery steps that must be taken.

### Liquidity and Contingency Funding Plan

In terms of monitoring and managing liquidity risk during crisis conditions, BMI has Contingency Funding Plan (CFP) policy, whose implementation is represented through more intensive Liquidity Crisis Mitigation Team (LCMT) meetings.

The implementation of the LCMT meeting is carried out by taking into account the results of monitoring the status of the Bank's liquidity conditions listed in the Liquidity Key Risk Indicator (LKRI) report under certain conditions. The LCMT meeting is expected to accelerate the recovery process of the Bank's liquidity conditions, especially through improvements in funding performance on the customer side, as well as alternative sources of funding that can be sought from the money market.

## Mekanisme Pengukuran dan Stress Test serta Pengendalian Risiko Likuiditas

*Stress test* likuiditas dilakukan oleh Bank sebagai salah satu metode manajemen risiko untuk mengevaluasi ketahanan modal, likuiditas dan kemampuan Bank dalam menyerap kerugian pada suatu kejadian krisis yang *exceptional but plausible*, serta mengidentifikasi langkah-langkah yang harus dilakukan untuk memitigasi risiko dan menjaga modal.

Ruang lingkup pelaksanaan *stress test* likuiditas mencakup *regular issue* dan juga *forward looking scenario* yang mengacu pada kondisi terkini seperti kondisi pasar dan lingkungan bisnis serta pandemi COVID-19 dan dampaknya terhadap bisnis Bank.

Dalam perhitungan *stress test* likuiditas, Bank mengidentifikasi potensi tekanan yang mungkin terjadi untuk menilai kecukupan likuiditas dan cadangan aktiva likuid yang dimiliki dalam menyerap tekanan yang timbul serta langkah pencegahan dan penanggulangan yang tercantum dalam CFP.

## Risiko Operasional

### Pengungkapan Eksposur dan Penerapan Manajemen Risiko Operasional

Risiko operasional didefinisikan sebagai kerugian akibat ketidakcukupan dan atau tidak berfungsinya proses internal, kesalahan manusia, kegagalan sistem atau isu eksternal yang dapat mempengaruhi operasional Bank. Kerugian dari dampak risiko operasional dapat mempengaruhi kinerja keuangan dan mengganggu pencapaian visi dan misi bank.

Lemahnya pengendalian risiko operasional dapat menyebabkan dampak terhadap kegiatan usaha Bank yaitu meningkatnya biaya operasional dan pada akhirnya mengurangi laba usaha serta modal Bank. Selain itu, secara umum kelemahan ini akan mengakibatkan kelancaran operasional dan mutu pelayanan menjadi terganggu dan menurunkan kinerja dan daya saing BMI.

### Organisasi Manajemen Risiko Operasional

Organisasi manajemen risiko operasional yang memastikan bahwa Dewan Pengawas Syariah, Dewan Komisaris dan Direksi serta komite di bawahnya melaksanakan fungsinya dengan baik. Termasuk dalam organisasi manajemen risiko adalah dibentuknya unit kerja terkait dengan operasional yang terdiri dari 3 (tiga) lini pertahanan manajemen risiko dengan fungsinya masing-masing, sebagai berikut:

## Measurement and Stress Test Mechanism and Liquidity Risk Control

A liquidity stress test is carried out by the Bank as one of the risk management methods to evaluate the resilience of capital, liquidity and the Bank's ability to absorb losses in an exceptional but plausible crisis event, as well as to identify steps that must be taken to mitigate risk and to maintain capital level.

The scope of the liquidity stress test implementation includes regular issues as well as forward looking scenarios that refer to current conditions such as market conditions and business environment as well as the COVID-19 pandemic and its impact on the Bank's business.

In calculating the liquidity stress test, the Bank identifies potential pressures that may occur to assess the adequacy of liquidity and reserves of liquid assets of the Bank in absorbing the pressures that arise as well as preventive and countermeasures steps listed in the CFP.

## Operational Risk

### Exposure Disclosure and Implementation of Operational Risk Management

Operational risk is defined as loss due to inadequate and/or malfunctioning internal processes, human error, system failure or external issues that may affect the Bank's operations. Losses from the impact of operational risk can affect financial performance and interfere with the achievement of the bank's vision and mission.

Weak operational risk control can have an impact on the Bank's business activities such as increasing operational costs and ultimately reducing the operating profit and capital of the Bank. In addition, this weakness in general will result in disruption of otherwise smooth operation and quality of services and reduce the performance and competitiveness of BMI.

### Operational Risk Management Organization

An operational risk management organization ensures that the Sharia Supervisory Board, the Board of Commissioners and the Board of Directors as well as the committees under them carry out their functions properly. Included in the risk management organization is the establishment of a work unit related to operations consisting of 3 (three) risk management defense lines with their respective functions, as follows:

### Strategi Manajemen Risiko Imbal Hasil

Bank melakukan strategi dalam pengelolaan manajemen risiko imbal hasil yang dilakukan dengan:

1. Mengontrol *cost of funds* dan *Net Profit Margin* dengan melakukan evaluasi pada Hi-1000 untuk menentukan bagi hasil nasabah.
2. Menetapkan *pricing* atas dana dan pembiayaan pada level tertentu sebagaimana dibahas dalam rapat ALCO.
3. Melakukan inisiasi reformulasi perhitungan nisbah untuk menghasilkan keuntungan yang layak bagi Bank dan nasabah.

### Mekanisme Pemantauan dan Pengendalian Risiko Imbal Hasil

Dalam hal pencapaian imbal hasil, Bank memiliki target yang telah dirumuskan dan tertuang dalam rencana bisnis Bank. Rencana bisnis Bank terkait dengan imbal hasil ini menjadi acuan utama bagi Bank dalam mengevaluasi pencapaiannya secara berkala. Hasil dari evaluasi pencapaian imbal hasil biasanya akan disampaikan dalam ALCO, atau dapat juga ditindaklanjuti melalui rapat *ad hoc* antar unit kerja ALMA dan unit bisnis.

### Risiko Investasi

#### Pengungkapan Eksposur dan Penerapan Manajemen Risiko Investasi

Risiko investasi adalah risiko akibat Bank ikut menanggung kerugian usaha nasabah yang dibiayai dalam pembiayaan bagi hasil. Risiko ini timbul apabila Bank memberikan pembiayaan berbasis bagi hasil kepada nasabah di mana Bank ikut menanggung risiko atas kerugian usaha nasabah yang dibiayai. Dampak terhadap kegiatan usaha Bank apabila usaha nasabah mengalami kebangkrutan, maka jumlah pokok pembiayaan yang diberikan Bank kepada nasabah tidak akan diperoleh kembali.

#### Organisasi Manajemen Risiko Investasi

Untuk meminimalkan risiko investasi sesuai dengan prinsip kehati-hatian perbankan, Bank telah memiliki organisasi manajemen risiko investasi yang mencakup:

### Rate of Return Risk Management Strategy

The Bank has a return risk management strategy, which includes:

1. Controlling the cost of funds and Net Profit Margin by evaluating Hi-1000 to determine customer profit sharing.
2. Determining the pricing for funds and financing at a certain level as discussed in ALCO meetings.
3. Initiating the reformulation of the ratio calculation to generate profits for the Bank and its customers.

### Rate of Return Risk Monitoring and Control Mechanism

In terms of achieving returns, the Bank has established targets that are outlined in the Bank's business plan, which serve as the Bank's main reference point when evaluating its achievements. The results of the evaluations of such returns are usually be submitted to ALCO, or can be followed up through *ad hoc* meetings between the ALMA unit and the business units.

### Investment Risk

#### Exposure Disclosure and Implementation of Investment Risk Management

Investment risk is associated with the risk of the Bank bearing a portion of a customer's business losses that are financed under a profit-sharing scheme. Such risk arises when the Bank provides profit-sharing-based financing to a customer where the Bank also bears the risk of loss from the financed customer's business. Should the customer's business go bankrupt, the impact on the Bank's business activities includes the non-recoverable principal amount of financing provided by the Bank to the customer.

#### Investment Risk Management Organization

To minimize investment risk, the Bank has an investment risk management organization that includes:

Bank Muamalat menyadari bahwa penerapan prinsip tata kelola perusahaan yang baik atau *Good Corporate Governance* (GCG) menjadi salah satu faktor fundamental yang sangat penting dalam pengelolaan perusahaan. Penerapan GCG akan memberikan dukungan Bank untuk tumbuh secara berkesinambungan.

Bahkan saat ini, para investor melihat GCG sebagai salah satu indikator penting untuk menilai sebuah entitas, terutama terkait prospek kinerja berkelanjutan di masa mendatang. Hal itu didasari atas keyakinan bahwa GCG adalah prinsip yang mendasari proses dan mekanisme pengelolaan perusahaan berlandaskan kepatuhan terhadap peraturan perundang-undangan serta cerminan dunia usaha yang beretika.

Karena itulah, Bank Muamalat menjadikan penerapan GCG sebagai suatu kebutuhan dalam pengelolaan kegiatan usaha Bank, bukan lagi sekadar kewajiban akibat adanya peraturan yang harus dipatuhi.

Bank Muamalat realizes that the application of good corporate governance (GCG) principles is one of the most important fundamental factors in the management of a company. The implementation of GCG will support the Bank to grow in a sustainable manner.

Even today, investors consider GCG as one of the important indicators to assess an entity, particularly in regards to prospects for sustainable performance in the future. This is based on the belief that GCG is the principle that determines the process and mechanism of managing a company based on compliance with laws and regulations as well as a reflection of an ethical business.

For this reason, Bank Muamalat makes the implementation of GCG a necessity in managing the Bank's business activities, no longer merely an obligation due to regulations that must be complied with.

## KEBIJAKAN PENERAPAN GOOD CORPORATE GOVERNANCE

Seluruh insan Bank Muamalat, tanpa terkecuali, dituntut untuk menyadari risiko yang mungkin muncul dalam setiap pekerjaan. Karena itu, penerapan prinsip-prinsip GCG merupakan landasan berpikir dan bertindak saat melaksanakan tugas dan tanggung jawabnya. Keberhasilan internalisasi prinsip GCG dalam setiap kebijakan akan menjadikan pengelolaan Bank dilakukan secara terbuka, jelas, dapat dipertanggungjawabkan, adil serta independen.

Prinsip-prinsip tersebut melekat pada setiap jajaran organisasi. Sebagai acuan bagi Insan Bank Muamalat, Anggaran Dasar Perusahaan berperan sebagai pijakan dasar dalam penerapan prinsip-prinsip GCG, yang telah disusun dari berbagai acuan Undang-undang dan peraturan regulator yang sesuai dengan kegiatan usaha Bank.

BMI memiliki *Governance Framework* dalam penerapan GCG, yaitu:

### 1. Komitmen Tata Kelola

Tahapan awal dalam penerapan GCG yakni membangun komitmen dari seluruh jajaran Bank untuk menjadi bagian dalam implementasi tata kelola perusahaan. Bentuk implementasi komitmen dimulai dengan membangun landasan yang menjadi dasar pelaksanaan komitmen implementasi seperti Anggaran Dasar Perusahaan, Visi dan Misi Perusahaan, dan *Code of Conduct*.

### 2. Struktur Tata Kelola

Bank melengkapi dan menempatkan sumber daya yang tepat pada struktur perusahaan dan menyempurnakan berbagai infrastruktur pendukung untuk memastikan *governance process* dapat berjalan seperti seharusnya.

### 3. Mekanisme Tata Kelola

Prinsip-prinsip GCG dibuat melekat dalam kebijakan, pedoman, prosedur kerja, dan aturan internal lainnya guna memastikan prinsip-prinsip tersebut terlaksana dan dapat memenuhi *governance process*.

## GOOD CORPORATE GOVERNANCE IMPLEMENTATION POLICY

All personnel of Bank Muamalat, without exception, are required to be aware of the risks that may arise in every job. To that end, the application of GCG principles is the basis for thinking and acting in carrying out their duties and responsibilities. The success of internalizing GCG principles in each policy will make the management of the Bank can be carried out in a transparent, clear, accountable, fair, and independent manner.

These principles are inherent in every level of the organization. As a reference for Bank Muamalat Personnel, the Company's Articles of Association serves as the basis for the implementation of GCG principles, which have been compiled from various references to laws and regulatory regulations that are in accordance with the Bank's business activities.

BMI has established a Governance Framework in GCG implementation, namely:

### 1. Governance Commitment

The initial stage of GCG implementation is building the commitment of the Bank's management to be part of the implementation of corporate governance. The commitment is formed by having a solid foundation as a basis of implementing the commitment such as the Company's Articles of Association, Vision & Mission, and Code of Conduct.

### 2. Governance Structure

The Bank completes and places the right resources in the Company's structure as well as improving several supporting infrastructures to ensure that the governance process runs as it is supposed to be.

### 3. Governance Mechanism

The Governance Principles are arranged to be inherent in policies, guidelines, work procedures, and other internal rules to ensure that the governance principles are administered in compliance with the governance process.

#### 4. Sosialisasi dan Evaluasi

Untuk memastikan jajaran perusahaan dapat mengimplementasikan prinsip-prinsip tata kelola yang telah diinternalisasi dalam sistem perusahaan maka tahapan berikutnya ialah melakukan sosialisasi kepada seluruh jajaran perusahaan. Dengan dilaksanakannya sosialisasi tersebut, diharapkan seluruh jajaran perusahaan memahami dan dapat mengimplementasikan GCG di tiap pelaksanaan tugas dan tanggung jawabnya. Evaluasi dilaksanakan untuk memantau sampai sejauh mana implementasi telah dilaksanakan dan guna memperbaiki kekurangan untuk perbaikan di masa yang akan datang.

#### 4. Socialization and Evaluation

To ensure that all levels of the Company are able to implement the governance principles that have been internalised within the Company's system, the next step is then to disseminate information to the Company's management. Through socialisation, all levels are expected to be able to properly comprehend and implement governance in carrying out their duties and responsibilities. Evaluations are conducted to monitor how far the implementation has been performed and to improve matters that are still insufficients for future improvement.
